The practical working of the eight-hour law, in its application to minors, is creating considerable dissatisfaction in this city. Apprentices who are willing and anxious to work more than eight hours per day, have been in some instances discharged, because, by keeping them at work the employers would, according to their construction of the law, be liable to fine and imprisonment. If this is the true interpretation

of the law, the dissatisfaction is well founded, and injustice is done to those minors who wish to learn trades, and to their parents. To protect apprentices by law against over-work and the employers who may exact it, is wise and just, but a law that an apprentice may not voluntarily and with the consent of his parents, work more than eight hours per day, is absurd. The President of the Mechanics' State Council, has written a letter, in which he gives to the law a very different, and as it seems to us, a true meaning. He understands the law to provide simply that minors shall not be *forced* to work more than eight hours. If this interpretation prevail, this ground of objection to the law is removed.

RELIGIOUS INTELLIGENCE.

PACIFIC COAST.

THE Presbytery of Benicia will hold its next semi-annual meeting in the Presbyterian church of Healdsburg on Friday, the 8th of May, at 7½ o'clock, P.M. The services to commence with a sermon by the retiring Moderator, Rev. James Wylie.

A. FAIRBAIRN, Stated Clerk.

—

Young Men's Christian Association Building.

A large number of gentlemen and ladies were assembled on Saturday last to witness the ceremony of laying the corner-stone of the building intended for the use of the Young Men's Christian Association, which is being erected on Sutter Street, between Montgomery and Kearny. A. L. Chamberlain, Chairman of the Building Committee, called the meeting to order, and called on George Barstow, President of the Association, to preside, and to make the opening address. Want of space prevents us from publishing in full the eloquent address of Mr. Barstow, but from it we gather the following information concerning the building. It will be of brick, two stories and attic in height, with deep basement; will have a front of fifty-four feet on Sutter Street by a depth of 121 feet, and will undoubtedly be an ornament to our city. It will contain a free library and reading-room, together with extensive apartments for social gatherings and innocent recreation. The cost will be $54,000. There will be a debt of $45,000, of which $16,000 are yet to be provided for. The value of the whole property will be $90,000.

After prayer by Rev. Dr. Scudder, Rev. Mr. Lathrop, of the Church of the Advent, was called upon to lay the corner-stone, which he did after placing in it a copper box containing reports of the Association, copies of the various city papers, etc.

After the singing of a hymn, Rev. Dr. Stone was called upon and delivered a brief but eloquent and appropriate oration.

A poem written for the occasion by Miss H. Satterlee, was read by Mr. Piercy. The Doxology was then sung by the choir, and the interesting and impressive ceremony was closed by the benediction pronounced by Rev. Dr. J. B. Thomas, of the First Baptist Church.

—

WE are surprised by the information that reaches us through the Eastern papers, to the effect that Rev. Dr. Eells of the First Church in this city, has decided that he cannot be useful on the Pacific Coast, and will soon return to his former associations. No intimation of this kind has been expressed on this side of the continent, and as we may be presumed to know, we will say that Dr. Eells expects to remain in his present position for a time, if his people are willing, and try to find a field in which to be useful in this wonderful region, which he has not been here long enough really to survey. The truth is not always learned from letter-writers, who are able to manufacture items, if they cannot gather them.

—

WE are pained to learn that the venerable Chancellor Ferris, of New York University, has been very ill, and fears were entertained that he would not recover. Later intelligence gives hope, however, that he will be slowly restored again to perfect health. There are few men living for whom more persons would sincerely mourn, were he to be taken away, than for Dr. Ferris, and the prayer of not a few on these distant shores is that he may hold his place of honor for years to come.

—

THE last mail from the East brings the sad news that two of the ablest jurists and most useful Christian men of our country have recently died. They are Daniel W. Lord, of New York City, and Henry Welles, one of the Justices of the Supreme Court of the State of New York. Both passed the bound of three score years and ten, but they were eminently useful in their advanced age, and as officers in the Presbyterian Church they were honored as among the most wise and prudent.

—

SANTA FE.—The Rev. D. F. McFarland appeals from the capital of New Mexico for funds to erect a church edifice and enlarge school accommodations. He says: A deep sense of duty compels to this course. "One year ago last November, a church was organized of twelve members, a Sabbath-school of eight scholars and three teachers, and a day school of twelve pupils. The church now numbers twenty-one, the Sabbath-school has thirty in attendance, with six teachers, and the day school thirty-four pupils. It will cost about $4,000 to build a respectable house of worship. The leading Americans in Santa Fe have pledged themselves to raise $1,500, if such a building will be erected early in the coming Spring. The amount may be increased to $2,000 if suitable encouragement is given."

—

RELIGIOUS SOCIETIES, who are in debt, are in many places about to celebrate the coming May Day with festivals and evening fairs, using the proceeds to liquidate their liabilities.

—

THE Unitarian Society recently organized at Sacramento have chosen Rev. W. H. Brown pastor, and hold religious services in the Senate Chamber.

EASTERN.

THE NEW PRESBYTERIAN CHURCH IN HARTFORD.—About eighteen months ago, Mr. Warburton, a member of the Centre Congregational Church of Hartford, Ct., unsolicited, pledged $5,000 to the Presbyterian church in that place, if the society would undertake the building of a new house of worship. The church is now entirely free from debt. The society numbers 143 communicants — ten having been added to the church at the last communion; 150 children attend the Sunday School. The congregation has been steadily increasing for the past two years, and the speedy erection of the church edifice is now imperatively called for.

COLORED STUDENTS ADMITTED.—The Board of Trustees of the Wesleyan University at Delaware, Ohio, have decided that there is nothing in the charter or laws of the University against the admission of colored persons; Rev. Robert Grattan, of unmixed African descent, has been admitted into the senior preparatory class.

REV. DR. N. L. RICE, formerly of New York City, is now in St, Louis. He has rapidly regained his health since going to the West, and is just now assisting his successor, Rev. Mr. Niccolls of the Second Church, in revival labors. He preached the communion discourse on the 1st ult., when about fifty were received on profession of their faith. Another account, however, says "Dr. Rice's strength has so far failed that his working days may be regarded as well nigh over; but his name will ever be precious to the Church."

YALE THEOLOGICAL SEMINARY.—The authorities of Yale College have determined upon the erection of a building for the Theological Department of that institution, on the corner of College and Elm streets; and Hon. Wm. E. Dodge of New York, whose noble-hearted liberality to every good cause is so well known, has given $10,000 towards its erection. He has also given permission to have all the stone required for the building taken from his quarry at Ansonia.

THE New York *Evangelist* says, that the good people of the First Church of Brooklyn, late Dr. Robinson's charge, have been following the example recently set by the Classon Avenue Church, and at a large meeting held last month, moderated by their late pastor, they had the good sense (and likewise the presumption) to vote an unanimous call to the pastor of the Mercer Street Presbyterian Church of that city to come over and serve them in the Gospel.

RELIGIOUS STATISTICS OF ILLINOIS.—The church membership of the different denominations in this State is given as follows: Methodists, 80,000; Baptists, 52,000; Presbyterians (of every name) 30,000; Congregationalists, 16,000; Episcopalians, 5,000; Universalists, 5,000; Unitarians, 3,000; Campbellites, 10,000; Lutherans, 6,000. There are various other lesser sects, in all probability numbering 25,000.

IT is estimated that 120,000 Jews live in New York and Brooklyn. They support 39 synagogues. Those of German origin are the most numerous; but there are also Dutch, Polish, Portuguese and French Jews. The latter have but one synagogue. It is highly creditable to this part of our population that till 1850 no Jew was ever convicted or tried, in this State, for a capital offence.

ORDINATION OF A WOMAN.—The first instance in the history of the religious denominations of Massachusetts of the ordination of a woman to the work of the ministry occurred on the 19th ult., at Hingham, when Mrs. Phebe A. Hanaford was publicly set over the Universalist church in that place.

REV. JOSEPH H. ROBINSON, pastor of the Presbyterian church at Cornwall, N. Y., died at that place on the 4th inst., in the 33d year of his age. He was a brother of Rev. Charles S. Robinson, D.D., who has just resigned the charge of the First Presbyterian Church, Brooklyn.

DURING the past winter the German Branch of the Young Men's Christian Association in New York has fed from 400 to 600 persons daily at their rooms, No. 69 Ludlow Street. The members have raised the necessary funds, and have given relief without reference to nationality.

REV. J. L. MCNAIR is greatly encouraged in his work as pastor of the Old North Reformed Church on Fulton Street, New York City. The congregation, Sabbath School, and all other parts of the general interest are increasing in numbers and activity.

REV. WM. H. A. BISSELL, D.D., rector of Trinity Church, Geneva, N. Y., a native of Vermont, and an Alumnus of the University of Vermont, was elected Bishop of the Diocese of Vermont, by the Diocesan Convention at Burlington, on the 11th ult.

THE N. Y. *Observer* states that there have been 570 revivals reported in its columns since 1868 began, and that in these revivals 9,000 persons have been hopefully converted, or a little more than an average of fifteen persons at each revival.

REV. DR. PADDOCK, of Detroit, declines to accept the appointment of Missionary Bishop of Oregon, tendered to him by the House of Bishops.

On the first of March, eighty-five persons were added to the Cohocksink Presbyterian Church, Philadelphia, of which Rev. Mr. Muchmore is pastor. Of this number, seventy-seven were additions on profession of faith.

The North Broad Street Presbyterian Church, of Philadelphia, have extended a unanimous call to the Rev. Peter Stryker, D.D., of the Thirty-fourth Street Church, of New York City.

We learn that Rev. Dr. Mattison, of the York Street Methodist Episcopal Church, Jersey City, has accepted the position of Secretary of the American and Foreign Christian Union.

Rev. M. H. Hutton, pastor of the Reformed Church, Mount Vernon, N. Y., has received and accepted a call to the pastorate of St. Peter's Presbyterian Church at Rochester.

Many of the Methodist families in Philadelphia have requested that, during the next session of Conference, no preachers be sent to them who use tobacco.

The Cumberland Presbyterian Church of St. Louis, on Sixteenth and Carr streets, reports about fifty hopeful conversions.

FOREIGN.

Madagascar.—This island has been one of the great centres of interest, in the field of the London Missionary Society. A few years ago it was the scene of the cruelest and most bloody persecutions to which the Christians of our day have been subjected. There still stands in Madagascar, near the capital, the fatal rock over which the Christians were cast. The change is indeed great. * * * * * * * Where Christian men and women fled to the rocks and caves to hide themselves, there are now thousands who glory in the one Name given under heaven whereby men can be saved. Within the capital city of that island there are now eight congregations with 12,400 hearers. These congregations have more than 200 communicants each, and the whole population of the capital is only 30,000. Within the villages of the country sixteen other churches have been founded; and a public treaty has been concluded between England and Madagascar, establishing religious liberty and full protection for Christian worship.

A Presbyterian Orphan Society.—In Belfast, Ireland, there is a Society whose object is to take care of the orphans of ministers and others connected with the Presbyterian Church. The second annual meeting of the Society was held on the 13th of February, and was largely attended. It appeared from the annual report that the total income of the Society for the year 1867 was over $20,000; the number of applicants for the benefits of the Society was 320 of which number 217 were accepted. Forty of those accepted had lost both parents, and the others had lost their fathers. There was a balance in the hands of the treasurer at the end of the year of over $12,000.

University for Women.—A bold movement for the establishment of a genuine University for Women, on the plan of Oxford, is begun in England. The design is to raise £30,000 for the erection of a collegiate building, which will be officered by women of experience, while the teaching will be conducted by instructors of both sexes. "It is hoped, that for about £80 per annum, including all expenses, young women who feel the desire or the necessity to pursue their studies as far and earnestly as young men do, may have the means placed within their reach.

English Church Rates.—Mr. Gladstone, the former Chancellor of the Exchequer, is making another attempt to settle this question. He has introduced a bill into Parliament doing away with the compulsory payment of these rates, except in cases where persons enter into a voluntary agreement to pay them. In such cases payment may be enforced in any court of law or equity. This would be an improvement on the present system, but we believe that the present tendency in England is to their entire abolition.

Oxford Bibles.

The superior excellence of the Bibles printed at the Oxford University Press is proverbial among all who prize correctness of the text, and clearness and beauty of typography and binding. The Oxford editions are the standard from which other editions are copied, and are therefore acknowledged as superior.

The Subscribers, who act as

SOLE AGENTS IN THE UNITED STATES

or these Bibles, keep all varieties and sizes, from the 48-mo. to the Folio. They select the following, which they strongly recommend.

THE SUNDAY SCHOOL BIBLE. Printed in clear type and well bound in arabesque - - - - - - - - 50 cents.

THE PEW BIBLE. Printed in large type and bound in morocco, $2 00; Turkey morocco, $3 00.

THE STUDENT'S BIBLE. Printed on fine paper, in beautiful type, with References and Maps, and an Index to the persons, places, and subjects occurring in the Scriptures. Turkey morocco, - - - - - - - - - - - $4 00

THE CLERGYMAN'S BIBLE. Printed in large, clear type, with References and Maps, and an Index to the persons, places, and incidents occurring in the Scriptures. Bound in Turkey morocco, - - - - - - - - - - - - $5 00

THE PULPIT BIBLE. Beautifully printed in very large, clear type, demy, 4to. Bound in Turkey morocco, - - $20 00

THE FAMILY BIBLE. Beautifully printed in large type, containing Family Record, with or without References, Plates, and Maps, in every style of binding, from $17 00 upwards.

THOS. NELSON & SONS,
137 Grand Street, New York.

THE PRESSURE OF THE PRESENT.

There is strange power in a present good which is seen sometimes in all classes, and in respect to all subjects. Offer a child his choice between one apple placed in his hand and twenty to be received to-morrow, and not one in fifty will give up the one that tempts his taste just now. Prove to a youth that the gratification which he may enjoy for a few days will diminish his life so that *years* of what might prove rational enjoyment will be taken from its *end*, and very rarely will he forego the immediate pleasure for the sake of the remote. Give the man of mature years the opportunity to add a thousand dollars to his fortune to-day, and at the same time a pledge of ten thousand in ten years if he will let the thousand pass from between his fingers, and not many will have the nerve to relax their hold and see the treasure before their vision pass away. And if the old man is offered alleviation of present sorrows, or relief from much greater sorrows which are certain to come upon him in a little time, with hardly an exception, he will seize with eagerness the good that is proffered *now*.

This is one great reason why so much evil is being wrought in the world. It is not generally because men prefer to do evil, but because there is some present tempting reward which they are not willing to surrender. One is engaged in some business which requires him to do violence to his convictions of justice, or to disregard some of the commands of God, yet which brings him *daily profits*. You may portray to him the ill effects of his course in the clearest light, you may arrange the benefits that would result from its abandonment, so that he will see them most distinctly for the moment, but those dollars dropped into his hand each day will rise before his vision and shut out of view the greater good that is further removed.

Here, too, is found a reason why the *spiritual* interests of men are so much neglected, and the positive commands of God that they repent of sin, and serve Him in their lives, are so steadily disregarded. This world rolls between the soul and the world to come, and its attractions, and claims, and interests eclipse whatever pertains to that other world, because they are ever *here*, and pressing themselves upon us; just as a mote upon the object-glass may hide a planet from the view of one who is looking through a telescope. Could eternity and time run parallel — could the future and the present be alike able to impress the spirit — could the body and the soul stand in their relative proportions at the same distance from the eye, there would be far less disposition to treat them so inequitably. When we reach the limit of time and eternity's verge, we have no difficulty of this kind, for there what has been neglected becomes near, and what has been sought fades into the distance. Then the great, the awful, the unknown future is felt to be *at hand*. The pottage is no longer preferred to the birthright. The momentary is no longer more important than the abiding. He is wise who tries to anticipate the judgment he will then form — who refuses to be cheated by what dances before his eyes — who takes within his vision eternity as well as time.

Use of Water as an Emblem of Purification.

I propose to trace, in a few articles, the ritual use of water in the different religions of the earth as a symbol of spiritual purification, until it reaches its perfect development in the Christian sacrament of baptism.

A consideration of the religious rites of mankind in all ages will develop two prominent ideas — expiation for sin, symbolized by blood; and purification of life, symbolized by water. These two ideas, walking hand-in-hand, travel the whole earth and pervade all time, having their allotted part in the service of every shrine and temple. The one dates from the time of Adam, when, in the acceptance of Abel's sacrifice, the principle was promulgated which has exercised a controlling power in all religious services since, that "Without the shedding of blood there is no remission." The other probably grew out of the fact, handed down in the traditions of all nations, that the world was once purified from all sin by the waters of the deluge. Purification by water, however, says a late writer, seems an emblem so naturally suited to that mental purity with which we ought to approach the Deity, that it scarcely requires the supposition of a Divine tradition to account for its being adopted as a religious ceremony among people unenlightened by revelation.

In the classics we find frequent reference to the lustrations common among the Greeks and Romans. Candidates for initiation into the Eleusinian mysteries washed their hands in holy water, and at the same time they were instructed to present themselves with minds pure and undefiled, without which the external cleanness of the body would not be accepted. Thorough washings, sometimes of the person, sometimes of the houses, and sometimes of the whole city, were a part of the regular and appointed lustrations of the Greeks and Romans, and were accompanied with dignified and impressive ceremonies. The religious rites of Eastern nations abound in purifications. To wash in the stream of the sacred Ganges is the height of Hindoo aspiration. The pollutions of a whole life are cleansed by its purifying flood, and those who sail upon its stream have their senses continually shocked by the sight of the floating dead bodies of the devotees who have cast themselves into the waters of the sacred river, that dying they may go to Paradise with every stain of guilt removed.* I am informed by a missionary lately returned from India, that near his residence in that country was a sacred pool of the Hindoos, to which the people at certain seasons resorted in great numbers. Rushing down towards the water as soon as they come in sight of it, and wading in up to their knees, the pilgrims throw the water over their bodies, dipping it up in their hands. This missionary also informs me that the Hindoo, when he returns from his day's work, first purifies himself in the water and then proceeds to wash his clothes and person; but the purifying act is always performed first.

The religious rites of the Mohammedans present a continued series of ablutions. At various times the voice of the muezzin is heard from the mosque calling the faithful to prayer, and these devotions are accompanied by frequent ablutions. So punctilious are the Mohammedans on this subject that the Arabs of the desert, where no water can be obtained, perform their prescribed ablutions with sand, rubbing it upon their bodies in place of water.

The Rev. Mr. Loomis, our missionary among the Chinese, informs me that the Budhist system also has its holy water and ablutions — a pillar hollowed at the top, in which holy water is contained, standing at the entrance of all their temples, and that when a Chinese convert from Budhism was about to join the mission church, he came to him previously to inquire what were the customary ablutions, considering it highly improper to enter this new rel tion without a thorough purification by water.

Just as the ancient Greeks and Romans were a customed to purify their houses and cities with tho ough lustrations — first with water, and afterwar with sacrifices — so the Chinese at the present da in our own city, at the close of each year, make thorough purgation of all that pertains to the washing off and cleansing away the filth of the yea so as to commence the new clean from all defil ment.

We have a sad illustration of the error of an u enlightened and superstitious faith, in the prostit tion of this custom in the case of Pilate, but still o extract vividly illustrates the power which the beli in the efficacy of water as a purifier had on t heathen when "Pilate took water and washed h hands before the multitude, saying, 'I am innoce of the blood of this just person. See ye to it.'"

We come next to consider the prevalence and u of this idea among the Hebrews. F. B.

* To such an extent do the Hindoos carry their ideas the efficacy of the Ganges, that even in bathing in anoth stream, if the devotee invokes the purifying power of the s cred waters, it will be accepted, and no matter how outrag ous a Hindoo's conduct may be — thief, adulterer, murder if his daily appointed ablutions are performed, his guilt the other respects is more than balanced by the merit of purifications.

ABSTRACT OF A SERMON,

BY THE REV. DR WADSWORTH, ON LAST SUNDA

"He that winneth souls is wise." Prov. 11th ch., 30th ver

On next Sabbath morning the anniversary of o Sunday School takes place. In view of the fact has been suggested that it would be appropriate make some reference to Sunday Schools in the app cation of my text to-day. There are some gre lessons to be drawn from our text in its special a plication to our Sunday school. First, that it is o duty to win souls to Christ; and secondly, that doing this we will reap our reward in growing wis and better. It is a very difficult work to win sou to the Savior. It requires practical wisdom, and one can have power to do so of himself alone; must come from God. As in taking a fort or storn ing a stronghold, we must set about it with deliber tion and care, understanding well what we have to d and how we are to do it, otherwise we will fail; s in the Sunday School, we must proceed with a fu sense of the importance of our work, a just feelin of our responsibility.

To win a soul, you must first secure its attentio and perfect confidence. It must be persuaded leave its sinful ways. This is very hard to do. W shall meet with strenuous opposition at every ste This we ought to expect and be prepared for. Abov all Satan sets himself against this work, because h knows that every soul that is given to Christ is some thing taken from his realm. To win the judgmen and the affections in spite of all the oppositions tha we encounter is an arduous task; but we must no be discouraged. Though but one be converted, w would be repaid for our labor. The great Lock talked and wrote eloquently, and yet how few cam under his influence. How much is done for the con version of men; what patient ministrations in th church, in the Sunday School, everywhere, and ye how few are cared for, in comparison with the grea number who have no religious instruction. If ther be any truth in philosophy, it is that it is a most dif ficult thing to draw souls to Christ. There is n greater error than to suppose that it is only necessar to bring the knowledge of the truth to the souls o men. Something more than this is needed; you must deeply interest them in the Bible and in th Church.

In dealing with children, you must teach them with love and kindness. One word spoken rightly will be more effectual than a thousand careless u

terances. We ought to seek men as the physician does his patients, with a kind look and pleasant word, and conversation adapted to the nature of their disease. So should we, when we would act upon adults or children, do so with great kindness, with a knowledge of their wants, and the treatment suited to them. We cannot be too discreet. By a wrong manner of approach many men have all the belligerent elements of their nature aroused, and instead of being convinced, are further estranged than ever from Christ. Gentle words draw souls to us, and win them to His fold. Truly, he who would win souls must be wise. The indifference of teachers is one of the greatest difficulties experienced by the Sunday School.

To be successful, it is needful that you should gird yourselves up to the work. Every one can do something. Every little child can bring some one into the Sunday School if he will try. God never forgets His promise. He will bless those who work for Him in behalf of others. There is nothing so well tending to strengthen the soul as Sunday School labor. One who teaches children, studying the Bible that he may teach its truths to them, will bring his mind every week into closer communion with God. The man who studies the Bible to teach it to others will be constantly growing wiser himself. He may sleep over a sermon, but cannot sleep when he prepares to teach others. Every one of the Christian graces seems to grow in this work of the Sunday School. We would like to bring all men and women to engage in it. Then indeed there would be a great revival. God has opened in the Sabbath School a great gymnasium for the exercise of all that strengthens the soul.

In every city the great body of the converted are Sunday School children. Eight-tenths of all the additions to our Church have come from thence. This would not have been the case under the old Puritan system, which made people church-goers. It would be better for us if that system still prevailed. Most of our people never come into the church. Perhaps it is not attractive enough. If we turned our churches into theatres, men would come to hear the music. In this church most of those who are here to-day would not to-morrow be able to tell me about what I have been preaching. It seems impossible to bring the great mass of people into church. Hence the Church cannot do without the Sunday School. It is a blessing to the country and is worth more than all other influences. It is a matter of history that our Protestant religion has been the basis of our free institutions. Upon the Bible rests our hope for the future. We are fast becoming a nation of atheists. There is no reason why the American mind should not come to be truly religious. For a young State like this there is no hope but in evangelical influences. A class of those here, as in the East, do not go to church, and yet consider themselves respectable. There is no public sentiment here, as there, which forces men to attend religious service. Our only hope is to get hold of the children. We must train up these souls for the Savior. This work is the great hope of the nation. Go forth and try to bring children into the Sunday School and church. What can be compared to the responsibility which gives into your hands the great work of teaching the children of this city? What teacher who has begun the work will ever think of giving it up? Teachers, your work is apostolic. Work with earnest hearts, for you will receive a reward both great and sure.

CONTRIBUTIONS.

Reading for Children.

Virginia City, April 20, 1868.

I have often thought I would like to call the attention of the readers of The Occident to the *Youth's Companion*, a child's paper, published by Perry Mason & Co., 151 Washigton Street, Boston, Mass. I have taken the *Companion* for the last five years for my children, and would not deprive them of it now for three times its cost. I have taken some pains to become acquainted with other papers published for youth, and, in my judgment, there is no child's paper published in our country which is superior to the *Companion*.

The articles are so varied that the paper is adapted to interest and instruct children and youth from six to sixteen years of age. While it is free from denominational tendencies, its moral tone is unexceptionable. It takes a wider range than most Sabbath School papers, which, though excellent in their way, do not generally meet all the wants of older children.

The *Youth's Companion* is a weekly sheet, neat in appearance, and costing only $1 25 a year, in advance. Its low price brings it within the reach of almost every family, while its intrinsic value commends it as one of the best papers published for the young folks. I know that most religious family newspapers of the present day have a "Youth's Department," and I regard it as at once the most important and the most difficult department of a paper. The idea that anything will do for children is fast passing away, and the sooner it is abandoned the better.

I have been much pleased to see that The Occident has, from the first, reserved a place for "The Young Folks." I only regret that the present size of the paper does not allow of a larger space for this important department.

I usually read with especial care what is written in any paper for the children, for I think that every parent ought to strive to acquaint himself with the mental and moral pabulum which is furnished from week to week for his children. That which is written for more mature minds may contain fallacy and error, but the maturity of the reader may enable him to detect the one and avoid the other; but that which is offered to the young is likely to be accepted as written. T. E. T.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, Principal.

The Seventh Term of this Institution will commence on Wednesday, January 22d, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

Correspondence.

Letter from New York.

Brooklyn, L. I., March 24, 1868.

I regard it as one of the signs of the times that The Occident should, so far as the religious press is concerned, be an organic union, or a united organ, of the two great branches of the Presbyterian family, shewing that on our grand Pacific border the watchmen see eye to eye, and lift up their voice together. With all the difficulties which here and there seem to impede the progress of this great movement towards a reunion of the two bodies, and the fears which some express that the time has not yet come — the watchword of the Church is Union!

The work which originated at St Louis has steadily advanced ever since the appointment of the Joint Committee, and though not crowned with immediate success, has resulted in showing to the world that there is a disposition to accomplish the object, and a willingness to make concessions for this purpose. The great convention held last fall in Philadelphia was of great service in many respects. The key-note was then given and has since been caught up by many similar conventions, until the song begins to be loud, and clear, and distinct, that will soon grow into a grand chorus in which our whole united Church will join —

"Behold how good a thing it is,
And how becoming well,
Together such as brethren are
In unity to dwell."

Early in this month the Joint Committee held another session in Philadelphia, all the members but three being present. Dr. Patterson of Chicago, having arrived from Europe the week previous, delayed his return home that he might be at this important meeting. It is not perhaps proper that I should speak at length of the results of their deliberations until they are first communicated to the General Assemblies. But there are some facts of which I may freely write.

The results of their conference were such as to inspire all with hope that a basis of union is now prepared which will be acceptable to all. Four days were spent in serious and prayerful deliberation over the whole subject, and all shades of interest, and feeling, and principle were represented. There were times when it seemed as if nothing could be accomplished which would meet the wishes of the Church at large. But at length the Committee came to a unanimous and hearty conclusion, and the final vote upon the doctrinal basis and all other points at issue was taken standing, and without a sign of dissent. It was a scene well worthy the hand of an artist. The result was so satisfactory and the vote so heartily unanimous, that the feeling of joy was almost oppressive. Many an eye was moistened with tears, as spontaneously joining hands and forming a circle around our venerable and beloved Moderator, Dr. Beatty, we sang together our thanksgiving to God.

The citizens of Philadelphia manifested the deepest interest in the deliberations of the Committee, and laid themselves out to make them welcome. Entertainments in princely style were given by Messrs. Brown, Benson, McAllister, and Newkirk, at which the most distinguished pastors and laymen of the Presbyterian Church of Philadelphia were present. On one of the tables was a beautiful piece of confectionery, surmounted with a shield having in golden letters the word "Union," and surrounded with belts of clasped hands.

While I am not at liberty to state the terms of reunion, I may say that the Committee were greatly indebted for their doctrinal basis to the Philadelphia Convention, and the vexed questions of seminaries and the publications of the Church are settled in a way which surely ought to give satisfaction to all.

While the Committee was in session, telegrams and letters came from many parts of the country, announcing special seasons of prayer for re-union, or the unanimous conclusions of some Presbyterian Convention. Let us hope and pray that after May, 1869, there will be but one General Assembly of the Presbyterian Church of the United States, and that the two streams which have for thirty years flowed in separate channels will again mingle their waters and form one grand and majestic river, which will bear on its bosom abundant blessings for our land and world. Surely there is a magnificent future for our Church when we shall have again become one. God hasten the day.

Your own State will feel the beneficial results of such a union. Standing as you do, face to face with the heathenism of Asia, your work is to be one which will require the combined effort of all the churches. I wonder sometimes if even you who are privileged to lay the foundations of religious institutions upon the Pacific Coast, are fully aware of the grandeur of the work to which you are called. Two years more and the great thoroughfare of the nation will be opened across the Rocky Mountains, and then a change in commerce and civilization will rapidly take place, of which now we do not even dream. Is the Church ready for the work which will then press upon it, when communications with Asia will be as frequent and common as they are now with New York and Europe? It will be no time then to be quarrelling over unimportant points of church polity, or differences of manner in illustrating or explaining the same doctrine. There will be serious work to be done, and for its accomplishment all must be united. O that we may yet see the prayer of our Divine Head answered, "That they all may be one!"

I do not know that I ought to close this letter without referring to matters at home that may be of interest even to your readers upon the Pacific Coast.

The First Church of this city has met with a loss in which we all sympathize, in the resignation of its pastor, Dr. Robinson. He has endeared himself not only to his church, but to the whole city, and will bear with him wherever he goes, the prayers of his brethren for his welfare.

Dr. Duryea has commenced his pastoral work successfully in the Classon Avenue Church. The Second Church is still vacant.

Here and there are indications for good in the evident presence of the Holy Spirit with His people. This is specially true in the various mission efforts among the poor, which are singularly sharing in the Divine blessing. Several of our churches have received important additions to their number from among those who have been reached mainly by mission schools and prayer-meetings. God's blessing has followed those who have gone into the lanes and streets of the city to extend to the poor and the needy the invitation: "Come, for all things are ready." And many of our churches are now doing a noble work in this direction, which is bringing to them its own exceeding great reward.

You have already heard of the great conflict in the Episcopal Church between Stubbs and Tyng. Some wag facetiously remarked that, "Good Catholics kissed the Pope's toe; but that the Episcopal Church had *stubbed* its toe against an old canon in the bogs of New Jersey." It is worthy of notice that at the very hour in which the prelate of New York was rebuking a young clergyman for preaching the Gospel in a Methodist meeting-house, the Joint Committee in Philadelphia were singing praises to God in view of the results they had been enabled to accomplish, and the hope of a re-union of a once divided Church. Which act was most worthy as an expression of worship and praise it is not very difficult to decide. Many here predict a division in the Episcopal Church; but I do not believe that any such result is to be looked for. At all events, God reigns, and against His Church the gates of hell shall not prevail. J. E. R.

Letter from New Hampshire.

Salisbury, April 1st, 1868.

Spring opens on the Granite Hills early and cheerily the present season. It is often among these highlands that runners are used during the first week of April on all the retired roads, but now only the mountain summits are flecked with snow. From the window where I am writing is a full view of Kearsarge Mountain — one of the few isolated peaks of central New Hampshire, towering nearly three thousand feet above the surrounding country. In outline and height it resembles Mount Diablo, and its name has become widely known from its association with the naval achievements of Capt. Winslow off Cherbourg. It lies twenty-five miles northwest of Concord, and around its base are rough farms covered with granite bowlders. The soil is productive, but hard to cultivate — such as a California farmer would utterly repudiate. In summer the scenery is attractive. The fields, surrounded with gray stone fences, are covered with stout timothy and red-blossomed clover, with here and there a a patch of tasseled Indian corn. The pastures, covered with loose, round rocks, drifted at some remote epoch from the north, are skirted with thrifty groves of rock maple, with now and then a thicket of dark spruce and hemlock. Large and fat cattle are raised here, but it requires care and labor to make them such, since half the year they must be fed and sheltered in the stall. More especially are the slopes of this mountain famous for superb flocks of merino sheep, such as, in these days of fancy blood stock, bring the best of prices and yield the heaviest of fleeces. Down from the summit come rivulets of clear, cool water, widening and deepening as they reach its base, and often disappearing under some huge bowlder, or hiding in a copse of thick alders. These crystal streams are the home of the agile, timid trout. In the hot days of July they are seen in the shaded pool, lying motionless, and watching the spray as it dashes from the ledge above into the basin.

Such is a brief outline of the scenery about this grand old mountain. It is a landscape not peculiar to itself, but such as is found in every section of Maine, New Hampshire, and Vermont. It is a picture that will be recognized by every New Englander in California. There are the same green declivities — the same bold summits — the same spurs of old forests standing out upon the hills — the same valleys with gravel-bottomed brooks, the same enclosures of orchard-land and fields of corn, the same waving meadows, the same peaks of gray granite cropping out stiffly — stark through secondary, tertiary, and alluvium.

Farmers and their Homes.

Then there are the same quiet farm-houses dot-

ting the hill-sides, the same square, box-like timber structures as everywhere mar the landscape in the rural districts of New England. There is the same fenced-up nest of out-buildings; you catch sight of a sled by the roadside; a pile of wood lies almost in front of the house; you see a group of children, you hear a barking dog, you have a glimpse of the busy house-wife at the low, narrow window. The people of this hilly region are not as demonstrative as the French or the Celts, yet they will give you a heartfelt greeting if you are an acquaintance, and hospitable treatment if you are a stranger. There is a quaintness, a quiet reserve, which reminds you of what you have read about the Massachusetts Puritans of two centuries ago. They are used to hard work, and the farmer delves away among the rocks month after month of each season in cultivating his cornfield and a few patches of grain so narrow and meagre that a Sonoma or Santa Clara farmer would turn from them in contempt. Such is farming upon the hard soil and amid the fitful climate of the Granite Hills.

THE SUGARING-OFF SEASON.

A week ago I met with an old schoolmate, one by the side of whom years ago I used to sit on the oaken bench of the old school-room, and who for twenty years has owned a farm high up the eastern acclivity of Kearsarge, in the good old town of Salisbury. An offer to attend a "sugaring-off" at his home was readily accepted. There were still broad patches of snow all through the woodlands. It was late in the afternoon when I reached the grove where in the open air the maple syrup was seething and bubbling — just ready for graining into sugar. A group of young and old were gathered around, and the enjoyment of the occasion can only be appreciated by those who have engaged in these sylvan repasts.

Just at sunset I ascended further up the mountain and reviewed a scene which a score of years ago I had surveyed with younger eyes and a more ardent imagination. Far to the southeast stretches the valley of the Merrimack, beyond the plains of Boscawen and among the lofty elms of Concord. To the southwest rises the summit of Monadnock, the rival of Kearsarge, while to the north, a hundred miles away, gleams the white, peerless crest of Mount Washington.

FIRESIDE REMINISCENCES.

But the shadows of night are gathering around, and I hasten down to the hospitable house, where, around the glowing fireside, are gathered a group of children — one of those old-fashioned families now so rare to be found in New England. How singularly have the Anglo-Saxon stock in the Eastern States depreciated in the size of their families within the memory of the present generation. Forty years ago there was an average of fifty school children in each district of this State. To-day the average in the same districts is less than twenty. The work of "multiplying and replenishing" has passed away from the descendants of the Puritans, and is now monopolized by the Irish and the Germans.

The evening passed quickly away. The young folks listened intently to our narrative of incidents on the Pacific Coast — the culture of grapes at Los Angeles, the hunting of bears on Eel River, the cutting of the huge redwood at Humboldt Bay, the camping with the Indians on the Klamath, and the toilsome journey over the Siskiyou Mountains. On the hearth, before the blazing hard-wood fire, were a pitcher of cider and a large dish of baldwins and russets with that flavor peculiar to the apples raised on the Granite Hills. As the hour neared eleven, the young people retired, and my friend and I were left alone. We talked of the events of the past, of successes and disappointments, of sunny days and dark hours. Above all, did we recall the loved ones — they who are "over the river," and who have left to us the example of their generous, unselfish, noble lives. At length the clock struck one, and we were soon asleep, and dreamed of scenes on the far-off Pacific shores.

NEW HAMPSHIRE AND CONNECTICUT ELECTIONS.

The elections in these two States have excited a deep interest, inasmuch as they indicate the popular feeling as to the approaching Presidential canvass. In New Hampshire the Republicans elected their Governor by a majority of 2,500 in a vote of 76,000 — a loss of a few hundred from last year. The Governor elect is not popular, and is really not the man a majority of the voters would prefer. But the voters of the Granite State will never allow a party with such a platform as that upon which the Democratic party stood in the late contest to triumph; and had its leaders the sagacity which once governed its councils, it would long since have abandoned the dead issues and worn-out heresies of the past, and achieved victory by advocating impartial legislation, and retrenchment and reform in the management of the General and State governments.

The re-election of Gov. English — a war Democrat — by an increased majority, while the Legislature is Republican, has not a little significance. The masses are growing too intelligent to be led by mere party names, and no political organization can long hold power which is false to its professions, and to the welfare of the country. Yerba Buena.

CURRENT LITERATURE.

RECENT PUBLICATIONS.

PUTNAM'S MONTHLY MAGAZINE for April is before us. Its three previous numbers we had noted carefully, and readable as they were, on perusal, we find the April number surpasses them. The best of its articles are "Yedo," "The Pope and the Temporal Sovereignty," "A Paper on Paper," and "Among the Poor Girls." The last named article we commend to the perusal of every considerate matron whose eye falls upon this notice. The following extract exhibits a phase of life not unfrequent in other cities besides New York.

Until you have lived the life of the working-girl, lady, reading this page, you cannot know what their temptation is — how hard it is to keep away sin and shame. By all the doors at which temptation can enter to you, it enters to them; and by many other doors of which you know nothing by experience. It comes in the guise of friendship to them, who are utterly friendless in the world. It comes in the guise of love — and do you think the poor girl never yearns for the caressing touch of love's palm on her aching brow? never longs to be folded in the comforting embrace of love's strong arms? Ah, *she* knows the worth of love! It comes, too, through womanly vanity, as it does to her happier sisters, who sit higher in the social scale. But, in addition to these, temptation comes to the poor girl through the tortures of a hunger which gnaws upon the vitals — of a cold which chills the young blood with its ice — of a weariness under which the limbs tremble, the head reels, the whole frame sinks prostrate.

If you were starving and could not otherwise get food, possibly you would steal it. I would. If hunger will rouse strong men to active crime, how easy must it be for it to lead the poor girl to a merely passive sin! Yet she struggles with a bravery which few would give her credit for — with this, as with all her temptations. There was Agnes ——, a beautiful girl of seventeen, who resisted the temptation that came to her through her own employer. He discharged her. Unable to pay her board, she was turned into the streets. It was a bitter day in January. For *four days* she wandered the streets, looking for work — only for work. "I envied the boys who shoveled snow from the side-walks. I would gladly have done their work for half they got." Hungry, she pawned her shawl. When that was gone, she went twenty-four hours without a crumb, shivering through the streets. At night she slept in the station-house — without a bed, thankful for mere shelter. Again and again she was tempted; but she did not yield. She found work at last, and leads her cruel life still, patiently and uncomplainingly.

There was Caroline G——, who came from the West to New York, fancying the great city would have plenty of work to give her. She, too, wandered the streets, and slept in the station-house. On the third day — which was the Christian Sabbath — mercy seemed to have found her. A gentlemanly-appearing person spoke to her, and learning her want, offered to give her a place as seamstress in his family. He lived a short distance in the country, he said, and took her to a hotel to stay till next day, when they would take the cars for his home. The hotel was an elegant one; the room given to her was hung with silk and lace; but she preferred the hard floor of the station-house that night to its luxurious state, for her "protector" was a wolf in sheep's clothing.

It is very dreadful to soil literature with such matters as these, is it not? "Really, now, *really* — there's *some* things musn't be talked about, you know," says the beast of prey we had in the thumb-screws.

There are worse things to be done in this world than soiling literature. It is a worse thing to shut our dainty eyes to the terrible evils that beset the path of the poor girl. It is a worse thing to confine charity to curing, forgetting the charity of preventing. There are two or three institutions in New York devoted wholly and exclusively to the rescue and reformation of fallen women. I cannot think of them without the dreariest of heartaches. The work they accomplish is smaller, in proportion to the efforts put forth and the money employed, than that of any other charity in the world. One at a time, with weary labor and care — as one might dip spoonfuls of water from the East River — a few abandoned women are gathered under its roof, of whom a minority are saved, while the majority slip back into their old paths. The whole work suggests nothing so much as the stone of Sisyphus. Back-sliding is so fatally easy in that direction.

I yield to no man in the leniency with which I look on the error, the sympathy I feel for the erring one — generally "more sinned against than sinning," more weak than wicked. But *prevention* is more needed in this quarter than cure. While you are rescuing one from out this slough, a score are entering it from the ranks of the poor girls, tempted as no other creatures on earth are tempted. They are at the entrance of the ghastly avenue of sin, which, with all its tawdry attractions, is drawing them with a fatal enchantment; while the fiends of Starvation, Cold, and Cruelty second and assist that enchantment by their goadings. Why do you stand far down this avenue, waiting to pick up, with painful effort, here and there one of the victims? Why do you not stand at the entrance instead? Here, a dollar will do more good than a hundred there. Here, no coaxings are necessary; the poor girls will fly to your protection with eagerness, with tears of gratitude; and here your work of salvation is a permanent one.

TIME AND TIDE. By John Ruskin, L.D.D. New York: John Wiley & Son. San Francisco: H. H. Bancroft & Co.

It will hardly be expected by any who are familiar with Ruskin's writings, that his views of the relation of labor to wealth, and of the different classes in society, would be received without some dissent and qualification by most of us. Yet, for the most part, his advice in these "Twenty-five letters to a working man on the laws of work," deserve attention. Some of his points deserve careful reflection and application in practical life. The letter on education, in which he discriminates between what is sought only as a means to success and what is essential to success itself; and that on the improper and excessive work of the lower orders in England; and that on the normal position and duties of the upper classes, are specially suggestive, and they must have influence. Ruskin should never be read without caution, for his sentiments are not absolutely reliable upon any subject, perhaps; yet he can be read with much profit by one who will think about what he says, and find his books rather stimulating than positively instructive. His style, his themes, his independence, his force oftentimes, render his books fascinating. The reader himself must render them profitable.

We have received:

THE CATHOLIC WORLD, for April.—Of which we can say, without being suspected of any sympathy with its religious and ecclesiastical views, that it gives high evidence of ability. The new story commenced in this number promises to be good. It is a cheering indication respecting the Catholic Church, that the intellectual character of its papers and periodicals is becoming more and more elevated.

THE CONGREGATIONAL REVIEW, for March and April.—We have not had time carefully to examine the contents of this copy, but the Table exhibits a variety of subjects and an attractive list of contributions, that excite the hope for more leisure for such reading soon.

THE AMERICAN QUARTERLY REVIEW.—We have not been familiar with this quarterly, but gladly welcome it to our table, and shall expect to read it with pleasure as a representative of the Episcopal Church.

THE FAMILY TREASURE.—An illustrated monthly, published in Cincinnati, and designed especially for the edification of Presbyterian households. This copy is good, and we hope it will have extensive patronage.

EDUCATIONAL.

Hills and Chills.

Gentlemen in San Francisco have sometimes thought that certain of their colds and lung weaknesses were due to their getting into a heat in climbing the hills where their houses were located, and then suddenly coming into the chill air on the top of those hills. And the friends of a young clergyman who died in California are inclined to think that his death was hastened by exposure without extra clothing, on the summit of the mountain called "Uncle Sam," near Clear Lake. These facts supply a hint to our young men, or young ladies, who may be ambitious of planting their feet on Mount Diablo, Tamalpais, or the Buttes. Such an ambition is not only innocent, but, to any discerning parent, very grateful. It shows blood, nerve, and enterprise Moreover, it is not wanting in the element of a certain suggestive sublimity. The youth treading with exultation the hard-won mountain-top is a symbol of nothing less than man's whole victory and supremacy over nature. So the stroke of the woodman's axe has prostrated the forests, and the echo of that stroke has swept the tribes of the wild beasts into deeper fastnesses. So the philosopher has harnessed the vapor of water to his machines, and the lightning of heaven to his messages. But, in valor, remember prudence. Unstrap the blanket and build the fire on the mountain-top, lest you remember afterward the evils of your achievement more vividly than its glories.

C. R. C.

Conversation.

It is much easier to pull down than to build up. Day laborers and volunteer firemen do the former, but it takes architects and master workmen to do the latter. This, of course, is a truism; but all truisms, as Coleridge says, acquire freshness when applied to individual cases. Applying this to the subject of conversation: It is easier to say, How unsatisfactory are the dialogues of modern society, than to say, Thus and thus you may make them more pleasing and edifying. But, occasionally, remarks of the latter nature do meet our gratified ears and eyes. Thus, in the "Recollections" of Samuel Rogers, is the remark of Plunket upon Grattan: "In conversation he gave results rather than processes of reasoning." And to this Rogers appends the note: "As I can say of all the eminent men I have ever known." Thus, also, we find the following in a letter from the poet Campbell, describing the astronomer Herschel: "Any train of conversation he follows implicitly; anything you ask, he labors with a sort of boyish earnestness to explain." These may serve as hints to those who would improve themselves, or direct others, in the important but neglected art of conversation.

C. R. C.

A VERY learned man has said: "The three hardest words in the English language are, 'I was mistaken!'" Frederick the Great wrote to the Senate:

"I have just lost a great battle, and it was entirely my own fault."

Goldsmith says: "This confession displayed more greatness than all his victories."

. The Church of England pays to maintain its establishment in Ireland for Archbishops, Bishops, Priests, Ecclesiastical Commissioners, etc., $3,485,000. Beside this it has 100,000 acres of land; $250,000 are annually paid to Trinity College, beside the students fees of $150,000. The membership is is 693,000. The Dissenters and Catholics number 5,800,000.

Missionary Labors In Spain.—Twelve Spanish young men, unable to gain a Protestant education in their own land, are studying in Switzerland, preparing to engage in missionary effort in Spain. During the Exposition over 13,000 Spanish Bibles, or parts of the Bible, with about 25,000 tracts, were distributed to the Spaniards visiting in Paris.

The remembrance and example of an honest Christian life, well spent, is better than the marble monuments over dead kings

A Country Walk.

BY J. B. ROGERS.

My heart rejoiceth in the country green,
I feel the warm blood tinge again my cheek;
A holy influence broodeth o'er the scene,
And fills my breast with thoughts I cannot speak.
Afar off looms the dim and smoky town,
Where clank the mighty engines night and morn,
Where wealth hath smiles, and poverty a frown,
And pride and scorn 'mid heaps of gold are born.
There hate or sorrow prompts too oft the word,
Here hymns of gladness from each bough are heard,
And falls the sunlight rich and dazzling down,
Like streams of glory from God's radiant crown;
Here scornless Nature works her peaceful ways,
And tunes the soul to meekness, love, and praise.

To-day.

Lo! here hath been dawning
Another blue day;
Think, wilt thou let it
Slip useless away?

Out of eternity
This new day is born;
Into eternity
At night will return.

Behold it aforetime
No eye ever did,
So soon it forever
From all eyes is hid.

— *Carlyle.*

The Jews in New York.

Dancing, money-making, and church building turn our attention at this juncture to the Jewish element among us. Probable splendors of the Hebrew ball at the Academy of Music, increasing influence and capital of Hebrew merchants, magnificent structures for Hebrew worship, combine to impress us with the growing importance of this strongly interesting people. Perhaps we ought not to give the ball at the Academy so much prominence in this connection. But such festivity as this among the descendants of Abraham is very suggestive.

After ages of contumely and persecution in the Old World, they have found a place and a "time to dance" in the New. It is well known that the costliest fabrics and most brilliant jewels adorn the daughters of Judah; and those who have stood beneath the thousand flames that light the fashionable glories of Israel have beheld riches that "far outshone the wealth of Ormuz and of Ind." Doubtless a large portion of this gay company will feel entirely at home in "The German."

But the gorgeous assembly, with its starry diamonds beaming in nights of raven hair, its fleecy clouds of lace fringing horizons of every hue, is only an indication of the wealth and luxury of those who thus celebrate the joys of social magnificence, midnight music, unmeasured measures and personal display. We are told that some departments of the importing business are largely in the hands of our Jewish residents, and that the tendency is in this direction from year to year. This part of our commercial enterprise requires a great capital in active employment, and that is what we may expect the Jewish element to furnish.

Even an American with great capital is willing to withdraw from the labor and risks of continued business. But the instincts of the Jewish race lead to unceasing exertion in the "interests of trade." There is no limit to their patience, their endurance, their success. Their familiarity with foreign tongues and countries, their family and social connection in every quarter of the commercial world, give them special advantages in the trade between nations. We are not surprised, therefore, to hear that their well-known wealth is on the increase, and that if it is true that they are disappearing from certain humbler quarters, they are coming into places more prominent and influential.

The splendid synagogue in the upper part of Fifth Avenue, now nearly finished, is a monument of this remarkable prosperity. There are many other buildings for Jewish worship which will compare favorably with the ordinary Christian churches in the city. But this new temple commands attention and admiration, in the midst of the utmost that wealth has erected for the gratification of metropolitan pride and personal luxuriousness. We understand that this synagogue is built by a congregation of Jewish Liberals.—*N. Y. Observer.*

THE YOUNG FOLKS.

Oliver Cromwell.

BORN 1599; DIED 1658.

BY NATHANIEL HAWTHORNE.

Not long after King James the First took the place of Queen Elizabeth, on the throne of England, there lived an English knight at a place called Hinchinbrooke. His name was Sir Oliver Cromwell. He spent his life, I suppose, pretty much like other English knights and squires in those days, hunting hares and foxes, and drinking large quantities of ale and wine. The old house in which he dwelt had been occupied by his ancestors before him for a good many years. In it there was a great hall, hung round with coats of arms, and helmets, cuirasses, and swords, which his forefathers had used in battle, and with horns of deer and tails of foxes, which they or Sir Oliver himself had killed in the chase.

This Sir Oliver Cromwell had a nephew, who had been called Oliver after himself, but who was generally known in the family by the name of little Noll. His father was a younger brother of Sir Oliver. The child was often sent to visit his uncle, who probably found him a troublesome little fellow to take care of. He was forever in mischief, and always running into some danger or other, from which he seemed to escape only by a miracle.

Even while he was an infant in the cradle, a strange accident had befallen him. A huge ape which was kept in the family, snatched up little Noll in his fore-paws and clambered with him to the roof of the house. There this ugly beast sat grinning at the affrighted spectators, as if he had done the most praiseworthy thing imaginable. Fortunately, however, he brought the child safe down again, and the event was afterwards considered an omen that Noll would reach a very elevated position in the world.

One morning, when Noll was five or six years old, a royal message arrived at Hinchinbrooke, with tidings that King James was coming to dine with Sir Oliver Cromwell. This was a high honor to be sure, but a very great trouble; for all the lords and ladies, knights, squires, guards, and yeomen who waited on the king were to be feasted as well as himself; and more provisions would be eaten, and more wine drunk in that one day than generally in a whole month. However, Sir Oliver expressed much thankfulness for the king's intended visit, and ordered his cook and butler to make the best preparations in their power. So a great fire was kindled in the kitchen; and the neighbors knew by the smoke which poured out of the chimney that boiling, baking, stewing, roasting, and frying were going on merrily.

By and by the sound of trumpets was heard, approaching nearer and nearer; and a heavy old-fashioned coach, surrounded by guards on horseback, drove up to the house. Sir Oliver, with his hat in his hand, stood at the gate ready to receive the king. His majesty was dressed in a suit of green, not very new; he had a feather in his hat and a triple ruff around his neck; and over his shoulder was slung a hunting-horn instead of a sword. Altogether he had not the most dignified aspect in the world; but the spectators gazed at him as if there was something superhuman and divine in his person. They even shaded their eyes with their hands, as if they were dazzled with the glory of his countenance.

"How are ye, man?" cried King James, speaking in a Scotch accent, for Scotland was his native country. "By my crown, Sir Oliver, but I am glad to see ye!"

The good knight thanked the king, at the same time kneeling down, while his majesty alighted. When King James stood on the ground, he directed Sir Oliver's attention to a little boy who had come with him in the coach. He was six or seven years old and wore a hat and feather, and was more richly dressed than the king himself. Though by no means an ill-looking child, he seemed shy, or even sulky; and his cheeks were rather pale, as if he had been kept moping within doors, instead of being sent out to play in the sun and wind.

"I have brought my son Charles to see ye," said the king. "I hope, Sir Oliver, ye have a son of your own, to be his playmate."

Sir Oliver Cromwell made a reverential bow to the little prince, whom one of the attendants had now taken out of the coach. It was wonderful to see how all of the spectators, even the aged men, with their gray beards, humbled themselves before this child. They bent their bodies till their beards almost swept the dust. They looked as if they were ready to kneel down and worship him.

The poor little prince! From his earliest infancy not a soul had dared to contradict him; everybody around him had acted as if he were a superior being; so that, of course, he had imbibed the same opinion of himself. He naturally supposed that the whole kingdom of Great Britain, and all its inhabitants, had been created solely for his benefit and amusement. This was a sad mistake, and cost him dear enough after he had ascended his father's throne.

"What a noble little prince he is!" exclaimed Sir Oliver, lifting his hands in admiration. "No, please your majesty, I have no son to be the playmate of his royal highness; but there is a nephew of mine somewhere about the house. He is near the prince's age, and will be but too happy to wait on his royal highness."

"Send for him, man! send for him!" said the king.

But, as it happened, there was no need of sending for master Noll. While King James was speaking, a rugged, bold-faced, sturdy little urchin thrust himself through the throng of courtiers and attendants, and greeted the prince with a broad stare. His doublet and hose, which had been put on new and clean, in honor of the king's visit, were already soiled and torn with the rough play in which he had spent the morning. He looked no more abashed than if King James had been his uncle, and the prince one of his customary play-fellows.

This was little Noll himself.

"Here, please your majesty, is my nephew," said Sir Oliver, somewhat ashamed of Noll's appearance and demeanor. "Oliver, make your obeisance to the king's majesty!"

The boy made a pretty respectful obeisance to the king, for in those days children were taught to pay reverence to their elders. King James, who prided himself on his scholarship, asked Noll a few questions in the Latin grammar, and then introduced him to his son. The little prince, in a very grave and dignified manner, extended his hand, not for Noll to shake, but that he might kneel down and kiss it.

"Nephew," said Sir Oliver, "pay your duty to the prince."

"I owe him no duty!" cried Noll, thrusting aside the prince's hand, with a rude laugh. "Why should I kiss that boy's hand?"

All the courtiers were amazed and confounded, and Sir Oliver the most of all. But the king laughed heartily, saying that little Noll had a stubborn English spirit, and that it was well for his son to learn betimes what sort of a people he was to rule over.

So King James and his train entered the house; and the prince, with Noll and some other children, was sent to play in a separate room, while his majesty was at dinner. The young people soon became acquainted; for boys, whether the sons of monarchs or of peasants, all like play, and are pleased with one another's society. What games they diverted themselves with I cannot tell. Perhaps they played at ball — perhaps at blindman's buff — perhaps at leap-frog — perhaps at prison-bars. Such games have been in use for hundreds of years, and princes as well as poor children have spent some of their happiest hours in playing at them.

Meanwhile King James and his nobles were feasting with Sir Oliver in his great hall. The king sat in the gilded chair under a canopy, at the head of a long table. Whenever any of the company ad-

lressed him, it was with the deepest reverence. If he attendants offered him wine, or the various delicacies of the festival, it was upon their bended knees. You would have thought, by these tokens of worship, that the monarch was a supernatural being; only he seemed to have quite as much need of those vulgar matters, food and drink, as any other person at the table. But fate had ordained that good King James should not finish his dinner in peace.

All of a sudden, there arose a terrible uproar in the room where the children were at play. Angry shouts and shrill cries of alarm were mixed up together; while the voices of elder persons were heard trying to restore order among the children. The king and everybody else at the table looked aghast; for perhaps the tumult made them think that a general rebellion had broken out.

"Mercy on us!" muttered Sir Oliver, that graceless nephew of mine is in some mischief or other; the naughty little whelp!"

Getting up from the table, he ran to see what was the matter, followed by many of the guests and the king among them.

On looking in, they beheld the little prince Charles, with his rich dress all torn, and covered with the dust of the floor. His royal blood was streaming from his nose in great abundance. He gazed at Noll with a mixture of rage and affright, and at the same time a puzzled expression, as if he could not understand how any mortal boy should give him a beating.

As for Noll, there stood his ugly little figure, bold as a lion, looking as if he were ready to fight not only the little prince, but the king and the kingdom too.

"You little villain!" cried his uncle, "what have you been about? Down on your knees, and ask the prince's pardon. How dare you lay hands on the king's majesty's royal son?"

"He struck me first," grumbled the valiant little Noll; "and I've only given him his due."

Sir Oliver and the guests lifted up their hands in astonishment and horror. No punishment seemed severe enough for this little wicked varlet, who had dared to resent a blow from the king's only son. Some of the courtiers were of opinion that Noll should be sent prisoner to the Tower of London, and brought to trial for high treason. Others in their zeal for the king's service, were about to lay hands on the boy and chastise him in the royal presence.

But King James, who sometimes showed a great deal of sagacity, ordered them to desist.

"Thou art a bold boy," said he, looking fixedly at little Noll; "and if ye live to be a man, my son Charlie would do wisely to be friends with thee."

"I never will!" cried the little prince, stamping his foot.

"Peace! Charlie, peace!" said the king; then addressing Sir Oliver and the attendants: "Harm not the urchin, for he has taught my son a good lesson, if Heaven do but give him grace to profit by it. Hereafter, should he be tempted to tyrannize over the stubborn race of Englishmen, let him remember little Noll Cromwell and his own bloody nose."

So the king finished his dinner and departed, and for many a long year the childish quarrel between Prince Charles and Noll Cromwell was forgotten. The prince, indeed, might have lived a happier life, and met a more peaceful death, had he remembered that quarrel, and the moral which his father drew from it. But, when old King James was dead, and Charles sat upon the throne, he seemed to forget that he was but a man, and that his meanest subjects were men as well as he. He wished to have the property and lives of the people of England entirely at his own disposal. But the Puritans, and all who loved liberty, rose against him and beat him in many battles, and pulled him down from the throne.

Throughout this war between the king and nobles on one side, and the people of England on the other, there was a famous leader, who did more towards the ruin of royal authority than all the rest. The contest seemed like a wrestling match between King Charles and this strong man. And the king was overthrown.

When the dethroned monarch was brought to trial, that warlike leader sat in the judgment hall. Many judges were present beside himself; but he alone had the power to save King Charles, or to doom him to the scaffold. After sentence was pronounced, the victorious general was entreated by his own children, on their knees to rescue his majesty from death.

"No!" said he sternly; "better that one man should perish, than the whole country should be ruined for his sake. It is resolved that he shall die. When Charles, no longer a king, was led to the scaffold, his great enemy stood at a window of the royal palace at Whitehall. He beheld the poor victim of pride, and an evil education, and misused power, as he laid his head upon the block. He looked on with steadfast gaze, while a black-veiled executioner lifted the fatal axe and smote off the annointed head at a single blow.

"It is a righteous deed," perhaps he said to himself. "Now Englishmen may enjoy their rights."

At night, when the body of Charles was laid in the coffin, in a gloomy chamber, the general entered, lighting himself with a torch. Its gleam showed that he was now growing old: his visage was scarred with many battles in which he led the van; his brow was wrinkled with care, and with the continual exercise of stern authority. Probably there was not a single trait, either of aspect or manner, that belonged to the little Noll, who had battled so stoutly with Prince Charles. Yet this was he.

He lifted the coffin-lid and caused the light of his torch to fall upon the dead monarch's face. Then probably his mind went back over all the marvellous events that had brought the hereditary king of England to this dishonored coffin, and had raised himself, an humble individual, to the possession of kingly power. He was a king, though without the empty title or glittering crown.

"Why was it," said Cromwell to himself — or might have said — as he gazed at the pale features in the coffin, "why was it that the great king fell, and that poor Noll Cromwell has gained all the power of the realm?"

And, indeed, why was it?

King Charles had fallen, because, in his manhood, the same as when a child, he disdained to feel that every human creature was his brother. He deemed himself a superior being, and fancied that his subjects were created only for a king to rule over. And Cromwell rose, because, in spite of his many faults, he mainly fought for the rights and freedom of his fellow-men; and, therefore, the poor and the oppressed all lent their strength to him.

Noble Boys.—On Saturday last, the little daughter of Mr. J. Garvin while crossing one of the sloughs which run through the city, accidentally fell in and was rapidly carried down the stream. Two little boys, about twelve years of age, the sons of Mr. J. C. Bell and Mr. Neff, happened to be near at hand, and regardless of consequences, boldly plunged in, and at the imminent peril of their own lives, rescued the little girl from a watery grave. Such bravery is seldom equaled by boys so young. Their noble conduct entitles them to the highest praise.—*Stockton Gazette.*

A poor heathen nabob, going along the streets one day, was attracted by the sounds proceeding from a mission school, and he drew near to listen. The boys were reading the fifth chapter of Matthew. The eyes of the prince flashed with unwonted fire, and when they finished their lesson, he exclaimed:

"If you only live that chapter as well as you read it, I will never say another word against Christianity."

MISCELLANY.

We have been reading a little treatise by Dr. Barrows, of Reading, Mass., on Raffles and Lotteries in Charity and Church Fairs. He hits happily and effectively the vice of the system, its inconsistency with good morals, and, citing the laws of many States and countries, shows that the sentiment of the Christian world condemns it. Whenever any of our pious people propose to break the laws by raffling for religious purposes, we hope that some other people will send them a copy of Dr. Barrow's tractate; and if they persist in the gambling, then try the laws. If some good Presbyterian minister, or minister's wife, were indicted under the gambling act, it would open some people's eyes a little.—*N. Y. Observer.*

The Open Fire.—"I am a firm believer," said Dr. Cuyler, "in the moral and spiritual influence of an open fire. To make home attractive, there must be somewhere in the house a common family rendezvous; and that ought to present a more radiant attraction than a black hole in the floor, through which hot air pours forth from a subterranean furnace. Men will fight for their altars and their firesides; but what orator ever invoked a burst of patriotism in behalf of steam-pipes and registers? I never cease to be thankful that I was brought up beside the hickory fire of a rural farm-house."

An old lady once said, that her idea of a great man, was "a man who was keerful of his clothes; didn't drink spirits; kin read the Bible without spelling the words, and kin eat a cold dinner on washday, to save the wimmen folks the trouble of cooking."

When the Breton mariner puts to sea, his prayer is, "Keep me my God! my boat is so small, and thy ocean is so wide!" Does not this beautiful prayer truly express the condition of each of us?

Bishop Purcell said, at a church dedication, in Hamilton, Ohio, "Give me children until they are ten years of age, and I care not who takes care of them afterwards."

The readiest way to find access to a man's heart is to go into his house.—*Chalmers.*

When a man lives with God his voice shall be as sweet as the murmur of the brook.

A man may hide God from himself, but he cannot himself from God.

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

PACIFIC COAST ITEMS.

If we were interested in the study of the human face, and wished to produce thereon at will a mingled expression of virtuous indignation, pity, and contempt, probably the most expeditious method of bringing about that state of affairs, just now, would be to express in the hearing of a citizen of our sister city across the Bay, a doubt of the future greatness of Oakland, or the comparative insignificance of San Francisco. We express no opinion and take no risks, but we hear on good authority that the steamers from Panama and China will, for a few more trips, land their passengers on this side of the Bay.

The *Constitution* and *Nebraska*, arriving from Panama last week, brought nearly seventeen hundred passengers. Of these, we learn from good authority, that not more than half landed with funds sufficient to pay for six weeks board. This is well enough if they have the requisite energy, and habits of industry, economy, and sobriety. But we are sorry to hear that a considerable per centage are not of the class who add to the strength and prosperity of the community.

From Alameda County we learn that workmen are now engaged in extending the telegraph line from San Leandro to Haywood. At the latter place great improvements are being made in the way of new buildings and gravel roads. Its citizens claim that they have the most desirable location in the State. A clergyman of the place recently declared that if he owned all the land in the world he would not move his house ten feet from where it now stands.

A proposition is before Congress to form a new territory out of that lying west of Nebraska and Minnesota, and north of Colorado, on the line of the Union Pacific Railroad. This region is rich in mineral wealth, including the Sweetwater and Wind River mines, and as it has much land adapted to agriculture, and is easy of access, it must soon be thickly populated.

April is redeeming herself from the doubtful repute for fickleness she was acquiring two weeks ago. Two weeks of sunshine have deepened the carpet of green upon every field, covered many a hillside with golden and velvet blossoms, and dried up the unsightly pools of mud and water. The tourist upon our coast at this season views a landscape of matchless beauty.

The Managers of the San Francisco Female Hospital have fitted up the three-story brick building, corner of Clay Street and Prospect Place in such a manner as to insure the comfort of their patients. This is purely a charitable institution, established for the purpose of affording gratuitous medical treatment to females who have not the means to pay for it.

The *Times* says: "On Sunday night we saw two well-dressed boys, apparently about fourteen years of age, dragging between them a drunken companion at least three years younger. It was a sad sight and spoke volumes against the present system of moral training in California."

In addition to their excitement in favor of railroads, the people of the State are becoming very generally aroused to the necessity of constructing solid wagon-roads which shall afford communication between the different localities at all seasons of the year.

The average yield of wheat per acre in Utah is said to be much less than in former years, which shows that in the West, as in the East, land must be enriched and cultivated, or it will become exhausted—a fact which Californian farmers are apt to disregard.

The Silk Manufacturing Company at San Jose has voted to disincorporate. This coast is unsurpassed in its capacity for producing wheat, barley, grapes, oranges, and grain and fruit generally, but the era of profitable silk culture has not yet arrived.

Several new steamers are being built at the shipyard on the Potrero, among them a magnificent ferry steamer for the Oakland route.

The aggregate value of private buildings already erected in Stockton during the year 1868, is $200,000.

It is estimated that this year Santa Clara Valley will produce double the wheat crop of last year.

It is said that work will commence immediately on the Saucelito & Humboldt Bay Railroad.

The Central Pacific Railroad Co. want 5,000 laborers at $30 in gold per month and board.

A new paper is to be published at Suisun. It will be of the Democratic "persuasion."

According to the *Alta*, the value of the exports of California equals $120 for each inhabitant of the Pacific Coast, being three times as great, comparatively, as that of England, and ten times as great as that of the United States or any of the countries of Continental Europe. It is rapidly increasing.

The Vallejo *Recorder* says that the new track-laying machine which has lately been tried in that city is a success, having laid one-eighth of a mile of track in an hour and forty minutes.

The Martinez *Express* complains justly of the mail arrangements between that town and Benicia.

Considerable trouble with the Indians is reported from Arizona.

TELEGRAPHIC SUMMARY.

Eastern.—The elections are progressing quietly in Louisiana, Georgia, and South Carolina. The Constitutions are doubtless successful in all three States....Bishop Hawks, of Missouri, died on the 19th inst....The Virginia Constitutional Convention has adjourned....The correspondence between the Fenian lodges in New York and Montreal has been seized by the Canadian authorities....Senators and Congressmen have been elected in Arkansas, and will soon start for Washington to claim their seats....The rails have been laid accross the summit of the Rocky Mountains....Twenty-seven persons were killed by the late accident on the Erie Railroad....Dickens has sailed for Europe....Gold in New York has advanced to 1.39⅝.

Congressional.—The evidence in the impeachment trial was closed on both sides on Monday. The decision will not probably be reached until next week....Banks' bill for the protection of naturalized American citizens has passed the House; also, a bill to reduce the naval force....The Senate has rejected the name of M. H. Farley as Surveyor of California....Boutwell has closed his argument on behalf of the Managers in the impeachment trial.

Foreign.—Rebels and bandits are keeping Mexico in a constant turmoil. There are rumors of a new conspiracy. ....Lord Napier asks remittances for a long campaign. The tone of dispatches would indicate a check to the British forces....100 people per day are dying in Callao, Peru, of yellow fever....The Czar consents to wait a month for his pay for Alaska....The Prince and Princess of Wales are making a tour in Ireland.

WEEKLY MARKET REPORT.

San Francisco Cattle Market.

Wednesday, April 22, 1868.

Under a moderate demand, the market is dull at a general decline of 1@2c ℔ lb.

We quote slaughterers' prices as follows:

Beef—American, 1st quality, 8@9½c ℔ lb.
do 2d do 6@8c ℔ lb.
Veal—Steady at 8@12c ℔ lb.
Mutton—Favors the buyer at 5@6c ℔ lb.
Lamb—Plentiful at 8@9c ℔ lb.
Pork—Undressed, grain fed, 6@7c; dressed, medium range, 8@10c ℔ lb.

Produce Market.

Flour—The shipment to New York by the Panama steamer this morning was 4,250 bbls. Oregon brands of Extra are jobbing at $7 37½@7 25.

We quote city mills as follows:

Superfine, hf sks, ℔ 196 lbs.....$6 50@6 75
qr sks..... 6 75@7 00
Extra, hf sks..... 7 25@7 50
qr sks..... 7 50@7 75

Wheat—Sales include 500 sks good milling, private; 330 sks Santa Clara, $2 50; 1,200 sks Oregon, ex *Continental*, private; 500 sks do, $2 45. We quote fair to good shipping at $2 40@2 45, and choice milling at $2 50 ℔ 100 lbs. At the close, 700 sks Oregon, private.

Barley—3,000 sks choice, in strong bags for shipment to Arizona, private; 2,000 sks brewing, $1 95; 600 sks do, $2. We quote feed, $1 90@1 95, and choice brewing at $2 ℔ 100 lbs.

Oats—The nominal range of the market is $2 50@$2 70, though small lots are selling at $2 40@2 60 ℔ 100 lbs.

Potatoes—Stocks are large—mostly, however, second-rate quality. Sales include 250 sks Pigeon Point, $1 30; 400 sks Humboldt, $1 30@1 35. Bodega from wharf are quoted at $1 12½@1 25. We presume a fair range for best kinds of the various descriptions would be $1 12½@1 37½ ℔ 100 lbs.

Corn—Red is quoted at $2 25; pale Yellow, $2 30; deep Yellow, $2 35@2 40; and White, $2 50 ℔ 100 lbs.

Rye—Dull and nominal at $1 95@$2 ℔ 100 lbs.

Buckwheat—Without inquiry at $1 60@2 ℔ 100 lbs.

Onions—Very scarce; jobbing as high as 12½c ℔ lb for San Joaquin.

Beans—Market quite firm at the following rates from store: Bayo, 3½c for old, with sale of 200 sks at this figure; Butter, 4¼@4½c; Pea, 5½@5¾c; small White, 5@5½c. Sale of 400 sks Pink, private; held at 3c, an advance; Red, 2½@2¼c ℔ lb.

Bran—Is still quoted at $32 50 ℔ ton, with light supply.

Middlings—We quote fine steady at $50, and feed descriptions at $35@40 ℔ ton.

Oil Cake Meal—In fair demand at $30 ℔ ton from the mill.

Hay—The nominal range of the market is $16@$24, though some parties are offering cargoes of Oat descriptions at $14@16 ℔ ton.

Dairy Products—The market is well supplied with all kinds, and prices favor the buyer. Fresh roll Butter is quoted all the way from 25 to 32½c, weak at the outside figure; California firkin Butter, 30@32½c for store and ranch-packed; Cheese, 15@18c, the latter figure for Steele's and kindred qualities; S. Hough & Son's command 20c ℔ lb. Eggs are plentiful and dull at 27½@30c ℔ doz.

Poultry—The demand has fallen off considerably of late, and prices are a little easier than last week. Live Turkeys are to-day quoted at 18@19c, and dressed 20@21c ℔ lb; Hens and Roosters, $7@8; Spring Chickens, full grown, $7 50@8 50; Broilers, $6@7; Ducks, $5@6 ℔ doz; Geese, $2 25@$2 75 ℔ pair.

Provisions—California smoked Bacon, 15½@16c; Oregon do, 12½@13c; California Hams, 17@18c; Oregon do, 16@17c; California Lard, 14@15c, and Eastern, 13@14c ℔ lb.

Wool—The spring clip is coming forward more freely, and generally in good condition. It is thought that the clip will exceed that of any previous season, aggregating from 9,000,000 to 10,000,000 lbs; adding fall clip our Wool crop for 1868 is placed at 12,000,000 lbs—an increase of over 20 ℔ cent. over last year. Sales since last Wednesday aggregate 223,000 lbs. We quote clean shipping grades of spring clip at 15@16½c; spring burry, 10@12c. There is no fall clip in market; the nominal quotations are 11@12½ ℔ lb. The Panama steamer this morning carried 183,000 lbs in transit to New York.

Hides—Market quiet a 14@14¾ for usual selections of California dry, with sales since last Wednesday of about 700 within the range; Mexican are quoted at 12@13½c ℔ lb.

Tallow—Sales of 5,000 lbs in lots, private. The range of the market for fair to choice descriptions of Beef and Mutton is 7¼@7¾c, the medium quotation being 7½c ℔ lb.

Ripe Fruit—The Oregon Apples per *Continental* were in fine order, and sold at prices ranging from $1 50 to $2 50, the average being at least $2 a box of 40 lbs. The market is well supplied with Strawberries, which are now jobbing at 35@40c ℔ lb. Eastern Cranberries are jobbing at 80c in 10-gall kegs, and 85@90c in 5-gall kegs and tins.

CURRENT TOPICS.

The interests of the Pacific Coast are not a little affected by the despatch received last week that official reports render it certain that Indian hostilities will be resumed this summer. The position of the leading Indian tribes cannot be mistaken, nor can their purpose be doubted. They feel that they have been cheated, and are being dispossessed of the territory they have regarded as their own, and they are resolved on what they call justice, or on revenge. Treaties are of no avail with them which on examination they find to be a settlement of difficulties so that the whites have all the advantage. Nor are those promises to be relied on which they make under stress of urgent necessity. Nor will the tribes abide by the obligations assumed by their chiefs, when there is sufficient temptation to set them aside. There seems to be no alternative but such a vigorous war upon them as will compel them to feel the folly of repeated depredations and the necessity that they become friendly. A moderate policy only prolongs and multiplies the evils. There must be an exhibition of the nation's power through the interior, and the Indians must be made to feel it, and to know that it is relentless and terrible, then they will cease to interfere with our settlement of the continent, and come themselves under the influence of civilization. Mercy calls for vigor and force in our treatment of them as the only means of checking their hostilities and turning their thoughts to peace and quiet, and this mercy relates to the Indians as well as to those whom they seek to drive out of their country. We trust Gen. Sherman will not be content with any further temporary expedients and partial settlements, when so much depends on the fact that absolute safety from trouble for all the future may be relied upon by those who desire to make their homes along the railroads and those who desire to make these the great commercial arteries of the continent.

It is difficult to see on what principle of affinity it is that the Unitarians have formed an alliance with the African Methodist Church South. The terms of coöperation seem to be that the African Methodists shall disseminate the publications of their allies, and the Unitarians shall furnish the money and men for the theological schools of the Methodists. But why they seek each other, or how they can have fellowship together, or by what process either will gain any real profit from the union, does not appear. Even could they agree in other particulars, we should suppose that the African Church would hardly be willing that a Unitarian Professor should teach theology to the young men who are to occupy their pulpits. We believe in union of Christians of all names, so far as this is consistent with purity of doctrine and efficiency in service, but we confess that we are somewhat surprised by this alliance.

Is public opinion tending toward repudiation of our national debt? It is humiliating that the inquiry is even suggested, but the fact that repudiation is openly discussed, and has its advocates, shows clearly that it has made progress in the minds of the people. At the close of the war a proposition to repudiate our debt would have subjected its author to scorn and contempt. Now men favor it and claim to be respectable. We present no argument against it. "There are things, to argue which is treason against nature." It is a subject that should not be debated—with which the mind should not be allowed to become familiar. Human nature is weak. Human interests are strong, whether they be real or apparent. The burden of taxation resting on the American people is heavy, and the temptation will be great. Already we have touched the outer circles of the whirlpool, and are moving slowly on the current that may in time bear us into the vortex of repudiation and disgrace. The danger consists in the fact that the vortex is yet distant and the current too gentle to be felt.

If, as now appears probable, the farmers of California shall raise a surplus of 20,000,000 bushels of wheat this season, should the yield in the wheat-growing section of the States be also correspondingly large, and should Europe be favored with abundant crops—the price of wheat on this coast will drop to $1.25 per hundred, and perhaps less. In that event, the effect will be to lower the price of land, to curtail the cash income of the grain-grower, the commission dealer, and business men generally, and to quiet speculation. No disastrous result would follow, no one would suffer for want of food, and the cheapness of provisions would stimulate mining and manufactures.

By the decision of the court in a suit for libel, the publishers of one of our city papers have been subjected to a heavy fine for having committed an error in the report of a trial. Many of the papers of the State consider the decision unjust. This is natural, since their own interests are supposed to be involved. If, however, publishers were to be made responsible for errors in their reports, or even prevented from publishing the details of criminal proceedings at all, it is difficult to see wherein the public interests would suffer. Freedom of the press has been considered one of the crowning glories of American institutions, and so far as it consists in the free expression of opinion upon all subjects, limited only by the laws of honor and decency, it should be forever preserved intact; but it is possible that in the matter of reporting the criminal proceedings of our courts the liberty of our daily papers might be somewhat abridged, and still the spirit of our free institutions survive the shock.

"The Insane Asylum at Stockton," writes a correspondent to us, "will now compare favorably with the long established institutions at Worcester and Hartford." The grounds, we know, are admirably located—one of the most delightful spots in California. The new portion of the building designed for female patients, is rapidly approaching completion, and will be ready for occupancy the first of June. There are now in the Asylum eight hundred patients, about two hundred and twenty of whom are females. Under the superintendence of Dr. Shurtleff, each department receives constant, careful, and judicious attention. The complaints of a few years ago are no longer heard. Forty patients have been brought to the Asylum during the month of April.

It seems, at first thought, a small matter that a Protestant church has been organized in the city of Mexico, but a little study of the past, and a little knowledge of the present as bearing on the future, cause the fact to be most interesting and significant. A single line conveys the news, but in our own land and in Europe it will be read with a conviction that not the least of the revolutions by which that unhappy country is perpetually shaken is that which is now affecting the religious sentiment of the people. While some will lament that such signs of thought and liberty are beginning to appear where they have been wholly unknown, others hail them as heralds of a brighter and better day for Mexico.

Among the multitudes of fresh arrivals on our shores there must be not a few who are not especially inclined to get an honest living. Papers from the interior report more thefts and burglaries of late than we remember to have noticed at any time before, and in the city the number has not diminished of those who prefer these methods of support. There is need of more careful protection against robbers, and of more severe treatment of them when they are caught and in the hands of the law.

The members of the Chinese Embassy have been busily employed during the last few weeks in visiting and examining the different objects of interest in our city and the surrounding country. The wonders of the printing press, telegraph, and machine shops have been exhibited and explained to them, and a special train on the Alameda road has afforded them the new sensation of a ride behind the iron horse. Americans are accustomed to wonder at, without fully realizing, the great improvement in the mechanical arts during the last century. What, then, must be the sensations of these ambassadors, coming

suddenly from the darkness of Asiatic barbarism into the light of American civilization? They will behold greater triumphs of skill in the Eastern States and Europe, but their first and lasting impressions of civilization will be formed in San Francisco. The influence of these first impressions in shaping the future of the vast empire of China, or even that of our own city, cannot be estimated. If San Francisco ever reaches the position in the commerce of the world which she so proudly expects, it will be principally by means of the China trade; hence, the attention paid to our visitors by those who understand the true interests of the city. It will require much attention to counterbalance the knowledge which they must have of our treatment of their countrymen. We fear that it is to the importance of our commercial relations with China, rather than to the prevalence of just principles, that we must look for the removal of the selfish prejudice against Chinamen which exists in the minds of so many of our citizens.

Religious Intelligence.

PACIFIC COAST.

The Presbytery of Benicia will hold its next semi-annual meeting in the Presbyterian church of Healdsburg on Friday, the 8th of May, at 7½ o'clock, P.M. The services to commence with a sermon by the retiring Moderator, Rev. James Wylie.

A. Fairbairn, Stated Clerk.

—

Anniversary of Calvary Church Sabbath School.—This Anniversary was held last Sunday morning. The interior of the church was decorated with flowers, and the children were seated in the galleries. The singing was performed by the members of the school, instead of the usual exercises by the choir. The annual report was made by Mr. J. B. Roberts, the Superintendent.

The address by Rev. Dr. Wadsworth had for its text the words of the Savior—"Behold the fowls of the air." These winged messengers of the air and sunshine teach many a lesson. They flit industriously through field and forest, pour forth their sweetest melody, are awake at early dawn, and have a provident forethought for the wants of the future. Other lessons taught by the animal creation were portrayed by the speaker, who closed by alluding to the importance of the position held by every Sunday School scholar. Children who are here to-day have reason to rejoice in view of the future awaiting them. Our coast is awakening to a new era of material enterprise and growth. But material resources alone do not make happy homes, or build up a State. The future posperity of our land demands of the young that they become good and strong men and women, who fulfilling their duty here, shall be heirs of the Heavenly Kingdom hereafter.

—

We are much pleased to hear of the promising condition of the Church in that part of the city generally called Hayes Valley. This church was organized about one year ago, and many predicted that it could not exist in that neighborhood for even a year with any prospect of growth. Under the faithful and wise direction of Rev. I. N. Hurd, they have now a good edifice enclosed, into which they hope to move in two months, and the church has more favor in the vicinity than at any time. It is specially worthy of notice that though they are only a handful, this building has been erected without aid from outside individuals or funds. It makes known the vigor and health of the enterprise, which are prophetic of complete success.

—

An earnest effort is being made to free Grace Church, corner of California and Stockton streets, from the debt which has rested upon it so long. The debt has already been reduced to $23,000, and in response to an eloquent appeal made by the rector last Sunday, the hearty coöperation of the vestry and congregation has been promised towards paying the debt in full. It is hoped that the payment may be made in season to enable the church to be consecrated before the departure of the Bishop for the East.

—

At Vallejo, the Roman Catholics have just completed a large brick church—the largest in Solano County. The Presbyterians have a small but very neat church edifice, upon which a tower is to be built next month. The Methodist church of that town is procuring a new Sunday School library.

—

Rev. J. G. Fackler, of the Central Presbyterian Church, has, we are glad to learn, so far recovered as to resume his active duties as pastor. The Central Church is prospering under his care.

—

Some of the Congregational and Methodist churches are holding religious services each evening of the present week, and an unusual degree of interest is manifest.

EASTERN.

The *Atlantic Monthly* says: "Our Roman Catholic brethren are acquiring so great an estate in the United States, and acquiring it so rapidly, that it becomes a matter of public concern how they get it, what they do with it, and especially what they *will* do with it by-and-by, when it shall have become the largest property held in the country by or for an organization. Other organizations usually live from hand to mouth; but somehow the Catholics always contrive to have a little money ahead to invest for the future. The Catholic Church, seven-tenths of whose members are exempt from the income-tax because their income is under a thousand dollars a year, is a capitalist, and has the advantage over other organizations which a man has over his fellows who, beside earning his livelihood, has a thousand dollars to operate with. There are spots in the western country, over which the prairie winds now sweep without obstruction, that will be the sites of great cities. Our Roman Catholic brethren mark those spots, and construct maps upon which not existing towns alone are indicated, probable towns also. A professor of one of our western colleges saw, two years ago at Rome, a better map of the country west of the Mississippi than he ever saw at home, upon which the line of the Pacific Railroad was traced, and every spot was dotted where a settlement would naturally gather, and a conjecture recorded as to its probable importance. Five hundred dollars judiciously invested in certain localities now will buy land which, in fifty years or in twenty, may be worth $100,000,000. Thirty-seven years ago the best thousand acres of the site of Chicago could have been bought for $1 25 an acre; and there is one man now in Chicago who owns a lot worth $20,000 which he bought of the government for 15⅝ cents. Now, there are in the Roman Catholic Church men whose business it is to turn such facts to the advantage of the Church, and there is also a systematic provision of money for them to expend for the purpose.

The *Protestant Churchman*, speaking of the late Tyng trial, says:

"Humiliated as we are with shame at the attitude in which our Church is now compelled for the time to stand, we counsel constant agitation of the subject with a view to relief at the next General Convention. In this crisis we should be calm but firm, and our words those of discretion and charity. With abiding and unalterable faith in the rectitude of our principles, we are confident, even now—yes, more confident than ever, of their triumph. The conflict is to be waged *in* the ecclesiastical body with which we are connected. There is to be no secession; but we claim it as our right, in dutiful submission to authority, when it does not contravene imperative demands of conscience, to be and to act as the Liberal Branch of the Protestant Episcopal Church.

Rev. Dr. George Shepard, Professor in Bangor, (Me.) Theological Seminary, died in that city last month, aged sixty-six years. He was a native of Plainfield, Conn., a graduate of Amherst and Andover, became pastor of the First Congregational Church of Hallowell, Me., in 1828, and eight years afterward assumed the duties of Professor at Bangor, which position he has worthily filled since that time. The Bangor *Whig* says: "Dr. Shepard was strong in intellect, unassuming and amiable in his disposition, sound in faith, and devotedly pious. He had all the elements of a pulpit orator, and was undoubtedly one of the best preachers in the United States."

The Thirteenth Street Presbyterian Church of New York City, Dr. Burchard's, is now experiencing a delightful spiritual visitation. On a recent Sabbath, thirteen were received by letter and forty-eight on profession of their faith. Of the latter number several were heads of families, twenty-eight were from the Sabbath School, including several from the Bible class taught by the pastor.

Henry Morehouse, the London "boy preacher," is now holding services in one of the Baptist churches in Chicago, and is announced to speak on such subjects as the Atonement, Justification, and Sanctification. He will return to England early in April. *The Advance* speaks of him as a remarkable young man.

Three ministers were once supported in the town of Chesterfield, Conn., all within a stone's throw of each other. For three years past, Rev. Edward Clark has been the only clergyman there. Little is *said* about union, but it seems to be *practiced*, and a most desirable thing it is.

Rev. Chauncey Goodrich, of New Haven, died very suddenly, March 27th, of neuralgia of the heart, at the age of fifty. He was the grandson of Noah Webster, and has been largely engaged in editing and revising the various editions of Webster's Dictionary.

Rev. James A. Reed, late of the First Church of Wooster, Ohio, has been invited to supply, temporarily, the pulpit of the New York Avenue Presbyterian Church, Washington, D. C., in the absence of its pastor, the Rev. P. D. Gurley, D.D.

The church of the Puritans in New York, where Rev. Dr. Cheever preached, is now being dismantled and altered into a business warehouse, and the pulpit, pews, and other fixtures are offered for sale.

One hundred and fifty thousand persons in Chicago are without the influence of the Gospel as preached from any pulpit. Forty thousand of these spend the Sabbath in saloons and German gardens.

Rev. R. W. Patterson, D.D., of the Second Presbyterian Church in Chicago, has just returned from a foreign tour of nine months. Lieut. Gov. Bross also came home on the same steamer.

Several Roman Catholics, husbands and wives, have been hopefully converted, and have united with the Methodist Episcopal churches in New York and vicinity during the month of March.

Rev. Dr. Curtis, of Elmira, N. Y., has received a call to the First Presbyterian Church in St. Louis, that to which Dr. Nelson has ministered so well for the last ten years.

Ex-President Finney, of Oberlin College, now in his seventy-fifth year, has so far recovered from a long illness as to be able to preach again.

Rev. Theron H. Hawks, D.D., pastor of the Second Presbyterian Church in Cleveland, Ohio, has resigned his charge.

Rev. Joel. H. Linsley, D.D., pastor of the Second Congregational Church, Greenwich, Conn., died on Sunday, March 22d, in the seventy-eighth year of his age.

Forty persons were received to membership at Dr. Cuyler's Church, Brooklyn, on a recent Sabbath—twenty-four, mostly heads of families, on profession of faith.

Rev. J. A. Thome has resumed his pastorate at Cleveland, Ohio, after an absence of a year in Europe, in behalf of the American Missionary Association.

MISSIONARY INTELLIGENCE.

Missionaries in Asia Minor.—Previous to the massacre of the Christians in Syria in 1860, Mrs. Bowen Thomson, an English lady, vainly attempted to establish a native female school at Antioch. The influence of both Christian and Moslem priests proved an insurmountable obstacle, and she returned to England. The massacre made many, among the Christians, widows and orphans. Mrs. Thomson now renewed her efforts among the neglected Syrian female population. Prejudices disappeared before such disinterested philanthrophy. Mrs. Thomson's labors in Beirut have been crowned with such success that the people of Damascus are seeking to obtain, for their own women, the advantages they see their countrywomen of Beirut have derived from attending the English schools. Greek Christians, Romanists, Jews and some Moslems, all belonging to the respectable classes, sent a deputation to Mrs. Thomson, last September, with a formal petition renewing their entreaties for the establishment of an English girl's school. As a proof of their earnestness, many put down their names as subscribers for the free admission of the poorer girls.

Pacific Mail Steam Co's Steamships

— FOR —

NEW YORK, JAPAN AND CHINA

Will be Dispatched as follows:

LEAVE WHARF CORNER OF FIRST AND BRANNAN STREETS, at 11 o'clock A.M. of the following dates, for PANAMA, connecting via Panama Railroad with one of the Company's splendid Steamers from ASPINWALL for NEW YORK.

On the 6th, 14th, 22d, and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Transatlantic Company's Steamer for St. Nazaire, and English Steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English Steamer for Southampton, South America, and P. R. R. Co.'s Steamer for Central America. Through tickets can be obtained.

Departure of the 6th connects with English Steamer for Australia.

The following Steamships will be dispatched on dates as given below.

STEAMERS FOR MAY, 1868.

May 6th—GOLDEN CITY, Capt. Lapidge, connecting with HENRY CHAUNCEY, Capt. Grey.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock.

Through tickets to Liverpool by the "Cunard," "Inman," and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired, an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship GREAT REPUBLIC, Capt. S. Doane, will be dispatched June 3d, at 12 o'clock, noon, from wharf corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting at Yokohama with the Steamship COSTA RICA, for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Co.'s Office, corner of Sacramento and Leidesdorff Sts.

OLIVER ELDRIDGE, Agent.

ILLUSTRATION OF DIVIDENDS OF PROFITS

—OF—

United States Life Insurance Comp'y,

NEW YORK.

Office, No. 40 Wall Street.

CASH ASSETS EXCEED $2,700,000.

SIXTH TRIENNIAL DIVIDEND.

The Board of Directors have this day declared a Dividend of FORTY PER CENT. for the three years ending at the 4th March, inst., to holders of all Policies then in force, on the whole sum of the annual participating premiums received during the said three years; and an additional Dividend of TWENTY PER CENT. on the whole sum of all previous Dividends and Additions, to holders of such Policies who have fulfilled their engagements with the Company, both Dividends being payable and available in the various modes explained in the Company's Prospectus.

For example, on a policy paying one hundred dollars a year of participating premium, the profits for each year and the total at each year on this system are:

Year.	Yearly.	Total.	Year.	Yearly.	Total.
1	$40 00	$40 00	28	$206 39	$2702 23
2	40 00	80 00	29	206 39	2908 63

San Francisco, Saturday, May 2, 1868.

FAR-REACHING FAITH.

Men do not find it difficult to believe what seems probable to them, or what accords with their wishes or experience. But faith respecting what they cannot comprehend, or what is so far in the future that they cannot see the relation of means to its accomplishment, or what appears to be opposed to their own interests, is an exercise which some men ridicule, some declare to be unreasonable, and few actually attain. It is hard to see the wisdom of that which hinders us, to trace any connection between what we cannot understand and the promise that "all things shall work together for good," so that we can admit that delay insures progress and defeat renders victory certain. It is no ordinary vision that can not only look upon the objects in the foreground of the picture of the future, but also upon the more distant features, which it makes real and glowing with the same light that beams on those which are near. Faith that needs no confirmation to the senses, and reaches over ages, or into Heaven, for that upon which it fastens; faith that does not waver, does not doubt, does not fear, yet rests upon testimony, and is intelligent because assured, is alone gifted with such vision. It was possessed by Abraham, when he went forth to sacrifice his son, on whom Jehovah had rested his promise. It was possessed by Noah when he wrought upon the ark during those many years, and when he sailed in it over a submerged world with no prospect save from the word of God, of anything other than final wreck and ruin. It is the belief that God is as worthy of confidence as men. It is a firm conviction that the word of God shall never fail. It needs no collateral support, but would as soon ask for proof that the arm which built the heavens will not be palsied in the lapse of time, or that the Eternal will not grow old and feeble, as that what He has said shall not come to pass.

Never has such faith been more ridiculed than in our day, yet never has it been more sublime or necessary. We cannot march on with Providence in the majestic procession of events by which this generation is to be distinguished, without implicit trust in *His word*. We cannot be in full sympathy with our Lord in the prophecies that are having their fufillment in these events, without such trust. And why do we question what God declares? Why is it foolish to take His testimony respecting what we eannot feel, or absurd to base our hopes on what He has promised? There is no *other rock* in this sea of conjecture, and speculation, and doubt on which we are afloat—why, when we climb upon it and feel that it is firm, should any seek to drive us from it again that they may see us beat the waves as hopelessly as themselves? Where shall we look for *assurance* if not to the simple, unshaken promise of God? Wherein is infidelity better, or more philosophical than faith? Why is it foolish, when we know not the path and cannot find it, to take hold of His hand who gives us proof that He can guide us out of the wilderness and bring us into a land where is no darkness at all? Angels traverse the wide fields that are open to their study to the limit of their powers, but when they reach heights of truth they cannot scale, they are helped up by God, through their faith in what He declares to them. And they are nobler, grander beings because of such trust. Is a man only to be despised who makes his pilgrimage through a world in which is so much that he cannot comprehend, confessing that he is guided by Him who helps the angels? When he is borne to the top of some Delectable Mountain, where the glorious prospect ravishes his spirit, and he knows that it is real, shall he be ridiculed because he erects his stone of grateful praise and writes on it, "Hitherto hath the Lord helped me?" As he walks in the light and sees light shining far over the way, is he to be pitied by those who stumble in darkness, and have no vision of the future to cheer and bless? No! There is greatness in the simplicity of such a trust. It involves the exercise of the highest faculties we possess, and it brings to us the noblest rewards. By it we walk with God, and are taught and encouraged, and elevated, till we are able to apprehend something of His designs, and to behold something of His glory. By it we are qualified to interpret much of the present and to forecast the future, till we come into that state of assurance which renders us serene in the midst of difficulties, and resolute and wise in the prosecution of our plans. Our theory as Christians is, that we live by faith, not that is blind, or impractical, or idle, but intelligent, and earnest, and powerful; nor should the confession cause us to feel that our manhood is dishonored when developed and controlled by such an influence.

There is no necessity that we make application of this theme in detail. To individuals in their experience, and to the Church in her plans and hopes, in a time like this, it furnishes lessons that may be studied with profit. To all who look around them with foreboding, and anticipate what may come with fear; to whose souls the grand announcements of prophetic vision bring no rapture, and the rising day of promised glory brings no hope for man, and who look forward to commotions and revolutions that shall end only in disaster and gloom, this inspiration of far-reaching, conquering, abiding faith should come with new interest and power!

Water as a Symbol of Religious Purification.

NUMBER II.

One of the earliest indications which we have in the Old Testament of the stress which the ancients laid upon the use of water as a symbol of religious purification is in Job, viii: 30: "If I wash myself with snow water and make myself never so clean." This passage is the more important when we consider the age in which the patriarch flourished. It was a prevalent belief among the Jews that Job lived somewhere near the time of the three great Hebrew patriarchs. Eusebius places him two ages before Moses, and to this the opinions of most Eastern nations consent. We have thus the existence of this religious idea carried back to a period of the remotest antiquity. Appearing thus early in the authentic history of the religions of mankind, we find the idea pervading all the religious notions and aspirations of the succeeding writers of Scripture. The Psalmist again and again refers to the purifying influence of water as a symbol of spiritual purification:

> "I will *wash* my hands in innocency,
> So will I compass thine altar, O Lord."

So David again, when defiled with the guilt of his adulterous connexion with the wife of Uriah, cries out in the bitterness of his anguish:

> "*Wash* me thoroughly from mine iniquity,
> And *cleanse* me from my sin."

And his hope of restoration to the favor of God finds utterance in the same strain:

> "*Purge* me with hyssop, and I shall be clean;
> Wash me and I shall be whiter than snow;
> Make to hear joy and gladness,
> That the bones which thou hast broken may rejoice."

So through the prophets also, this same idea of purification of heart, symbolized by the purification of the person by water, prevails: "Wash ye, make you clean; put away the evil of your doings from before mine eyes. Cease to do evil; learn to do well." "Come now, and let us reason together, saith the Lord; though your sins be as scarlet, they shall be as white as snow; though they be red like crimson, they shall be as wool." (Isaiah i: 16 and 18.)

"Oh, Jerusalem, *wash* thine heart from wickedness that thou mayest be saved." (Jeremiah iv: 14)

So also among the apostles, purity of heart is signified by cleansing of the person: "*Cleanse* your hands, ye sinners, and purify your hearts ye double-minded." (James iv: 8.)

INTRODUCED INTO THE TEMPLE SERVICE.

The use of water as a religious emblem, so fitly setting forth the need of purity of heart and life God employs most largely in the service of the temple, in the worship which He constituted for His own chosen people through Moses, the Divine law-giver. "For see, saith he, that thou make all things according to the form showed to thee in the mount."

God was thus pleased to introduce this ritual use of water into the worship of the temple. God chooses to draw His people by the cords of a man to let the order of His service run somewhat in the line of our human notions and sympathies, and the fitness of things, and the analogy of truth seemed to render the use of this purifying element appropriate in His sanctury to indicate the purity of heart and life essential to His favor.

There are three special and appointed ablutions in the Hebrew economy which deserve notice.

I. THE PURIFICATION OF THE PRIESTS.

"And Aaron and his sons thou shalt bring into the door of the tabernacle of the congregation, and shall *wash* them with water." (Ex. xxix: 4.) "And the Lord spake unto Moses, saying: 'Thou shalt also make a laver of brass, and his foot also of brass, to *wash* withal, and thou shalt put water therein, where Aaron and his sons shall *wash* their feet thereat. When they go into the tabernacle of the congregation they shall *wash* with water, that they die not. So they shall wash their hands and feet that they die not." The Hebrew word which in this case is translated wash is *rahats*, defined by Gesenius to mean wash, lave.

II. THE PURIFICATION OF THE LEPER.

I will condense in as brief a space as possible the Scriptural directions. The healed leper was to present himself to the priest with two birds alive and clean, with cedar wood, hyssop, and scarlet. One bird was to be killed over a vessel containing living (running) water. The priest was then to dip the living bird, with the cedar, hyssop, and scarlet, in the blood of the bird that was killed over the running water, and with this sprinkle the cleansed leper seven times, and pronounce him clean, and then let the living bird loose into the open field. "And he that is to be cleansed shall *wash* his clothes and shave off all his hair, and *wash* himself in water, that he may be clean." (Lev. xiv: 8.)

The Hebrew for dip is *tabal*, defined by Gesenius *dip, immerse*. The Hebrew for *wash* is *rahats*, as before.

III. PURIFICATION FROM A DEAD BODY.

"And for an unclean person they shall take of

he ashes of the burnt heifer of purification for sin, and running (Heb., living) water shall be put thereto in a vessel, and the clean person shall sprinkle upon he unclean the third day, and on the seventh day he shall purify himself, and *wash* his clothes and bathe himself in water, and shall be *clean* at even." The word for *wash* in both cases is *rahats*, in Hebrew, as before.

These several cases, and others which might be instanced, will serve to show, clearly and explicitly, how important in the services of the Hebrew economy was the ritual use of water in the purification of those who had contracted personal uncleanness under the ceremonial ordinances. The purification moreover, was to be made, not with standing, but with running, living water, and all the appointed ablutions were to be strictly observed, or the soul that was unclean would be cut off from the congregation.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Seventh Term of thi Institution will commence on Wednesday, January 22d, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

Correspondence.

Letter from Massachusetts.

Worcester, Mass., April 8, 1868.

Boston is the "hub" and Worcester is the "heart" of the Commonwealth of Massachusetts. The latter is a well built, thrifty town of thirty-five thousand inhabitants. In summer it is delightfully shaded and surrounded with gardens. Its mechanics embrace a large majority of the voters, and they are the most intelligent, enterprising, and independent class of men in the country. Few of them drink whisky or smoke cigars, and hence they have money to lend. They live in houses which they own, and can look everybody in the face and say: "I owe you nothing." They read their own newspapers, do their own thinking, and go to whatever church they think most orthodox.

MEDIOCRITY THE BEST STATE.

In a word, the Worcester mechanics enjoy the blessing of mediocrity—that middle state, neither rich nor poor, neither famous nor insignificant, neither fat nor lean, a fair sample of what men can be, enjoying all that humanity can enjoy. It is just the state which the reader, if a young and ardent Californian, is probably trying to avoid. He has not yet learned that wealth disappoints the hopes. Not that money has it not in its power to compass noble ends; it is the ladder by which we ascend into the heaven of spiritual as well as intellectual enjoyment It confers great privileges, but it is not everything. If a man expanded in heart as his purse swelled; if his intellect grew with his pocket; if his moral views expanded with his domains, a man should pray for riches as Solomon prayed for a contented mind. The young man yearns for a fortune, works for it, drudges for it, and has it. Where is he now, himself? He has contracted habits of body and mind which he cannot throw off. He has outraged nature, and lives and dies with a sordid soul.

WHY IS MASSACHUSETTS RICH?

Worcester is a manufacturing city. On every side you see the smoke of the foundry and the forge, and hear the clank of machinery. In this department no people on the face of the earth are so independent. Go into the parlor of the opulent merchant or retired capitalist. Every article of furniture, from the Chickering piano to the minutest curtain-loop, is the product of Massachusetts skill and industry. Go out upon the street and farm, and the same evidence of enterprise and skill meets you everywhere. A railway train rushes past you; every spike, beam, lever, and plank was manufactured within the county, and every part of it can be repaired and refitted within eighty rods of the depot where it halts. Here is the secret of the great wealth of Massachusetts. It is this productive power—this home capacity for manufacturing, which has enabled the people of the Bay State to cover her territory with a net-work of railways; to own half the banks, warehouses, and railroads of the Mississippi Valley; to hold a controlling share of the Government bonds; to furnish the sinews of war which crushed the Southern rebellion, and at the present time to dictate the policy of the General Government.

In this respect one finds a marked contrast between Massachusetts and the Pacific Coast. Visit the house of any thrifty California farmer. Every agricultural implement, all the household furniture, all traveling vehicles, except those of the ruder kind, nearly all the fabrics of cotton and woolen are from abroad. You cannot find a sofa, a chair, a sewing machine, a candle-stick, or clothes-pin—you do not see a reaper, a plough, an axe, a knife, a hammer, a nail, or even a hoe-handle, which is not the handiwork of a Yankee. This is the leading cause why, with an annual product of fifty millions of bullion, with a soil astonishingly productive, and a climate unsurpassed, the Pacific Coast is to-day destitute of the means needed to build her railroads, open her mines, and develop her vast agricultural resources. Of course a new region can not be expected to become a manufacturing country at once, and I dwell upon the existing state of things as I twelve months ago saw them, merely to awaken the reader to the importance of introducing manufactures on the Pacific Slope at the earliest practicable day.

THE SOCIAL PROBLEMS.

But in despite of their varied resources and abundant capital, the people of this State are greatly disturbed by some of the moral and social questions of the day. The question whether the "prohibition" or "license" system in regard to intoxicating drinks shall be the policy of this State excites great interest among our people. The Legislature has been in session over three months, and although the license party have a decided majority, no act has been framed which seems to be satisfactory. The question will go back to the people and will be the leading local issue next November.

Massachusetts has an excess of 150,000 female over the male population. In all the large manufacturing towns, Lowell, Lawrence, Lancaster, Fall River, and Holyoke, the female adults exceed the male two to one.

Aside from the great social evil of the day, this preponderance of females is regarded as involving a serious problem. Among the wealthy and well-to-do classes are many grown-up daughters who are supernumeraries, and are not needed in the community, and who are living with no object in life, and apparently to no purpose.

It cannot be denied that while modern civilization has elevated woman in a social and intellectual point of view, to an equal rank with man, it has as yet failed to furnish motives and occupation worthy of her powers. Every teacher of experience knows how difficult it is to appeal to the older class of girls with so strong an inducement to acquire an extended and thorough education as he has readily at command to stimulate their brothers.

For want of an object in life corresponding with her aspirations, a minor key of sadness has run through all the words and works of talented women. No man can speak of the position of woman so mournfully as she has done it for herself. Mrs. Hemans, Madame De Stael, Mrs. Browning, Charlotte Bronte, and, in truth, the majority of intellectual women have, from the beginning to the end of their lives, touched us to sadness even in their mirth. And the mournful memory of Mrs. Siddons, looking back upon the years when she had been the chief intellectual joy of English society, could only deduce one hope, "that there might be some other world, hereafter, where justice would be done to woman."

WOMAN'S RIGHTS IN THE TRUE LIGHT.

It is not in the great tragedies of life; it is more in the unseen and private sorrows; it is more among women that make no complaint than among the complaining, that we see the want of motives to effort in the position of woman. The life—the ordinary life of single women in the community—their life from sixteen to their wedding-day, what is it in tens of thousands of cases, but one long, petty tragedy? A life reputed blameless, indeed, but also aimless; a life without a noble hope, without a large enjoyment, without an earnest purpose! A writer in the *Atlantic Monthly*, a few months since, lamented that "the young women of this country, especially of the higher and middle classes, were wanting in solidity of character, were frivolous in conversation, and *blase* in their manners." How could it be otherwise when, especially among the wealthier class, society gives young girls, as the solid material of their lives, dancing parties, a crochet needle, the last new novel, and the occasional manufacture of rather indigestible sponge-cake? A well endowed mind demands an object, or it languishes. This emptiness of life has again and again led to premature decline for which the doctors could find no sufficient reason. Again and again, says Dr. Holmes, have I been asked by women, almost with tears in their eyes, "Do not merely preach to us resignation, but point out to us some object for existence." How hard it was to answer.

What is education—what all the varied culture of modern times to a perplexity like this? It is only giving wings to a caged bird. "It is a sad thought to me," said an accomplished female teacher, "to watch my fine girls, after they leave school, and see the intellectual expression die out of their eyes for want of an object to employ it." I remember to have heard a mother once say, "I have not thought much on this subject, but I know this: My daughters are more gifted than my sons, more cultivated, have higher aspirations. Yet if my sons lived, all the year round, as unoccupied and listless as my daughters—who, from the usages of society, are compelled so to do—I should be ashamed to have brought them into the world."

This question, in the future, will doubtless find its proper solution. It is a transition age. The old employments of women are passing by. Lowell does the work of the spinning-wheel. The sewing-machine is annihilating the needle, and society is to solve a new problem in the position and occupations of woman.

Sunday School Instruction.

The moral influence of the Sabbath School teacher is incalculable. After all that has been said of the paramount importance of fireside teaching, it may well be questioned whether that of the Sunday School is not almost commensurate, if pursued for a term of years with the same class; especially when we consider all the impressive attendant circumstances of the Lord's Day; its public and comely associations; its prayers and songs, as well as the wonderful power of example, and of healthful, rousing mental competition.

A teacher of a recent Sabbath School gathering in this city said that he once placed a stone in the fork of a tree. A year or two afterward he returned out of curiosity, and discovered that the branches had so grown around it that it was impossible to dislodge the stone. So a principle well planted in the mind of a child becomes at length immoveable. A wave of sound, a word, a note of music, disturbs the atmosphere, vibrating on forever, as some suppose certainly far beyond all trace of finite faculties. Moral conduct, having to do with spiritual existences, thus reproduces and perpetuates itself to an infinite extent, and no human mind can fully measur

its momentous consequences in the spirit world. We are unconsciously writing out characters that will be terribly or gloriously legible in the projected sphere of eternity.

Another remarked, that teachers should endeavor to study the minds and characters of those entrusted to their care. In order to acquire a commanding, lasting influence over them, they should continue to retain the same class. One scholar requires a firm, stern treatment; another can only be controlled and influenced by gentleness of manner. Access there is to every mind, if the right method is adopted for the study of character. For this, time is requisite.

A case in point was cited in proof of the need of study and perseverance. When the French took possession of the Spanish Inquisition, they entered a large room floored with marble. For a considerable time they vainly sought to discover what was underneath it. The soldiers tried the seams of the floor with their weapons. They stamped and beat upon it, determining, if possible, to break through, but failed. Finally an officer suggested the shrewd expedient of pouring water upon it, which was done. The outflow showed where was the secret trap-door, which, by hidden springs, yielded to effort, exposing to their astonished eyes the gloomy, appalling chamber of torture, where lay the dead and the dying. The survivors were rescued by this means. Thus was exemplified the need of effort in obtaining access to the youthful mind, which, whenever the true way appears, is quickly influenced; while the water suggested the searching and persuasive power of Gospel truth, in laying bare the depraved and wretched condition of the natural heart.

Education has been happily defined to be the formation of character. How much of the education and character of coming generations, of States, of governments, depends upon the teachers in the Sabbath Schools! They have more responsibility than secular teachers, since they have to do almost exclusively with the moral nature of the child—with that part which peculiarly allies him to the Deity, and which preëminently exalts him in the scale of intelligence. None can be too much alive to the privileges and responsibility of Sabbath School instruction. Angels might well covet such opportunities as it affords for extending Immanuel's Kingdom, and rescuing souls from eternal destruction.

The duties of the teacher are, chiefly, the study of the Word of God, prayer, and self-sacrificing devotion to his work.

1. He should daily, diligently, systematically search the Scriptures. No other qualification can take the place of this. If he studied nothing else, it would be enough, though other studies would give freshness, variety, and force to his teachings of the Bible. But if, on the contrary, he were to study everything else, to the exclusion of the Scriptures, his labor would be worse than vain. He must compare Scripture with Scripture, history with prophecy, proverb with poetry, doctrine with biography. He ought to be able to concentrate upon a given statement, of fact or of principle, all the lights and the cross-lights of inspiration. If competent, he should not rest satisfied without constant reference to its original languages—without vigorous and refreshing draughts at the fountain-head. He cannot, indeed, know enough of this source of spiritual light and of truth. A little, even, of regular, systematic examination of the Word of God, is of much more value than great desultory application.

2. Prayer alone gives vitalizing force to Sabbath School efforts. Without it, study is vain. Prayer should precede and follow the examination of the lesson, in order successfully to apply and enforce the truth. The teacher should pray for himself, that he be not a stumbling-block or rock of offense; pray for the good-speed of what is taught; pray for a proper knowledge of the characters under his control, and pray that he may employ just the right word at the right time. Foolish, untimely words might undo the labor of a life. Since the work is like writing out books for eternity, careful should we be to preserve a clean page for God's scrutiny. If souls are to be saved, there must be ceaseless prayer.

3. Devotion must seal all such active endeavors. The truly devoted are the only successful reapers in the Master's harvest. A lifeless, dull teacher may do infinite mischief. His life and manner throw a cloud of skepticism over the doctrines he professes to inculcate. He could hardly expect his pupils to credit what affects him so feebly. Devotion makes a man forcible and impressive. Unless the heart is engaged, the work of converting the youth of a school can never go on. H.

A Suggestion.

It is with pleasure we read of the commendable forethought of the citizens of San Francisco in organizing societies for the aid and advice of the incoming population bound to the Golden Land. Strangers are often at a loss, even regarding temporary homes, in a country heretofore unvisited. It is a generous and thoughtful spirit which prompts the action of the citizens in this respect, as well as self-protection. For a community can illy afford to have a swarm of idle, or unemployed persons clogging its business activities. Idleness is too surely "the parent of vice." Many men, and especially young men, are led into evil through the simple fact of having nothing to do, and acquire a taste for habits inimical to industry and virtue, from being led astray in unemployed moments.

The thought suggested itself whether the Young Men's Christian Associations, both in San Francisco and Sacramento, could not prepare a circular letter, addressed to business men remote from the cities, inquiring what opportunities for employment are to be found in their respective localities. In some of the mining districts, we have heard, mill owners and others interested in mining operations, complain of the want, and often of the inefficiency, of help. And now that the work of the farmer is commencing, many persons might find employment in agriculture at remunerative wages. A recent letter to the writer from Santa Barbara, speaks of the steady employment of carpenters and other mechanics there, and of the demand for still more.

Domestic help is also very scarce, except in the cities, China *men* taking the places of servant girls almost universally in the mountains, and at the same average wages. Too often, however, we see advertisements with the intimation that "a *short* distance in the country would not be objectionable." If those who come to California are possessed with the idea that they must necessarily remain near cities; or that money is more easily to be obtained without labor here than elsewhere, the sooner they are made aware of their mistake the better.

The *conditions* of labor only are less exhaustive here, owing to the favorable influences of climate and soil, but the God-ordained mandate, "By the sweat of man's brow he shall gain his bread," has never been annulled. And in all varieties of labor, whether of hands or head, it continues in force. I recently conversed with a young man "just arrived," who said there were two classes of persons composing the bulk of the passengers on the ship in which he came — day laborers from the Eastern and Western States, and Southerners. The last, he informed me, "were not calculated to work; they might teach, or become professors in colleges, but, never having been used to manual labor, were totally unfitted for it;" and besides, he remarked, "they feel it to be degrading."

In the early days of pioneer privation, and heretofore unexperienced hardship, many a man, who was fitted by education and social position, for a higher grade of occupation than manual labor, gladly and willingly accepted such opportunities as were open to him, rather than remain a "cumberer of the earth." And generally such reached their own social plane all the more readily from the very manliness which prompted their acceptance of conditions unsuited to their tastes or former pursuits.

"Necessity knows no law," and if individuals coming to California expect to reap the advantages of a better state of things than the pioneer of '49 encountered, they must have as willing hands, and as energetic natures to surmount obstacles and bear discouragements.

The prices of labor, it would be well to bear in mind, are not so remunerative as formerly; neither are the conditions of labor so hard. The rates of rents, clothing, and provisions are greatly reduced, and with the advantages of good schools, churches, and libraries, it might appear reasonable to suppose that industry and frugality would still result in competence and plenty. But the great misfortune is, that too many persons start for California with the idea that "somehow" they will obtain a fortune, and leave behind them the habits of strict economy and attention to business they pursued in the Eastern States. Having no definite plan of action, they are thrown into the hurried vortex of a new life, only to be taught the bitter lessons of reverse and disappointment. Extravagance and dissipation lead to the same results everywhere, and while all rational recreations are consistent with a life of business, and healthful and invigorating to the spent energies, it is pitiful to see the daring recklessness with which many of our young men spend money. We have seen young clerks dashing out to the Cliff House in expensive and showy turn-outs, when, if they had independence enough to enjoy the pleasure at the cheaper rates provided by car and omnibus, they could in time accumulate a traveling fund which would enable them to visit the different sections of the State, and perhaps locate themselves advantageously in permanent business, where the competition is not so great as in the large city.

The vitality of the atmosphere gives existence a tempting zest and color here, and its fascination generally becomes so imperative as to forbid a return to the more regular routine of life in the Atlantic States. So that we may expect those who come, to remain, as is generally the case.

Let us then turn our attention to the best "aids" we can give the strangers to self-help and self-respect, shielding them from the temptations to idleness, by the idea that it is better to seize any present opportunity of honorable occupation than to incur the question, "Why stand ye here all the day idle?" Sermon,

By Rev. J. S. Wylie.

(PREACHED BEFORE THE PRESBYTERY OF SAN JOSE, AT ITS LAST MEETING, AND PUBLISHED BY REQUEST OF PRESBYTERY.)

"Make full proof of thy ministry." 2 Tim. 4: 5th verse.

The valedictory counsels of any good and true man are valuable for those whose duty it shall be to succeed him, in the toils he is about to relinquish. Such counsels become more precious if they are the parting words of a faithful and laborious Christian minister, who, having arrived at the close of varied and trying labors, and being about to enter into his rest, is permitted to utter words of counsel and caution for those upon whom the mantle of his ministry must shortly fall. Especially is this value increased if the speaker be an inspired apostle, and the words are falling from lips long accustomed to proclaim the messages of life—if they are the essence of a life-work—if they flow from a heart throbbing in deepest sympathy for, and glowing with interest and devotion to, the cause. Under these conditions, the last words become sublime in their significance. Such an one, and infinitely more, was Paul the aged, when "about to be offered," and still eager to impart fidelity and courage to Timothy, his dear son in the Gospel. You behold him, the venerable apostle, solitary, diseased, a prisoner; his treasures and hopes in Heaven, but his thoughts and anxieties clinging to the cause and its advocacy upon the earth. In this spirit he charges, with the fervor of an angel and the wisdom of one inspired, the youthful minister, whose privilege it was to regard him as his father in the Gospel. He sums up, in the words of my text, the substance of these apostolic injunctions, laying a parting obligation as the cap-stone on all he has before written, when he says: "But watch thou in all things, endure afflictions, do the work of an evangelist; make full proof of thy ministry." This is the sublime charge conveyed by the venerable apostle—a charge worthy its heroic utterer, and fitted to dwell forever as the motto of action in the hearts of all "chosen of God and called" to take part in this ministry of reconciliation.

The theme I propose is expressed in these words: "The work of the ministry, a demonstration of personal fidelity." Viewed from any correct standpoint, the high and holy vocation of preaching Christ's Gospel must be regarded as an infinitely solemn and responsible work. No strictly temporal occupation can compare with it for might or responsibility. The themes discussed—the condition and necessities of those addressed—the far-reaching and immeasurable issues resulting from obedience to the message, on the one hand, or disobedience on the other; the dread hour of individual accountability floating in the ever-nearing future, when minister and hearer shall confront each other, either with joy or sorrow; these great facts which break in on the soul at times, like an overflowing flood, and which are never entirely banished from the thoughts of the devoted minister—these great facts tend to encompass this solemn work of entering week by week into the pulpit and speaking in the name of God to guilty men of their dangers and their deliverance—with the most awful and soul-subduing responsibility, and to forget it would be the greatest of crimes. But while this crushing obligation enters into every right conception of this responsible work, there is certainly a method through which its highest obligations are converted into the occasions of genuine and enduring recompense. That end is secured when a degree of conscientious fidelity characterizes the discharge of the work. A demonstration is thus furnished, before God and men, without which the ministry cannot be exempt from censure. The steward who strictly and unshrinkingly performs the duties of his office, can face the master without apprehension or shame; but the ministry is a stewardship of the "manifold riches of God." The ambassador who promptly and without deviation, follows the letter of his commission, thereby secures the approbations of the country or the monarch from whose court he went forth; and the ministry is an embassy; its commissions are sent from the high Court of Heaven.

If personal fidelity can be demonstrated before the eyes of the Master, then the welcome "Well done, good and faithful servant; enter thou into the joys of thy Lord," is to be hoped for in the great day. But without this, it is vain to anticipate approbation or reward. Here, as elsewhere, the commission brings with it the terrible condemnation of unfaithfulness, not less than the gracious sanction of a demonstrated fidelity. It is, then of primary importance to apprehend upon what conditions such a demonstration must rest. Unless the premise is correct, the demonstration becomes false. There may be a vast amount of labor expended on a superstructure, but if the foundation be of sand, it is liable to fall. Not every one putting out to sea shapes his course in a way that shall bring him to the desired haven. Unless the minister has the right message, his very fidelity must prove injurious to the Master and His cause. The first condition insuring a correct demonstration of ministerial fidelity resides in a proper apprehension of the work to be done and the message to be conveyed. This apprehension is formed from the study of God's Word. This blessed Book is the great credential. In it dwells the truth. From it the minister must deduce not simply his text, but the whole texture of his message. The truth he conveys is objective, not subjective. He produces it, not like the spider, from the spinnings of his own invention, but as the busied bee gleans her sweet treasures from the flowers God's hand has made.

Human theories are not the substance of this Gospel message; there must be no modification or dilution, of the great things revealed in God's Word. Duty demands rather that the truth should be conveyed, simply, through the medium of the minister, and without coloring from its transit to the hearing and hearts of those to whom he speaks. The Word of God is the fountain of evangelical truth; from it the living waters flow forth. No man has the right to go outside or beyond its inspired utterances for themes upon which to speak before the great congregation. And not only so, but the peculiar characteristics of the Bible are to pervade and give color to these apprehensions of the ministerial message.

It is true that well nigh every shade of error claims to find its warrant from God's Word—so that it will not suffice simply to lay hold upon the half-truths of inspiration—this is what heresy usually does. A shadow and fragment of truth is made its foundation. But the great and distinguishing doctrines of God's Word are not half-truths. They constitute rather an organized and systematic body of truth, which, like the skeleton of the human form, supports and gives beauty to the Gospel plan. These grand cardinal doctrines are to be apprehended and woven into the very texture of the soul. And it is necessary for the ambassador of Christ conclusively and unqualifiedly to believe himself what he would convey to others. There is a power in deep personal convictions which speaks to the heart. It gives force and fire to truth, and renders men of one idea potent either for evil or good; and ministers of the Gospel should be men of one idea in the good sense of the term—able to say, with the apostle, "This one thing I do."

Again, we say, the truth must be apprehended, through the patient, persevering, and persistent study of God's Word. Mightiness in the Scriptures secured by ardent toil. And upon this the writings of those best qualified to elucidate and defend these glorious truths. In this labor the strength and fidelity of the Gospel messenger should be severely and persistently exercised.

It is the renown of that pulpit to which this Presbytery belongs that its occupants have ever been qualified and ready to proclaim and sustain those great doctrines of grace which Christ and His apostles, Augustine and Calvin, Farel and Turretine, Luther and Knox, Whitfield and Edwards, so nobly maintained; and now, as before, that renown can be preserved only by the faithful apprehension of those sublime truths which, treasured in God's Word, are to be deduced by patient toil, and set forth with conscientious fidelity. If the Presbyterian Church retains her position among the sisterhood of churches, it must be by the time-honored methods which have crowned her with glory in the past. These sublime doctrines of truth need no modification, but simply the vitality of living contact with the present wants of men. Received into the soul of the ambassador, they are to be reproduced, not under a modified form, but in their adaptations to man as he is, and as he has always been. Now as ever, these humbling truths are the only adequate remedy for sin—the "iron must enter the soul;" man must descend before he can hope to ascend.

But, in the second place, it is equally important that what has been duly apprehended should be, with corresponding fidelity, conveyed into the hearer's heart; the thorough demonstration of ministerial faithfulness requires the communication of the whole truth, and nothing but the truth—the Gospel of the great God and our Savior Jesus Christ, in all its length and breadth. The prophet received his commission from God in these words: "Proclaim unto them the words that I bid thee." Nor is that commission modified now. The miller who casts into his hopper all kinds of grain must necessarily behold an impure flour as the product; but he who grinds nothing but wheat will furnish food for kings. There is bread enough and to spare in our Father's house; what need, therefore, to go abroad, gleaning, for that wherewith his people may be fed? Evangelical truth furnishes a sufficiently wide range, from which to select, for the ministrations of God's house. This, then, is the substance of the Gospel message. The glorious revelations of God's Word, brought down to the comprehension of men, and urged home upon their consciences with "demonstrations of the spirit and with power." The few years the minister has to occupy are not sufficient to exhaust these sublime topics. On the contrary, they expand and deepen with study, as did the miraculous waters of the prophet's vision, until their depths afford a fitting opportunity for the swimmer to stretch forth his hands. And upon their nutritious substance, to change the figure from one Scripture metaphor to another, the sheep thrive and rejoice.

The important point here is to make the truth plain. Unless the fodder be brought within the reach of the sheep, it matters little how excellent its quality, they are liable to starve, while their hungry eyes gaze on the inaccessible food. Three things are especially needful in conveying the truth of God to men. They include the matter, the manner, and the spirit.

The matter should comprehend truth in its totality, without elimination, and without modification. God's command is "to proclaim the message that I bid thee," and it were cowardice and a crime to shrink from the duty. "I have not shunned," the apostle said, "to declare unto you the whole counsel of God," and neither should any who follow in his footsteps. Originality in this work does not consist in proclaiming theories God's spirit never suggested, but in so grasping and presenting what inspiration has provided as to make it effective in reaching the consciences of men. There is an infinite variety in the applications and adaptations of these sublime principles; they impinge upon the soul in every imaginable angle, and no substitute will effect the end they are designed of God to secure.

The manner of conveying these truths demands great plainness of speech. Inasmuch as men are not born theologians, familiar with the nomenclature of the schools, it is necessary to so present the truth that it shall not suffer in its presentation. Life should pervade the dry bones. The soul of the Christian orator should overflow in his words. Rigidity, dullness, cold didactic statement—these are the paralysis of efficiency. They inject drowsiness into the eyes, and congeal ice around the hearer's heart. But no man need fall into these errors un-

less he choose, and any man will without vigilance and effort. When we consider the fearful nature of the work, the momentous issues clinging to its results, and the sublime character of the truths themselves, when exactly understood and faithfully communicated, the most phlegmatic should become animated, the most thoughtless serious.

And then the *spirit* in which the message should be conveyed. What need has every messenger of Christ's Gospel of that spirit of which the sainted McCheyne inquired when he asked his friend, "Were you able to preach the doctrine *tenderly*?" The conscious presence of this tender yearning spirit will produce its effect on the hardest heart.

But once, more, to make full proof of the ministry requires a judicious *adaptation* of the truth to the special wants of the hearer addressed. The minister of Christ's Gospel need not relinquish the use of that ordinary common sense with which all men are more or less endowed, and which, in its proper place, will deliver any from a multitude of follies. Communicating God's truth, like every other employment, has its peculiar conditions. There are themes more appropriate on one occasion than others. It does not subserve the end of enduring success to dwell too exclusively on any single aspect of the truth, however important or essential it may seem. The skillful angler adapts his bait to the known tastes of the finny denizen of the brooks. If one artifice will not succeed, he adopts another with patient zeal. And he who fishes for men should be no less wise in his attempts to save their souls. It is utterly vain, for instance, to bring up old dead issues in the pulpit, and waste precious time in their discussion or refutation. The questions which lay hold upon men's present and admitted wants are sufficiently numerous and weighty to occupy the time and the energies. Let the antiquarian or the historian disinter these venerable skeletons of controversies long passed away; but for the pulpit of to-day there is "a more excellent way," and none can wisely sacrifice its influence for issues which fail to stir the popular heart. And generally it is safe to affirm that in these adaptations of God's truth to men's present wants, too little effort is made to bring home its realities to the conscience and convictions of the hearer. Truth is held up in a masterly way, like a marble statue, before the mind. Its glorious features are skillfully delineated, its sublime reality confirmed by an unanswerable array of arguments, and there the work is left, in the hope that men will take the demonstration home to their own souls. But the hope is vain; the bold finger of personal appeal must point, as did Nathan's to the guilty king, otherwise conscience will speak in vain. You may take it for granted, if escape is possible, it will be sought. Not until every outlet has been closed, and the hearer made to feel that these utterances of God's Word apply, and are designed to apply, to his condition and wants, will he cease from being an indifferent spectator of the scene. Adaptation, pungency, resistless appeal, these *rub in* the truth so as to make it *stick* where it falls. The hearer may go away apparently unmoved, but he conveys an arrow in the joints of the armor, and his very indifference only fixes it surer in his soul.

There are multiplied ways in which labors like these tend to demonstrate ministerial fidelity. *In the first place*, they secure the approving testimonials of one's own conscience. Where there has been conscientious fidelity in all things, expressed in the earnest desire to know God's will and the resolute endeavor to fulfill that will, regardless of sacrifices, labor, or result, the conscience must avow its approbations, and no approval is more precious to the man of God. If all is right within, it matters little how tempestuous the storms without. The servant of God, who can say, with Paul to the Ephesian elders, "I have not shunned to declare unto you the whole counsel of God," ought to be, and is, a happy man. Judged according to the standards of temporal success, his prospects may be limited; but tried by the testimony of his own conscience, he has been faithful in his lot.

Again: labors like these procure the acknowledgment of God's people, a blessing every servant of God must highly esteem. "The Church of Christ, the pillar and ground of truth," is built up and made strong where the Gospel has been faithfully and systematically proclaimed, and all who rejoice in the prosperity of Zion will hail the event with gratitude. The sincere approbation of one mature and experienced Christian, pronounced upon ministerial fidelity, is worth more to the laborious herald of the Cross than ten thousand resolutions unanimously adopted by those either tacitly or avowedly the enemies of Jesus. The sheep know the shepherd's voice, but an hireling they will not follow. Happy, therefore, that man upon whose labors the approval of the people of God rests. And whatever may be said to the contrary, labors like these best attain the sanctions of the ungodly and impious. It has ever been true that the vicious and profane flock to hear those who, like John in the wilderness of Judea, and Jesus wherever He came, proclaim the necessity of repentance and regeneration. An emasculated, rationalistic pulpit secures a prayerless church and indifferent auditors.

However much men of the world may announce themselves pleased with "smooth things" and a theory of religion which exhausts itself in glittering generalities, they tacitly evince their contempt for such imbecilities by thronging to hear men like Luther and Knox, Wesley and Whitfield, Chalmers and Spurgeon, who denounce sin in all its forms, and preach nothing but eternal misery for all who continue to neglect the duty of repentance toward God, and faith in the Lord Jesus Christ. Popularity in itself is certainly a poor criterion of fidelity, and yet, where it follows in the wake of fearless earnestness, and intense devotion to evangelical expositions of Gospel truth, we should assuredly regard it as the Divine method of making even wicked men the witnesses to the power of God's word.

And *last*, but greatest of all, the sanctions of the Divine Spirit rest upon labors like these with special and abiding power. When God is honored by the untiring use of those sublime instruments He has ordained for the furtherance of His Kingdom and glory, He withholds not the evidence of His presence and approval. "His word shall not return unto Him void." The workman may lie down and die, but the work pauses not in its glorious career. He who goes forth against the grim giants of an ungodly world, encased in the ponderous Saul's armor of a carnal wisdom, will assuredly give his glory to the foe; but the humble shepherd, clad in his native apparel, and carrying the smooth stones furnished of God from the brook by the way, shall smite the giant, while he hopes for victory without a struggle. "The weapons of our warfare are not carnal," but they are "mighty through God to the pulling down of strongholds." The Gospel warrior needs no new weapon of modern military invention with which to assault and overthrow the towers of error and sin. Snatching from its sheath that sword of the Spirit, "which is the Word of God," and bearing upon his arm the "shield of faith," and on his bosom "the breast-plate of righteousness," while within there glows the resolute purpose to employ these, and none but these, in the conflicts of God, he may rest assured, "there be more with him than any that can come against him," and though he fall down, slain upon the unconquered field, yet victory will surely crown the issues of the struggle, and his triumphant soul be a sharer in the distributions of the eternal reward. Take courage, then, oh, men of God! The eye of the King rests upon you. Remember the end, for it is near. "Make full proof of your ministry." "Endure hardness as good soldiers of Jesus Christ." Let His matchless love for a sin-wrecked world be the beginning and the ending of your message. In labors like these demonstrate before the presence of angels and men the sublime fidelity of your ministry, until at length the voice of God shall call you, with the faithful of all ages, to rest from your labors in the fruition of Heaven.

DR. H. AUSTIN,

Dentist,

No. 634 WASHINGTON STREET,

Between Montgomery and Kearny,

(Over San Francisco Baths,) SAN FRANCISCO.

The American Sunday School Union.

Having commenced the Sunday School Missionary work on the Pacific Coast, we are ready to aid in organizing Sunday Schools and aid existing needy Schools.

We have just received a fine and large assortment of the publications of the Society, which we supply to Schools at reasonable rates. We also supply the periodicals of the American Sunday School Union. The

CHILD'S WORLD,

a beautifully Illustrated Paper for Children and Youth. Monthly, at 12½ cents each per year for ten copies and upwards, and 24 cents for the semi-monthly. Also,

THE SUNDAY SCHOOL WORLD,

a Sixteen-Page Quarto Monthly Paper for Sunday School Officers and Teachers, at the low rate of Fifty Cents per Year. No Sunday School Teacher should be without this paper.

Rev. Richard Newton, D.D., the Editor of these papers, is acknowledged to possess unsurpassed abilities as a Sunday School writer. The above rates are in Currency.

Catalogues of the Society's publications, and Sample Copies of its Periodicals furnished gratuitously on application to Wm. F. Peters, care P. O. Box 1007, or at the Depository, 302 Montgomery Street, (Second Floor, Room No. 2,) San Francisco, Cal.

Miners' Foundry and Machine Works,

Nos. 245 to 255 FIRST STREET,

SAN FRANCISCO.

HOWLAND, ANGELL, & KING, Proprietors,

Manufacturers of Machinery for

QUARTZ MILLS, SAW MILLS, POWDER MILLS, FLOUR MILLS, SUGAR MILLS, PAPER MILLS, STEAM ENGINES OF ALL KINDS, AMALGAMATORS OF ALL KINDS, MINING PUMPS, OIL WELL TOOLS, ROCK BREAKERS, HOISTING WORKS,

—AND—

Machinery and Castings of all kinds, either of Iron or Brass.

Boilers and Sheet Iron Work, in all its branches.

Shoes and Dies of White Iron, manufactured for, and imported by us, expressly for this purpose, and will last 25 per cent. longer than any other made on this coast.

Russia Iron Screens, of any degree of fineness. We are the only manufacturers on this coast of the "Hicks Engine," the most compact, simple in construction, and durable, of any Engine in use.

Family Reading.

Daybreak.

A wind came up out of the sea,
And said, "O mists, make room for me."

It hailed the ships, and cried, "Sail on,
Ye mariners, the night is gone."

And hurried landward far away,
Crying, "Awake! it is the day."

It said unto the forest, "Shout!
Hang all your leafy banners out!"

It touched the wood-bird's folded wing,
And said, "O bird, awake and sing."

And o'er the farms, "O chanticleer,
Your clarion blow; the day is near."

It whispered to the fields of corn,
"Bow down and hail the coming morn."

It shouted through the belfry tower,
"Awake, O bell! proclaim the hour."

It crossed the churchyard with a sigh,
And said, "Not yet! in quiet lie."

—*Longfellow.*

"How Rich Ben Adam is."

Ben Adam had a golden coin one day,
Which he put out at interest with a Jew;
Year after year awaiting him it lay
Until the doubled coin two pieces grew,
And these two, four—so on, till all the people said,
"How rich Ben Adam is!" and bowed the servile head.

Ben Selim had a golden coin that day,
Which to a stranger asking alms he gave,
Who went rejoicing on his unknown way.
Ben Selim died too poor to own a grave;
But when his soul reached Heaven, angels with pride,
Showed him the wealth to which his coin had multiplied.

Ministers' Children.

Rev. T. Lightbody sends a well put article in refutation of the aspersions so often cast upon the children of ministers and deacons. We extract as follows:

I. Nothing ought to be *presumed* that seems to contradict the Bible. Let God be true, even if it should follow that all the clergymen in the land have been remiss in their duty.

II. It does not follow that children are properly trained, because they have good parents. Of one of David's sons it is recorded, "His father had not displeased him at any time in saying, Why hast thou done so?" And it is well known Eli was sadly deficient in his duty as a father.

III. Children are much more likely to follow their mothers than their fathers.

IV. If it were true that ministers' children were so bad, it might be traced in some measure to the unreasonable expectations some parishes have with regard to the minister's wife. If she must necessarily be much away from her little ones in their early years, the minister's children will stand but a poor chance of being well trained. If God had intended what some expect, He would never have caused it to be written in his word, "A bishop must be the husband of *one* wife." Besides the number required for the parish, one would have been allowed for himself and his children.

V. But is it a fact that the children of ministers and other good people do frequently not turn out well? If there be truth in the adage, "Figures do not lie," it is a gross slander. Take the first hundred biographies in Dr. Sprague's great work, and it will be found that over one hundred and ten of their sons became ministers; and a very large proportion of the remainder became ornaments and blessings to society.

From reliable statistics gathered in various parts of the United States, it is found that out of 5,548 children of ministers and deacons, over fifteen years of age, only fifty-four, or less than one in a hundred, could be said to have turned out badly.

Rev. E. Smith, in his work, "Nine Years amongst the Convicts," says: "For the past nine years in which I have had personal acquaintance with several hundreds of convicts, I have not found a son of a clergyman, deacon, class-teacher, steward, or church-warden among them, except one, and he was early adopted into a wealthy, but wicked family."

I contend then, that when children of ministers and other good people do not turn out well, the cases are taken notice of and spoken much about *because they are so singular.*

In the whale-fishery it is customary, where a whale has been discovered, for a harpoon to be cast at it. It frequently happens that after the fish has been pierced, it dives into the deep, but generally it is at length secured. And sometimes after godly fathers and pious mothers have done their utmost. the favored child may seemingly dive into the depths of sin. But in many—I believe in most cases—he is at length secured for God and goodness.

Fore-runners and Ghosts.

"Do you believe in fore-runners?" asked a nervous lady of old deacon J———.

"Yes, ma'am," replied the Deacon, "I've *seen* them."

"Bless me!" exclaimed the lady; "do tell!"

"Yes," continued the Deacon, fixing his eyes with a solemn stare on a dark corner of the room; "I *see one now!*"

"Mercy! mercy on me!" shrieked the lady; "where?"

"There! there!" said the Deacon, pointing to where his eyes were directed. "That cat, ma'am, may be called a fore-runner, for she runs on all fours!"

Speaking of apparitions: that is rather a forcible argument urged against the theory of their existence by one of the characters in "The Grimsby Ghost:

"Ghosts be hanged! It's too late in the day for 'em by a whole century; they're quite exploded; went out with the old witches. No, sir! Workmen may rise for higher wages; the sun may rise, and bread may rise, and the sea may rise, and the rising generation may rise, and all to some good or bad purpose; but that the dead and buried should rise, only to make one's hair rise, is more than I can credit. What should they rise for? Some say they come with messages or errands to the living; but they can't deliver 'em for want of breath, and can't execute 'em for want of physical force. If you come up out of your grave to serve a friend, how are you to help him? And if it's an enemy, what's the use of appearing to him if you can't pitch into him?"

Ah, my friend, between us and the other world there is an impassable wall—a wall of adamant, through which nothing can penetrate.—*Knickerbocker.*

The Living Dead.

It was a sad thing just now, in the gay and busy street, under a sunny, cloudless sky, with the healthful current of life coursing joyously in our own veins, to relinquish the feverish and wasted hand of a friend at whose door Death will call ere long, and walk with him through the Dark Valley. "I am going," said he, in a voice scarcely above a whisper; "I am fast going; I shall leave all this!" and he turned his glassy eye upward to the calm, clear heavens, and waved his hand toward the busy crowds that rolled through the street or pattered with hasty steps upon the pave; "I shall soon leave all this!"

"It is but too true!" thought we, as we turned to watch his slowly receding footsteps:

——"Yet a few days and thee
The all-beholding sun shall see no more
In all his course; nor yet in the cold ground
Where thy pale form was laid, with many tears,
Nor in the embrace of ocean, shall exist
Thy image."

May he be able to say, with joy, when the Last Messenger shall await his departure, "Come, Death, to this frail, failing, dying body! come the immortal life!"—*Carlyle.*

Character and Reputation.—A Western pastor having written a reply to some malignant newspaper attacks, sent it to a friend to be submitted to Dr. Wayland for his advice. The doctor read the article, considered it for a few moments, and said, in substance,

"Tell brother —— to take no notice of the attacks. A man's *character* will take care of his *reputation*, and he need not fear the malicious attacks of his enemies. It is never well for a man publicly to vindicate himself from charges which the whole tenor of his life contradicts. Those who know the man do not need the vindication, and those who don't know him will not care enough about it to read what he may write."

Our ministerial friend said he had lived long enough to be more thankful than he could express for the advice then given.

The Young Folks.

Song for the Children.

Come, stand by my knee, little children,
Too weary for laughter or song;
The sports of the daylight are over,
And evening is creeping along;
The snow-fields are white in the moonlight,
The winds of the winter are chill,
But under the sheltering roof-tree
The fire shineth ruddy and still.

You sit by the fire, little children,
Your cheeks are ruddy and warm;
But out in the cold of the winter
Is many a shivering form.
There are mothers that wander for shelter,
And babes that are pining for bread;
O! thank the dear Lord, little children,
From whose tender hand you are fed.

Come look in my eyes, little children,
And tell me through all the long day,
Have you thought of the Father above us,
Who guarded from evil your way?
He heareth the cry of the sparrow,
And careth for great and for small,
In life and in death, little children,
His love is the truest of all.

Now go to your rest, little children,
And over your innocent sleep,
Unseen by your vision, the angels
Their watch through the darkness shall keep.
Then pray that the Shepherd, who guideth
The lambs that he loveth so well,
May lead you in life's rosy morning,
Beside the still waters to dwell.

Gracie; or, the Bright Side.

Gracie always looks on the bright side. One day when she was just old enough to run about alone, and to prattle very pretty baby-talk, Bridget happened to break the handle off the covered China pitcher which was used for syrup at almost every meal.

"Mamma dit a new one," suggested little Gracie consolingly to poor Bridget, as she stood bemoaning her misfortune in true Irish fashion.

"Mamma, however, did not get the new one before the next meal; so the pitcher without a handle made its appearance at the breakfast table. It was rather awkward work handling it: so papa found, and even Gracie noticed, as he poured the syrup on her griddle-cakes; but never at a loss for the bright side, she looked smilingly into her father's face, lisping,

"We're dlad its dot a *nose*, ar'nt we, pa?"

So, thanks to Gracie, a ray of sunshine, reflected even from a broken pitcher, made light and warmth at the breakfast.

The little cousins, too, who were present, repeated the story at their home, where others were led by Gracie's bright example, saying with her as they tried to make the best of the unwieldy circumstances of life, "We are glad the pitcher has a nose."

Gracie has long ago laid aside her baby-talk, but never her happy faculty of looking on the bright side. At home, the very sound of her footstep is a token of joy. At school, the teacher smiles approvingly at the very thought of Gracie, and her schoolmates all love the one who has so much of that "charity" which "thinketh no evil," that she never looks on any but the bright side of their characters.

Did I say Gracie *always* looked on the bright side? Ah! there was a dark, dark day, when even Gracie saw no light; when she looked downward into the blackness of her own heart, beholding only sin, and upward to an angry God, beholding only condemnation. But soon the Holy Comforter whispered the

sweet name of Jesus in Gracie's sorrowing heart, and she fled quickly from the darkness of self and sin to the cross crowned with its bright halo of eternal glory. So Gracie is a joyful Christian now, ever looking on the bright, bright side, where Jesus sheds unfading light.

Happy Gracie! happy now, and happy forevermore.

I Will Try.

"Oh, dear! we have got to write a composition; and such a subject as Miss Williams has given us." So said my wide-awake little niece, Bessie.

"What is your subject?" I asked.

"'I will try.' What can I write about that?"

"What can you write? Why, what can you not write? I should think you would be, as the French say, embarrassed with the riches of your subject. 'I will try,' has done a great deal worth telling of, and the men who have enlisted under 'I will Try's' banner have been those to whom we owe nearly all our happiness and comfort. There was George Stephenson, born in a mining district, near Newcastle, England, and while a mere child, obliged to earn his own bread among the mines, principally by working on the machinery. He became a celebrated 'engine doctor,' as he was called, and thought himself well off when he earned twelve shillings a week. This poor boy, with no education but what he got in the little time that he could spare from his daily labor, and after he had mended the watches and clocks of his neighbors, saw his son a member of Parliament; became himself a rich man, and the greatest engineer in England. He made so many improvements in locomotives and railways that he has been called the inventor of railways.

"Then how many physical difficulties 'I will try' has overcome. Dr. Nicholas Sanderson, another Englishman, lost his sight when only a year old; but when he grew up he was a great scholar, and taught mathematics and optics at Cambridge University. Think of that—a blind man explaining to students how and why they could see. But all the men who have tried and succeeded are not Englishmen. It is told of the President of one of the first colleges in the United States, that he was, when quite young, reading the life of Benjamin Franklin, and said to himself; 'Here was a poor, ignorant boy, who had no one but himself to depend upon, but he rose to be a great and celebrated man; why may not I do the same? I will try.'

"How often must each of the poor soldiers who has lost his right hand, have had to say, 'I will try' before he learned to write with his left? That must have been a brave fellow who, when both hands were gone, learned to write with his mouth.

"The man who wrote the best account that we have of bees and ants, was blind. If a man who could not see could study and write about such little creatures, cannot you think of something to write about 'I will try?'

"'I will try' is like the steam in a great engine, it keeps all the machinery in motion."

"I will try," said Bessie; and she ran out of the room, and her merry voice came back to me from the stairway, as she sang,

"If at once you don't succeed,
Try, try again."

—*New York Observer.*

Cat and Kitten.

"Granny, granny! the air is full of canaries; it is, granny! Just like Miss Lilly's, in the cage—the cage, granny, that she rubbed my nose against because I just looked at it." And the Kitten stood with her back arched, her tail straight up, and her eyes as bright as stars and as round as beads.

"Nonsense!" cried the old Cat.

"Well, then, they are butterflies. Yes; they *are* butterflies!" said Kitty, lifting up one little paw for a start.

"Butterflies in December!" said the old Cat contemptuously.

"Then—then—then—they are——," cried Kitty, and off she scampered, without waiting to finish, and jumping up to catch one, fell backwards and over and over.

"They are nothing but dead leaves, granny!" she exclaimed, returning with an air of disappointment.

"Of course, they are dead leaves. I knew that," said the old Cat.

"Did you? Then why didn't you tell me?" asked Kitty, half affronted.

"Because, my dear," replied the old Cat, "young people are apt to set a higher value on what they have some trouble in learning than on what they get for nothing.

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

Also, SCHOOL FURNITURE.

WARREN HOLT,

PACIFIC COAST ITEMS.

The "Sweetwater Infatuation" has broken out violently in Idaho, and nowhere more so than among the farmers of Boise Valley. Nearly every day little squads of mules and packs are wending their way across the bridge eastward. Ask where they are going, and the answer is—"Sweetwater!" The Boise *Statesman* says: "We make no objections. Let every man go who feels inclined. He will be good for nothing if he stays, after once taking the "fever." A man who has Sweetwater or any other humbug on the brain, won't work. With land, team, seed and tools put in his hands, he wouldn't raise enough to support himself. Therefore, we, rather encourage all who are at all anxious to go."

A New York paper says: "When men come home from California they have a way of talking about 'the way we do things on the Pacific' that rather nettles Eastern men. There is more liberality and mutual confidence out there, they say, and not so many rogues, despite the loose way people have of dealing with each other. This is not very pleasant talk to hear; but what must we think about the facts of the case when we run plump against such a statement as that little San Francisco, with a hundred and twenty thousand inhabitants, pays more money into the internal revenue of the United States than New York City, with its eight hundred thousand? So it is however. *Are* the people honester out there?"

The Santa Cruz *Times*, speaking of the Salinas Valley, says: "In addition to grain husbandry, this valley sustains an important wool trade; the merino flocks of the Sausal Rancho, and the fine improved sheep owned by Messrs. Carr, Reiadon, Bardin and others number probably 30,000, and add materially to the wealth of the plains. The dairying business has received an immense impulse within the same period (two years), and the local establishments vie in perfection of details and quality of produce with the famed dairies of Clear Lake, Petaluma and Sonoma.

The Arizona *Miner* announces the departure of several citizens to the southern section of that Territory, and predicts their fortune thus: "Twelve months hence will find them in a little log cabin with the ground for a floor, breeches patched with flour sacks, watching a quartz claim of supposed fabulous richness, with a hole sunk on it about twenty feet deep, waiting 'to make a sale.' This is about an average of the 'luck' that has and will attend prospectors to the indefinate region of southern Arizona."

The San Jose *Mercury* says: "No large apple, pear or peach orchards have been planted in this section within the last five years, and but very few vineyards of native grapes; while our nurserymen have been unable to supply the demand for cherry trees, and the better varieties of foreign grape roots and cuttings. We regard this diversion in favor of the culture of the more costly varieties of fruit as a move in the right direction, and one which will enable our orchardists eventually to 'get even' on former losses.

The opening of the San Joaquin River to light draft steamers is likely to have a very favorable effect on the prosperity of the counties of Stanislaus, Merced, and Fresno, where the progress of settlement has in years past been hindered by the extreme difficulty of bringing produce to market. The steamers are doing already a large business, large tracts of arable land have been taken up, and this seems likely to become one of the prominent agricultural regions in the State.

A correspondent of the Stockton *Independent* speaks as follows of one of the growing cities in San Joaquin Valley: "San Joaquin City rivals San Francisco in space to build on. We presume that the citizens have been induced by the beauty and mildness of the climate to dispense with houses, which usually mark the sites of other cities, and the citizens themselves appeared to be absent, no doubt on important business."

A grand entertainment was given at the Lick House, on Tuesday night, in honor of Hon. Anson Burlingame, the Chinese Ambassador, and his suite. Gov. Haight presided. Speeches were made by the Chairman, Gen. Halleck, Mr. Burlingame, Delos Lake, Edward Tompkins, and Newton Booth. The Embassy left for Washington on the steamer of Thursday.

At the recent celebration of the steamship pioneers, Thomas H. Selby, Esq., said that the present prosperity of California, and the increased value of real estate, arose from the fact that our State had become self-supporting. He thought that during the past year we had retained in the State $30,000,000. He believed that in fifty years San Francisco would become the financial centre of the world.

The Oregon City *Enterprise* says: "In no other country, that we can speak from a knowledge of, are salmon and trout such ordinary dishes that the laboring man will even turn up his nose at them. The delicacies of other lands are common food in Oregon—oysters, fish, game and every product under the sun, may be had here in abundance."

The surveys for the Ione Valley, San Joaquin, and Sacramento Valley Railroad have been completed. It will start from a point on the Sacramento River opposite Rio Vista, and will intersect the Western Pacific Railroad at Woodbridge, in San Joaquin County, passing through one of the most fertile sections of the State.

A wharf is to be built immediately at Saucelito for the landing of materials for the construction of the Railroad. Ferry-boats will soon begin to make regular trips from this city. This will afford facilities for forming twenty-five or thirty new homestead associations.

A car is being made for the San Jose Railroad which is to be used exclusively for the purpose of bringing to market strawberries and other delicate varieties of fruit, so liable to be injured by the ordinary method of transport.

A Chinaman has been naturalized in Boston. California would perhaps be willing to naturalize *one* could she thereby get rid of the rest. Our people, especially the Celtic portion of them, are strangely averse to the Asiatics.

The Santa Clara *News* says: "Great excitement exists in this community about emigrating to the fertile lands of the lower country. We hear of a large number of persons who are intending to leave immediately."

Cutting Logs.—Much activity prevails along the coast the present season in the lumbering business. Large numbers of men are employed in the woods cutting logs.

The new Giant Powder seems not to have succeeded so well in the mines, as the result of experiments in this city and elsewhere seemed to indicate that it would.

James Brooks, for twelve years editor and proprietor of the *Golden Era*, has closed his connection with that paper. He is succeeded by Charles S. Capp.

A farmer near Paradise City has recently purchased thirty-five tons of wheat sacks for the coming harvest at a cost of $11,800.

The Reese River *Reveille* speaks of the existence of a turquoise mine in the Columbus District which may prove valuable.

The valley of the Willamette, in Oregon, contains the largest compact body of cultvated land on the Pacific slope.

The Southern Pacific Railroad Company has commenced work at San Jose.

Strawberries and green peas are becoming plenty in our market.

The haying season has begun in the upper San Joaquin Valley.

TELEGRAPHIC SUMMARY.

Eastern.—The Constitution has been adopted in Louisiana, Georgia, and North and South Carolina, by decisive majorities....Wm. C. Rives, formerly Senator from Virginia, died on the 26th inst., aged seventy-five years....The President has nominated Schofield as Secretary of War in place of Stanton removed. He declines the nomination....The revenue for the first five months of the fiscal year, especially from whiskey, falls far short of the estimates by the Commissioner....A Washington clergyman has been impeached and removed by his congregation.

Congressional.—In the Impeachment Trial, Butler, Boutwell, Stevens, and Williams, for the Managers, and Nelson, Groesbeck, and Evarts, for the defence, have concluded their arguments....Bills admitting North Carolina, South Carolina, and Louisiana have been introduced in the House, and referred to the Reconstruction Committee.... A dispatch to the *World* says the friends of the President are confident of his acquittal.

Foreign.—The Abyssinians were badly whipped at Magdala on Good Friday, and the town taken by the English forces. King Theodore was killed in the battle. The English people are greatly rejoiced at the victory....Prince Alfred, while on a visit to Melbourne and Sydney, was shot and dangerously wounded on the 12th of March. The would-be assassin has been arrested and condemned to be hung.... Barrett, of the Clerkenwall prisoners, has been found guilty, and the others acquitted.

WEEKLY MARKET REPORT.

San Francisco Cattle Market.

Wednesday, April 29, 1868.

Prices are essentially the same as last Wednesday. The only change we have to note is an advance in Pork, caused by a temporary scarcity in the supply.

We quote slaughterers' prices as follows:

Beef—American, 1st quality, 8@9½c ℔ lb.
do 2d do 6@8c ℔ lb.
Veal—Steady at 8@12c ℔ lb.
Mutton—In fair request at 5@6c ℔ lb.
Lamb—Plentiful at 8@9c ℔ lb.
Pork—Undressed, grain fed, 7@8c; dressed, medium range, 10@12c ℔ lb.

Produce Market.

Flour—Sale of 5,000 bbls Oregon, for export, private. We quote city brands nominal at the following figures:

Superfine, hf sks, ℔ 196 lbs.....$6 50@6 75
qr sks..... 6 75@7 00
Extra, hf sks..... 7 25@7 50
qr sks..... 7 50@7 75

Wheat—Sales include 600 sks choice Santa Clara, $2 50; 2,000 sks ordinary coast, for export, $2 30 ℔ 100 lbs.

Barley—Sales of 400 sks feed and 800 sks brewing, private; 300 sks brewing, $1 85. We quote the market dull at $1 75@1 85 ℔ 100 lbs.

Oats—The nominal range of the market is $2 54@$2 70, though prices are very weak, and round lots could not probably be placed above $2 50@2 60 ℔ 100 lbs.

Potatoes—Sales include 400 sks ordinary Tomales at $1; 100 sks good do, $1 12½; 200 sks choice Humboldt, $1 35. We quote the market dull at $1 12½@1 37½ ℔ 100 lbs for best kinds.

Corn—Is quiet at $2 25 for Red, $2 30 for pale Yellow, $2 35@2 40 for deep Yellow, and $2 25@2 37½ ℔ 100 lbs for White. The last named description is more plentiful at the decline noted.

Rye—Has advanced to $1@$2 12½ ℔ 100 lbs.

Buckwheat—Without inquiry at $1 60@2 ℔ 100 lbs.

Onions—Very scarce; jobbing at 12½c ℔ lb.

Beans—We give the medium quotations as follows: Bayo, 3½c for old; Butter, 4½@4⅝c; Pea, 5½@6c; small White, 5½@5¼; Pink, 3@3¼c and Red, 2⅛@2¼c ℔ lb.

Bran—In moderate demand at $30@32 50 ℔ ton.

Middlings—We quote fine steady at $50, and feed descriptions at $35@40 ℔ ton.

Oil Cake Meal—Moves off freely at $30 ℔ ton.

Hay—Is slack at $16@23 ℔ ton, with light sales.

Dairy Products—The market is well supplied with all kinds. California fresh roll Butter, 27½@32½c, with 30c as the medium; firkin, 30@32½c for store and ranch-packed; Cheese, 15@17c, the latter figure for Steele's and kindred qualities. Eggsare plentiful at 26@27½ for Hen, and 22½ ℔ doz. for Duck.

Poultry—Live Turkeys, 16@17c; dressed do, 18@19c ℔ lb; Hens and Roosters, $6 50@7 50; Spring Chickens, full grown, $8@9; Broilers, $6@7 50; Ducks, $5@6 ℔ doz; Geese, $2@2 50 ℔ pair.

Provisions—California smoked Bacon, 15½@16c; Oregon do, 12½@13c; California Hams, 17@18c; Oregon do, 16½@17c; California Lard, 14@15c, and Eastern, 13@13½c ℔ lb.

Wool—Sales since last Wednesday aggregate 200,000 lbs. We quote spring burry at 12½c, and shipping grades, 15@17c ℔ lb, the latter figure for choice clips.

Hides—Sales since last Wednesday of 600 California dry, usual selection, 14@14½c ℔ lb.

Tallow—We quote fair to choice Beef and Mutton at 7¼@7¾c ℔ lb.

—*S. F. Bulletin.*

CURRENT TOPICS.

The success of the English expedition to Abyssyhia has been more complete, and more speedily reached, than was anticipated by any. The news that Theodore had been killed, that his army and strongholds had been captured, and that the captive British subjects had all been released, occasioned quite a reaction in the state of popular feeling throughout the Empire respecting the war, and the pride of success which has always been prominent in the English will tone down much of the dissatisfaction which had begun to find expression. There is one immediate result of the expedition which will be valuable in its bearing upon heathen nations that may be inclined hereafter to disturb missions established among them. It is, that no difficulties nor expense will prevent the government from which these missions are sent from protecting those whose lives or property may be in jeopardy. No doubt, also, the kingdom of Abyssinia will now be placed in the hands of some prince less opposed to the introduction of Christianity, and good may spring out of what was designed only as evil. God's purposes are wrought out by strange means, oftentimes, but they are never without proof of regard for the enlightenment and elevation of man.

A National Temperance Convention is to be held in Cleveland, Ohio, on the 29th of July next. The call for this Convention is signed by some of the most eminent temperance men in the country, and they invite delegates from all the various organizations, religious and secular, that seek to promote this reform. It is proposed that there be a full and free comparison of views, so that, if possible, some general expression of sentiment may be given, and some more effective means devised for the suppression of intemperance. We are rejoiced that such a convention is to be held, and hope it will be attended by representatives of all societies and orders, and from every part of the land. There is need of combined effort in support of a cause which now suffers from the belief that the various organizations that carry its banner are really antagonistic to each other. Temperance needs the moral power of such a united testimony in its behalf, and a new impulse will be given to its progress if such enthusiasm shall prevail in the convention as it is hoped may be awakened. The evils resulting from drunkenness are increasing, and more shameless than ever. Some new method must be adopted, or new vigor must be infused into the old methods, by those who would remove them, and this convention will afford opportunity for counsel, and the adoption of plans for coöperation from which much may be hoped.

Much comment is made in the Eastern papers on the interest manifested by certain prominent men, heretofore regarded as radical in their sentiments, in the college of which Gen. Lee is President. It is, certainly, a fact noteworthy and remarkable that Mr. Beecher, Mr. Greeley, and others like them, have made speeches and given money in support of an institution represented by the man they lately esteemed as worthy of the bitterest condemnation. What the effect will be upon the cultivation of good feeling, either at the South or North, can hardly be known at present, but the probability is small that it will have as much influence as these gentlemen seem to imagine.

The English, and other foreign papers would have us believe that the people of France, oppressed beyond endurance by the new military law and other despotic acts of government, are almost on the point of revolution, and that the Emperor is at his wits end to know how to stay the spirit of dissatisfaction and regain his fast waning popularity. We must remember, however, that there never has been a time when, according to English authority, Napoleon's popularity has not been on the decrease and France in a state of anarchy. Yet he has attained a hold on the hearts of the people unknown to other sovereigns, and the condition of the French people has been greatly improved under his reign. The people have confidence in their ruler, and endure with little complaint, measures that in other kingdoms would cause revolt. Napoleon shows by his acts that his life-study is the welfare of France; and whatever may have been his course with other nations, he has never deceived the French people. The agricultural and commercial prosperity of the country has been his special aim, and when we consider that he has had the dead weight of the Pope and the Romish church to support, the jealousy and hatred of all Europe to contend with, and an immense military force to maintain in order to preserve the peace he deems so essential to the success of his schemes, we must acknowledge that the country has made remarkable progress. Could our own rulers by their acts, inspire the people with confidence like that felt by the French in their ruler, it is probable that the way out of our present difficulties would be materially shortened.

Prince Lucien Bonaparte has been made a Cardinal. This, in the circumstances, is no ordinary announcement, and it is evident that it is regarded with great interest by the men who manage affairs at the head of the Romish Church. The Pope is old and feeble. The French Emperor and the Pope do not agree upon certain points of policy; yet the Emperor is a mighty power in support of the Church, whose continued and daily interest must be cultivated. The Bonaparte family has mighty influence in all Southern Europe. Prince Lucien would be a good representative of that family, and in sympathy with Napoleon, and, withal, not unpopular with the Ecclesiastics. Why may he not be Pope? At any rate, it can do no harm to have him within the range if he should be desired. If he is elected, we may look for some new developments in the Papal See within a few years.

During the last few months, no less than five different associations have been formed by our citizens with a view to relieve some of the wants to which humanity is subject. Most of these are already in successful operation, and are accomplishing a work which will, if continued, give San Francisco an enviable reputation for her charities. There are greater stimulants to charity in our city than in perhaps any other large city in the world, and not the least among these is the possibility of success. Abject poverty is a disease which has taken a firm hold of the older cities of the world, and from which it seems impossible that they can ever be relieved. In London, Paris and New York, the numerous benevolent associations, although the absolute amount of suffering relieved by them is immense, hardly make a perceptible impression on the sum total of misery. But San Francisco has grown with such marvelous rapidity, that this disease does not exist in its most malignant forms, or, at least, has not yet become chronic. It may be prevented from becoming so for a long time by the application of the proper remedies. As long as our fertile, but uncultivated valleys offer so inviting a prospect to our surplus population, and our yet uncompleted net-work of railroads calls for thousands of laborers, so long, at least, may the earnest efforts of our citizens keep back from our city the tide of suffering which forms so sad a phase of New York life. The movements of the past few months show that they are disposed to make the effort. Such prospects of success do not, perhaps, render charity a more imperative duty, but they certainly make it a more agreeable duty to perform.

"If you are pious, pray for me, for I have a mother whose gray hairs would go down in sorrow to the grave if she knew of my miserable fate." This is a strange request with which a burglar a few days ago closes a letter addressed to the lady of a house in this city from which he had taken some articles, but for some reason was moved to return them the next night to the door. It is hardly possible that the words do not express the real feelings of the man, for there are few who would not be honest when speaking thus of a mother's love for her wayward son. Yet, how sad a fact is made known by them! With trifling varations how many young men in California might speak as sorrowfully of the effect of their career on a mother's heart! There may not be many burglars who have a desire for prayers that they may lead a better life; but there are multitudes of those who are regarded as reckless,

wicked men, who in hours as serious as that in which this man wrote his letter, would crave no greater good than release from the bonds of habit or association that hold them to a life of sin. Whether they ask it or not, they should have the prayers of the good. Those mothers with gray hairs plead with unequaled eloquence for the sons whom they never forget. If there be a son of such a mother who shall read this paragraph, whose conduct would bow that honored form in sorrow to the grave, let him turn from his evil ways, and the prayers of all who prevail with God will aid him to be a better man.

RELIGIOUS INTELLIGENCE.

PACIFIC COAST.

WHERE IS DR. WILLIAM D. WICKES? Dr. Wickes is a native of Lockport, N. Y.; was a practising physician in several of the larger cities East and West—once Professor of Mathematics in Oberlin College, Ohio, and about ten years ago came to San Francisco. Since that time he has removed to parts unknown. His two sisters—Sarah and Mattie—now in San Francisco, are anxious to ascertain his whereabouts, or any information concerning their brother. Cannot any of our readers furnish this desired information? If so, please address Rev. F. Fox, San Francisco.

THE Sunday School of the First Presbyterian Church in this city, held its Nineteenth Anniversary last Sabbath morning. The day was not favorable, but the house was full, and the exercises were very interesting, the children having the principal part in the service.

The art of decoration with evergreens and flowers has been often beautifully illustrated by those who conduct this school, but they have never exhibited it in more perfection than on this occasion, and the strangers who had lately come among us from the East, were both surpised and charmed by the display of nature's exquisite ornaments. We will not give a detailed account of the Anniversary. The central feature was the emblem for the whole school, "The Garden of the Lord," on an arch over the pulpit, with lists on the sides of various plants and trees and flowers mentioned in Scripture, one of these being assigned to each class as its emblem. As these were announced in order, a member of the class would rise and repeat a verse containing some reference to the emblem, and at the close of this exercise, the whole school arose and responded to that representing the Garden. The music, the address of the Pastor, and the other services were in harmony with this central feature; and the testimony of all present was that the whole was as impressive and beautiful, as it was new. At the close of the exercises, Dr. Eells made a short appeal for the generous support of the School on the part of the Church, and from the collections in the morning and evening, $500 were given for an addition to the library and the current expenses.

We append the closing remarks and summary of the Superintendent's Report:

"To you, the members of this congregation, God commits this School as a tender plant in His vast garden. As you have fully and liberally bestowed your favor on it in the past, so care for it in the future, that as it grows in numbers, it may grow in strength, and bring forth much fruit to His glory. And you, teachers and officers, in view of the blessings which you have so abundantly received in the past, in view of what you are doing, and the blessed rewards that follow your labors, be faithful that you may be called "trees of righteousness, the planting of the Lord," and that these little ones to you entrusted, may, with you, be at last found flourishing in the eternal courts of our God.

There have been 182 books added to the library, and about 8,000 papers, testaments and books, have been given out in the School during the year. Two members have died. Ten have been admitted to the church on profession of faith. The average number in attendance has been 284, though the average is much higher for the latter part of the year. The amount of money contributed by the scholars for benevolent purposes has been $290."

THE effort which has been lately made to free Grace Church from debt has been, we are glad to state, entirely successful. On Sunday last the building was consecrated to the service of God by the Bishop of California, assisted by the Episcopal clergy of this city, who performed the usual consecration ceremony, according to the beautiful and impressive forms of the Protestant Episcopal Church. The interior of the building was decorated with flowers, and was crowded with people long before the ceremonies began. Bishop Kip made a short and eloquent address, congratulating the church on their success in paying a debt which has oppressed them so long, and reminding them that their freedom from debt imposes on them the duty of doing more than they have ever done for the relief of the poorer churches on the coast.

THE Baptist State Convention, lately in session in this city, voted unanimously in favor of introducing the Bible Union version of the New Testament into general pulpit use. Might it not be well to defer such a responsible step until the version is perfected considerably beyond its present state? Greatly improved it must and will be within a few years. It is only a highly perfected translation that should justify such a grave matter as turning out of common use a long tried version of the Scriptures. Otherwise we are likely to change our Bibles with every generation.—*Spare Hour.*

THE First Baptist Church, we learn, has purchased for itself a lot 70x120 feet, northwest corner of Bush and Stockton streets, fronting on the latter street. The lot, as it stands, with an expensive amount of grading yet to be done, costs $13,000. With this removal all the Baptist churches will be on the southern slope of the city. What is to be done for the north end?—*Spare Hour.*

A MEETING of the young men of all the evangelical churches was held on Wednesday evening at the City Hall in Stockton for the purpose of taking into consideration the propriety of forming a Young Men's Christian Association in that city.

THE SABBATH SCHOOL CONVENTION.—This body concluded its labors last week. There was a large number of ladies and gentlemen present to witness the exercises. The Rev. G. Beckwith delivered an address on the importance of the Sunday School, and Professor Kellogg spoke of the relations of parents and Church to the Sunday School. The Secretary, Mr. H. A. Palmer, then made his report, from which we learn that there are twenty schools in Alameda county, of which number seventeen have sent in reports. Of this number six are Presbyterian, three Methodist, three Union, two Congregational, two Baptist, and one Episcopalian. The number of scholars on the roll is 1,470; in the infant class, 292 (seven schools do not report the number in this class); number of teachers, 173; average attendance, 987; number of volumes in the libraries, 4,960. The Chairman, the Rev. B. T. Martin, was elected a delegate to the State Convention, to be held June 20th. G. W. Armes, R. E. Cole, A. L. Warner, Rev. B. N. Seymour, E. W. Playther, F. S. Page and S. A. Hastings, were appointed a Committee to arrange for quarterly meetings for the City of Oakland, and the annual meeting for the county.—*Oakland Transcript.*

IT gives us great pleasure to learn that in various places in the State, the churches of the Cumberland branch of the Presbyterian Family have enjoyed unwonted religious interest during the past winter. This denomination has facilities for marked church extension on this coast, and those who represent it should not fail to avail themselves of these to the full extent.

EASTERN.

THE following from the North Carolina *Presbyterian*, shows the spirit of the Church in the South:

"The *political* equality of the negro is already upon us. Force has fixed it on us for the present, at least. And the fact ought not to be overlooked that those who have secured this triumph will not be satisfied with what they have attained. Social and ecclesiastical equality are the next things in order; and there is every probability that there will be a persistent and determined effort to secure it. It therefore becomes those who believe this whole thing to be wrong in principle—that it will inevitably result in degrading white men and dragging them down to the position of the negro, without any perceptible elevation of the negro—to set their faces like a flint against this great iniquity. We do not hesitate to say, that the effort now making on the part of radicalism to bring about a *perfect equality in all things* between the races in the Southern States, is a sin against God—an effort to abolish the distinctions that he has established among men for wise and holy purposes. It is a criminal intermedling with what his word and providence both teach. And, in our view of the question involved, it becomes all good men to oppose these extremists at every point; and we regret exceedingly that any of our good people have been led to give any countenance whatever to what we conceive to be serious error, through the specious plea for the ecclesiastical equality of the negro."

THE world is outgrowing the old ascetic notions and supersitions, and no longer believes that human enjoyment is a snare of the devil. The Rev. Mr. Vincent, of Troy, has been advocating all the innocent and rational amusements that take the tastes of young people; and the Young Men's Christian Association, of the same place, has done a good thing in permitting games and plays to be carried on at their reading-tables. These games are played harmlessly, and the players turn to books or journals when they are tired of the former. Meantime, the young people are kept away from worse haunts and pastimes. This plan of providing well-regulated and agreeable reading-rooms for the people, is growing into a custom, and will soon be found to be the means of instruction and well-being.—*The Times, New York.*

THE Board of Education, is paying one per cent. per month for money to make good their promises to the beneficiaries. Two thousand dollars were appropriated by the General Assembly to this Board to aid the young men recommended by their respective Presbyteries. Not one-third of that amount has been received.

PROF. WILLIAM SMYTH, of Bowdoin College, the distinguished mathematical scholar, died suddenly at his residence in Brunswick, Me., Saturday afternoon, April 4th.

The religious interest throughout the country appears to have been on the increase during the last two weeks. While many accounts of the happy continuance of revivals already reported have reached us, it is with joy we announce the outpouring of the Spirit upon 120 more churches. The converts in these now number 4,550, of whom 4,354 are already members of the Church. Therefore, since January 1st, we have noticed the occurrence of 820 revivals, in the course of which 18,000 have been hopefully converted, and 10,000 have been added to the churches.

New Sunday Service.—For some time in the New England cities it has been a problem, quite difficult of solution, what should be done with Sunday afternoons. The Old South church, Boston, has inducted a service that so far works well. One sermon a day is delivered, and at the second service the pastor alternates in an exposition of the Word of God. Quite an interest attaches to the familiar and lucid exposition.—*Congregationalist.*

Rev. E. F. Abbott, of Andover, who left the Congregational church two years ago to enter the Universalist ministry, has returned again to his former belief, after an experience which excites the interest and inspires the confidence of his orthodox friends.

The Rev. Wm. S. Curtis, D.D., has resigned the Presidency of Knox College, to return to the pastorate. This ought to be welcome news to some of our prominent churches in need of a good minister.

Dr. Dix, it is said, is to be tried for false doctrine and Romanistic tendencies.

MISSIONARY INTELLIGENCE.

The Luther Monument at Worms.—The committee on the Luther monument at Worms, informs the Protestants in foreign countries, that the grand monument which is to be erected to the German reformer, Dr. Luther, in that city, is nearly completed, and that the ceremony of the uncovering and consecration of this monument will take place on the 24th, 25th, and 26th of June, 1868. The city of Worms is making the greatest exertions to render the ceremony a national festival for Germany.

There are now in active operation, in different parts of the world, eighty-six different Protestant missionary associations for the propagation of the Gospel in the unevangelized countries. These Associations are supporting about 1,500 missionaries; and the united receipts of these and kindred benevolent associations during the past year, exceed twelve millions of dollars. All the American Societies received some $4,750,000, or about three quarters of a million more than the last year's receipts of the New York and Boston theatres!

There is laboring in China about one ordained missionary to every four million inhabitants. Think of the United States containing only eleven clergymen! In the Ningpo District there are thirty foreign missionaries, four ordained native preachers, and 778 communicants. Nearly three-fourths of these are connected with American societies.

Mary, daughter of Rev. Jeremiah Porter of Prairie Du Chien, Wis., is soon to sail for China with Miss Mary Andrews of Cleveland. They will take charge of Mrs. Bridgman's school, and she is to return to this country. They go out with Mr. and Mrs. Hunt. He is to take charge of a mission printing establishment for Northern China.

Central Turkey.—Mr. Schneider gives an interesting account of a visit to Hassan Beyti, in the mountains; the formation of a church there, and a marked moral change among the people of the village, formerly noted for their highway robberies and wickedness.

Deserved Honor.—Rev. Dr. Schauffler, of Constantinople, has been made Doctor of Divinity by the united universities of Halle and Wittenburg, for his excellent translation of the New Testament into the Turkish language.

The Sunday Schools of France.—The first Sunday School in France was held in Paris in 1822. There are now in that city and vicinity fifty-one Sunday Schools and 8,000 pupils. In the departments there are 686 Sunday Schools, with 30,000 children.

Three Missionaries Ordained.—Three members of the last class in the Union Theological Seminary of New York, have been recently ordained as foreign missionaries, and expect to sail this month for Turkey, under the care of the American Board.

At Madison University, five-sevenths of the 142 students are studying for the ministry. Twenty-one are consecrated to foreign missions. Fourteen States and Denmark, Sweden and Burmah are represented among the students.

A new Presbyterian church is about to be erected in Valparaiso.

Sunday School Books.

The Largest and Choicest Assortment in the city, embracing the publications of

AMERICAN SUNDAY SCHOOL UNION,
AMERICAN TRACT SOCIETY,
MASS. SABBATH SCHOOL SOCIETY,
ROBERT CARTER & BROTHERS,

SAN FRANCISCO, SATURDAY, MAY 9, 1868.

THE POWER OF SYMPATHY.

The heart is the fountain of the most powerful influences that are ever felt, and it would not be difficult to prove that those who accomplish most in the world are those who suffer the warm currents from this fountain to press them on. Creeds, perfected and beautiful, may be admired, but we gain little real inspiration from them. The mere conclusions of the reason, cold though satisfactory, often fail to move those who admit them. But when, in support of our creeds, and as the ally of reason, the heart is enlisted, we are conscious of a mighty power within us which makes devotion delightful and gathers charms around the whole path of duty. But not alone upon ourselves is this influence exerted. There is a strange power upon others in manifested feeling. It makes a highway from soul to soul; or rather, it binds soul to soul by those gentle yet resistless bands which we have all acknowledged when we have come within the magnetic reach of a truly *earnest* man.

There are some Christians who float in the currents of the Church, and sometimes get out upon the world's great sea, like isolated icebergs, whom all shun, and from whom no genial influences ever emanate. You find nothing beautiful on them, you can kindle no fire upon them, and you only wonder of what use they are. But when you see one who seems to live under the tropics of genuine devotion, who gives you blossoms and fruit at the same time, who mingles with others bestowing blessed contributions upon all, whose soul is full and overflowing with *love*, you are drawn towards such a man; he touches chords that vibrate everywhere, and from him you learn what is possible to one in whom dwells the *spirit* of our religion. Men have nothing to oppose to that spirit. God has made them so that they must be affected by it. Who does not remember the mild and affectionate *entreaties* of his mother? The stern commands of a father, or his threats in case of disobedience, have passed from the memory; but the tears, the words, the prayers of a tender mother, in which she poured forth all her heart, will never be forgotten. After she has lain long years in her grave, her spell remains upon her wayward son, as he seems to see her tearful face, in some thoughtful hour, and she chides his folly with the memory that such conduct would break his mother's heart did she but witness it. Yes, there is a fountain within every breast that is always stirred by a kind and gentle spirit, and while denunciation will rarely open the way for blessings, there are few who can be unmoved by one who comes with the invitation of love, "Come thou with us and we will do thee good."

Never does religion look so beautiful to those who have not known its power as when seen through the tears of its *earnest*—not its *unhappy*—professors. These are the lenses that reveal what cannot otherwise be seen, as the telescope or the microscope reveals new worlds of wonder that the eye alone could never know. Paul was a wonderful man, but we find added occasion for admiration when we see him weeping over souls to whom he came with the Gospel of Christ, and great as was his intellect, its most powerful ally, save the Holy Ghost, was his great, throbbing, devoted *heart*. We are sometimes told that those are the best illustrations of true religion who go through the world like a loaded wagon of sheaves, dropping off one and another *unconsciously*, for any who may thus be blessed by them. But those, rather, are the best who go with loads of sheaves *on purpose* to scatter them, taking conscious pleasure in the work. We are sometimes told that those pious acts are the most likely to be useful which are strewn like stray seeds in a garden, springing up and giving fruit without the *design* of him who dropped them. But those, rather, have the fairest promise which fall into the ground prepared by the hand of care, and are cultured with the hope and prayer which true devotion brings to *increase* the harvest. There is beauty, and there is worth in that piety which exhales its spirit, as the rose does its fragrance, till, though not aware of its influence, it has perfumed the atmosphere in which it blooms. But it takes on a nobler quality and a richer worth when, in addition to this unconscious blessing, it goes forth on errands of good, seeks out objects of love, and with positive, glowing *purpose*, obeys the Master's order.

Never was there a state of society, from its very composition, more in need of such illustrations of religion on the part of those who profess it than that in the midst of which we are. Here are thousands who are temporary residents, and feeling that they are strangers, they keep themselves aloof from Christian influences as confined to our churches. Here are thousands more from every part of the world, who have never felt any direct influence of the Gospel, and really do not know what it is, and never will while it is cribbed up, so to speak, in the hearts of Christians, or within the walls of churches. Yet never was there a more hopeful field for individual, earnest *heart-service* in behalf of souls. You will find those whom you may bless next door to you, on the same block with you, in the same store or shop with you. You will find them in palaces and in hovels; you will find them gay, and you will find them sad, intelligent and ignorant, infidels and believers, vicious and virtuous, of every order, and character, and state. Yet, to a degree never before so general, perhaps, all responsive to the tones of sympathy, and touched by the display to them of a warm heart. There may be marvelous results from such Christian interest as this, in the midst of such a population. There is urgent nred of an earnest ministry, and an earnest Church. There is a most inviting field for those who shall show that they *feel* as well as *know*, and never had the injunction that we "*Go* preach the Gospel" more emphasis than as it falls on our ears. Let none forget that the Gospel can be preached most successfully when we come so *near* those to whom we bear it that they can feel our hearts beat in proof that they have our sympathy and love.

ANNOTATIONS.

X.

GOOD OUT OF EVIL.

The belief in the maxim, that good comes out of all evil, has a dangerous tendency, if the maxim is accepted literally. It virtually takes away from evil its distinctive character, and transforms it into good. Dora Greenwell, in that remarkable and highly original book, "The Two Friends," thus sets forth the truth that is in the maxim: "All that evil can do, is *to make good manifest*; as oppression calls forth heroism, or, as in the family life, the selfishness of one member brings forth the excellence of another. Yet in the very instances where this is admirably shown, we may still say, 'that if one member suffer, all the members suffer with it.' All life is organic, and no individual ever regrets or violates a moral or social obligation, but a wound more or less directly felt, goes through the whole. The work of righteousness is peace; the natural tendency of good is to reproduce itself: even so does evil sow itself *ad infinitum*; unless through repentance it ceases to be evil, and even *after* repentance the seed beforehand cast unto the earth will come up. We see this in the life of nations. What confusion and anarchy result from forced appropriation and unequal laws. A life may slowly get over a great sorrow, but when does a country get over a great wrong? * * * What has Ireland been to England, or Poland to Russia, but a standing perplexity from age to age. What else is the African population now in America.

It is not only the wronged who suffer. The roots of humanity are so inextricably intertwined that we must grow together if we grow at all. Every war and cant tells upon the whole." There is truth in this which every Christian should understand. Repentance brings forgiveness; but the acts repented of must still work out their natural effects. It is both weak and vain to dream that it can be otherwise. That our guilt is pardoned and blotted out when we turn to Christ with faith and sincere contrition is enough—the consequences of that guilt we must be prepared to endure. The man, who after an aimless, frivolous or wicked career repents late in life, cannot change the disgraceful, useless past, nor call back the years that he has frittered away. Neither can he escape the natural results of his acts. Such a man can never be on earth what he might have been; he has lost opportunities that cannot be recalled nor repeated. Yet let him be resigned—yea, let him be thankful, that God will condescend to accept the poor remnant of a misspent life, "the feeble pulses of a heart that has spent its best hours not for Him, but for self and enjoyment." Let him be resigned, thankful, hopeful, courageous, for, in the beautiful language of Robertson, the spirit of Christianity draws over our life under such circumstances "not a leaden cloud of remorse and despondency but a sky, not perhaps of radiant, but yet of most serene and chastened, and manly hope. There is a past which is gone forever. But there is a future which is still our own."

Water as a Symbol of Religious Purification.

NUMBER III.

A PROPHETIC SYMBOL.

I enter now upon a very pleasant and edifying range in my investigations. The thoughts of my readers will revert, almost without my suggestion, to the lofty psalm of prophetic praise which David raised in honor of his divine Son, the future Messiah, which commences:

> "Give the king thy judgment, O God,
> And thy righteousness unto the king's son."

That portion of the psalm which symbolizes the vivifying and fructifying influences of timely showers, is aptly paraphrased in our psalmody:

> "As rain on meadows newly mown,
> So Jesus sends His blessings down;
> His grace on fainting souls distils,
> Like heavenly dew on thirsty hills,
> The saints shall flourish in His day,
> Drest in the robes of joy and praise;
> Peace, like a river from His throne,
> Shall flow to nations yet unknown."

Under the Messiah's gracious and powerful ministration, the hard and barren mountain rock shall become fruitful.

> "The handful spare of scattered corn
> Upon the barren mountain sown

Shall in the ungenial soil take root,
And shake like Lebanon with fruit."

So with the kindly and genial showers from Heaven, the wilderness and solitary places shall be glad at the Messiah's presence, and "the wilderness shall bud and blossom as the rose.

"Though in a bare and rugged way,
Through devious lonely wilds I stray,
Thy bounty shall my pains beguile;
The barren wilderness shall shine
With sudden green and herbage crowned;
And streams shall murmur all around."

So strikingly and beautifully suggestive are the timely rains from Heaven in the production of plant, flower, and fruit, of the genial influences of Christ's Spirit on the barren and unkindly soil of man's nature, in creating spiritual life, fruit, and beauty. If my readers, perchance, should think I draw too largely on the poetic element, I can only say that the theme naturally lifts the soul above mere prosaic essay, and when it can find voice for its emotions in the lofty utterances of the inspired Word by Watts and Addison paraphrased, it is meet and proper that it should thus declare itself.

From these more general manifestations of the divine influences symbolized by water, we come next to that class of prediction which foretells the inauguration of Christ's visible kingdom on earth, in which we find

THE SPIRIT'S INFLUENCE SYMBOLIZED BY DESCENDING SHOWERS.

"And it shall come to pass afterward that I will pour out my spirit on all flesh, and your sons and your daughters shall prophesy, your old men shall dream dreams, your young men shall see visions. And also upon the servants and the handmaidens in those days will I pour out my spirit. And it shall come to pass that whosoever shall call on the name of the Lord shall be delivered, for in Mount Zion and Jerusalem shall be deliverance as the Lord hath said, and in the remnant whom the Lord shall call." (Joel 2: 28, 29. 35.) Our readers will all remember how this prediction is applied by the Apostle Peter at the Day of Pentecost, and no further comment is needed from me.

But the purifying influences of water are used most distinctly and unequivocally to set forth not only the coming and kingdom, but the office of the promised Messiah.

CHRIST'S WORK SYMBOLIZED BY WATER.

"Behold my servant shall deal prudently; he shall be exalted and extolled and be very high. As many as were astonished at thee, his visage was so marred more than any man, and his form more than the sons of men. *So shall he sprinkle many nations.*" (Isaiah 52: 14, 15.) This symbol of Christ's work as a purifier is more fully developed in Ezekiel 36: 25–27. "Then will I sprinkle clean water upon you, and ye shall be clean from all your filthiness and from all your idleness will I cleanse you. A new heart also will I give you, and a new spirit will I put within you. I will take away the stony heart out of your flesh, and I will give you a heart of flesh. And I will put my spirit within you and cause you to walk in my statutes, and ye shall keep my judgments and do them." This prophetic idea, which symbolizes Christ's work in the water of purification, after having been so clearly and definitely set forth in the earlier prophets, is not suffered to float off into obscurity and be forgotten in later revelations, but Malachai, the last of the Old Testament prophets, developes it again with a bright and startling vehemence. "The Lord whom ye seek shall suddenly come to His temple. But who may abide the day of his coming, and who shall stand when he appeareth, for He is like a refining fire and like fuller's soap, and He shall sit as a refiner and purifier of silver, and He shall purify the sons of Levi and purge them as gold and silver, that they may offer unto the Lord an offering of righteousness."

We see, from the above passages from the prophets, how, in most clear and unmistakeable language, the promised Messiah is exhibited in His work as a purifier, that through Him the people of God are cleansed, purified, sanctified; that having thus cleansed and renovated, God will perfect His work. It must be borne in mind that this perfection of the Christian character is secured in the divine ministry of the Messiah, through the emblematical agency of the purifying water. It is interesting to note, further, that in Isaiah this work of purification is in immediate connection with the Savior's suffering and crucifixion. "His visage was so marred more than any man, and His form more than the sons of men." So, declares the prophet, shall He sprinkle many nations, and the more extended prediction of the suffering and passion of the Messiah immediately follows. Let us here call to mind the close connection between the water and the blood, which we noted as apparent in all the religions of the earth. After the same manner appear plainly in Christ's work, as foretold by the prophets, the water of purification and the blood of expiation.

These two scriptural ideas in the prophets of expiation and purification, are both retrospective and prospective—*retrospective*, because in the one case they look back, and have their meaning filled out into more fullness and sharpness of expression as they reflect the sacrifices and ablutions of the temple service. *Prospective*, for they look forward and anticipate in their predictions the work of the Messiah, of the bloody sacrifice on Mount Calvary, and the fountain wnich was opened in Judea and Jerusalem for all sin and uncleanness, when from the pierced side of Jesus flowed that mingled stream of blood and water,

"To be of sin the double cure,
To cleanse from guilt and break its power."

Nor should it be forgotten, in this connection, that those which are of the hosehold of God are built on the foundation of the *prophets*, as well as the Apostles, Jesus Christ Himself being the chief cornerstone.

We are now brought in our discussion to the threshold of the new dispensation. F. B.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Seventh Term of this Institution will commence on Wednesday, January 22d, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

Rowland, Bailey & Co.

516 and 518, Washington st.

WHOLESALE & RETAIL GROCERS,

A complete and select stock of Groceries and Provisions, to which attention is requested, both from City and Country.

Having been established for for over eighteen years, they offer their past course as a guaranty for the future.

ROWLAND, BAILEY & Co.,
Opposite old Washington Market.

Correspondence.

Letter from Solano County.

Vallejo, May 1st, 1868.

A pen-and-ink sketch of Vallejo and its adjacent hills and valleys may be of interest to the reader. They extend north and east from ten to twelve miles, comprising some of the choicest wheat-producing land in the State. With the exception of the Santa Clara wheat, that raised in this region is second to none in the State. The land in this vicinity is under the highest state of cultivation. The prospect for a good crop was never better than at the present time, with the exception of a few low places where it is too wet. The average yield now is from twenty to twenty-five bushels per acre. Formerly it was from thirty to forty bushels per acre. The cause of the decline is the continued succession of the wheat crop, thereby impoverishing the land for that kind of grain.

A great draw-back to the town and adjacent country has been the unsettled condition of the titles. But these having been at last settled, the people are making improvements in their homes, by planting orchards, and evergreens, and shrubbery.

The climate is one of the most healthy on this coast. It is free from the extremes of cold and heat. Those cold, dense fogs so prevalent in summer and autumn along the coast, are almost wholly unknown here, while a pleasant breeze springs up in the forenoon and makes the air cool and bracing for the rest of the day. The complaint of the doctor has generally been that "It was a remarkable state of health."

Our city contains about three thousand inhabitants, and they are rapidly increasing. There are no houses to rent. Many are building at the present time, and many more are to be built the coming season. Real estate, of course, has greatly advanced. Lots fifty by one hundred and thirty feet are worth from $300 to $5,000. Land in the vicinity of the city is selling for $200 to $500 per acre.

Every department of business has received a new impulse since operations have been resumed upon the railroad. They have over a mile of the track laid, and three engines up and in running order, and all the material on the ground with which to lay the track as far as Sacramento. It is the intention of the company to push the work forward as fast as possible and have it completed by the first of August.

Our churches are four in number; three of them are Protestant and one is Roman Catholic. The people of the latter Church have erected and are completing a fine, large brick building, which is an ornament to our city.

The Episcopalians intend to erect a house of worship this summer. They have service every Sabbath in the "Masonic Hall." By the efficient labors of the Rev. A. C. Treadway, a congregation has been gathered and a church organized, called the Church of the Ascension.

The Chaplain at the Navy Yard officiates every Sabbath afternoon in the Presbyterian church, where he is gathering the Baptists of the place, and expects, when "the way is clear," to organize a church of that persuasion. It is not to be of "the straitest sect" of the Baptists, but Open Communion.

The Presbyterian church has recently purchased a bell weighing over one thousand pounds, and intends immediately to erect a suitable tower for its reception. If they would provide a parsonage for their minister, they would be in good working condition and could do far more efficient service for the cause than is done at present. A worthy example is set them by our Methodist brethren, who have purchased a parsonage, and are making preparations for holding a festival in May to raise funds with which to pay for it. This is a subject worthy of the serious attention of all our country congregations, and it ought to be pressed upon their attention until they are led to provide suitable homes for their ministers. It would be better for the people and the pastor too. Please give this idea of parsonages prominence in your excellent paper. B.

Letter from Marin County.

San Rafael, May 2.

To "burn incense on the moustache" is the French phrase for praising a man to his face. Such an operation with your senior editor being physically impossible, I may be allowed to say to you that the lecture of Dr. Eells in this place, on Thursday evening, was a gratifying and improving occurrence. The best of all compliments has been paid to it, namely, actual quotation with approval by those who heard it. General praise might be doubtful; quotation is a species of applause not to be questioned. It was undertaken in order to supply the Sabbath School here (in charge of Mr. Dickson) with a melodeon, and the melodeon will soon be purchased.

The influx of strangers to this charming summer resort has already commenced. Indeed, the town is overflowing. It is to be hoped that the church members who resort here this season will be of the church-going sort—people who go to the sanctuary because it is God's house, and not because this or that distinguished preacher is expected to hold forth. The effect of a visitation of such Christians as can only go to church in the city, is sometimes depressing upon country churches and the interests of religion. It is a safe rule to go to church in a country place, even under circumstances which would keep you at home were you near your accustomed place of worship. We thus avoid the "appearance of evil." The world and Rome would desecrate the Sabbath in these suburban places by the fashion and the toleration of Sunday picnics, and Christians, who are such indeed, should do what they can to resist these forces of error by redoubled assiduity in religious duty.

San Rafael boasts as yet no Protestant church edifice, but we hope to see one begun before the summer is over. Let church members who visit the place express interest in the matter, and it will help considerably. C. R. C.

CONTRIBUTIONS.

The Cross Immutable.

Max Muller, in his "Science of Language," says: "It is a well known fact, which recent researches have not shaken, that nature is incapable of progress or improvement. The flower which the botanist observes to-day was as perfect from the beginning. Animals that are endowed with what is called an artistic instinct, have never brought that instinct to a higher degree of perfection. The hexagonal cells of the bee are not more regular in the nineteenth century than at an earlier period, and the gift of song has never, as far as we know, been brought to a higher perfection by our nightingale than by the Philomel of the Greeks."

And what holds in nature is true of grace. No improvement can be made upon God's method of saving the human soul; it is as true now as it was eighteen centuries ago, that Jesus Christ alone can deliver from the pit. What He did on Calvary was not simply to commence, but to perfect an atonement for a lost world. Salvation through the Cross is therefore a completed work. Standing out in its matchless excellence, it challenges the admiration of the universe. Every attempt of bad-hearted men to ignore the love of God's own dear Son must prove in vain, because what has been done once abides forever. Time cannot outlive, sin cannot overcome, the wisdom, and power, and goodness of God as these appear in Redemption through the Cross.

"If a man is not rising upward to be an angel, depend upon it he is sinking downward to be a devil. He cannot stop short at the beast; the most savage of men are not beasts—they are worse, a great deal worse."—*Coleridge—"Table Talk."*

The contemplation of human capacity for evil or good is calculated to deeply move the reflective mind. Not simply what man can be, but what he must be. If he does not ascend, he must descend. Progress is possible in either direction, and there are no limits to its reach. The melancholy end of a promising young man, who committed suicide recently in one of the interior towns of our State serves to illustrate this truth. A child of pious parents, religiously educated, his father a clergyman—in this land of dissipation he became the slave of vicious habits. Among others, the desperate vice of gambling gained a firm hold upon him, and to its imperious demands he sacrificed all his living. Friends in the East, hearing of his straitened circumstances, sent him funds sufficient to convey him comfortably to his home in one of the New England States. He received this money a few days since, and what was designed for his benefit proved the instrument of his doom. He carried it to the gambling-table, and staked it until all was gone, except a single half-dollar. This he invested in the poison which caused his death. He left his name and the names of his parents, with the declaration that he was not worthy to live.

We hear frequently of similar tragedies, showing us that if it is possible to reach exalted bliss and purity through God's grace, it is equally possible to descend in degradation and wretchedness beneath the beasts which perish.

Seeds of Thought.

There are seeds as well as full grown plants in the natural world. The former are in order to the latter. If the latter be of value, then the former should be prized. The more one exalts the tree as to its beauty, shade, fruit, or timber, the higher estimate should he place upon the seed from which all these may be developed.

The analogy holds true in the world of thought. There are seeds of thought, which are seeds also of life, because thought rules life. There are first truths, radical conceptions, primordial beliefs, from which all other thinking springs, as the trunk, branches, leaves, and fruit from the vegetable seed. Trace back human practice in its thousand forms to the original germs, and you find a few ideas simple in character and briefly expressed. Seeds are always small compared with the after-growth, and because they are small, and dry, and possessed of less beauty than the shrub or tree, are sometimes overlooked or despised. Yet emigrants, settling in a wild country, could hardly take with them anything equal in value to an assortment of field and garden seeds. The containing boxes might make but a small show beside their other goods, but the wealth of the future would really be hid therein.

If seeds are thus valuable, it is a pity that men do not always recognize them at sight, and that they frequently fail to distinguish between seeds of grain

and seeds of tares. In religion, true doctrines are seeds of right thought and holy life, because truth is a power of sanctification; false doctrines are seeds of error and sin, because falsehood misleads and depraves. A system of unscriptural beliefs is the germ of all manner of evil. "There will be no theology in our columns,' says the editor of a mammoth religious paper, trying to look very wise in the utterance. We do not remember to have heard a farmer say, "No seeds allowed on my farm;" nor to have read the prospectus of any agricultural paper which gave complacent notice that it would allow no discussion as to kinds of seed, and their comparative value. It is in religion that men make fools of themselves and others.

Doctrines are very dry subjects, says one. Yes, seeds are very dry affairs. We never could detect much of any moisture in them, especially in those which are the most common and useful—the various grains. Thefore, let us cease paying attention to seeds, and give ourselves to a juicier business! Ah, that will not do. Dry things have their uses, as well as the moister. Treat your dry seed properly; separate it from tares and chaff; plant it in good soil; be patient awhile; ere long you shall see life emerge, beauty, strength, food; you shall have verdure, flowers, fruit. True theologizing is spiritual agriculture. It separates truth from error by the test of God's word. It sifts out the chaff of mistaken philosophy and wrong method by the faithful use of the historic sieve, the accumulated experience of the Church in dealing with religious truth. It makes choice of the best varieties of even good spiritual seed, that the future harvest may be choice in quality as well as abundant in quantity. Let it not be despised. For all history shows that as dry seeds are full of life and contain the vast harvests of the future, so true doctrines make living churches, and false belief brings damage if not death.—*The Advance.*

Oxford Bibles.

The superior excellence of the Bibles printed at the Oxford University Press is proverbial among all who prize correctness of the text, and clearness and beauty of typography and binding. The Oxford editions are the standard from which other editions are copied, and are therefore acknowledged as superior.

The Subscribers, who act as

SOLE AGENTS IN THE UNITED STATES

or these Bibles, keep all varieties and sizes, from the 48-mo. to the Folio. They select the following, which they strongly recommend.

Pacific Mail Steam Co's Steamships
—FOR—
NEW YORK, JAPAN AND CHINA

Will be Dispatched as follows:

LEAVE WHARF CORNER OF FIRST AND BRANNAN STREETS, at 11 o'clock A.M. of the following dates, for PANAMA, connecting via Panama Railroad with one of the Company's splendid Steamers from ASPINWALL for NEW YORK.

On the 6th, 14th, 22d, and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Transatlantic Company's Steamer for St. Nazaire, and English Steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English Steamer for Southampton, South America, and P. R. R. Co.'s Steamer for Central America. Through tickets can be obtained.

Departure of the 6th connects with English Steamer for Australia.

The following Steamships will be dispatched on dates as given below.

STEAMERS FOR MAY, 1868.

May 14th—GOLDEN AGE, Capt. E. S. Farnsworth, connecting with OCEAN QUEEN, Capt. King.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock.

Through tickets to Liverpool by the "Cunard," "Inman," and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired, an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship GREAT REPUBLIC, Capt. S. Doane, will be dispatched June 3d, at 12 o'clock, noon, from wharf corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting at Yokohama with the Steamship COSTA RICA, for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Co.'s Office, corner of Sacramento and Leidesdorff Sts.

OLIVER ELDRIDGE, Agent.

ILLUSTRATION OF DIVIDENDS OF PROFITS
—OF—
United States Life Insurance Comp'y,
NEW YORK.
OFFICE, No. 40 WALL STREET.

CASH ASSETS EXCEED $2,700,000.

SIXTH TRIENNIAL DIVIDEND.

The Board of Directors have this day declared a Dividend of FORTY PER CENT. for the three years ending at the 4th March, inst., to holders of all Policies then in force, on the whole sum of the annual participating premiums received during the said three years; and an additional Dividend of TWENTY PER CENT. on the whole sum of all previous Dividends and Additions, to holders of such Policies who have fulfilled their engagements with the Company, both Dividends being payable and available in the various modes explained in the Company's Prospectus.

For example, on a policy paying one hundred dollars a year of participating premium, the profits for each year and the total at each year on this system are:

Year.	Yearly.	Total.	Year.	Yearly.	Total.
1	$40 00	$40 00	28	$206 39	$2702 23

RECENT PUBLICATIONS.

TWENTY-FOUR VIEWS OF THE VEGETATION OF THE COASTS AND ISLANDS OF THE PACIFIC. Taken during an Exploring voyage, by F. H. Von Kittlibs. London: Langman & Co.

These photographic views, with explanatory descriptions translated from the original German, make up a choice volume of sixty-eight pages, of which the copy before us is probably the only one on this coast. It was obtained in London for the "Pacific Library of Reference," an exceedingly rare collection of books, owned by the Messrs. Bancroft, comprising everything ancient and modern, which has been published in English, French, German, Spanish, Italian, and Hawaiian, on the Pacific Coast. Many of these volumes, from their rarity, are not found in any public library.

This photographic volume contains a series of views illustrating the forests, mountains, shores, islands, and swamps on the coast of Alaska, Kamtschatka, the Phillippine and other islands of the Pacific. Not only are the bolder outlines represented, but the underwood, shrubbery, ferns, and grasses are exhibited almost as vividly as they appear to the traveler to these rarely-visited shores. The scenes about Sitka are well selected, though not the most striking that could have been chosen. They give a correct idea of the general aspect of that wild, wet, woody region—such as will be at once recognized by every one who has been there. The work is an unmistakeable proof of the value of the photographic art in giving to us at our firesides correct views of scenes remote and well nigh inaccessible.

HYMN-WRITERS AND THEIR HYMNS. By S. W. Christophers. London: S. W. Partridge. San Francisco: H. H. Bancroft & Co.

As the Church grows old, the hymns that become familiar from frequent use, and dear from the associations by which they are hallowed, are regarded with intense interest. Often they are appropriated without any thought concerning their origin, but there are some who would be glad to know by whom and in the midst of what circumstances they were written. The author of this book has evidently taken great pains to gain information upon these points respecting some of the most valuable old hymns used by the English Church. It is written in an easy, pleasing style, and its facts commend it to the study of all who take interest in such inquiry. It is to be noticed that some of the most tender and beautiful of these pieces were composed by persons unknown to fame, the poetry being the outflow of their devotion, the expression of the heart rather than of the intellect, and this fact may account largely for their warm place in the hearts of Christians. Some of the most cherished hymns of our American church music are the transcripts of hearts, of which we know nothing except these blessed effusions. We shall be grateful to him who shall tell us respecting these what this author has gathered respecting the English sacred songs. This subject suggests a word in reference to the "*Hymnal*," lately published by the Presbyterian Board of Publication, O. S., for use in the churches. We do not like to find fault with a work recommended by such high authority and approved by the General Assembly, but we are sorry this collection, both of hymns and tunes, is not better. There are several books now in use that are much more valuable than the *Hymnal*, and we hope it will be improved by some committee that shall be familiar with the wants and tastes of the Church, and another edition furnished before other collections shall be more generally introduced.

HINTS ON THE FORMATION OF RELIGIOUS OPINIONS. By Ray Palmer, D.D. New York: A. D. F. Randolph. San Francisco: H. H. Bancroft & Co.

This book was published some years ago, and is now republished in this country from plates of the English edition. It is worth reproduction, not merely on account of its intrinsic merits, but because it is particularly adapted to the wants of these days. The forms of error which are most insinuating and popular now are those which suggest doubt and cultivate it among the real believers of truth. They seek to awaken suspicion, rather than avow opposition, and the result is that many who have given the great themes of religion but little accurate and critical study, are disturbed in their faith, and sometimes almost persuaded to abandon it. Dr. Palmer, in these discourses, undertakes to confirm those who are thus affected in their convictions, and to give them instructions in regard to the best method of strengthening themselves against the invasions of infidelity. Of course, in popular speech there was not the opportunity for elaborate and condensed critical argument, but enough logic, and research and demonstra will be found in these "Hints," to satisfy almost any honest mind respecting the being of God, the inspiration of the Bible, and the value to the race of such a revelation. The book is beautifully bound, and is made very attractive by the publisher, who has peculiar taste in this direction. We would like to know that it will be read by every young man in California, while we hope that many in every class will be fortified and instructed from its pages.

The same publisher has also issued another little work of Dr. Palmer, different in material, but perhaps more exquisite than the more solid book of which we have been speaking. This is the "*Hymns of my Holy Hours, and other pieces*," in which are some poems and lyrics that compare favorably with those already contributed by this author to the Hymnology of the Church, and sacred in the memory and associations of thousands. The time will not be long before some of these will have a like consecrated place. In the meantime, they will be welcome in the charming volume now before us.

THE CHIMNEY CORNER. By Christopher Crowfield. Boston: Ticknor & Fields. San Francisco: H. H. Bancroft & Co.

It is an easy way of writing a book to give it in parts, from month to month, in a magazine. In some respects it is possible to make a book more practical and readable that is thus composed. Still we do not believe that when any particular author has written several books, some by sections in this way, and some by consecutive and continued work to the end, there will be any doubt that the last will be the most valuable, and will contribute most to his fame. Mrs. Stowe furnishes abundant proof that that is true. The little volume now before us has much in it that pleases, and her ideas respecting the position and duties of woman, and health, and the modes of rendering the family cheerful, and useful, and attractive to others, may be accepted by many with great advantage. Yet, in matter and in style, it is not equal to either of several works by which it was preceded.

"ECCE HOMO." By Hon. W. E. Gladstone. London: Strahan & Co. San Francisco: H. H. Bancroft & Co.

The articles in review of the remarkable book that introduced so many of the "Ecce" order, which appeared in the "Good Words," are given us in this very neat and inviting volume. That they were written by Mr. Gladstone is a pledge of their interest and their worth. In addition, we will only say that he seems to have a more just apprehension of what the author of "Ecce Homo" intended to accomplish in his exhibition of our Savior, than has any one of the multitude who have undertaken to criticise him. The book reviewed did us real service, and the review has interest in itself, and because of its connection with the themes it makes more clear and free from the objections many have urged against them as presented.

We have received, with thanks:

Putnam's Magazine for May, which is a capital number of that excellent monthly. The article on San Francisco, and the letter from the ship *Great Republic*, will have special interest for those on the Pacific Coast.

Hours at Home. We are glad to learn that this magazine is having increased circulation among our people.

The Twenty-first Annual Report of the American Missionary Association.

The Presbyterian Monthly.

EDUCATIONAL.

Bodies Little; Memories Long.

There is something startling in the idea that what remains with children, in their intercourse with their elders, is not so much their present opinions of those elders as their observations and experiences. Your looks, your tones, your gestures, and your expressions—these are what are now engraving themselves upon your child's or your pupil's mind; and possibly in the future he will deduce from them some conclusion, or misgiving, respecting you which will be more true than flattering. His present opinion, derived from these same impressions, may be all that you would wish—wholly false, in fact. He may call your flashing eye righteous indignation, and your peevish word a just reproof, but this opinion will fade away, for his mind is framed to remember concretes and not abstracts. Wisely his Creator has given him a memory feeble for chains of reasoning and for conclusions, at a time when his reasoning and his conclusions must be so defective. But the grounds of that opinion, the phenomena and facts from which he drew his conclusions will abide, and perhaps will form the basis of an unwilling but irresistible opinion concerning you quite different from his early hallucination. There is something deeply monitory in the thought of our child growing up a thoughtful man or woman, recalling his parents or teachers—ourselves—and passing in review our looks and actions with the coolness and penetration of maturity and experience of the world. Let us be more careful of our conduct before the young. We are writing testimony for or against ourselves—our principles, our religion—which will be weighed with the wisdom of riper years and grayer heads than those which now, it may be, are sadly deceived in their estimate of our greatness, strength, and piety.

We are led into this train of thought by a passage in an article on "Early Education," in *Hammond's Quarterly Journal of Psychological Medicine* (Jan. 1868): "Instances have been known of the mature reason drawing correct conclusions from the experience of childhood, which, at the time of their occurrence gave rise to no such reflections. Perhaps every one can remember some incident of his earliest life which did not then excite any particular impression, but for which he can now clearly account. Nothing should be said or done in the presence of the youngest child which he could not be wished to understand or remember at any future time."

C. R. C.

One Hundred Years from To-day.

One hundred years seems a very long time. Between May, 1868, and May, 1968, what a multitude of events will happen! How many pleasant weeks will intervene, and how many days of sorrow! One hundred years from to-day San Francisco will number its million and a half of people—twelve times its present population. Towns will be thickly clustered around the Bay, and across the inland waters will gleam the hundred spires and costly edifices of Oakland. Instead of muddy and, in winter, almost impassable thoroughfares, stretching across the country, every valley of our State will be traversed by the railway. At six o'clock each morning a train will leave the spacious depot on Market Street, and an hour later the passengers will reach the plaza at San Jose—a beautiful inland city of one hundred thousand inhabitants. At mid-day the train will cross the Tejon headlands, and at sunset the traveler will be quietly taking his tea in Los Angeles.

One hundred years from to-day the solemn old forests which cluster around the northern mountains and eastern Sierras will have fallen by the relentless hand of the chopper, and the stately pine and redwood will be found only in remote cañons and upon far-off hill-sides. Valleys, which have now only here and there a cabin, will be densely peopled with farmers. Over the bald hills and shrubbery-belted summits, where the deer, elk and bear now roam unmolested, many a thousand herds and flocks will be scattered, and many a happy home will be nestled in nooks and dells which now rarely, if ever, echo with the human voice. News from the "Orient" will not be brought by the slow monthly steamer, but on each morning's breakfast table will be laid the *Daily Times* or *Alta*, containing last night's dispatches from Japan, China, and Australia.

Such are some of the inevitable mutations of the future. But there are other things which a century to come will not change. There will be the same sun, moon, and stars. The grand old hills which stretch along our coast will remain unchanged. In our Bay, then, as now, will the waters flash brightly in the summer's sunshine, and frown darkly amid the winter's storms.

Populous as this city will then be, the visitor who shall walk out amid the hills will find in that silent community about Lone Mountain a congregation destined to be larger than any other, whom neither the breath of morn, the busy hum of mid-day, or the stillness of evening shall waken. Not one of us a hundred years from to-day will be alive. Others will walk these streets, and pursue their busy day-dreams, as we do now. The veil which hides the future we cannot penetrate. How far we shall be conscious of what takes place on earth a hundred years hence, no one knows save He from whom nothing is hidden. ALICE.

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

(from dr. holland's last poem.)

"Teach me,' I said, "for I am ignorant;
Lead me, for I am blind. Explain the past,
With all its errors. Why am I so low,
And you so high?"

She pressed my hand, and said:
"You have been hungry all your life for God,
And known it not. You lavished first on me
Your heart's best love. You poured its treasured wealth
At an unworthy shrine. You made a God
Of poor mortality; and when you learned
Your love was greater than the one you loved—
The one you worshipped—you invoked the aid
Of your own imagination, to enrich
Your pampered idol, till at last you bowed
Before a creature of your thought. You stole
From excellence divine the grace and good
That made me worshipful; and even these
Failed on your heart at last, and ceased to yield
The inspiration that you craved. You pined,
You starved for something infinitely sweet;
And still you sought it blindly, wilfully
In your poor wife,—sought it and found it not,
Through wasted years of life.

"And then you craved
An infinite return. You asked for more
Than I could give, although I gave you all
That woman can bestow on man. You knew
You held my constant love, unlimited
Save by the bonds of mortal tenderness,
And still you longed for more. Then sprang your scheme
For finding in the love of multitudes,
And in their praise that which had failed in me.
You wrote for love and fame, and won them both
By manly striving—won and wore them long.
All good there is in love and praise of men,
You garnered in your life. On this reward
You lived, till you were sated, or until
You learned it bore no satisfying meed—
Learned that the love of many was not more
Than love of one. With all my love your own,
With love and praise of men, your famished soul
Craved infinite approval—craved a love
Beyond the love of woman and of man.

"Then with new hope, you apotheosised
Your cherished art, and sought for excellence
And for your own approval, with what end
Your helplessness informs me. You essayed
The revelation of the mighty forms
That dwell in the unrealized. You sought
To shape your best ideals, and to find
In the grand scheme your motive and reward.
All this blind reaching after excellence,
Was but the reaching of your soul for God
Imagination could not touch the hight;
And you were baffled. So, you failed to find
The God your spirit yearned for in your art,
And failed of self-approval.

"You have now
But one resource,—you are shut up to this:
You must bow down and worship God; and give
Your heart to him, accept his love for you,
And feast your soul on excellence in him.
So, a new life shall open to your feet,
Strown richly with rewards; and when your steps
Shall reach the river, I will wait for you
Upon the other shore, and we shall be
One in the life immortal as in this.
O! Paul! your time is now. I cannot die
And leave you comfortless. I cannot die
And enter on the pleasures that I know
Await me yonder, with the consciousness
That you are still unhappy."

Let the Forgiven Fear.

A soldier, whose regiment lay in a garrison town in England, was about to be brought before his commanding officer for some offense. He was an old offender, and had been often punished. "Here he is again," said the officer, on his name being mentioned. "Everything—flogging, disgrace, imprisonment—has been tried with him."

Whereupon the sergeant stepped forward, and apologizing for the liberty he took, said:

"There is one thing which has never been done with him yet, sir."

"What is that?" was the answer.

"Well, sir," said the sergeant, "he has never been forgiven."

"Forgiven!" exclaimed the colonel, surprised at the suggestion.

He reflected for a few moments, ordered the culprit to be brought in, and asked him what he had to say to the charge.

"Nothing, sir," was the reply; "only I am sorry for what I have done."

Turning a kind and pitiful look on the man, who expected nothing else than that his punishment would be increased with the repetition of his offense, the colonel addressed him, saying:

"Well, we have resolved to forgive you!"

The soldier was struck dumb with astonishment; the tears started in his eyes, and he wept like a child. He was humbled to the dust; he thanked his officer and retired—to be the old refractory, incorrigible man? No; he was another man from that day forward. He who tells the story had him for years under his eye, and a better conducted man never wore the Queen's colors. In him kindness bent one whom harshness could not break; he was conquered by mercy, and forgiven, and ever afterward feared to offend.

Shall the goodness and grace of God have any effect on us? Shall we continue in sin that grace may abound? God forbid. Let the forgiven fear, and O, let none offered a greater forgiveness, a pardon which cost God His Son, refuse so great a boon! Weigh well, I pray you, these solemn words: "He that despised Moses' law, died without mercy under two or three witnesses; of how much sorer punishment, suppose ye, shall he be thought worthy who hath trodden under foot the Son of God, and hath counted the blood of the Covenant, wherewith He was sanctified, an unholy thing, and hath done despite unto the Spirit of Grace?"—*Zion's Advocate.*

Why Prohibition?

The prohibitory law, rightly constructed and enforced, is essential to the safety of the majority of the intemperate. The attraction of an open bar is, to many, overmastering. A friend urging the writer to support a prohibitory law, used the following language:

"Sir, I am too weak to pass a rum-shop when a friend asks me in. For ten years I never knew what it was to be sober an entire week until the liquor shops were closed between my house and my place of business. *Habit took me there.* I was master elsewhere."

Another writes:

"Sir, I dare now come to a prayer-meeting. The open bars are closed between my house and the place of prayer."

This man is a hero. In fighting the claims of appetite, he has been compelled at times to place the table between himself and the door. The perspiration would flood his brows; his eyes would burn; his tongue seemed parched for rum, and yet he gained the mastery, but not until the constabulary helped to deliver him from evil. A widow enters the parlor, and tells this story:

"My husband was an excellent mechanic, a noble man, and a devoted father. But he loved rum. For months he would resist his enemy. He would clothe himself and his family, furnish the house, and all at once begin drinking. Once started, nothing could stop him. He would squander clothes and furniture, and at last be arrested and confined at Deer Island for six months, when he would come out of his intoxicated state, and be once more a man. Often has he said: 'Oh, wife, that I knew a place where no liquor is sold! I would go anywhere.' At last he begged that he might remain behind bolts and bars. It was impossible. He came out, struggled for a time, and went down amid the dark waves of dissipation."

Thousands beside him are subject to "uncontrollable fits of intoxication." We know the story of the mælstrom; whoever touched its outermost eddy was imperilled. Immediate escape was a duty, or ultimate death became a necessity. Think of the young man at Newton pushed over the stairs into the mill-race, floated down and drowned. Who has been arrested? A drunkard has died! Follow his soul. Think of his night of despair—and all because of an open rum-shop.—*Rev. J. D. Fulton.*

Unpopular Men.

Unpopular men, those who cannot get the attention of people to their writings or their speeches, are much inclined to disparage those who are more successful; to ascribe their popularity to certain elements of superficiality and weakness. They console themselves by the reflection that deeper thinkers, profounder minds, are not easily understood by the multitude, and cannot attract them, and must wait patiently till the cultivated portion of the public learns to appreciate them. In this there is, doubtless, a measure of truth. In the intellectual, as in the commercial world, the wares sell fastest which are most in demand, and those are most in demand which best meet the immediate needs. He who discusses the questions of the day—those which come directly home to the hearts of men—will find more readers or hearers than he who deals with the dead questions of the past, or speculates respecting the remote future.

But it by no means follows that the popular man is a weak man, or even superficial. He may be, in many ways, quite in advance of his age, and yet have so many points of contact with it, that his contemporaries shall recognise his greatness. Indeed, the speaker, be he preacher, or lecturer, or statesman, must be heard and understood, or they are lost. If he have not immediate influence, if he cannot control the public mind and direct its present action, he may as well be silent. Speakers speak in order to move men, and their popularity is a proof that men do hear them, and are in greater or less degree moved by them.

It is impossible that any man, to whom the public listens for years with eager attention, can be a weak man. He may not be great in the large sense of the term, but he must have certain elements of attraction and power. Men will not long pay attention to a fool, even if his folly be amusing. There must be a measure of intellectual or moral strength in that speaker whom men throng to hear, even if the critics find nothing in him to praise.—*The Churchman.*

THE YOUNG FOLKS.

A Glimpse in the Rear.

A STORY FOR BOYS.

"So you would like to be office-boy, for a few weeks," said lawyer Steele, looking up from his paper.

Ury Sliter turned his cap in his hands, with downcast eyes.

"I should, sir, but I was speaking for Davie Simmons; he heard about the place first."

"And is Davie as nice a boy as you are?" said the lawyer with an approving glance at Ury's trim figure and clean collar.

"He's a very nice boy," said Ury, hesitating.

The sharp lawyer was quite sure he was keeping something back.

"Well, is he strong, and handy, and quick? Why didn't he come to see me himself?"

"He is lame, sir," said Ury with regretful candor, "and it tired him to walk so far, so I said I'd come for him."

"Lame!" exclaimed lawyer Steele sharply. "Well, that's the end of the matter. What did the jackanapes suppose I wanted of him—to perch him on a shelf for an ornament? No I want a pair of legs that can run errands from morning till night, if necessary."

Ury looked distressed.

"I think you would like him, sir."

The lawyer shook his head. "You are a good, true friend," said he more pleasantly, "but Davie would be of no use to me. I should like to engage you in his place."

Ury hesitated and demurred.

"I don't know what Davie will think. Perhaps if he had come himself——"

"It would have made no difference," interrupted lawyer Steele. "So shall we call it a bargain? Here, take an orange, my boy, while you're making up your mind."

"Thank you," said Ury, "I won't eat it now. I will take it to my little brother he is so fond of oranges."

The old lawyer beamed upon him more genially still.

"Here's another for your brother, my fine fellow,

and as for that matter, you may as well take one to lame Davie, too. Now good morning. You may come to-morrow, bright and early."

Ury bowed very respectfully, and thanked him; but he wiped his face with his red-bordered handkerchief, faltered something about "poor Davie," and went out seeming more grieved over Davie's crushed hopes, than elated with his own good fortune.

"A fine boy," said lawyer Steele to a client.

"A promising boy!" returned Squire Upton absently.

But Mr. Fred, the lawyer's son, looked after the retreating figure, and said nothing, but thought a great deal.

The fact was that Fred, who had been out of town on some business for his father, had that morning just returned by rail. During the course of his travels he had been whirled through a great many places, some large and some small, and as is generally the case in this mode of traveling, had made acquaintance with a great many back doors and kitchen gardens.

Now this he had found very curious, and far from uninteresting. The houses seemed to have thrown off their masks and their company manners, and revealed themselves in their real life and true characters. What hypocrites some of them were! For instance, how was he astonished when he whirled past Mr. Baker's house, in the next town! He knew it by its cupola, and a side glimpse of the grand bay-windows, the most pretentious house within ten miles. And he remembered that on the street, it stood in a spotless, white dress, with its brown granite feet planted decorously and neatly before it, its shutters bowed, and fringed curtains drooped like eyelids in the langor of most genteel repose. But ah! in the rear, what a contrast? What chaos and confusion, glimpses of ash-heaps, rubbish of broken glass and rusty nails, crops of burdock and thistle, crazy fences, and general discomfort.

Fred smiled in spite of himself. He should never drive up to that smooth front again without thinking what an old humbug it was.

"Ah," sighed he, for he was studying with his father to be a lawyer, "if there were only some way of getting a glimpse at *people* in the rear."

He was still revolving this idea as he came into the office just in time to hear the talk between Ury and his father, and, very strangely, this frank, self-sacrificing boy—this trim, decorous little building not made with hands, reminded him of Mr. Baker's double-faced house.

"We've only had a front view of Ury Sliter, I'm almost certain," he said to himself, leaning from the window; and then, with a sudden impulse, he seized his hat and hurried after the boy.

"I'm sorry my father was so hasty about Davie," he began. "I knew a lame boy once who jumped around as spry as anybody, and was the most faithful fellow in the world. Now don't despair, you seemed so broken-hearted about the decision that I've made up my mind to intercede for you both. I've a great deal of influence with my father, and I'm pretty sure I can make him take Davie, yet."

There was a great commotion in Ury's smooth face. He turned away his head, but not quite quick enough. It seemed as though a window had been suddenly raised, and Fred's keen eyes saw that a great load of disappointment, selfishness and anger was being hastily carted into the rear.

When it was all safely dumped out of sight as Ury hoped, he turned again to Mr. Fred.

"You are very kind sir," he, faltered, "if it won't give you too much trouble—"

"Not the least in the world! When I see a boy so generous and unselfish, I want to encourage him all I can."

Ury smiled in a sickly way.

"Ah, see that poor woman with her baby by the hedge!" cried Fred suddenly. "She looks as if she hadn't tasted a morsel to-day. How delighted she'd be with one of those oranges!"

Ury colored. "Yes but one is Davie's, you know, and one is—"

"Yes," interrupted Fred, "I was so pleased when you wanted to give yours to your little brother! But you forget father gave you *three*; one is your own yet, and you can do whatever your own good heart tells you to. You forgot that, didn't you?" said Fred brightly, as if he were making the most delightful suggestion.

"Yes," said Ury faintly, his face red with the effort to stow away a little ash-heap of meanness as he laid the orange in the woman's hand.

Fred laughed. "How pleasant it is to do a kind action," said he; "your whole face is glowing! I will let you know about Davie this afternoon," and they parted at the corner of the street.

As Fred returned an hour later, the common with its trees and shaded walks tempted him to turn aside. It was a warm day, and Fred was something of an idler; so he bent his steps to a little clump of woods he well knew, and threw himself upon the grass. He was just losing himself in a day-dream, when the sound of voices very near him caused him to raise himself on his elbow and peer through the trees.

"I declare," said he with a low laugh, "if there isn't my generous friend Ury Sliter, and Davie and the little brother with him. And if I am not very much mistaken I am about to be favored with a glimpse in the rear!"

"And he wouldn't have me at all?" said a mournful, shaky voice, which was Davie's.

"I said all I could for you," said Ury, "you may ask Squire Upton. But you see, he just seemed to take a great fancy to me and would not hear of any one else. I hope you don't think I wasn't fair?"

"O no," sighed Davie, "but you don't know how I hate to go home, mother and Susy were so sure I would get it," and he drew his worn sleeve across his eyes. "Susy thought we'd both have some new clothes this summer, but the old ones will have to do," and he gave a little nervous laugh, trying to be manly.

"Here," said Ury, uneasily, "have a piece of orange!" and taking out one he cut a generous quarter each for Davie and the little brother, reserving the half for himself.

"It is so good, Ury," said the little one, smacking his lips, "isn't there any more?"

"No!" said Ury, shortly.

"What is that big bunch in your pocket?"

There was a disturbance in the ash-heap, the dust began to fly!

"Don't bother!" cried Ury, threateningly.

But the hungry little brother rushed on to destruction.

"It looks just like an orange. May be you forgot it; just look, Ury, I only want a little piece, a little, little piece."

Ury got up with a flaming face, boxed the small brother's ears, and shook him till if the little soul and body hadn't had the strongest kind of a grip of each other, they would certainly have parted company.

Davie interfered and rescued the child, but neither he nor the little brother who sat down to sob very quietly to himself, seemed in the least surprised. It was quite evident that Ury did not very often honor them with a front reception, and that they were quite used to being hurt with the rusty nails and broken glass of anger and selfishness that lay in the rear.

After a few minutes Ury sauntered away, followed by the lagging little brother, and Davie was left alone.

Then Fred went up gently to the poor boy, who was sobbing with his face to the grass.

"Have you been lame a great while, my poor fellow, and can't you be cured?

Davie looked up in such bewilderment that Fred repeated the question.

"I've been lame, if that's what you call it, sir, since yesterday," said Davie. "I was at the new building, and a heavy stone fell on my toes. It almost kills me to walk to-day, but mother thinks I'll be all right in a week."

"Oho!" thought Fred, "what a candid, truthful boy is Ury. Who would think so much rubbish lay behind that small, one-story building?"

Davie spent no more time sobbing on the grass that day! Mr. Fred had a long talk with him, looking keenly all the while in his honest, patient face; and in the end he engaged him to come to Lawyer Steele's the very first day his foot would permit, and dismissed him with a quarter for Susy.

That afternoon Ury received a little note:—

"Mr. Ury Sliter: Knowing your great anxiety, I hasten to inform you that your most ardent wishes are realized, and your friend Davie will come to our office in a few days. It is very singular, but a little circumstance you forgot to mention, namely, that Davie's lameness was only temporary, has entirely removed my father's prejudices against him. If you had only known at the time that such a trifling fact would have made it all right, how much anxiety you might have been saved. My father is very eccentric. Hoping you may have equal success in all your generous undertakings,

I remain yours, etc.,

FRED STEELE.

Also, Importers of

DOLE'S SPOKE TENONING MACHINES,

DOLE'S HUB BOXING MACHINES, DOLE'S PATENT ADJUSTIBLE HOLLOW AUGERS, THIMBLE SKEINS, PLATED AND IRON-TURNED HUB BANDS, AXLE CLIPS (best hand make), TOP PROPS, FELLOE PLATES, CLIP KING BOLTS,

Wilcox's Shaft Couplings, Pole, Shaft and Yoke Tips, Malleable Iron Castings for Vehicles, all kinds.

SANDER'S NEW YORK BEST HALF PATENT AXLES, CONCORD AXLES, SIDE SPRINGS, Etc.

Having the advantage of a long experience in this line of business, and abundant facilities, we are well prepared to fill any orders with which we may be favored, upon the best terms, and with the same care, promptness, and attention as heretofore.

ORDERS FROM THE COUNTRY SOLICITED.

If from persons unknown to us, they should be accompanied with the cash or city reference.

Merchants and others bringing orders to us, will be met with liberal terms.

Persons ordering goods will please be particular in describing what they want, so as to prevent mistakes.

☞ Catalogue and Price Lists sent on application.

PACIFIC COAST ITEMS.

The dedication of the new Presbyterian church on Howard st., between 21st and 22d sts., will take place on the ensuing Sabbath, at three o'clock, P. M. Sermon by the Rev. Chas. Wadsworth. D. D. All friends are cordially invited to be present.

The San Bernardino *Guardian* says: "The orange, lemon, fig and grape flourish here as well as in Italy; the mulberry grows luxuriantly, and there is no reason why Southern California should not become tho Italy of America, and furnish the States east of the Rocky Mountains, fruits, nuts, wines and silk, instead of importing them from the ports of the Mediterranean. We dream no idle dreams, nor engage in visionary speculations. The past twelve or fifteen years of California history and advancement in agricultural and horticultural pursuits and in manufactures teach us what the future has in store for us. Let us profit by the experience and begin to lay the foundation in the present, that the future may bring us its reward of a noble prosperity."

There is a prospect that the custom of shipping grain in bulk will soon prevail in this State. The objections to that method are probably of less weight than has generally been supposed, and the necessity of buying sacks each year has long been a heavy tax upon the farmers. They will gladly welcome a change. A company has been formed at Vallejo, with a capital of $500,000, for the purpose of erecting warehouses and a grain-elevator, with the modern improvements, such as are in use in the Western Atlantic States.

Californians have not yet recovered from their mania for locating new cities. Nearly every paper in the State points out some place of great commercial importance which is sure to be built up in connection with some of the new railroads. There can be little doubt that such places will spring up, but probably a trip through the country in ten years from now, will show their location more precisely than a careful study of the State papers at the present time.

The California Sugar Manufacturing Company has been incorporated, with a capital of $600,000. The company will commence operations in Santa Clara County. A contract has been made to plant one hundred and fifty acres in sorghum, imphee, and sugar beets, on a farm near Alviso, where a mill will be erected this summer, capable of working the product of five hundred acres. That number of acres would be planted this season but for the want of seed.

The California Labor and Employment Exchange has been in operation for two weeks. A large number of persons have applied for employment, and of those who really wish to work a majority have been directed to persons who wish to obtain their services. Many who wish to be employed as clerks cannot be furnished with positions by the Society since the supply of this kind of laborers, as usual, far exceeds the demand.

It is said that a colony of three hundred Swedes will settle in our State if satisfactory arrangements can be made. The Swedes are an honest and industrious people, and if they conclude to make their home in some of our fertile valleys, they will doubtless better their own condition, and add greatly to the prosperity of California.

The new steam plow, now being constructed at Martinez, is to be finished and at work in a few weeks. The success of the trial of a similiar but greatly inferior machine, a few months since, gives the proprietors ground to hope that the introduction of this plow will mark a new era in the agriculture of our State.

Some of the companies who invested largely in the petroleum speculation in Santa Barbara County a few years ago, which turned out a complete failure, are likely to make a fair profit on their investment after all, on account of the immense rise in the value of land in that region for agricultural purposes.

A gentleman who has just visited Yosemite Valley, reports to the Mariposa *Mail* that that famous locality has received rather rough usage at the hands of winter. The snow at the foot of Yosemite Falls is nearly three hundred feet deep. Califonia is ahead, even in the matter of snow drifts.

The *Rocky Mountain News* says: "The coal question, which has had an important bearing upon our railway interests, seems to be definitely settled. Three large veins of coal have been discovered near the line of the Railroad."

The Imperial Government has agreed to share equally with British Columbia the expense of establishing a line of steamers between Victoria and this port.

A curiously arranged system of electric signal bells has been introduced in the Savage mine in Nevada, by means of which the engineer is in perfect communication with the workmen in all parts of the underground works.

The people of Southern California are agitating the matter of establishing a college for the education of their youth. A good movement, but possibly a little premature.

The peach crop in Siskiyou County will be a failure this season, the intense cold of the early part of April having prevented the trees from coming to blossom.

TELEGRAPHIC SUMMARY.

Eastern.—Jefferson Davis has given a new bail bond of $100,000, headed by Greeley, Vanderbilt, and Gerrit Smith, for $25,000 each....In Georgia, the Republicans have elected their Governor and a majority of the Legislature. The white Republican vote was 44,000....Eleven persons were killed by the explosion of a steam boiler at Buffalo, N. Y., on May 1st....The Treasury Department has ordered all the distilleries in New York to be closed, owing to the fact that they sell whisky at less than the excise tax....Governor Brownlow is about to call out the militia in Tennesee to suppress lawlessness in that State....Arrangements are being made to hold a National Soldiers' Convention in Chicago, about the time of the Republican Convention.

Congressional.—In the House, a resolution arraigning the Managers of the Impeachment Trial in reference to the Alta Vela case, was indefintely postponed, after a bitter personal debate....The report of the Commissioners for the Collection of Mining Statistics has been received by the House. It recommends artesian wells for supplying the Western plains with water, speaks of the discovery of coal along the Eastern base of the Rocky Mountains, and discusses the best methods of reducing the rates of transportation west of the mountains.

Impeachment.—Evarts, Curtis, and Stanberry have concluded their argument for the defense. They proceed mainly on the ground that the House is influenced by partisan motives in the impeachment of the President, and that the President has a right to disobey a law, in order to test its constitutionality....There is a rumor, probably sensational, that if Johnson is removed, his Cabinet will refuse to resign... Bingham is making the final argument for the Managers.

Foreign.—The Cretans have gained a great victory over the Turks....In the British House of Commons, the Liberals, on third reading, passed Gladstone's resolution for disestablishing the Irish Church, by a majority of sixty-five, which is a gain of five votes since April 4th....In the Canadian Parliament, a protest from Nova Scotia against the Union was voted down by a large majority....Complaints are made of outrages on American merchants at Monterey, Mexico, perpetrated by the local authorities....The allies are achieving new successes over the Paraguayans in South America....Burke and Shaw, of the Clerkenwall prisoners, have been found guilty and sentenced to long imprisonment. ....A new eruption of the volcano Mauna Loa, in Haiwaii, is reported, accompanied by violent shocks of earthquake, causing great loss of life and property.

WEEKLY MARKET REPORT.

San Francisco Cattle Market.

Wednesday, May 6, 1868.

The demand is quiet, and prices easier to the buyer, the decline since last week being fully 1c ℔ lb.

We quote slaughterers' prices as follows:

Beef—American, 1st quality, 7@8½c ℔ lb.
do 2d do 6@7c ℔ lb.
Veal—Plentiful at 7@10c ℔ lb.
Mutton—Steady at 5@5½c ℔ lb.
Lamb—Plentiful at 7@7½c ℔ lb.
Pork—Undressed, 5½@8½c; dressed, 9@12c ℔ lb, as to quality.

Produce Market.

Flour—The Panama steamer this morning carried about 5,000 bbls in transit to New York, mainly on owners' account.

We quote city mills as follows:

Superfine, hf sks, ℔ 196 lbs	$6 25@6 50
qr sks	6 50@6 75
Extra, hf sks	7 00@7 25
qr sks	7 25@7 50

Wheat—Sales include 2 000 sks Oregon, in lots, private. We quote the market quiet $2 15@2 30. At the close, 1,600 sks good shipping, $2 25 ℔ 100 lbs.

Barley—We note a slightly improved demand. Sales of 500 sks feed $1 40; 400 sks brewing, $1 50 ℔ 100 lbs. Buyers are of the opinion that the market has reached its level.

Oats—Sales include 400 sks fair, $2 12½; 334 sks good, $2 25. The range of the market is $2 10@$2 50 ℔ 100 lbs, the outside figure being considered a nominal quotation for small jobbing lots from store.

Potatoes—Sales of 1,000 sks Humboldt, private. The heavy arrivals of late have further depressed the market, so that now $1 15 is considered an outside quotation for best lots; other kinds range from 75c to $1 ℔ 100 lbs.

Corn—The various descriptions are quoted as follows: Red, $2 25; pale Yellow, $2 30; deep Yellow, $2 35@2 40, and White, $2 25@2 37½ ℔ 100 lbs.

Rye—Last sales from wharf were at $2, and from store, $2 12½ ℔ 100 lbs.

Buckwheat—Demand light at $1 60@2 ℔ 100 lbs.

Onions—None in first hands; new crop expected inside of a fortnight.

Beans—The jobbing rates are as follows: Bayo, 3¾c; Butter, 4½@5c; Pea, 5½@6c; small White, 5½@5¾; Pink, 3@3½c, and Red, 2⅛@2¼c ℔ lb. For round lots from wharf, prices are about ¼c less.

Bran—In moderate demand at $25 ℔ ton.

Middlings—We quote fine at $47 50@$50, and feed descriptions at $35@40 ℔ ton.

Oil Cake Meal—In fair request at $30 ℔ ton.

Hay—About 75 tons sold within the range of $15@22 ℔ ton.

Dairy Products—Under a moderate demand, supplies have accumulated. Fresh roll Butter is quoted at 27½@30c, occasional lots of very choice, 32½c; California firkin Butter 30@32c for store and ranch-packed; Cheese, 15@16c, the latter figure for Steele's and kindred qualities; S. Hough & Son's dairy, (large size) 18c; Eastern dairies, 21c ℔ lb. Eggs are in moderate supply at 32½@35 ℔ doz.

Poultry—The demand is light for all kinds. Live Turkeys are quoted at 15@16c, and dressed, 17@18c ℔ lb; Hens and Roosters, $5 50@6; Spring Chickens, $6@7; Ducks, $5@5 50 ℔ doz; Geese, $2@2 50 ℔ pair. These figures show a general decline from last week's quotations.

Provisions—The market rules steady. California smoked Bacon is quoted at 15½@16c; Oregon do, 12@13c; California Hams, 16@18c; Oregon do, 15@16c; California Lard, 14@15c, the latter figure for small tins, and Eastern do, 12@13½c ℔ lb.

Wool—The local mills are buying but little, though there is a good demand for shipment. Under the stimulus of recent Eastern orders, prices have advanced fully 1c ℔ lb. Desirable lots are quickly taken immediately upon arrival at full rates. Sales since last Wednesday aggregate about 400,000 lbs spring clip as follows: 150,000 lbs at 16@18c; 148,217 lbs at 16@17½c, and 80,000 lbs at 15@18¼c. A fair range for general lots of clean shipping grades may be stated at 16@17½c; for exceptional lots of very choice, 18@18¼c has been paid. Spring burry is quoted at 10@13½ as extremes, though the more popular range is 11@12½c ℔ lb. The shipment to New York by the steamer this morning amounted to 258,000 lbs.

Hides—The demand is fair at full figures. Sales since last Wednesday 516 California dry, fair to choice selection, 14@15c; 500 do choice, 15c ℔ lb. The steamer to-day carried 2,000 in transit to New York.

Tallow—Small sales of very choice have been made as high as 8c. The general range of the market for fair to choice Beef and Mutton is 7¼@7¾c ℔ lb.

—*S. F. Bulletin.*

MARRIED.

In this city, at the First Congregational Church, by Rev. A. L Stone, D.D., on Thursday, May 7, Ford H. Rogers and Miss Eva C. Adams, both of San Francisco. No cards.

CURRENT TOPICS.

The most terrific natural phenomena that have been witnessed during the century—so far as we remember, the most terrific in some of their peculiarities of which we have any record—are described in the papers lately received from the Sandwich Islands. The details have been so widely copied by our journals that it is not necessary to give them in our limited space, but there are some general facts connected with them which have special interest. There was marked resemblance between the prominent features of this agitation, both of land and water, and that of the West India Islands, a few months ago, on the same parallel of latitude and on the opposite side of the hemisphere. There was an addition to the island on which the commotion was greatest, from the depths of the sea, of the same nature as the rest of the land and the general formation of regions that are supposed to have had volcanic origin. The surface of the country in the vicinity of the eruption, and over which the lava flowed, was greatly changed. These and other facts, well understood and readily explained by geologists, may be observed by those who have not made such phenomena a study, with other feelings than those of mere curiosity. They speak volumes respecting the origin of these coast mountains, whose appearance was at first so strange to us. They suggest the possibility of further vast tracts to emerge from the Pacific in the ages to come, as the result of throes of which Nature thus shows herself to be capable. They oblige us to feel how utterly defenceless we are when only a little of the "hidings" of His power is revealed to us, whose amazing resources could rock the creation at His will. "He taketh up the isles as a very little thing," and continents and seas are in His hand. This truth may well awaken our awe, while it gives assurance of safety to those who are His friends.

The impeachment trial has been protracted beyond the expectation of the public, and it is now announced that the vote of the Senate will not be taken until to-day. The result is still doubtful, though men on both sides of the question are confident, and every appliance will be resorted to that can change a vote on either side. In our view, this is one of the most sad features of the case. We hoped a dignified trial would determine the facts, so that the honest men of the nation might have no doubt respecting them, and that if the President should be found to be guilty, he would be removed; if innocent, he would be sustained, without regard to the political issues of the day. But this now seems impossible, and none can predict the effect of the trial upon the country, or upon political parties, however the points involved may be decided.

The particulars of the recent horrible disaster on the Erie Railroad are sufficiently dreadful, but even when we read of disfigured corpses, and mangled forms from which life had not been instantly crushed, we are not so much shocked as by the statements of the Superintendent, in his last report, respecting the condition of that road upon which thousands were tempted to travel. He says: "The iron rails have been broken, laminated, and worn out beyond all precedent, until there is scarcely a mile of good road, except that laid with steel rails, between Jersey City and Salamanca, or Buffalo, where it is safe to run a train at the ordinary passenger-train speed." When it is remembered that almost all persons travel on our thoroughfares only because they have confidence in those who manage them, and are wholly at their mercy, a statement like that is fearful indeed. The wonder is that any train passed over the road without disaster, and the very words seem freighted with groans, and blood, and death. The laws can hardly be too stringent in regard to these thoroughfares, and manifestly there should be other supervision of them than that of the Directors and officers.

Some time since we called attention to the fact that several Christian men of this country have established and partially endowed a college in Syria. The college has flourished beyond the expectation of any, having had an average of about one hundred students a year, and having gained in general influence until it is now proposed to add to it a medical department. The missionaries represent that facilities for instruction in this direction would greatly increase the popularity and usefulness of the institution, and that they should be supplied without delay. A meeting was held in New York with reference to it, which excited much interest among those who have favored this phase of missionary progress, and there seems to be little doubt that in New York and London the amount of money necessary for the endowment of a medical school will be contributed. All who take a wide view of missions, and of the means adapted to win for Christianity a permanent place in heathen lands, must be rejoiced at such proof that light is welcomed, as they believe this is but the harbinger of the coming day.

While the tide of emigration continues to be full from the eastern coast to the Pacific, the indications are abundant that a tide no less full is pouring upon that coast from the other side of the Atlantic. The number increases, we are told, of those who are seeking a home in our own country, from the continental nations rather than from Great Britain, and they are largely of the class who desire to buy and cultivate our lands. The reasons for this increase may be found both in the state of things in Europe and in the attractions furnished by America, and now that reliable information can be conveyed even to the lower classes of European residents respecting the great interior and western districts that we can offer as their home, we may expect colonies, rather than individuals, to flow into these fertile and inviting regions. No country but our own could bear the strain upon its framework of so large an influx of foreign elements, and there is danger that we shall suffer from it, unless means are provided for the assimilation of these people, so that as rapidly as possible they may become Americans. Especially should facilities for education, of the higher and lower grades, be multiplied in the new portions of our territory, so that the next generation may be prepared, so far as intelligence is concerned, for the responsibilities of citizenship.

Lord Brougham is dead. The time was when this announcement would have caused excitement in all nations, for Brougham was once a mighty power. Now we are obliged to consult the past for a knowledge of his greatness, and no more is involved in the dispatch that makes known his death than the mere fact that an old man, ninety years of age, has passed from earth. How soon are the most prominent succeeded by others, who move on the affairs to the administration of which they seemed essential! How soon are the most distinguished almost forgotten, as one generation cometh and another goeth! Nevertheless, Lord Brougham has left his mark on the national policy, as well as history of Great Britain, and many of the schemes with which he was identified, both political and educational, will abide in their influence for good, though he has gone. Not many statesmen have been more renowned than the late Lord Chancellor of England.

Judge Provines has confirmed the opinion of those who knew him best, when they said he would decide in favor of the existing Sunday law. No important principle was urged by its opponents, and only personal and political influences were brought to bear upon him, with hope that they might be sufficient to determine the case in favor of those who desire to do their own pleasure on the holy day. Still, those who have been called upon to withstand these influences, when they come in so heavy a tide, know well that they are very difficult to resist, and Judge Provines deserves the hearty commendation of all lovers of good order, because of his firmness. It is not probable that any appeal will be taken, for it is pretty well understood that the Supreme Court would affirm the decision.

The anticipations of the public in regard to the Labor Exchange have been more than realized. No benevolent association, for such the Exchange may really be called, has ever accomplished in its infancy so great a work for the welfare of the State. The

announcement of its success will give a new impulse to the already active spirit of emigration in the East, so that as its facilities for work shall increase, it will have an abundance of material on which to expend its energies. Although employers throughout the State have hardly had time to become acquainted with the object of the association, already in some departments of labor demands are made which the Exchange cannot supply. The establishment of branch agencies in different parts of the State is being generally discussed, and will undoubtedly be effected at an early day. The time seems near at hand when no able-bodied man need want remunerative employment in California. Our fertile lands will no longer remain uncultivated, and the wonderful productive capacity of our State will be developed as more attractive than ever.

Religious Intelligence.

PACIFIC COAST.

The edifice erected by the Calvary Church, on Howard St. for the accommodation of their Sunday School, and for public services under the direction of Rev. Mr. Marr, was dedicated last Sabbath afternoon. Dr. Wadsworth preached the sermon, which was eminently appropriate to the occasion, and the exercises were of more than usual interest. The prospects of this enterprise are very encouraging, and the young minister has a growing and inviting field in which to labor. We understand that public worship will be maintained now regularly, in the new building.

—

We chronicled the departure of Rev. T. Frazer for Oregon. Some untoward circumstances have attended his visit. He was detained six weeks at Astoria by ice in the Columbia River, and then on his release and arrival at Portland, was disabled for a month by sickness. Since then he has preached and the congregation has grown. But the church is in a position calling for the prayers of those who remember such matters before God. New churches have been started recently which have naturally taken off some of its members. The pastor elect the Rev. Mr. Lindsley, has not been heard from, and his movements are unknown. Besides, Mr. Frazer desires to return to Santa Rosa, not merely for domestic reasons, but with reference to building a new church there. He feels the necessity, however, of sacrificing much for this principal church of the Presbyterian order in Oregon, and will remain several weeks longer.

—

Churches in Stockton.—There are, all told, twelve churches in Stockton, some of them very fine buildings. In addition to these, there is a Congregational assemblage that meets for worship in the south end of the Court House, in the District Court Room. These twelve congregations are as follows: Catholic, one; Baptist, two; Presbyterian, two; Jewish Synagogue, one; Campbellite (otherwise called Christian Church), one; Methodist, three; Episcopalian, one. There is also one church where the colored people worship, but to what denomination they belong we have not been informed. One of the Baptist churches also belongs to the colored. A close observer passing through Stockton would not be struck with the pious zeal of its inhabitants, if he was to judge from the exterior appearance of some of their places of worship. Several of the finest churches in the place sadly need repairs. The Baptist church, a fine building, has a tin roof on it that has never been painted, and, judging from its looks, will not go a great while longer before it will not be worth it. Perhaps our church people are afraid of being ranked with a certain class, of whom our Savior said: "Ye are like whited sepulchres, which indeed appear beautiful outward, but within are full of dead men's bones, and of all uncleanness." —*Stockton Gazette.*

—

The *Christian Inteligencer*, the organ of the Reformed (Dutch) Church, comes to us with a card from Dr. E. S. Porter, containing his resignation as its editor-in-chief. We are not surprised by this information, though we much regret that duty compels Dr. Porter to leave a position he has held so honorably and so long.

Sixteen years he has represented the sentiment and maintained the interests of the venerable Church with which the *Intelligencer* is connected, and it will be difficult for any one to fill the vacancy his resignation occasions.

—

Mr. E. Z. C. Judson has arrived in San Francisco, having accepted an invitation from the Sons of Temperance to labor for a time under their auspices. Mr. Judson was warmly welcomed at a reception attended by many friends of temperance, on Tuesday evening last, and there is no doubt he will do among us what he has done with success in the cities on the other side of the continent. He will need constant and active coöperation, however, and we trust this will not be withheld by any who love the cause he so ably advocates.

—

On Thursday of next week will commence the two General Assemblies of the Presbyterian Church —the O. S. in Albany, the N. S. in Harrisburg. In addition to the ordinary business, both bodies will, no doubt, give much time to the questions connected with reunion, as presented by the Joint Committee. No more important crisis has occurred in the history of our Church since the memorable year of disruption, and the result should be anticipated with interest and prayer.

—

This evening a festival in aid of the church in Hayes Valley invites all who are interested in the promising work of that little company of earnest Christians. They want help in the completion of their edifice on Fell Street, between Octavia and Laguna, and both their own sacrifices and the cause for which they have made them, call for sympathy and coöperation.

—

The church of Contra Costa is flourishing under the care of Rev. H. R. Avery, who is now beginning to reap the harvest of seed sown in years past. Last Sabbath six persons were added to this church on profession of faith, and there are several more who will soon be received.

—

A letter from Healdsburg says: "There is quite an interest in the church in this place. Six persons have been added to its membership, and others are anxiously inquiring."

—

We learn that the Rev. J. E. Braly, of Santa Clara, has started for the East, He is a delegate to the General Assembly of the Cumberland Presbyterian Church.

EASTERN.

At the late Union Convention, held at Morristown, N. J., Rev. Mr. Gallagher, pastor of an Episcopal church in Brooklyn, and undeterred by the fear of Stubbs and Boggs, though on the inviolable soil of New Jersey, being called to the floor made a very graceful and effective speech. He said that he would not insult his brethren by even saying that he considered them ministers of Christ truly and fully. He referred them to the interesting fact that in the First Presbyterian church of Morristown, which stood where we are now in session, Washington, an Episcopalian, once joined with those who worshipped there in the communion service. He read some striking words written by Washington on the subject of Christian unity, and recalled the noble speech [article] of Dean Alford, in which he recently took such open and hearty stand for reciprocal recognition among all Evangelical ministers.

A Strong Presbyterian County.—A correspondent of the *Presbyter* writes from Central Ohio: "At Wooster we have the largest Presbyterian Church in the Synod of Ohio; and in this region Presbyterianism prevails more than in any other part of the State. In Wayne County, there are fourteen O. S. Presbyterian churches, with a membership, in the aggregate, of over fifteen hundred. Besides these, there are four churches within fifteen miles of Wooster, which were once in the county, with an aggregate membership of three hundred. Taking Wooster as the center of a circle, with a radius of fifteen miles, we have in the circle, eighteen O. S. Presbyterian churches, and eighteen hundred Church members.

The people here do not believe that ministers' children are worse than other people's. Here lived Rev. T. E. Barr, five of whose sons entered the ministry. And here yet lives Rev. A. Hanna, whose eleven sons and sons-in-law are, or were, either ministers, elders, deacons or trustees in the Presbyterian Church.

From seventy churches we have received revival intelligence during the last two weeks. These churches have received to their communion, 2,780 persons—an average accession of nearly 40 to each church. Of the seventy revivals reported, 23 have prevailed in Presbyterian churches, and have thus far succeeded in adding to their membership, 800 converts. From many places, too, information, additional to that already published in our columns, has reached us of the continuance of the blessed work of the Spirit. A friend writes to the *Examiner* from New Albany, Ind: "The churches in this city have been greatly revived. The four Methodist churches, have had over 600 added to them; the Presbyterian about 200, and the Baptist not as many. The Presbyterian churches (two of them), have immersed, at their special request, several that have united with them."

A poor woman, on the evening of "Holy Thursday," went to a Catholic church in this city, carrying in her arms her infant child, only ten days old. The babe died during the service, and the unhappy mother, discovering the melancholy fact, and unable to restrain her feelings, shrieked aloud in her distress, and ran to the sacristy, and subsequently into the street, where she was arrested on the charge of disturbing a religious meeting, and sent to a police-station, with her dead child in her arms. She was kept all night a prisoner. The recklessness and even cruelty often exhibited in the treatment of the poor under circumstances like these are frightful.—*N. Y. Independent.*

The Council of the National Conference of Unitarian and other churches, sent a letter to the New England Methodist Conference, expressing an earnest interest in the great work done by the Methodist Church in America and other parts of the world, and offering assurance of their prayers and hopes that, under the guidance of the Holy Spirit and of the Great Head of the Church, like success might attend their plans and efforts for the future. The letter was conveyed by Rev. James Freeman Clarke, one of the most eminent of the Unitarian clergy, who was cordially welcomed and invited to address the Conference.

Rev. R. De Baptiste, baptised a short time since and admitted to the fellowship of the Olivet Baptist Church (colored), in Chicago, a colored woman who is one hundred and fifteen years of age, and now makes a profession of her faith in Christ. She remembers General Washington passing through Maryland, in which State she was then residing, and the great excitement of the people on his coming.

REV. BENJAMIN F. JACKSON, of Charleston, S. C., writes that Congregationalism is increasing to such an extent in the Palmetto State that there will probably be fifty churches of that denomination in its boundaries in three years. His church, the Plymouth, has 225 members, and a Sunday School of 448 scholars.

PRINCETON COLLEGE. — Dr. William Henry Green, D.D., Professor of Hebrew in the Presbyterian Theological Seminary, at Princeton, and an accomplished scholar, was on Tuesday last, 7th inst., unanimously elected President of Princeton College, in the place of Rev. Dr. Maclean, resigned.

REV. DR. P. D. GURLEY, of the New York Avenue Presbyterian Church, Washington City, who has been compelled, by severe ill-health to retire for a season from his pulpit and people, will take, we understand, a trip to California in the hope of being permanently restored.

IN Danville, Pennsylvania, a remarkable work of grace is in progress, and 600 have been received by the different churches during the winter. One hundred and twenty of these joined the Baptist society.

CHURCHES.—"A Presbyterian church was organized Sabbath, March 8th, at Beavers' Falls, Minn., seventy miles beyond any of our churches or ministers preaching in the English language."

REV. E. P. PARKER'S society in Hartford have increased his salary, and are so urgent for him to remain with them, that he declines the call of the Memorial church, Springfield.

REV. WILLIAM HART, of Malden, N. Y., has accepted the call to the Assembly's church, Washington, D. C. He entered upon his new field of labor on the 15th of April.

THE Brooklyn Young Men's Christian Association has closed an engagement with Rev. Wm. M. Martin, late of Virginia City, Cal., to act as their chaplain.

THE Young Men's Christian Association of Bethelem, Pa., has erected a building for its use, at a cost of between $15,000 and $16,000.

FOREIGN.

DISSENT in Ireland is practically extinct, though thirty years ago both Methodism and Congregationalism may be said to have flourished. In a very large portion of the country, however, Protestantism will totally disappear with the downfall of the Church, and the handful of Protestant whorshippers be left without any religious ministrations whatever. Whether they will suffer by this is, however, more than doubtful, as the ministers paid by the state to instruct congregations of this size are very rarely of much value from a spiritual point of view. In fact, the Irish clergy, except in Dublin and one or two other large cities, have themselves been for long years a standing illustration of the badness of the system to which they belong. What with their want of intelligent society, their unfortunate relations with their Catholic neighbors, who look on them as the outposts of a foreign army, their close connections with the Protestant gentry, whose relations with their Catholic neighbors are nearly as bad, and the demoralizing influence of a false position, they may be said to have done nothing for religion, and little or nothing for learning. A more deplorable history than theirs, considering what the state has done for them, from a literary point of view, no body of clergy in Europe has to show. The Irish bishoprics, too, have, when not given to Englishmen, been generally bestowed as rewards for political service of a low order, rendered by the appointee's relatives. One or two great houses may be said to have had bishoprics in the family. In fact, taken for all in all, a viler abuse, one with fewer redeeming traits, fewer historical claims to the sympathy or consideration of any intelligent human being, than the Irish Church, has never fallen before the reformer's axe.

SEVERAL years ago an important measure was adopted by the Prussian government relative to the observance of Sunday, by restricting on that day the ordinary work of the post. By this means a great number of postmen were enabled to enjoy the rest granted them by God, and to serve God according to their conscience. This same measure was last year accorded to the new provinces annexed by Prussia, and since November, 1867, it has been in vigorous operation, without having called forth, as it appears, any violent opposition, or produced any commercial derangement.

THE Central Protestant Evangelization Society of Paris has been established twenty-one years, and has established Christian worship in one hundred and sixty-three localities. It sustains thirty schools, and employs ninety-three agents, of whom forty-eight are preachers. To supply a great need felt by the churches, it has established a preparatory theological school, which has in fifteen years given sixty-five pastors to the churches, and is now training fifty-two students.

DR. LIVINGSTONE.—All doubts of the safety of Dr. Livingstone, the African explorer, are now dispelled. Sir Roderick Murchison, April 8th, received a letter from the distinguished traveller, which came by way of Zanzibar. Dr. Livingstone writes that he is in good health, that his journey of exploration has been successful, and that he will soon return to England.

REV. MR. SPURGEON'S Church at the Tabernacle numbers now 3,634 communicants. His Theological school is also sending out a company of thoroughly evangelical and promising young men into the ministry. He recently received anonymously $10,000 for his operations.

Sunday School Books.

The Largest and Choicest Assortment in the city, embracing the publications of

AMERICAN SUNDAY SCHOOL UNION,
AMERICAN TRACT SOCIETY,
MASS. SABBATH SCHOOL SOCIETY,
ROBERT CARTER & BROTHERS,
HENRY HOYT,

The Occident.

San Francisco, Saturday, May 16, 1868.

USEFULNESS GOD'S MEASURE OF EMINENCE.

Men differ widely respecting what they call elevation, greatness, eminence, in their relations to one another. One makes it depend on what he gathers around him, by which he may be distinguished. Another, on what may be within him which causes him to be unlike his fellows. Another on the accidental position he may reach through some favoring influences. There are few who measure eminence by what is desired, or done, for the good of others. Yet this is the test by which God estimates us. It is the test which He invites us to apply to Himself—to all the declarations He gives us respecting His character and attributes, adding proof from what He has done.

Study the wonders of creation, as they have been more and more revealed by science, and everywhere teems the evidence that while "for His pleasure they are and were created," that pleasure is fulfilled in the happiness and welfare of the beings He has made. The infinite greatness of the Maker is seen in the uses of what He has formed, their mutual and reciprocal adaptation and worth. Turn to the control of Providence in the natural and intellectual departments of His creation, and you are most amazed, not at the grandeur of the order that everywhere appears, and the majesty of the rule that has such sweep and sway, but at the tokens on all sides, which further study only renders more abundant, that Providence is moved by the wish and purpose to *do good*; that laws, the application of principles, the regulation of forces, physical and moral, have no other end than the best interests of all to whom God is pleased so wonderfully to minister.

Turn again from these exhibitions of His perfections in exercise, to that theater of their display furnished by the invasion into the normal condition of things effected by sin. Examine the plan for the recovery of the fallen, as proposed in the counsels of the Godhead. They contemplated the manifestation of God's glory, but this was to be in the new display of His purpose to accomplish some good for man. They were jealous for the holy law, but the very provision for its continued honor was essential to the restoration of the transgressor to his estate of holiness. Follow the adorable Redeemer, who came to execute that plan, and in every sentiment and act and purpose; in His life, His character, and His death, can be traced the truth of His own words with which He epitomized the whole: "The Son of Man came not to be ministered unto, but to minister."

Wherever God is seen, is seen the proof of some service for His creature. In this is the most sublime demonstration of His divinity. Could we conceive of a Deity with only *passive* infinite attributes, doing nothing, simply existing, though it might be in the complacency of supreme satisfaction with Himself, He would not have the glory of the God we worship. Our God thrills us with amazement, fills us with gratitude, provokes our homage, at times oppresses us with awe, because He has not been passive, but *active*, bending His incomprehensible powers to our advantage, finding pleasure in doing good, and awakening anthems of praise over the universe, through discoveries of His usefulness.

Having thus exhibited His greatness to us, He demands that we prove our right to elevation in like manner. Usefulness to our fellows, devotion to His service, ever accompanied by reliance on the Lord Jesus for pardon wherein we fail, are God's tests of greatness, and it is the duty of every one to make himself, in this sense, as eminent as possible. Were some difficult or burdensome requirement laid upon us, there might be *excuse* for not a few. But every one can *serve*, in his own measure and within his own range. There can be no excuse for failure to rise when the helping hand we reach out to others, so far from keeping us down, will really bear us upward. By such means each one may strive to be *chief*. Selfishness has no place among these motives, but God turns all our thoughts beyond ourselves, above, on every side, beneath, as He commands us to grow, by work in His vineyard, and doing good to all.

We should admit the influence of such holy emulation, and have no wish to do less than we can, for He who in mercy gave us the rule, first adopted by Himself, will judge us by it at the last, and He only will determine our work. How will human estimates be reversed at that final assize? The vast company who value themselves in proportion as they are served by others, proud, haughty, self-sufficient, and outraged unless some new attention is bestowed on them each day, will fall back. Then, from the various paths of self-denial, toil, obscurity it may be, will come up those who shall take the highest rank in that vast assemblage of our race. Then it will be "enough for the servant that he be as his Master, enough for the disciple that he be as his Lord," and they will be glorified together.

Commendation.—We should be less human than we are were we not cheered and pleased by the frequent expressions of approbation which reach us from different directions respecting The Occident. Having had no experience in editing a newspaper, we were well aware that in attempting to adapt one to the wants and feelings of Presbyterians generally, and others who might desire such a family paper, we could hardly expect to avoid merited dissatisfaction at times, and should not have been surprised by occasional censure. In place of these, however, we have been constantly stimulated by the kind words of those whom we are willing to believe sincere. Often have we been blamed because we were unwilling to publish some of these kind words, but have not felt that this was really modest or necessary, and we only yield to the desire of others in printing the following note just received from some unknown subscriber.

BETTER AND BETTER.

Oakland, May 11, 1868.

I feel like saying just one word about The Occident. I have read carefully and with interest each number, from the beginning. The first numbers, though creditable to all concerned, and indicating future improvement, gave evidence that there was a large amount of reserved power, which would reveal itself when the proper occasions might make the demand. Thus far it has had a modest but vigorous growth. It is justly entitled to be called a true branch from the Tree of Life. Already it bears not only blossoms, but very luscious fruit. It has become better and better weekly, and, to change the figure, the last number, particularly, was a casket of jewels. The Occident ought to be in every family in the State.

Very respectfully and gratefully yours,

Paterfamilias.

We have been anxious to make such a paper as our friend describes The Occident to be, but can not yet agree with him in his judgment of its merit. We hope to satisfy ourselves, as well as others, after a time.

Water as a Symbol of Religious Purification.

NUMBER IV.

We now come to consider the use of water in the religious rites of the New Testament. The lowest in the scale is that which is exhibited *in the traditionary ablutions of the Jews.*

These were extra judicial and superstitious. Mark probably being a Hellenist, describes with much particularity the process: "For the Pharisees and the Jews, except they *wash their hands oft*, eat not, holding the traditions of the elders; and many other things there be which they have received to hold—as the *washing* (Greek: *baptismos*) of cups, and pots, and brazen vessels, and of tables."

For the purpose of separating his people from the heathen world, and teaching them the necessity of purity of heart, God imposed upon the Hebrews the rites of the ceremonial law, prescribing many ways in which they contracted uncleanness, and ordaining certain rites for their purification. The later Jews added to the weight of the law heavy burdens, multiplying the causes of impurity, and giving a corresponding unnatural efficacy to their ablutions, exposing themselves to the sharpest of the Savior's rebukes for their hypocritical regard for external ceremonies, while they neglected the weightier matters of the law, justice, and judgment. Even the Apostle Peter, having never eaten anything common or unclean, had to be enlightened by a miracle before he would violate the traditions of the Jews.

Mark notes first the diligence of this *hand-washing*, then the scrupulousness of the Jews in their ablutions when they came from market, and the attention paid to the washing (*baptismos*) of pots and cups, and brazen vessels. The disciples of Jesus, however, taught better by his precept and example, disregarded these vain ceremonies, and hence the rebuke of the Pharisee: "Why walk not thy disciples after the traditions of the elders, but eat bread with *unwashed hands?*" What importance the Pharisees attached to this ceremony will be seen by the following extracts: "A man shall *wash his hands* in the morning so that it shall suffice him for the whole day, and he shall not need to *wash his hands*, as often as he eats, which holds, if he do not avert his mind another way—that is, go abroad, or meddle with business, or *go to market.*" (Maimonides). "R. Aquiba, being in prison, and not having water enough to drink *and wash his hands*, chose to do the latter, saying, it was better to die of thirst than transgress the traditions of the elders." "The separation from the vulgar conduceth to the purity of the body from evil works, and the purity of the body from evil works conduceth to the separation of the soul from sinful affections, and the sanctity of the soul conduceth to the likeness of God." (Jewish writers.)

Nothing can be clearer from the above extracts than that the Jews expected by these ablutions to protect themselves from external defilement, and that they depended on these external purifications to secure purification of the heart and acceptance with God. But if anything more were necessary, we have the reproof of the Savior, who could not be mistaken in the meaning and intent of these rites: "Now do ye Pharisees *make clean the outside* of the cup and the platter, but your inward part is full of ravening and wickedness." No one can read these

passages, in Matthew, Mark, and Luke, and resist the conviction that these *baptismoi* were scrupulously observed by the Jews for the purpose of securing themselves in ritual *purity* and *cleanliness*. John has a casual but pertinent reference to these usages in chap. 2: 6: "And then were set there six water pots of stone, after the manner of the purifying of the Jews, containing two or three firkins apiece."

BAPTISM OF JOHN.

We come next to the baptism of John, the forerunner of the Messiah. My readers are too familiar with the facts and intent of John's baptism to need discussion on this matter. He himself shall declare its nature and intent: "I indeed baptize you with *water unto repentance*." "All Judea and Jerusalem and the region about Jordan, went out to him, and were baptized of him in Jordan, *confessing their sins*." The exhortation to the subjects of his baptism was, "*bring forth therefore, fruits meet for repentance*," or answerable to amendment of life, as it reads in the margin. The baptism of John was, therefore, an external purification, indicative of purification of heart and amendment of life. "His baptism implied that the whole people were unclean, and, in their present condition unfit for the Kingdom of Heaven. So far as the Jews were concerned, the rite originated in the Levitical lustrations provided for the unclean, but bore analogy, also, to the symbolical purifications by water and other ways, common to the other nations of the world and to the Jewish proselytes." (Lange.)

We receive additional light concerning John's baptism from the incident mentioned in the third chapter of the Gospel of John. There arose a discussion between some of John's disciples and the Jews about *purifying*. The dispute became so interesting that they must needs have the matter settled. To whom should they go as an arbiter on the subject but to the Baptist himself, showing most conclusively the connection in the minds of the Jews of that day between *baptism* and *purification*, and corroborating by this incidental illustration the view hitherto taken of the design of baptism administered by John *as a purifying ordinance*.

Before concluding this article I desire to refer to a passage in Hebrews all important in this investigation, because by apostolic hands it links together the purifying ablutions of the Old Testament with the work of the Lord Jesus in the New. We read in Hebrews: "Which was a figure for the time then present in which were offered both gifts and sacrifices, that could not make him that did the service perfect as pertaining to the conscience, which stood only in meats and drinks and *divers washings* (Greek: *baptismois*) and carnal ordinances imposed on them until the time of reformation." (Heb. 9: 10, 11.)

The apostle then proceeds to single out one of the *baptismoi* to illustrate and confirm his position: "For if the blood of bulls and of goats, and the ashes of a heifer, sprinkling the unclean, sanctifieth to the *purifying of the flesh*, how much more shall the blood of Christ, who through the Eternal Spirit offered Himself without spot to God, *purge your conscience* from dead works to serve the living God."

The only use I intend to make of these passages at the present time is to show how by the unerring guidance of the Holy Ghost in the inspired Word the idea of purification in the shadow of heavenly things efficacious to the *purifying* of the flesh, passes to the substance, in the more efficacious, exalted, and comprehensive work of Christ *purging* the conscience from dead works.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Seventh Term of this Institution will commence on Wednesday, January 22d, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

PARIS AND LONDON.

Paris and London! You cannot compare them. Paris, light, cheerful, clean, and clear of coal-black. Its public buildings combining immensity, solidity, splendor; their collossal facades perfect in detail; filled with innumerable statues; standing in vast open squares; looking upon monuments, gardens, and fountains. Paris with the Louvre, its origin wrapped in obscurity; a royal hunting-seat in the days of the Merovingian kings, standing at that time in an immense forest, and supposed to derive its name from the wolves (*louvres*) which swarmed around it; from the days of Francis I, who pulled down the old castle, and commanded the erection of the present edifice, until now, exhausting the resources of the sovereigns, architects, and the decorators of each succeeding generation! Paris, with the Louvre, in its present glory, the monument of Napoleon I, and Napoleon III, occupying four sides of an oblong, and covering sixty acres! The graceful Seine, running through the city "as if for its own amusement, rather to adorn and entertain Paris than to be useful to it;" crossed by twenty-seven stone bridges, of beautiful architecture, one would think that the river was the work of a landscape gardener and architect combined, the wealth of a great empire for centuries lavished on its adornment! The principal streets laid with a concrete, smooth and hard, over which wheels roll as over a marble slab, swept each night—not a straw, nor a paper shred allowed to lie during the day on either sidewalk or carriage-path; the water in the gutters looking limpid enough to drink; the shops of a general uniform aspect, at once durable, tasteful, and filled with all that in material, shape, and color, can attract the eye or lead captive the mind, whether gold and silver, gems, silks, laces, gew-gaws, pictures, prints—whatever is available for human use, or conceivable by human imagination; things needful and needless, arranged only as a Parisian knows how to arrange them.

The men sitting on the side-walks in front of the countless cafés, reading the papers, smoking, sipping the Arab berry, with all the ease of complete leisure, looking happy as if they never felt a pain, and wise as if they had solved all the problems of life. Scores of spruce, busy, stirring girls and women, neatly arrayed, passing you at each moment with uncovered heads and pretty caps; to them apparently committed by the men all the business of this working world; the feminines, the shop-keepers, the book-keepers of Paris. Order, courtesy, sobriety, comfort, splendor in the streets; no beggars, no drunkenness, no rowdies. Paris the Magnificent, with the best police on earth; Paris made for this world, with so much decency and taste pervading it as to persuade you, in spite of yourself, that this world is vastly better than it is!

Paris, to a stranger, like a huge, resplendent palace, bazaar, café, garden, and theatre combined, where pleasure chases pleasure, and some new excitement is ever driving away the last. To the student of science throwing open its universities, and schools, and its lectures; to the lovers of art offering free its unsurpassed treasures; a half-mile of rooms opening into rooms, containing all the different schools and ages of painters, and illustrating each of them by the work of masters. Paris, its libraries among the largest, the choicest, the rarest collections of books in the world. Paris, where enthroned sits the most ambitious dazzling monarchy of earth, grasping Europe and more than Europe in its plans for power; hesitating at no prodigality of cost to captivate the imagination of its subjects, and fire them with gorgeous dreams of the glory of France; creating new streets where the city was densest and its lanes narrowest; demolishing acres of houses and shops this year in order to open the view to the palaces, and monuments, and gardens, it caused to spring up last year, by demolishing previous acres of houses and shops! Paris of to-day is new to the eye that saw only the Paris of five years ago.

But London! London, with its more than three millions of inhabitants! London, with its fogs and its coal-smoke; its dingy, brick, and crowded streets! Sombre and dull to the mere pleasure-seeker, but like the English character, somewhat repellant until you get at the heart, and then noble within. For you must remember that France is centered in Paris. But the Englishman loves the country. There he is at home; there he lavishes his affection, his wealth, his taste, his labor. London is spread out over all England, and no nation can vie with her in the princely beauty, magnificence, and multitude of her rural homes.

The grand buildings in London are not concentrated, but scattered over this giant city. No entire streets and rows of houses have been removed, as in Paris, to create fine sites for palaces, monuments, and public squares. Herein is illustrated the difference between despotism and freedom. English associations are sacred. The past is respected. Accordingly architectural effect in London has been left to individual effort, and marks the slow and gradual elevation of public taste. In Paris it is decreed and instantly created by the throne. It disseminates good taste among the people, but does not result from it.

The parks of London have been reserved for the multitude. Vast in their extent, they comprise nearly 1,300 acres of green grass and woods within the precincts of the crowded city. Hyde Park contains three hundred and eighty-eight acres; St. James, ninety-one acres; Green Park, sixty acres; Regent's Park, four hundred and seventy-two acres; Victoria Park, two hundred and sixty-five acres. The Thames, unlike the Seine in Paris, is a most important thoroughfare, on which hundreds of boats at all hours, for a penny or two, transport you miles. Its rising tide brings in purity and freshness from the sea. The city is cleanliness itself, compared with New York. The immense tide of life that daily pours through the great avenues is rarely obstructed, and the tumult and clamor that mark the stoppage in Broadway are unknown.

London is not behind Paris in its libraries and collections of science and art. The British Museum, with its wealth of antiquities, manuscripts, and books, thrown open to the public, worthy of the resources of the British Empire! London, with its colleges, inns of court, hospitals, institutions of charity, and churches—multitudinous in number, royal in endowments! The edifice of the Bank of England covering four acres! St. Paul's Cathedral, a vast pile, would rank among the finest churches in Europe, were two defects supplied—the lack of space around it, that it might be seen, and the lack of decoration and color to fill up and warm its cold and blank walls. The Tower of London, dating back to Julius Cæsar, and bathed in a history of tears and blood, transmitting in monumental voice the crimes and the sufferings of traitors, the prayers and the constancy of martyrs; consecrated by bishops who suffered and died for the faith; immortalized by Raleigh, Russell, and Sydney! Among the saddest of the sad spots of earth, there in the square enclosure is the block of stone on which Anne Boleyn and Lady Jane Grey laid down their heads to die. There carved on the wall of the prison of the Beauchamp Tower, and cut in the solid stone with such rude tools as prisoners could command, is the name "*Jane*," and near it that of "*Dudley*," her husband. What weeks and months of sorrow, in that cold, dark room, must have been consumed in printing these letters of the heart on the rock! But enough. Paris can be seen and appreciated in days and weeks. London needs months and years.—*The Hartford Churchman.*

Moral Culture of Life the same for All.

We are prone to imagine that our temptations are peculiar; that other hearts are free from secret burdens that oppress our energies, and cast a cloud upon our joy; that life has for others a freer movement, and a less embarrassed way. But in no one has God made the human heart to carol its thoughtless song of joy; and the shadow of our moral being rests darkly upon us all. We cannot take the world as it comes, enjoying what it offers, and passing by its sufferings and its burdens with our lightest touch; we get involved in the deep questions of conscience and duty, and the sense of responsibility stills the carol of the spirit, and suffers no man to repose without a trouble on the bosom of life.

Infinite are the ways in which the devices and aims of the moral nature break the instinctive happiness that lives for the day, and forgets the morrow; but effectually this awakening of dheper and sadder life takes place in all; and struggle, fear, disappointment, the partial feeling of an unfilled destiny, the restless wavings of uncertain hopes, are in the heart of every man who has risen but a step above the animal life. The more we know of what passes in the minds of others, the more our friends disclose to us their secret consciousness, the more do we learn that no man is peculiar in his moral experience—that beneath the smoothest surface of outward life lie deep cares of the heart—and that, if we fall under our burdens, we fall beneath the temptations that are common to man, the existence of which others as little suspect in us as we do in them. We have but the trials that are incident to humanity—there is nothing peculiar in our case—and we must take up our burdens in faith of heart that, if we are in earnest, and trifle not with temptation, God will support us, as, in the past fidelity of His Providence, He has supported others as heavily laden as ourselves.

The New Life.

Christianity in the soul is, in the strict and literal sense, a NEW LIFE. And by this we mean, not merely a new course of action and conduct, but the formation of a new vital principle. As the temporal life of a man or animal consists not merely in outward actions, but also in an invisible principle by which those actions are prompted; so the spiritual life consists, not merely in new efforts and actions, but in the possession of a new principle, out of which these actions naturally flow. The striking analogy of the spiritual life to the temporal life appears in many particulars. * * * As our earthly existence is divided into rest and labor, repose and action, night and day; so the spiritual life consists of alternations of faith and works, trust and obedience, prayer and labor, quiet waiting and active obedience. In our temporal life we are surrounded by Nature; by sky and earth; mountain, forest, and ocean; drifting clouds, falling rains, the vegetable and animal worlds, and the speaking face of man and woman. In our spiritual life we are surrounded by a spiritual world of holy truths, gentle affections, far-reaching hopes, noble aims, and sympathies wide as the world. As the vital principle of plant or bird shows itself especially in the fact of growth, so one characteristic of the spiritual life is development and progress. * * * Man's soul is developed, as regards this life, by the various objects which attract his desires and passions. Just so the spritual life is the development of the spirit by the attractions of eternal things, which awaken love. "All life," says Fichte, "is love. He who loves most, lives most."—*J. F. Clarke.*

The Harmonies of the Soul.

I READ a story of a church in the old country, the organ of which was accustomed to be played at the evening service by a very poor player, but he being laid aside by sickness one evening, a stranger offered to conduct the services, and as the twilight fell, he sat himself down at the instrument and played the simple airs that the service required. When he had completed that, he began to feel his way along the keys with such strange and hitherto unknown power that the instrument seemed to those who listened to be something different from what it ever had been before. He, forgetful of himself, went on, opening sweeter and sweeter harmonies, until every one was amazed, and no one knew the organ because it was so played upon.

When the day comes that God's hand shall play upon the key-board of man's soul, and he shall bring out that long delayed melody, and those wonderful harmonies which we cannot compass, but of which the mind is capable, then methinks Heaven will stop to listen and hear the song of redemption—brought out, not in one, but in according hearts innumerable, in the kingdom of God's glory. We do not know what we are, nor what we are capable of becoming; and we shall not know until we stand in the full experience of it in the plenitude and blessedness of our Father's Kingdom.—*Beecher.*

MISCELLANY.

It is related of Napoleon, that when Marshal Duroc, an avowed infidel, was once telling a very improbable story, giving his opinion that it was true, the Emperor remarked:

"There are some men who are capable of believing everything but the Bible."

This remark finds abundant illustration in every age. There are men all about us at the present day who tell us they cannot believe the Bible; but their capabilities for believing everything which seems to oppose the Bible are enormous. The greediness with which they devour the most far-fetched stories—the flimsiest arguments—if they only appear to militate against the Word of God—is astonishing.

A country schoolmaster, preparing for an exhibition of his school, selected a class of pupils and wrote down the questions which he would put to them on examination day. The day arrived, and so did the hopefuls, all but one. The pupils took their places as had been arranged, and all went on glibly until the question of the absentee came, when the teacher asked,

"In whom do you believe?"

"In Napoleon Bonaparte," was the answer quickly returned.

"You believe in the Established Church, do you not?"

"No," said the youngster, "the boy that believes in that church hasn't come to school to-day."

The following anecdote used to be related by the late William Hazlitt. He was out visiting Mr. and Mrs. Basil Montague, when Sir Anthony Carlisle came in, apparently in a state of more than his usual self-complacency, having just received a flattering testimonial from the Apothecaries' Hall. In answer to the inquiries of Mr. Montague, he said, very pompously and somewhat profanely,

"Madam, the glorious Company of the Apothecaries praise me!"

"But," retorted Mrs. Montague, what say the noble army of martyrs, your patients, Sir Anthony?"

Sir Anthony was so nonplussed by this witty rejoinder that he somewhat suddenly took his leave.

A Cheerful View of Things.—"How dismal you look!" said a Bucket to his companion, as they were going to the well.

"Ah!" replied the other, "I was reflecting on the uselessness of our being filled; for, let us go away ever so full, we always come back empty."

"Dear me! how strange to look at it in that way," said the Bucket. "Now, I enjoy the thought that, however empty we come, we always go away full. Only look at it in that light, and you'll be as cheerful as I am."

Abernethy once gave a patient the following prescription:

"Let your servant bring to you three or four pails of water, and put it into a wash-tub; take off your clothes, get into it, and rub yourself well with soap and a rough towel, and you'll recover."

"This advice seems very much like telling me to wash myself," said the patient.

"Well," said Abernethy, "it may be open to that objection."

An usher in an English school, seeing one of the boys with a thick lump in one of his cheeks, asked:

"Quid est hoc?"

To which the lad, spattering out a large piece of chewing tobacco, replied, "Hoc est *quid*," for which repartee the master forgave him.

Drinking water neither makes a man sick nor in debt; nor his wife a widow.

Blessed is the man that maketh a short speech; he shall be invited to come again.

Oxford Bibles.

The superior excellence of the Bibles printed at the Oxford University Press is proverbial among all who prize correctness of the text, and clearness and beauty of typography and binding. The Oxford editions are the standard from which other editions are copied, and are therefore acknowledged as superior.

The Subscribers, who act as

SOLE AGENTS IN THE UNITED STATES

or these Bibles, keep all varieties and sizes, from the 48-mo. to the Folio. They select the following, which they strongly recommend.

THE SUNDAY SCHOOL BIBLE. Printed in clear type and well bound in arabesque - - - - - - - - - 50 cents.

THE PEW BIBLE. Printed in large type and bound in morocco, $2 00; Turkey morocco, $3 00.

THE STUDENT'S BIBLE. Printed on fine paper, in beautiful type, with References and Maps, and an Index to the persons, places, and subjects occurring in the Scriptures. Turkey morocco, - - - - - - - - - - - $4 00

THE CLERGYMAN'S BIBLE. Printed in large, clear type, with References and Maps, and an Index to the persons, places, and incidents occurring in the Scriptures. Bound in Turkey morocco, - - - - - - - - - - - - $5 00

THE PULPIT BIBLE. Beautifully printed in very large, clear type, demy, 4to. Bound in Turkey morocco, - - $20 00

THE FAMILY BIBLE. Beautifully printed in large type, containing Family Record, with or without References, Plates, and Maps, in every style of binding, from $17 00 upwards.

Pacific Mail Steam Co's Steamships

— FOR —

NEW YORK, JAPAN AND CHINA

Will be Dispatched as follows:

LEAVE WHARF CORNER OF FIRST AND BRANNAN STREETS, at 11 o'clock A.M. of the following dates, for PANAMA, connecting via Panama Railroad with one of the Company's splendid Steamers from ASPINWALL for NEW YORK.

On the 6th, 14th, 22d, and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Transatlantic Company's Steamer for St. Nazaire, and English Steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English Steamer for Southampton, South America, and P. R. R. Co.'s Steamer for Central America. Through tickets can be obtained.

Departure of the 6th connects with English Steamer for Australia.

The following Steamships will be dispatched on dates as given below.

STEAMERS FOR MAY, 1868.

May 22d—CONSTITUTION, Capt. Wm. H. Parker, connecting with RISING STAR, Capt. Conner.

May 30th—SACRAMENTO, Captain J. M. Cavarly, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock.

Through tickets to Liverpool by the "Cunard," "Inman," and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired, an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship GREAT REPUBLIC, Capt. S. Doane, will be dispatched June 3d, at 12 o'clock, noon, from wharf corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting at Yokohama with the Steamship COSTA RICA, for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Co.'s Office, corner of Sacramento and Leidesdorff Sts.

OLIVER ELDRIDGE, Agent.

ILLUSTRATION OF DIVIDENDS OF PROFITS

—OF—

United States Life Insurance Comp'y,

NEW YORK.

Office, No. 40 Wall Street.

CASH ASSETS EXCEED $2,700,000.

SIXTH TRIENNIAL DIVIDEND.

The Board of Directors have this day declared a Dividend of FORTY-PER CENT. for the three years ending at the 4th March, inst., to holders of all Policies then in force, on the whole sum of the annual participating premiums received during the said three years; and an additional Dividend of TWENTY PER CENT. on the whole sum of all previous Dividends and Additions, to holders of such Policies who have fulfilled their engagements with the Company, both Dividends being payable and available in the various modes explained in the Company's Prospectus.

For example, on a policy paying one hundred dollars a year of participating premium, the profits for each year and the total at each year on this system are:

Year.	Yearly.	Total.	Year.	Yearly.	Total.
1	$40 00	$40 00	28	$206 39	$2702 23
2	40 00	80 00	29	206 39	2908 63

Current Literature.

RECENT PUBLICATIONS.

Robert Carter and Brothers have attained the enviable reputation as publishers that their imprint is a guaranty that the book which bears it is worthy to be read. Many Sunday School books, and those that deserve a place in household libraries, are sent out from their presses every year, and when one has not time carefully to examine a work before wishing to commend it, he will run little risk if he finds the name of the Carters on the title-page. Of the recent books issued by this house, and for sale on this coast by Bancroft & Company, San Francisco, are

Girding on the Armor.—A work of more than usual interest, and with such a bearing as must render it useful, whether it be read by children or adults.

The Word; or the Star out of Jacob—The object of which is to cultivate love for the Scriptures; and to present that portion of which it specially treats, so that it may be both instructive and pleasing.

Sequel to the Peep of Day—designed for quite young readers, and having the same general purpose with the last.

The Weaver Boy; or, a description of the course from childhood of David Livingstone, whose name has been so prominently connected with both missionary and political investigations and explorations in Africa. Such biographies as this are very healthful, and there is no form of instruction more likely to benefit the young.

MASSACRE OF ST. BARTHOLOMEW. By Henry White; with illustrations. New York: Harper & Brothers. San Francisco: H. H. Bancroft & Company.

So fearful were the scenes connected with the history of the French during those years, of which the massacre of St. Bartholomew may be regarded as the central event, that we do not weary of a multiplication of books that recite them. Some of these books have been unreliable, because of the prejudice of those who wrote them. Some have drawn upon fancy for their materials, when one would suppose the facts would have more thrilling interest than any productions of the imagination. And there is, after all have been read, a degree of uncertainty as to the details of that wonderful history which pertains to few other eras as prominent as that through which it extends. This volume appears to be a plain statement of these details, and bears internal evidence of being truthful, while its accounts are of such a nature that they must be interesting. The author does not make pretension of superior rhetoric, but writes for the people, and his book will have very general circulation. It is beautifully bound, and its whole appearance is attractive.

THE PUPILS OF ST. JOHN, THE DIVINE. By the author of the "Heir of Redclyffe." London: McMillan & Co. San Francisco: H. H. Bancroft & Co.

These publishers are issuing a series of books which they call "The Sunday Library for Household Reading," of which this volume is one, and the titles of the others promise much for the series. Certainly, this book deserves a position on a list designed for the profit of a family. It has much in it that parents may read with advantage, much that Sunday School teachers may carefully study with interest, while children will be pleased with the style and matter, more than will be true of most books of this nature.

AUTOBIOGRAPHY OF ELDER JACOB KNAPP. New York: Sheldon & Co. San Francisco: H. H. Bancroft & Company.

Those who have heard the distinguished man presented to us in the portrait and pages of this book, will have a pretty good conception of its subject-matter. The same style which is so peculiar in the pulpit is found in the print, and the account of a life that has been so prominent in its relations with the Baptist Church has interest that attaches to but few. There are some who object to the Elder's mode of preaching, but none, perhaps, who doubt his sincerity and desire to do good, and his narrative of his own career will be more generally welcomed than would be a biography of him written by any other person.

ANNUAL OF SCIENTIFIC DISCOVERY. By Samuel Kneeland. Boston: Gould & Lincoln. San Francisco: H. H. Bancroft & Company.

The title of this work suggests its contents, and its worth. It is a catalogue of the discoveries and prominent improvements in all departments of science, made during the year 1868. One has no idea of the number and importance of these tokens of progress until he sees them gathered in such a collection; but after a review of this book none will doubt that there are a multitude of men who move the world by their thinking.

The Pacific Medical Journal, for May.—This number closes the first volume, and has a variety of matter, equal to that of any of the preceeding numbers. The editors allude, with much satisfaction to the proofs of interest in the *Journal*, furnished by the medical profession of the coast, and begin another volume with cheering prospects. They have every reason to be encouraged.

The Family Treasure, for April.—This monthly has a pleasing appearance, and though we have not read its contents, the names of the editors and, the subjects presented are a sufficient pledge of its worth.

We learn, with much pleasure, that A. Roman & Co contemplate the publication, in this city, of a first class literary magazine. We see no reason why it should not be as good as any of the list now issued in various parts of the land, and we shall welcome its appearance.

EDUCATIONAL.

Conversation with Elders.

Conversation with elders is an important means of improvement to the young. Especially do the facts of history, when illustrated by the reminiscences of the aged, take lasting hold upon the mind. Near us at the present moment is a man of sixty-three, with whom we have been conversing. His father was born 1757, and died in 1844. Consequently their combined lives, although they overlapped, cover ten years more than a century. His father had seen Washington, and been befriended by Lafayette; had trembled before, and been reckless, as usual, after the first shots at White Plains; had been assigned to the reserves, and so compelled to witness, without sharing, the glories of Bunker Hill; had entered an American privateer, been captured by the British, but rescued by the French under De Grasse, in time to witness the surrender of Cornwallis at Yorktown. Then the son saw General Scott during the war of 1812, and heard the guns sounding from end to end of the Erie Canal when it was opened. Of course, for the accuracy and completeness of our historical knowledge, as well, in fact, as for the very power to put leading questions, we must turn to our books. But conversation with our elders imparts a certain reality to such facts, well fitted to assist the imagination and secure the memory. C. R. C.

Knapsacks of Books.

Carrying school-books in little knapsacks is a custom which seems to have come to us from Germany. An observant tourist in that country puts the following query: "Does this youthful carriage of the knapsack adapt boys for military service, and does it account for the high shoulders of many Germans?" (*Rob Roy Canoe on the Rivers.*) This query suggests matter for observation on the part of teachers and parents. The smallest matters, in themselves, assume importance when they are shown to influence, even in the slightest degree, the bodily habits or mental tastes of youth. C. R. C.

AGRICULTURAL.

Kindness to Animals.

Professor Youatt gives the following interesting fact in one of his valuable works:—

"A horse in the depot at Woolwich had proved so unmanageable to the rough-riders that at length no one among them durst even mount him. His mode of throwing or dismounting his rider consisted in lying down and rolling over him, or else crushing his leg against some wall, or post, or paling. All means to break him of these perilous tricks proving unavailing, the animal was brought before the commanding officer with the character of being '*incurably vicious*,' and with a recommendation, on that account, that he should be sold. Colonel Quest, hearing of this, and knowing the horse to be thoroughbred, and one of the best actioned and cleverest horses in the regiment, besought the commanding officer to permit him to be transferred into the riding troop. This was consented to, and the transfer was no sooner made than Colonel Quest determined to pursue a system of management directly opposite to that which had been already attempted. He had him led daily into the riding school, suffered no whips even to be shown him while there, but petted him, and tried to make him execute this and the other manœuvre, and as often as he proved obedient rewarded him with a handful of corn, or beans, or a piece of bread, with which bribes his pockets were invariably well supplied. In this manner, and in no great distance of time, was the rebel not only subdued and tamed, but rendered so perfectly quiet that a little child could ride him. He became, at length, taught to kneel down while his rider mounted, and to perform several evolutions, and dances, and tricks in the *menage*, which no other horse in the school could be brought to do. In fine, so great a favorite did he become, that his master gave him the apellation of 'The Darling.'"

Co-operative Farming.

Coöperation having proved so successful in other departments of industry, it is not surprising that in England it should have been tried in connection with farming. A society called the Agricultural and Horticultural Association has been formed, and at a recent meeting of the society in Islington, a report was read of a highly encouraging nature. The managing director stated that the society had so far accomplished everything which it had undertaken. The principle of their association is a limited share capital, by which all liabilities are limited to the amount of £1 per share. The members are to be supplied with the best description of implements, cattle-food, seeds, etc., at trade prices, without the intervention of agent's profits; but, in addition to their securing good and unadulterated articles, the whole of the profits, minus the small charge for working expenses, which do not average more than four per cent., will find their way into the pockets of the members. They will receive a dividend of seven and a half per cent. on the capital and the profits upon their purchases, minus the working ex-

penses, the amount returned in the average of existing coöperative associations being six-sevenths of the profits. At present the manufacturers allow a commission of something like twenty per cent. to the agents who sold the goods, and in the event of the farmers availing themselves of the advantages of agricultural coöperation, the commission will be saved.

At this meeting Mr. Thomas Hughes, who is a a member of the society, spoke in favor of coöperation, and said that it enabled him to save from twelve to fifteen per cent. in his household expenses. The amount of capital invested in coöperative enterprises in England is £1,846,310; the amount lent on deposit, £113,023; the aggregate profit derived from such enterprises last year, £372,317; and the average returns to the individual stockholder, thirty-six per cent.—*Newark Sentinel.*

LITTLE NEGLECTS DESTROY FARM PROFITS.—By neglecting to lock the stable-door, the horse was stolen; by leaving a lot of rubbish in the barnyard, one colt broke his leg and another got a nail in his foot; in neglecting to spend half an hour in battening up the sheep-fold, a pair of twin lambs froze to death; by carelessly tying the bull, the ox was gored and died; by neglecting to kill the ticks on the sheep and lice on the cattle, the sheep became poor, shed their wool, gave no milk, and the lambs died, and a fine stock of cattle, in high condition when they came to stall, lost all their flesh before spring—some were helped up by the tail and survived, while others were snaked off by the neck, a sort of retributive justice to their owners, always attached in some way to human transgression.—*Vermont Farmer.*

TO FRESHEN RANCID BUTTER.—To a pint of water add thirty drops (about half a teaspoonful) of liquid chloride of lime. Wash in this two and a half pounds of rancid butter. When every particle of the butter has come in contact with the water, let it stand an hour or two; then wash the butter well again in pure water. The butter is then left without any odor, and has the sweetness of fresh butter. These preparations of lime have nothing injurious in them.

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

The Warbling of Blackbirds.

When I hear the waters fretting,
When I see the chestnut letting
All her lovely blossoms falter down, I think, "Alas the day!"
Once, with magical sweet singing,
Blackbirds set the woodland ringing
That awakes no more while April hours wear themselves away.

In our hearts fair hope lay smiling,
Sweet as air, and all beguiling;
And there hung a mist of bluebells on the slope and down the dell;
And we talked of joy and splendor
That the years unborn would render,
And the blackbirds helped us with the story, for they knew it well.

Piping, fluting, "Bees are humming,
May is here, and summer's coming;
Don't forget us when you walk, a man with men, in pride and joy;
Think on us in alleys shady,
When you step a graceful lady;
For no fairer day have we to hope for, little girl and boy.

Laugh and play, O lisping waters,
Lull our downy sons and daughters;
Come, O wind and rock their leafy cradle in thy wanderings coy;
When they wake, we'll end the measure
With a wild sweet cry of pleasure,
And a 'Hey down derry, let's be merry! little girl and boy!'"

—*Jean Ingelow.*

Forgiveness.

My heart was heavy, for its trust had been
Abused, its kindness answered with foul wrong;
So, turning gloomily from my fellow-men,
One summer Sabbath day I strolled among
The green mounds of the village burial-place;
Where, pondering how all human love and hate
Find one sad level; and how soon or late,
Wronged and wrong-doer, each with meekened face,
And cold hands folded over a still heart,
Pass the green threshold of our common grave,
Whither all footsteps tend, whence none depart,
Awed for myself and pitying my race,
Our common sorrow, like a mighty wave,
Swept all my pride away, and trembling I forgave!

—*Whittier.*

Being and Doing.

We are no advocates of indolence; we believe that willingness to labor as long as life lasts is necessary to happiness as well as prosperity; but the feverish haste which seeks to do in one year the work of three; which undermines health and overcasts the comfort of too many homes, is not diligence, but its counterfeit. It is an evil which will tell on the next generation far more than on the present. Children are being brought up to seek constant excitement, either in work or play; on week days they are crammed with twice the amount of science which their minds can digest; on Sundays there is too little of the quiet home-life which makes so powerful and holy impressions on the youthful heart. A Sunday School is nothing if it is not "lively;" there must be stirring addresses and sensation songs, dialogues, and "interesting" books, for the sake of which accessions the Bible lesson is endured patiently. How much reverence for God's Word, and thorough understanding of it, our Sunday Schools, as ordinarily conducted, are likely to produce is a question for the thoughtful.

So in the Christian life. Activity and effort are too often the main points of exhortation to recent converts; doing and not being; work as a means of faith. We do not say this thoughtlessly; we appeal for confirmation of our words to any who are familiar with the common style of exhortation among revivalists; good men who have not always a zeal according to knowledge, and who have the spirit of the age in excess. We look at the ministers broken down by overwork, to supply the demand of ambitious congregations for eloquent sermons, and extra services; at men of all professions and employments, prematurely infirm, or taken away in the prime of life—and we feel that we cannot protest too earnestly against such violation of the laws of nature.

We took up, the other day, a little book containing the memoir of a young and lamented preacher, lately deceased. It was the too common story of a life crowded with work, from boyhood to its close; without one interval of rest, till, too late, disease enforced it; a life of usefulness indeed, but of usefulness how abridged, by disregard of health. A little timely attention to bodily infirmities might have prolonged an existence dear to many, and given incalculably greater opportunities for the service of the Master. We doubt not that it was with the utmost conscientiousness that this young man persevered in his self-immolation; that he verily thought he was doing God service in despising and neglecting the body; but does not this impression, becoming prevalent among Christians, savor too much of that spirit which we censure in the devotee of a superstitious faith? Is God pleased that we should destroy the temples which he has built for us to labor in? If we do impair or destroy them for our own selfish ends, for covetousness of wealth or power, we unquestionably commit sin; if we do it for the sake of religion, are we not, to say the least, mistaken?

In matters temporal and spiritual there are, of course, risks which we may lawfully run; times in which we should be recreant to our honor if we did not forego all thought of self, but we are not speaking of emergencies, but of the common routine of life. And we are more deeply convinced year by year that he who would work well must sometimes rest; that anxiety and over-vexation are the worst enemies of true accomplishment, and that such examples as we have mentioned should not be held up to the young for imitation.—*Springfield Republican.*

The Use of Stimulants.

It is quite true that after a man has gone through a day of severe and harassing labor—whether in the city, or in seeking patients, or getting up briefs and cases, or in any other way—he feels very much refreshed and restored by the bottle of champagne which he has been recommended to take with his dinner. But the restoration is only for the moment. No process of real enduring reparation takes place. One effect of the temporary exhilaration is a readiness to renew the labor from which he only desisted an hour and a half before. The stimulant supports him for two hours' more work, and the result is that the last state of that man is worse than the first.

There is another way of recruiting the flagging system to which doctors are also very fond of resorting. If you feel wearied at any time, or faint, they say in a sympathetic manner, "Take a little brandy and water." This is more fatal than the other. As the teetotalers say, it makes men a prey to the demon of alcohol. The intervals between the periods of faintness grow small by degrees and beautifully less. The dimensions of the refreshment decrease with a proportionate rapidity, and a man becomes a steady, if an unostentious, tippler before he knows that he has left the domain of the most rigid temperance. Common language misleads him. A man is not called a drinker unless he drinks till he is drunk. Now the barrister, or merchant, or doctor—for the doctor is no wiser than his own prescription—who thus recruits himself several times a day, never does drink until he is tipsy. He takes a sufficient quantity to make him so but he takes it with discretion and judgment. He can do an immense amount of work without ever feeling anything like severe exhaustion, and he is naturally confident therefore, that it is all well with him.

It is not necessary to trace the gradual source of things, after the manner of a tract, or an itinerant advocate of total abstinence. Whatever advantages the system of brandy-and-water, taken in small but frequently repeated doses, may have in helping a weakish man through some period of emergency or pressure, it is conformable both to analogy and experience to believe that in the long run it most be ruinous. No doctors differ as to the ultimate consequences of such a habit, if it becomes chronic and settled. Their theory is that it never does become chronic—a theory which reposes upon a very thin delusion indeed. It is not the business of a layman to teach the skillful leech the physical deterioration which must ensue from repeated stimulants, however small each of them may be. A man need not be a very subtle physiologist to discover this The moral consequences are just as certainly evil. The most important of all these is that it helps an overworked man to overwork himself still more. It facilitates the growth of the very vice whose results it was supposed to mitigate. Instead of soothing a harrassed mind, it only increases a man's capacity of bearing to be harassed. Whether this is a kindness to him is not much of a question.—*Saturday Review.*

THE YOUNG FOLKS.

The Half-Eagle.

"Uncle, see what I have found!" said Henry Morgan, as he came running home from school one pleasant summer afternoon. "It is gold, and it is money; how much is it?"

"It is a half-eagle," said Mr. Morgan, taking the coin and viewing it carefully.

"How many dollars is it worth?"

"How many dollars are there in an eagle?"

"Ten."

"How many in a half-eagle?"

"Five."

"Never ask a question that you can answer yourself. Where did you find it?"

"In the middle of the road at the foot of the hill. There was nobody in sight."

"So you don't know to whom it belongs?"

"It belongs to me because I found it."

"Suppose the owner should come along and claim it?"

"I suppose I should be obliged to give it to him. Do you think it is likely that he will come along?"

"Not very."

"There is cousin John: I must go and show it to him."

Away he ran to the orchard where John was; and before he got near him he cried out:

"John, I'm rich! I've got five dollars!"

"Counterfeit money, I dare say," said John.

"Real gold! See here!"

John examined the coin more narrowly than his father had done.

"It's gold, if it isn't brass or something else."

"It's gold. Your father says it is gold, and don't you think he knows?"

Boys are very apt to affirm that a thing has been said, when in reality, only something like it has been said.

"What are you going to do with it?"

"Buy things."

"You may find the owner for it."

"I shan't try very hard."

"If you had a piece of gold of your own, and should happen to lose it, would you not want to find it?"

"Of course I should."

"Suppose some one should find it and should keep it a secret?"

"If he knew I lost it, he would be as bad as a thief."

"I agree with you."

The boys walked to the house in silence. John had given Henry something to think about, and did not disturb his thoughts by any remarks.

Henry began to see that his desire that the owner of the money should not be found was not a very honest desire. The first impulse he felt on finding it was to keep it a secret, so that he would not have to restore it to the owner, should he appear to claim it. That he had not yielded to that impulse was owing partly to excitement, and partly to the fact that he did not see how he could account for having so much money. The more he thought of the matter, the nearer he became being convinced that he had felt like a thief.

That was not a very comfortable feeling. At supper, Mr. Morgan asked Henry:

"Have you made up your mind what to do with your money?"

"Yes, sir."

"Well, let us know."

"I shall put it in your hands to keep for the owner if he turns up; and, when you think there is no chance of his appearing, you may let me have it, and I will divide it with John."

"John didn't help you find it."

"That is true. But he helped me to think about it."

A blush followed this last remark, which Mr. Morgan noticed, and deemed it wise to say no more.—*Child at Home.*

Key to Character.

"Ned Jones is a capital fellow," exclaimed little Arthur, whom Ned had been drawing upon the ice with his chubby, wide-awake brother.

"What makes Ned so good?" inquired his mother, to whom Arthur addressed his words on his return from play.

"He drew Charlie and I on his sled while he was skating, and Nelson Holt wouldn't do it. Nelson said that he wasn't going to spoil his fun to please two little brats like Charlie and I."

"Just what I should expect of Nelson," responded his mother. "He is an unmannerly, selfish boy, and he cares only for his own pleasure; but Ned was always a manly, thoughtful boy. There is more manhood in Ned's little finger than there is in Nelson's whole body. Be like Ned, my son, and not like Nelson."

Now here we find representatives of two different classes of boys—the kind and generous, and the selfish and mean. On every skating-ground these two classes of players meet, and the observer can readily distinguish them. The Neds are noble-hearted, generous, and high-minded, while the Nelsons are wrapped up in self, and value pleasure, and everything, only as No. 1 is promoted thereby. With the latter class it is a word and a blow. They can't withstand much. Being selfish, they are jealous of their rights, and construe innocent annoyances into intended invasion. Poor, weak, niggardly souls; they don't know what is really manly! How many such boys there are. You have seen them, reader. We hope you belong to the other class, who seem to know that some other people live besides themselves. But you have seen these burly, testy, unkind boys, who are the bane of the play-ground, whether skating, coasting, fishing, or what not. Mark them closely, for they will become uncomfortable men. They will become to the human race what wasps and hornets are to the insect tribes. We never thought that wasps and hornets could be much respected among butterflies and humming-birds. They may be on good terms with mosquitoes and bed-bugs, though we rather doubt it. Put the selfish creatures together, and they will soon have trouble with each other. Two Nelsons like the foregoing would fight much sooner than one Nelson and one Ned together. The former cannot quarrel with the latter, because the latter *won't.*

But draw a little closer to me, reader, while we look closer at this Ned—the big boy who is kind enough to draw the little "brats" on his sled as he glides over the ice. It is a small act, apparently, and yet it is the key to Ned's character. Behold him on the pond, enjoying the skating as hugely as any of his comrades, and at the same time making two little urchins, much younger than himself, equally happy. A youth who will do that is nobler than a multitude of boys whom we meet. His head has wiser thoughts, and his heart has kindlier feelings—he has higher aims and purer motives—he will do other good things. I will tell you some good things that he will do. He will obey his parents—he loves his mother—he is a good boy at school—I don't believe he swears; in short, he will not do a mean thing—he has too much respect for himself and God.

Thus it is that a small act on the play-ground becomes the key to a boy's character. Remember that, reader, and never despise a good deed, even if it is to be performed for the tiniest child. If no one else beholds how much it proclaims about you, God does.—*Merry's Museum.*

"Mother," said Jane Wiley, "is Robert Wickes a Christian?"

"I hope he is. I believe he is. He is very young to join the Church; but his pastor and friends thought he gave evidence of being a Christian. Why do you ask the question?"

"Because he plays with the other boys every day when school is out."

"Does he play like a Christian, or like a wicked boy?"

"I don't know, mother. I only know that he plays with the other boys."

Jane thought a Christian must always be very sober if not sad. Her idea was a mistaken one. God wishes us to be happy. He is as willing that children should play as their parents are. He requires them to play as Christians,—that is, that they avoid all wickedness in playing.

A Whole Day to Do Nothing.

"If I could only have a whole day to do nothing—no work and no lessons—only play all day, I should be happy," said little Bessie.

"To-day shall be yours," said her mother. "You may play as much as you please; and I will not give you any work, no matter how much you may want it."

Bessy laughed at the idea of *wishing* for work, and ran out to play. She was swinging on the gate when the children passed to school, and they all envied her for having no lessons. When they were gone, she climbed up into the cherry tree and picked a lapful for pies; but when she carried them in, her mother said:

"That is work, Bessie! Don't you remember you cried yesterday because I wished you to pick cherries for the pudding? You may take them away. No work to-day, you know!"

The little girl went away, rather out of humor. She got her doll and played with it awhile, but was soon tired. She tried all her toys, but they didn't seem to please her any better. She came back and watched her mother, who was shelling peas.

"Mayn't I help you, mother?" she asked.

"No, Bessie; this isn't play."

Bessie went out into the garden again, and leaned over the fence, watching the ducks and geese in the pond. Soon she heard her mother setting the table for dinner. Bessie longed to help. Then her father came back from his work, and they all sat down to dinner. Bessie was quite cheerful during the meal; but when it was over, and her father away, she said, wearily,

"Mother, you don't *know* how tired I am of doing nothing! If you would *only* let me wind your cotton, or put your work-box in order, or even sew at that tiresome patchwork, I would be so glad!"

"I can't, little daughter, because I said I would not give you work to-day. But you may find some for yourself, if you can."

So Bessie hunted up a pile of old stockings, and began to mend them, for she could darn very neatly. Her face grew brighter, and she presently said,

"Mother, why do people get tired of play?"

"Because God did not intend us to be idle. His command is, 'Six days shalt thou labor.' He has given all of us work to do, and has made us so that, unless we do just the very work that he gave us, we cannot be happy."

He has hard work who has nothing to do.

A Good Resolve.

"Mamma, when I am a man, I will begin to love Jesus."

These words fell from the lips of a fine little fellow, scarcely six years old.

His mamma had endeavored, time after time, to impress on his youthful mind the necessity of early piety; but, hitherto, all her persuasions seemed in vain. When he uttered these words she said,

"But, my dear, suppose you do not live to be a man?"

He remained silent for some minutes, with his eyes fixed on the ceiling, as if in deep thought; and then, with a resolute countenance, added,

"Then, mamma, I had better begin at once."

Now, my dear young readers, will you follow Eddie's example, and "begin at once?" There is no time like the present for serving the Lord. If you put it off a little longer, you will, perhaps, find that you have put it off a little too long. You have been frequently reminded, perhaps, by incidents occurring around you, that the youngest is not too young to die. But neither are you too young to give your heart to Jesus. If you go to Him now, you will not regret it when you become men and women; but, on the contrary, will find God's care and protection to be over you at all times, and that He fulfills His promises in ways that you cannot fully understand.

PACIFIC COAST ITEMS.

The Sacramento *Union* urges the people of Sacramento and San Joaquin valleys to devote a part of the money they are so freely giving to the railroad companies, to the improvement of river navigation, as the only means of forcing the railroads to reduce their rates of freight. One of the principal advantages expected from our railroads is the facility which they will afford to our farmers for bringing their produce to market. It is claimed that this method of transportation is liable to be placed entirely beyond their reach unless the railroads are prevented from charging exorbitant rates by an active river competition.

A correspondent of the Portland *Oregonian* gives the following account of business on Puget Sound: "Government has not yet established a navy yard on the Sound but at several points new vessels are being built. At Port Madison a bark is being completed which will be the largest vessel ever built on the Pacific Coast up to this time, but one of greater capacity still is on the ways at Port Ludlow. Many other smaller vessels are being constructed. The manufacture and shipping of lumber to San Francisco and various foreign ports is the chief business of the Puget Sound country, and is at present carried on largely and with considerable profit."

The Seniors of the College of California, five in number, having completed the studies of the course, are now supposed to be busily engaged in writing their commencement parts. Commencement day will be Wednesday, June 3d, and on account of the steps which may be taken at that time in the organization of the University, it promises to be an occasion of unusual interest. Rev. J. A. Benton will deliver the college oration. The oration before the Associated Alumni will be delivered by Rev. J. E. Dwinelle, and Chas. W. Stoddard will be the poet of the occasion.

It is reported, by the *Commercial Herald*, that six first class screw steamers are being built by the Peninsular and Oriental Company of London, to be placed on the route between this city and the China and Japan ports. The business on this route will be immensely increased when the Pacific Railroad is completed, and a new line of steamers in opposition to the Pacific Mail Co. will not probably prove injurious to the commercial interests of our city or of the world. Both lines will eventually have enough to do.

The *Alameda Gazette* suggests to persons looking for desirable and pleasant locations for homes that they visit the beautiful town of San Leandro. Improvements are being made on every hand, giving evidence of a rapid and substantial growth. A large number of new houses are being erected and the streets are being graded and ornamented with trees. There is a prospect of several extensive manufactories being started in a few weeks, which will make things lively.

We learn from the *Times* that an expedition has recently left this city for San Luis Obispo County, for the purpose of surveying and eventually dividing into small farms a large tract of fertile land in that region, which is owned by San Francisco capitalists. This movement will be greatly for the convenience of those who may wish to settle in that part of the State.

The San Mateo County *Gazette* says: "Many parties have already commenced cutting their grass, and it will not be long before new hay will be plenty in the market. The general opinion seems to be that the hay crop of the present season will exceed that of any former year. The crops generally, both of hay and grain, never looked better in San Mateo County than at present."

The Owyhee *Avalanche* states that a company is being organized for the purpose of running a tunnel through War Eagle Mountain, from Jordan to Sinker Creek. This will be the most extensive mining operation ever undertaken, since the tunnel will be over two miles in length.

The *Record* says: "We understand a contract has been made for one thousand Chinese laborers to work on the Oregon Central Railroad. The contractors pay $36 per month, and the Chinamen board themselves. They offer white men the same wages and board in addition."

The election in Sonoma County, to decide between the Petaluma and Vallejo routes for the railroad, took place on Saturday last, and resulted in favor of Petaluma by about five hundred majority. The citizens of the latter city are greatly rejoiced at the result.

The building lots sold at auction in Reno, the new town on the Truckee, in Nevada, which is attracting so much attention, brought from $250 to $1,000 each. There seems to be reason for the confidence which is felt in the future importance of this place.

A correspondent of the Stockton *Independent* advocates a plan for producing artificial showers during the summer months, and thus preventing the ague and bilious fevers by which a large proportion of the inhabitants of that city are attacked each summer.

The Yreka *Journal* says: "We understand that there is a constant stream of emigration into the Klamath Lake country, and that many farms have been taken up and cultivated for the first time this spring."

A ghost in Minnesota predicts the loss of one of the Panama Steamers, but we have not heard that the price of tickets has been affected by the prediction.

Ned Buntline has lately arrived in this city, and is lecturing on temperance, under the auspices of the Sons of Temperance.

A steamer is about to be built to run on the Stanislaus River, which is said to be navigable for fifty miles from its mouth.

The Sweetwater excitement seems to be dying out. There is some reason for considering it a humbug of the first order.

From the vine growing regions of the State we learn that the prospects for the grape crop are very flattering.

James Gordon Bennet is said to contemplate the publication of a daily paper in San Francisco.

The first shipment of cherries for the season was made from Marysville on May 5th.

The prospects for the wheat crop in the East are not so favorable as in this State.

At Denver, Col., farm hands can be hired at from $15 to $25 per month and board.

The steam ferry-boat is now making regular trips between this city and Saucelito.

On May 24th Victoria is to be proclaimed the capital of British Columbia.

The peach trees in Alameda County have been struck with "curled leaf."

A new Democratic paper is to be started in San Leandro in June.

There is a great demand for dwelling houses at San Rafael.

Apples are selling at three cents per pound in Oregon.

TELEGRAPHIC SUMMARY.

Eastern.—The Texas Convention will meet on June 1st. ....The Illinois Republican Convention met on May 6th, nominating Gen. Palmer for Governor, and Gen. Logan for Congressman, and passing resolutions against the President and in favor of Congress....The jury in the Cole-Hiscock murder case failed to agree....The N. Y. *Herald* has, as usual, accounts of another conspiracy....Twenty miles more of the Union Pacific Railroad have been completed....It is believed that Seward will demand redress for the outrages committed on Americans at Monterey....The bill abolishing the State Constabulary in Massachusetts has passed the House over the the veto of the Governor....McCulloch has quarreled with the President.

Impeachment.—The arguments on both sides have been concluded and Chief Justice Chase has declared the case closed....At the close of Bingham's argument, the galleries were cleared and much of the business done since has been with closed doors....On Tuesday, the 12th, the Senate remained in session until midnight, and we have partial reports of proceedings. Long speeches were made by many Senators. ....Many of the Republicans declared themselves against several of the articles....Fessenden and Trumbull indicated that they would vote aganst all the articles....The final vote was postponed till Saturday, the 16th, on account of the illness of Senator Howard....Great excitement exists in Washington....The Managers of the impeachment are discouraged....The feeling against Fessenden and Trumbull is very strong. The Maine and Illinois delegations demand that they shall vote according to the wishes of their States or resign....It is said that Wade will resign as President of the Senate to vote for conviction.

Congressional.—Mr. Schenk reported a bill to reduce to one act and amend the Internal Revenue laws, which was ordered printed and recommitted....Mr. Price reported a joint resolution declaring that American iron shall be used in repairing the Pacific Railroad. Also, a resolution regulating fares on the same road; which passed....Forney has resigned as secretary of the Senate....The bill admitting the Carolinas, Louisiana, and Alabama will be the special order for Monday next....The bill for the admission of Arkansas passed the house by 110 to 32.

Foreign.—The English have destroyed Magdala and returned to the Red Sea....Lord Brougham is dead, at the age of ninety years....Napoleon has broken off diplomatic relations with Tunis.

WEEKLY MARKET REPORT.

San Francisco Cattle Market.

Wednesday, May 13, 1868.

We have this week to note a still further decline in prices, coupled with a continued light demand. The extremes for Beef are 4 to 8c and for Lamb 7 to 9c, the latter showing a slight improvement. Veal and Mutton are substantially the same as last week. Dressed hogs are quotable at 8@10c for grass fed and 11@12c for grain fed.

We quote slaughterers' prices as follows:

Beef—American, 1st quality, 6@8c ℔ lb.
do 2d do 4@6c ℔ lb.
Veal—Steady at 7@10c ℔ lb.
Mutton—In fair request at 5@6c ℔ lb.
Lamb—Ranges from 7@9c ℔ lb as extremes.
Pork—Undressed, 5½@8½c; dressed, 9@12c ℔ lb—outside figure for best quality grain fed.

Produce Market.

Flour—About the usual quantity will be shipped by the steamer to-morrow. Another vessel has been taken to load for Sydney.

We quote city mills as follows:

Superfine, hf sks, ℔ 196 lbs	$6 25@6 50
qr sks	6 50@6 75
Extra, hf sks	7 00@7 25
qr sks	7 25@7 50

Wheat—Sale of 800 sks good shipping, $2 12½. We quote fair to choice grades at $2 05@2 15 ℔ 100 lbs.

Barley—Sale of 800 sks choice brewing, $1 80; 400 sks ordinary feed, $1 72½. The market ranges from $1 70 to $1 70 ℔ 100 lbs.

Oats—Round lots from wharf are quoted at $2 15@$2 45; jobbing from store at $2 25@2 50 ℔ 100 lbs.

Potatoes—Prices have assumed a wide range, according to description and quality—say 50c@$1 10 ℔ 100 lbs, the latter being considered a full figure for choice from store.

Corn—Prices are steady. We quote Red, $2 25; pale Yellow, $2 30; deep Yellow, $2 35@2 40; White, $2 25@2 37½ ℔ 100 lbs.

Rye—Sale of 200 sks from wharf $2 ℔ 100 lbs.

Buckwheat—No demand; quotations nominal at $1 60@2 ℔ 100 lbs.

Onions—The new crop has not yet made its appearance, though expected soon.

Beans—The jobbing rates are as follows: Bayo, 3¾c; Butter, 4¾@5c; Pea, 5½@6c; small White, 5½@5¾; Pink, 3@3½c, and Red, 2½@2¾c. Round lots from wharf, about ¼c discount.

Bran—Is freely offered at $22 50@$25 ℔ ton.

Middlings—We quote fine at $47 50@$50, and feed descriptions at $35@40 ℔ ton.

Oil Cake Meal—Sells at $30 ℔ ton from the mill.

Hay—No sales; quotations nominal at $15@22 ℔ ton.

Dairy Products—Supplies continue to accumulate, with but little improvement in the demand. Fresh roll Butter is quoted at 27½@30c, as the medium range, with 32½c demanded for extra choice lots; California firkin Butter 30@32½c for dairy-packed, and 28@30 for store-packed; Cheese, 15@16c for ordinary to choice dairies, and 18c ℔ lb for S. Hough & Son's; Eggs, 30@32½c for Hen, and 25@37½ ℔ dozen for Duck.

Poultry—Live Turkeys 15@17c, and dressed, 17@19c ℔ lb; Hens and Roosters, $6@6 50; Spring Chickens, $5@6 50; Ducks, $5@5 50 ℔ doz; Geese, $1 75@2 ℔ pair.

Provisions—California smoked Bacon 15@16c; Oregon do, 12@13c; California Hams, 16@18c; Oregon do, 16@17c; California Lard, 14@15c; Eastern, 12½@13½c ℔ lb.

Wool—The inquiry is mainly for shipping, for which there continues to be a good demand, absorbing the supplies of choice grades as soon as received. Sales since last Wednesday aggregate 500,000 lbs as follows 200,000 lbs spring clip, clean grades, 15½ @18c; 20,000 Pulled, private; 40,000 lbs shipping, spring clip, 16@18c; 214,000 lbs do do. 16½@18c. The extremes of the market are 15½@18c for fair to choice shipping and 11@14c ℔ lb for inferior to burry.

Hides—The demand is steady. Sales since the 6th inst., aggregate 1,200 California dry, usual selection, 14@15c; 100 do choice, 16c; 115 Mexican, as is, 12½c ℔ lb.

Tallow—Sale of 1,200 lbs fair Beef, 7½c. The market is quiet at 7½@7¾c ℔ lb for ordinary to choice Beef and Mutton.

Ripe Fruit—Eastern Cranberries are jobbing at 75@80c in 10-gallon kegs; 85c in 5-gallon kegs, and 80c in 5-gallon tins; Strawberries, 15@20c; Gooseberries, 18c ℔ lb.

—*S. F. Bulletin.*

MARRIED.

At Sutter Creek, Amador County, Cal., May 12th, by Rev. H. H. Dobbins, at the residence of J. M. Randolph, Mr. Wilmer Palmer and Miss Mary C. Cross.

THE OCCIDENT.

CURRENT TOPICS.

Some months since, the Roman Catholic Bishops of New York published a tract which had very general circulation, entitled, "Is it Honest?" This tract contained eight questions, the object of which was to awaken sympathy for the Catholic Church, on account of the misrepresentation of Protestants, and the style and apparent candor with which it was written were well calculated to gain favor among those who are not acquainted with the facts. As if pleading the cause of a persecuted people, the Bishop asked if it is honest to insist that Romanists refuse the free distribution of the Bible; commend the worship of the Virgin Mary and the images of the Saints; favor the persecution of heretics, etc., when the quotations he gives, and the sentiments he announces as making known the spirit of their Church, teach quite the reverse. The challenge thus given to discuss the questions propounded has been eagerly accepted by several able writers, who rarely have such an open door through which to make an exposition of Romanism, and the result is not likely to be to the advantage of the Bishop. It is a new movement on the part of those whose strength has been in masterly silence. Discussion has never been the forte of the papacy, yet a willingness to provoke it has in it a sign of progress. Did the Bishop know, when protesting so earnestly against the charge that they are opposed to the circulation of the Bible, that all Europe is open to those who would give it to the people, except Papal Rome and Spain? Or did he think his readers did not know it? we shall hail the day with thanksgiving when "honesty" will permit us to *believe* all that this tract would have us *infer* respecting the Roman Catholic Church.

Now that Dickens has returned to England, the question may well be asked, what was his motive in this visit to our country? He could hardly have come for money, for he had enough before the journey, and he might have taken back much more than he has, had he been so disposed. He could hardly have been desirous to extend his fame, for he was already as widely known as even ambition would have wished. May not his motive have been that to which he made allusion in his speech at the farewell dinner given him in New York, viz: that he might have an opportunity to set himself right respecting our people and land, so that history shall be able to detract nothing from his fame? He was convinced before leaving his home that he had misjudged in what he had published about America, but he could not declare this until he had been among us again. Now he can do us full justice, and it is manifest that he will hasten to do it. For his sake, and for our own, we may rejoice that he has been here. He has been kindly, generously received, and he has occasion to believe us worthy of his praise.

The news brought from Japan by the last steamer is of such a character that we hardly know whether to regard it as favorable or not to the designs of the Mikado in reference to intercourse with other nations. The Daimios, or provincial governors, are manifestly unwilling to accept the new order of things without resistance, and they are making the policy proposed as unpopular as possible. The people, however, as has been true in many instances before where such great national changes have been effected, seem to be in advance of the rulers, and many of them, urged by their interests, are anxious to establish commercial relations with foreign governments. It is not improbable that civil war may work its bloody havoc in the different provinces before any settled and fully defined change shall be determined upon, and we may expect to hear almost anything from Japan within the next few months, except that the exclusive policy heretofore prevalent has been again adopted. This can never be, and it will be cause for gratitude to the God of providence, as well as of grace, that the Japanese themselves open their ports to commerce with the world, and welcome the civilization, of which they have only just begun to learn.

Evidence has accumulated, from the time of his accession to the throne, that the Emperor of Russia is a remarkable man. His ability as a Ruler was soon apparent, and the features of his policy have a bearing which constantly excites the other Powers of Europe, while they are likely to revolutionize his own country. Not the least influence which has gone forth from the Capital is that which has modified the Greek Church, and it may not be too much to hope that some real life may yet be infused into the forms which millions call their religion. The Emperor has recently printed a large edition of the Bible in the spoken language of the people, at his own cost, and has caused it to be distributed in the army and among the government officials, free of expense.

The Senate having failed to convict the President on the charge in the eleventh section, the feeling is general that he will be acquitted on the others. Of course, this probability is received with various views of its justness and effects upon political affairs and the state of the country, but the sentiment prevails that it was unfortunate that the trial was commenced, if this is to be the result. Another unfortunate thing is the manner in which some of those Senators who are in favor of acquitting the President have been assailed by those who do not agree with them. There is such a quality as honesty, conscientiousness, abstract regard for justice, without reference to questions of policy, and it will be a blessing to the country when it is understood that politicians, in any number, are possessed of this quality. We know not that its possession, on the part of these Senators, was the occasion of their vote, and possibly there may have been other influences by which they were affected, but while we might not have agreed with them in their judgment had the responsibility been upon us, it is a very sad commentary upon the state of public morals when it is assumed that because men in high station do not pursue the course we prescribe for them, they are false to right and duty. No worthy citizen would have the President impeached at the sacrifice of honor and justice in the decision of the high Court before which he is tried.

One feature of the annual report of the Secretary of the San Francisco Benevolent Association deserves special consideration by those who are paying large sums of money in support of that most excellent institution. He states that thirty-five per cent. of the destitution relieved by the Society during the last year was occasioned by the drunkenness of parents, and twelve per cent. by the desertion of those who should be the supporters of the dependent, which may undoubtedly be assigned to the same cause. When a fair proportion of that occasioned by sickness, and by the fact that the persons aided were widows and orphans, is added to the amount thus definitely stated, it is within limits to say that certainly sixty per cent. of the $25,459 contributed by our citizens during the year for the relief of the poor who were reached by this Association was used for the temporary aid of those who were the victims of intemperance. When general statements are made by temperance men in respect to the relations of drunkenness to pauperism and suffering among our people, the reply is given that they are not reliable, not supported by figures. Here are figures given by the acting officer of a Society deservedly regarded with great favor by our citizens, and we commend them to the study and reflection of those who think we have no interest directly affected by the general sale of intoxicating liquors.

The Committee on Foreign Affairs in the House, through Mr. Banks, the Chairman, has reported a bill in favor of appropriating $7,200,000 for the purchase of Alaska. This, of course, is in execution of the treaty with Russia, and although the bill will meet with heavy opposition, there is little doubt that it will pass. It will be believed by a large majority of the people that our treaty should be consummated in good faith, notwithstanding the views of some members of Congress.

Accounts from Mexico are not encouraging. The precise position of affairs at present it is very

difficult to ascertain, yet it matters little what faction may be temporarily in power, or whether this or that revolution has failed or succeeded—whether Juarez maintains his position in the capital, or has fled towards the Texan border. The fact that so many factions exist, that one revolt follows another, that the President is obliged to maintain his position by force against the attacks of his countrymen, whom he so recently delivered from a foreign power, shows only too clearly that the experiment of self-government by the Mexican people is again a failure. This experiment has been made under peculiarly favorable circumstances, with a leader who has shown himself by his acts superior in worth and ability to any who have preceded him, and hopes for its success have been aroused in the minds of all friends of liberty throughout the world. Its failure will do much to confirm the opinion that the Mexican people are at present wholly incapable of self-government, and that without the assistance of some foreign power, they must remain in a state of semi-barbarism. The probable future relations between the United States and Mexico cannot fail to excite in the minds of the people of California a deep interest in the progress of our unfortunate neighbor.

RELIGIOUS INTELLIGENCE.

PACIFIC COAST.

Presbyterian Mission Chapel on Howard St. between 21st and 22d Streets.

Mention having already been made of the dedicatory service of the new chapel, under the care of Calvary Presbyterian Church, Rev. Mr. Marr, acting pastor, we give in this number a fuller description of the building. We think it will interest many of our Church.

In style of architecture, the building is "early English," from plans drawn by Wright & Sanders, architects of this city. The dimensions are thirty-two feet wide by sixty feet long inside, and thirty-six feet high to the ridge of the roof, which is open-timbered and supported on light open principals resting on corbels at the side walls, which, together with the roof, are sheeted inside and varnished.

The building is lighted by five large two-light windows, with trefoiled heads, on each side, and by a double window with traceried and moulded head in front gable. The seats are open, and afford accommodation for two hundred and fifty persons.

The church is entered by a large double door and vestibule in front, having doors opening into two aisles four feet wide each, terminated by doors on each side of the pulpit, leading to the Sabbath School room and study in the rear, which are 12x15 and 11x12 feet respectively.

The exterior of the church presents a neat and characteristic appearance, having a high pitched roof and bracketed eaves and gables. For evening service the building is lighted with gas by means of star pendants suspended from the principal rafters. The acoustic properties of the building are good, and ventilation has been well provided for. The entire cost of the building was $4,000.

—

Central Presbyterian Church Anniversary.

Last Sabbath, 17th inst., was the Third Anniversary of the organization of this Church. At the close of the morning Sermon, the pastor, Rev. John G. Fackler, read a brief statement, showing the progress and prospects of the Congregation. It appears that the organization was effected in May 1865, with fifty-three members. Since then one hundred and twelve names have been added to the roll, making a total from the begining of one hundred and sixty-five. Of these, ninety were received on examination, thirty-five on certificate, from other churches in the city, and forty from churches elsewhere. The additions during the past year have been: on examination, forty-five, on certificate, seven; total for the year fifty-two. Since the organization, but two have died, and thirteen have been dismissed to other congregations. The present actual membership is one hundred and forty eight.

The Sabbath School was reported as steadily increasing in size and interest, with an average attendance of something more than one hundred and fifty. During the year, the debt of the congregation has been largely reduced, and it is hoped that, in a few months, it will be wholly extinguished.

The pastor reported, that he had been absent from the pulpit, from sickness and other causes, but five Sabbaths within the year, and that he had preached a total of one hundred and four sermons, besides conducting the services of sixty-four prayer-meetings, and attending to a large amount of pastoral work. The Lord has certainly been very gracious to this Church, and it is hoped that the present year will be one of still greater prosperity.

—

A CORRESPONDENT of the Alamo *Presbyter* writes as follows from Amador Valley:

"The Rev. W. W. Brier, of the Presbyterian Church, has maintained a regular monthly appointment in this valley for the last two summers. Aside from his appointment (which embraces a morning and afternoon service at two different points) there has been no regular means of grace in the valley.

Most of the lands have been brought into cultivation within the last three years, which accounts for this state of things. Consequently everything is new. A Sunday School was organized on the Sabbath of our visit, which promises very favorably for usefulness and success.

On the Sabbath of our visit, we heard the Rev. Mr. Brier preach a truly evangelical sermon, to the edification of the people, and the comfort of the Christians.

The Methodists are making arrangements to occupy this very interesting field. We also arranged for a monthly appointment, embracing morning and afternoon service, at different points. We found several Cumberland Presbyterians, and others whose sympathies lead them that way.

The valley is one of the most fertile and beautiful valleys in California—settled by a thrifty and enterprising population, and much wealth must eventually concentrate there. The railroad from San Jose to Stockton passes through this valley, and it is thought will be completed in time for the people to transport their grain over it in the fall."

—

THE Ninth Anniversary of the Industrial School was observed on Monday of this week. The day was rather unpleasant, but a large number of those interested in the institution attended the exercises. The President of the Board of Directors, Jacob Deeth, Esq., delivered an opening address, which narrated the facts of general interest connected with the School, and Rev. Dr. Eells closed the exceedingly satisfactory exercises of the children with the annual address of the occasion. It was pleasing to see so many of our prominent citizens, both ladies and gentlemen, willing to spend a day in exhibiting their regard for this excellent charity.

—

AT the regular communion season, observed Sunday, May 2d, at the Green Street Congregational Church, there were received into the church, by profession of faith, nineteen; and by letter, one. This accession is the good fruit of a happy revival of religion in the church and society, in the months of March and April. We are glad to know that this church is gradually surmounting its difficulties, growing in power, courage, and faith, and increasing in favor with God and with man.—*Pacific.*

—

SAN FRANCISCO BENEVOLENT ASSOCIATION.—The above named benevolent institution rendered assistance to 1,287 persons, at a cost of $4,000, during the months of March and April. The majority of those thus relieved were women and children. During the same period the Society assisted 142 persons to find employment. This organization is doing a great and noble work, in a most quiet and unobtrusive manner, and all who are in a condition to do so should contribute to its funds.—*Times.*

—

REV. J. A. HANNA, of Ashland, Oregon, has received and accepted a unanimous invitation to supply the Presbyterian church of Eugene City, Oregon. His post-office address is changed from the former place to the latter.

—

A FESTIVAL was held by the ladies of Vallejo last week, to raise funds to pay the debt resting on the parsonage of the Methodist church in that place. We are glad to learn that the effort was entirely successful.

—

THE Agent of the Board of Publication offers a premium of one hundred dollars for the best essay written in consideration of the question, "Why am I a Cumberland Presbyterian?"

EASTERN.

THE *Christian Register*, Boston, says: "The leaders of the Roman Catholic Church, if they are as wise as we think them, will do well to turn their attention to some of the follies committed by their subordinates, who are guilty of extravagances which will bring that Church into serious peril. A few days since a man was discharged from custody here by the Supreme Court, who has been three times tried for murder. On the second trial all the jury but two found him guilty. The other two, being Roman Catholics, refused to convict the prisoner, who was also a Roman Catholic. On the third trial one juror only was a Roman Catholic. He stated in the jury-room that he did not believe the evidence which satisfied the other eleven, and refused to join in the conviction on which the others agreed. The Governor's attorney stated to the Court that the preponderance was thus strong, and that the jurors were pointed out in advance of the trial as people who would refuse to convict. But the Court said it could not inquire as to what passed in the jury-room, and therefore this man, whom ninety-nine people in a hundred will call a murderer, merely on the facts that we have stated, was set free."

KANSAS.—The Papists are rapidly conquering the Great West. Their agency is the school. The property of the Romish Church, in the new city of Leavenworth, Kansas, is, from the published estimate, $475,000, while that of *all other* Christian denominations, in the same city, including our own, is less than $100,000. Sustained by all this wealth, the grand agency of the Romish Church for proselytism is the school, and especially the school for girls. Such a school is established in every large town, and these schools are chiefly supplied with scholars by the patronage of Protestants.—*Home Missionary for March.*

AT the late meeting of the Presbytery of Long Island, the Rev. Robert Davidson, D.D., was constrained, on account of ill health, to ask a dissolution of the pastoral relation between himself and the First Church of Huntington, which request was reluctantly granted.

A FEW weeks since the pastor of the Second Presbyterian Church at New Albany, Indiana, administered the ordinance of baptism by immersion.

THE Plenary Council of the Roman Catholic Bishops, held at Baltimore some months since, issued a pastoral, which speaks thus of round dances:

"We consider it our duty to warn our people against those amusements which may easily become to them an occasion of sin, and especially against those fashionable dances which, as at present carried on, are revolting to every feeling of delicacy and propriety, and fraught with the greatest danger to morals."

HUNTINGTON, Long Island, has been, and is still, blest with the most powerful revival that has ever been known on the island. The religious interest commenced in the Methodist and Second Presbyterian churches about New Year's, and has continued with unabated interest until the present time. On the 12th of April the Presbyterian church received fifty by confession. Previous to this the Methodist Episcopal church had taken in a number rather exceeding this, on probation.

A CORRESPONDENT of the *Congregationalist* writes from Nashville, Tenn.:

"A Congregational church ought to have been started here at the close of the war. Now many of us have become so connected with the Presbyterians, and so interested with them in their hard struggle, that we dare not weaken them by withdrawing."

REV. DR. LANDIS has left Wilmington to enter upon his duties as Professor in the Seminary at Danville, Kentucky.

Dr. Landis is succeeded by Rev. H. S. Huntington, late of California, and we earnestly hope that, under his labors, the good work begun may continue, and be greatly enlarged.—*Presbyterian.*

THE Presbyterian church at Rochelle, N. Y., which received seventy additions on the 15th of March, has since received thirteen more, ten of whom are heads of families, and the remaining three are active young men. This makes eighty-three additions in all, as the result of the revival, and others are yet expected.

REV. DR. SPEAR, pastor of the South Presbyterian Church in Brooklyn, N. Y., recently celebrated the twenty-fifth anniversary of his settlement, preaching a discourse appropriate to the occasion. Dr. Spear began his ministry in that church on the first Sabbath in May, 1843.

REV. H. KENDALL, D.D., Secretary of Home Missions, has sailed for a six months' visit in Europe. During his absence, the Associate Secretary, Rev. Robert Adair, will be in attendance several days in each week at the Presbyterian Rooms in New York City.

THE New Bedford *Mercury* says that at the late annual parish meeting of the First Congregational Society in that city the ladies not only voted, but were placed on nominating committees, and were made members of standing committees of the Society.

WE are informed that the First Baptist Church of Newport, Rhode Island, has withdrawn its fellowship from the open communion Second Church, of which the Rev. Charles Howard Malcom is the pastor.—*N. Y. Examiner.*

THE Presbyterian churches throughout the entire Southwest seem to be in a very depressed condition. Many of the ministers find it necessary to till the land for their support, to keep the churches open. —*Zion's Herald.*

REV. R. C. HOWELL, D.D., one of the most prominent ministers of the Baptist Church in the South, died at his residence in Nashville, Tenn., on Sabbath, the 5th of April, in the sixty-seventh year of his age.

THE First Congregational Society in Hartford, Conn., have purchased the house of the late Dr. Hawes, on Grove Street, for $7,500, for a parsonage, and are to put it into complete repair for that use.

THE number of communicants in the Moravian Church in the United States is 6,200.

REV. MR. ABBOTT, Unitarian minister of Dover, N. H., has lately renounced Christianity, and declared himself a pure Theist.

FOREIGN.

THE Governor-General of India has ordered that a room in a central position, but not in the barracks, to which the men in the English military service in India can resort for private reading and prayer, or for holding prayer-meetings and the like, shall be established, that the difficulties and inconveniences experienced by pious and well-disposed soldiers for the want of some such place of retirement may be obviated. Such a room hereafter is to be one of the recognized requirements in every encampment of British troops. A residence is also to be assigned to a "Scripture-reader" in the married quarters. This room for prayer is to be under the general control of the chaplain and commanding officer, and the men are to be allowed the utmost freedom and latitude so long as they avoid "sectarian and proselyting discussion."—*Congregationalist.*

THE Jewish Church is everywhere noted for its kindness to its own people. It is against Jewish principles to allow any of their poor to come upon the public. All the sick in poverty are cared for, and provision is made for the widows and orphans. Efficient societies, liberally provided with funds, supply the poor with food, help the old people as they need, and bury the dead. Some of the free hospitals in London have Jewish wards, but all the expenses of those wards are defrayed from the treasuries of Jewish organizations. If any able-bodied persons are out of employment, and need help, they receive no gratuity, but are accommodated with a temporary loan, and the cases are said to be rare in which these debts are not fully paid.

ONE of the English religious papers is making a raid, aided by troops of correspondents, on the wearing of moustaches by Methodist ministers.

New Publications!

The greatest success of the age! 100,000 copies of the New Edition of Wells's Every Man His Own Lawyer, already sold. Agents making from $10 to $25 a day. San Francisco, Saturday, May 23, 1868.

GUARD YOUR WEAK POINTS.

Nothing is more surprising to one accustomed to study the influences which bear upon us, than the little attention given by most persons to their *defects*, whether in disposition, or character, or attainments, and the slight sense of responsibility respecting such defects, manifested by those in whom they are the most conspicuous. A man will become the prey of some passion, whose ravages upon interests that should be sedulously protected by him, are the mournful witnesses of its rule, yet make no effort to become free from its power, and perhaps deny that he is to be blamed for its effects. Another will disavow obligations he ought to heed, because he has an aversion to the labor their discharge would make necessary, and think little of the fact that he is permitting his life to be a blank. Another will be false to all the sentiments of honor, and the suggestions of affection, at the instance of some overmastering temptation, and feel little compunction for the outrage, because the temptation assails him at a point where he assumes himself to be incapable of defense. Another will commit sin against God—it may be blaspheme His name, or set aside His authority—and resolve himself without guilt, because his temperament or circumstances make it impossible to avoid such transgression.

All these persons are none the less guilty on account of what they present as valid apologies for guilt. We are to resist base inclinations, not expect to yield to them; to reject evil influences, not foster them; to guard our weak points with special care and the strongest forces, not suffer them to become the widest entrances through which the Devil can make assaults upon us. We should study ourselves, not that we may learn what we must not be expected to become, or to do, but that we may know our deficiencies, and, so far as possible, remove them. A weak man should not be content, when he has determined what such a man ought to achieve. He must strive, by all the means he can employ, to make himself strong. A passionate man must not make his passions into as broad a cloak as possible, with which to cover the sins against God and his fellows, they have provoked him to commit. He must make ceaseless effort to control his disposition, and oblige it to be a power impelling to good, and not to evil. Whatever may be one's weakness, by patient study he should endeavor to ascertain it, then establish a guard at that point which cannot be overcome or bribed.

There are two reasons why he should do this. *First.* Because by marked execution of justice we are made to suffer from *distresses* that enter through these very doors we leave open for sin. The passions, the gratification of which seems so great a good, when gratified become the most relentless tormentors of one whom they rule. The follies that attract us till they have caused the sacrifice of what is noble in character, or valuable in attainment, taunt us with the loss they are unable to supply. As you have seen the avaricious man watch, with feverish anxiety, the demands upon his treasure, and turn pale with distress when he must part with a little of what he worships, have you not admired the order of Providence which obliged the very disposition that affords him the most joy to bring upon him the keenest pain he ever feels? And in other instances, have you not observed that often there is the visitation of evil by the very doors that were opened for unhallowed pleasure? These facts should teach us, and their most impressive lesson is, that we should fortify with perpetual care the points where we are most exposed.

The *second* reason is because, without such watchfulness respecting our peculiar frailties, we shall not be useful to others. The probability that one will not succeed in doing good is much increased by the *assumption* that he will not succeed. Let the attempt be made to accomplish anything, and expect to fail, and you will rarely be disappointed. The most useful men have not been those most free from defects, nor those who would have been selected by others as most likely to reach great success. The diaries of those who have left these records of their private conflicts and trials with themselves, make known their constant sense of imperfection, their daily struggles with besetting sins, yet their trust in God, and their unwavering resolution to bear down their opposition, and do what they could. Payson had peculiarities, that would have paralyzed his usefulness had he yielded to them. Henry Martyn would have been unknown as a missionary had he withdrawn his guard from certain weak points of his natural temperament. Luther would have beamed no such light on the darkness of the Middle Ages as introduced the day, unless he had ruled himself with an iron hand, and held in control the characteristics for which he was noted in his early life. Paul would have been a castaway, instead of the chief Apostle, had he not kept his body in subjection, and been constantly reminded of his need of God's grace. Defects need not render us useless; they may contribute to our greater success, because obliging us to watch, and neutralize, and transform, by divine assistance. Yet, no man can do much in any sphere of service who declines thus to prevent Satan's advantage of him at the *weak points* of his character.

Sit not down at ease, therefore, beneath the shadow of your deficiencies, and feel that they release you from obligation to work, nor think that because of them you may escape responsibility for sin. Obligation reaches, often, to what may never have been attempted by us, and responsibilty relates to what we *may be*, no less than to what we *are*.

THE TALMUD.

The prominent Jewish papers of this country are at present abounding in articles respecting the Talmud, the object of which is to throw discredit on Christianity by charging that much of the teaching of Christ was derived from this old Hebrew compilation. The statement is made that the Sermon on the Mount, the Lord's Prayer, and other portions of the Gospel, so closely resemble parts of the Talmud that they must have been suggested, at least, by that work. Yet the Talmud was not written until after the time of Christ, not being completed until the sixth century, and though it existed before in an oral form, there is no more evidence that Christ drew his doctrines from these traditionary statements than that those who gathered them into a book afterwards drew all those portions that are so unlike the rest from what had then been written as the Gospel of Christ.

The Watchman has an article in a late number containing the following short summary of a lecture delivered in Boston by Prof. C. E. Stowe, which is of interest to all readers of the Bible.

"Prof. Stowe, in his lecture on Christ's Sermon on the Mount, spoke somewhat at length concerning the Talmud, a compilation of Jewish laws and traditions, with comments on both.

There is a prayer in the Talmud which the Professor read in full, that holds a place in Jewish worship similar to that held by the Lord's Prayer in the English liturgy. It is said to be as old as the Captivity. It is highly prized, and its repetition is regarded as having great efficacy. It is written in Chaldee, instead of Hebrew, because, say the Rabbis, God didn't wish it to be understood by the angels, who know the latter language, but not the former. While several expressions of the Lord's Prayer are found here, yet what a superfluity of words. They are little grains of gold in a heap of common earth. How unlike are the two in simplicity, compactness, and beauty! It is very ancient, no doubt, but it has more or less changed, as is evident by comparing the prayer books of different countries; and it is evident that it may have been drawn from the prayers of Christ.

The Professor read from the Talmud another prayer, used when persons are dying, which contains, besides the expression, 'hallowed,' etc., the doctrine of the resurrection, and the renewal of the earth, These prayers are the most favorable specimens of Talmudic teaching, but are even these to be compared with the teachings of Christ?

An article on the subject in the London *Review* has produced a very singular impression, as if nobody had ever heard of the Talmud before! But Dr. Lightfoot, more than two hundred years ago, and Dr. Gill, the great Baptist commentator, thoroughly mastered it, and drew from it very largely in illustrating Scripture ideas and expressions; as has Dr. Clark, the Methodist commentator, whose quotations, however, are less satisfactory. *The Talmud is really an old subject.* But Jewish writers, just now are much excited about it, and are endeavoring to show that the Sermon on the Mount was taken from the Talmud.

There is a book written by a Jew, called 'The Biography of Jesus of Nazareth," made up from what the Talmud says of Christ. It admits His miracles, etc., but insists that He was a bad man, and was stoned and hanged as such."

Prof. Stowe has also written an article for the *Congregationalist*, in which he makes extended extracts from a Jewish book just completed from the Talmud, for the most part, which is called a Life of Christ, and the tenor and language of these extracts afford conclusive proof that those who wrote the Talmud must have been acquainted with the narratives of the Evangelists. It is remarkable that from a Jewish stand-point, so complete a life of Jesus can be made out, while it is so obviously modified to suit the purposes of the unbelieving Jews.

It is rather a cheering sign of progress, than evidence of conscious strength in the position held by the Rabbins for ages, that so much is said by Jewish writers now respecting Him who claimed to be the Messiah of God. The very bitterness with which they write has in it some tokens of promise, and the fact announced by them that 40,000 copies of the Talmud, in twenty-eight large volumes, with illustrations and commentaries, were sold last year, evinces a desire to read, and a purpose to think, among the mass of their people, from which no evil can spring. We have believed, for years, that Judaism will be Christianized, not absolutely and in form abandoned, and there are more indications that this will be at no distant day than there have been at any previous time.

Nameless Writers.—We receive pieces of various kinds, occasionally, intended for publication in The Occident, that are not accompanied by the names of those who write them. If such contributors will reflect a moment, they will be convinced of the necessity of the rule that no articles can be placed in the paper unless we are able to refer to their authors, if this is necessary, and therefore we hope they will send us their names. Sometimes we

might bring serious trouble on ourselves, unless we are thus certified of the authority upon which statements of fact, and of truth, are made to the public.

No Part of Life Frivolous.

Let none prevail with us to think that there is any period of life, or any sphere of our activity, or any hour of our rest, which can escape the range of right and wrong, and be secluded from the eye of God. Nothing can be more offensive to a good mind than the eagerness to claim, for some portions of our time, a kind of holiday escape from the presence of duty, and the consecration of pure affections; to thrust off all noble thoughts and sacred influences into the most neglected corner of existence; and drive away religion, as if it were a haggard necromancer, that must some time come, instead of a guardian angel that must never go. It were shameful to sanction the low-minded sentiment, which so often says of *early life* that it is the time for enjoyment, and makes this an excuse for dispensing with everything else. Under such guidance, life would have no secret unity; it would be no sacred epic, sung throughout by any constant inspiration, but a monster of incongruity; its first volume a jest-book; its second a table of interest; and its last a mixture of the satire and the liturgy. I can form no more odious image of the human life than a youth of levity and pleasure, followed by a maturity and age of severity and pietism. Both sights in this succession are alike deplorable; a young soul, without wonder, without reverence, without tenderness, without inspiration; with superficial mirth, and deep indifference; standing on the threshold of life's awful temple, with easy smile, without uncovered head, or bended knee, or breathless listening! Is that the time for enjoyment? Yes;—and for enthusiasm, for conviction, for depth of affection, and devotedness of will; and if there be no tints of Heaven in that morning haze of life, it will be in vain to seek them in the staring light of the later noon.—*Martineau.*

The Sunday School children in Canada contributed, during the last year, $676 towards Foreign Missions.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, Principal.

The Seventh Term of this Institution will commence on Wednesday, January 22d, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

☞ For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

CORRESPONDENCE.

Down the Coast.

MONTEREY, May 18, 1868.

At no time since the occupation of this coast by the Anglo-Saxons has the face of the country worn a more cheering aspect than at this time. Reaching San Jose Valley ten days ago, I found the tillage land everywhere under crop, with the promise of an unusual yield. It is believed that the barley fields will yield eighty bushels to the acre. The amount of wheat sown in Santa Clara County is beyond precedent, and the harvest bids fair to be proportionally large. The fruit orchards and gardens are also unusually promising. There are three hundred acres of strawberries within five miles of San Jose, bearing, on an average, three thousand pounds to the acre, or nearly a million of pounds in the aggregate. These give a gross income of about $170,000. The berries come into the market the last of April, and continue till the middle of July.

The Santa Cruz Mountains form a belt fifteen miles wide between San Jose Valley and the coast. Contrary to expectation, I found them by no means sparsely settled. The redwood timber first attracted the lumbermen, and the high price of land in the valley, and the uncertainty of titles, led many to look for homes amid the "fastnesses of the hills." In many a nook, and on many a plateau, near the summits of this range, are families who cultivate the vine and other fruits, sow a few acres of grain, keep a few cows, and a band of horses.

The grapes raised on these mountains have a finer flavor than those of the valley, and command a readier sale. Mr. Lyman J. Barriere, a pioneer among these mountains, having come here sixteen years ago, has a handsome income from his vineyard—the leading variety of which is the "White Muscat of Alexandria." Whatever surplus he has of them is dried and boxed, furnishing the best quality of raisins.

Mr. A. Hatler made last season two thousand gallons of wine, of a finer quality than is produced on the lowlands; and "Mountain Charley," widely known by this and no other cognomen, raises an excellent quality of the peach and apricot.

Formerly the grizzly was a dangerous denizen of these mountain woodlands, but is now rarely seen. But on no part of the coast are the quail, wild pigeon, and rabbit so numerous as here.

In the aggregate, these mountains are progressing as well as the average of our population. The chief drawback is the absence of school, church, and social privileges. As to health, no region is more favorable to longevity, and these people have a vitality in the atmosphere, and a beauty in the landscape, sufficient to compensate for many disadvantages.

Santa Cruz, lying on the coast at the base of these mountains, has an atmosphere and scenery reminding one of New England more than any other town I have visited. It has six churches, a large hotel, and more manufacturing than any other town of its population in the State. Its chief exports are lumber, lime, leather, and powder, all of which find a market in San Francisco. The town has over two thousand people, who are said to mostly live in homes of their own.

Soquel, Watsonville, and Monterey are the three other towns on the Bay. Watsonville has an agricultural vicinity of surpassing fertility, and is a prosperous town. Rev. A. J. Compton, the pastor of the Presbyterian church, came there five months ago, and is securing an influence among all classes.

Monterey retains its characteristics as the capital of the old Mexican province of "Alta California." Its houses are nearly all adobe, and a majority of its one thousand inhabitants are Mexicans. There is, perhaps, more of historic interest about this town than any other in California. It was here that the first American pioneers settled and engaged in commerce. Here the Spanish and Mexican Governors issued their manifestos, and it was here that our State Constitution was framed and submitted for adoption. G.

Letter from Sonoma County.

BLOOMFIELD, May 14th, 1868.

The Presbytery of Benicia met in the Presbyterian church of Healdsburg on the 8th inst., and was opened with a sermon by the retiring Moderator, Rev. James Wylie, from Genesis, 22d Chap., 18th verse. In an interesting and pungent discourse, the speaker pressed home with great power the duty of submission to the will of God, on the part of Christians and Christian ministers, in order to be made in their measure, like Abraham, a blessing to the world. The statistics of the various churches within our bounds gave us information of considerable prosperity—revivals in some quarters, and an increase in our membership of about fifty. Our Sabbath Schools and Bible classes have been numerously attended, and the Shorter Catechism committed to memory by a large number of children and youth.

It is with pleasure that we are enabled to report that some of our churches have adopted the plan of systematic benevolence suggested by our General Assembly, and are now contributing regularly to all the Boards of the Church, and we hope and pray that this may soon be practiced by all our churches. This custom established, our people taught the doctrine of benevolence, and practicing it to the extent of their ability, we should hear no more cries coming from our Boards of empty treasuries and financial embarrassment. Then our Church would go forth in the fulness of her strength to the accomplishment of her mission.

The wants of the field within our bounds, and indeed all over our wonderful coast, were referred to by the brethren present, making mention of numerous vacancies that ought to be supplied immediately, and consequently of the great need of more laborers; whereupon our Committee on Missions were instructed to collect facts and write to the Secretary of our Domestic Board, so as, if possible, to have our ministerial forces increased.

Much sorrow of heart was caused by the statement that we have not a single candidate for the ministry within the bounds of our Presbytery, and in view of this state of things, a resolution was adopted urging upon all our ministers and church members the duty of giving this subject their special and prayerful attention, so that some of the youth now joining our church may have their minds directed toward preparation for the work of the Gospel ministry, that we may thus be enabled to supply a want that we cannot hope to have fully supplied from abroad.

We had a most harmonious and delightful meeting, which continued over Sabbath, the 10th. The Sacrament of the Lord's Supper was celebrated, a large number of God's people communing. Several children were dedicated to God in the ordinance of baptism, this service being preceded by a most masterly vindication, by Rev. James Wylie, of the duty on the part of believing parents of thus offering their children to God in this holy ordinance.

For one, I would love to see this address of Bro. Wylie given to the public, and I am sure there are others with me in this desire.

Rev. Ben. E. S. Ely, pastor of the church in which we met, has great reason to be encouraged. He is highly esteemed as an able and faithful minister of Jesus Christ, and his labors have been very successful.

Healdsburg is one of the most beautifully located towns in the State. In the summer of 1857 there was scarcely a house to be seen, and no sign of a church—nothing but a forest of oaks, a few of which remain. Now, churches and handsome residences, and orchards, and gardens, and stores, and a population of about two thousand indicate what a change has been wrought in a few short years. And when civilization shall bring, as it soon will, railroads to the place, Healdsburg will doubtless be spoken of as one of the large and flourishing cities of the State. M, A.

Letter from Contra Costa County.

WALNUT CREEK, May 9, 1868.

The warmth of summer, for the past few days, has wonderfully developed vegetation in this vicinity. The beauty of our landscape is just now in its highest state of perfection, making this the most desirable season for the ascent of Mount Diablo, which is each year becoming more and more popular with those who enjoy panoramic views of nature. We have been looking forward with pleasurable anticipations to this season, in hopes that some of the metropolitan preachers who occasionally come here to seek relaxation from their labors, would come and enjoy with us our rural pleasures, and contribute to our improvement some of their carefully prepared discourses.

Last Sabbath was our communion, which was held in the new school-house near Danville, about seven miles south of this place. We had made arrangements to have the assistance of Brother Buel, but through some fault of the post-office department, we were disappointed and left single-handed in the conflict.

The congregations were large, notwithstanding the unfavorable appearance of the weather, and there were manifest indications of the presence of the Holy Spirit. Six members were added to the church on profession of their faith, although some of them had formerly been connected with other churches. One was baptised, and in the afternoon appointment at Dublin two infants were also sealed with Christ's seal of the covenant.

The Sabbath School was reorganized at Danville, and supplied with a good second-hand library, through the kindness of one of the Elders of the First Presbyterian Church of San Francisco.

The Sabbath Schools at all of my places of preaching (five in all), save one, have been reorganized, and promise more than usual efficiency. I trust that some of them will be represented in the State Sunday School Convention, next month.

ALEPH.

Men Possessed.

It is one of the great moral uses of insanity that we are so powerfully admonished by it never to surrender our self-keeping to any kind of impulse or dominating sway, outside of our own personality or self-active liberty. For it is a great and radical distinction of moral natures that they are to steer themselves by their own helm, and be responsible for what they may become—mere animals and things having no such high prerogative, and no capacity to be different from what they are made to be under the sway of causes not in themselves. Just here, accordingly, we discover a principal reason for that

proneness to insanity, which is the infirmity of men in distinction from the animals. It is that, as being in evil or sin, they so far and frequently surrender themselves to impulsions and enchantments outside of their own responsible self-keeping. The power that was given them to gather up their nature in due self-obligation, and centralize it in the supreme domination of reason, is weakened, and they fly asunder, so to speak, in a scattering, unkept habit that approaches, and finally becomes, insanity. They fall under a kind of possession, and are just so far dis possessed of themselves. In their zeal to get possession of money, money gets possession of them, driving them on past all bounds of reason, as if it were a demon. Instead of possessing their business, their business possesses them, shoving them on to all utmost overdoing, and finally to madness. Society possesses them, and so completely dominates in their habit that any coming short of its conventionalisms or fashions goads them to distraction; their own self-keeping force is so far taken away that their judgments themselves are reduced to a kind of insanity. They get possessed by other men in the same manner; one by some other that he thinks a hero or a genius; one by the name and successes of a great operator in the market; one by the fascinating airs and gayeties of a libertine; one by a charlatan or a quack; and another by a false prophet. Every soul of evil is under some kind of bad instigation or possession, that comes upon him as a gale of impulsion, swaying his objects and actions, and so far abating in him the sovereign keeping of his own right reason.—*Dr. Bushnell in Hours at Home.*

MISCELLANY.

A LADY noted for her hatred of tobacco, recently entered a well-filled car on the Napa railroad, and an accommodating gentleman politely made room for her by his side. Before accepting the seat, however, she asked:

"Do you use tobacco?"

"No," replied he, "but I can get you a chaw, if you wish."

A POOR woman, with want pictured on her face, and a little edition of the same sort resting on her arm, went from door to door in Bridgeport, Conn., with tearful, prayerful eyes, asking alms from the charitable. She wanted, if possiblr, to collect money enough to have the sweet little baby's photograph taken.

A CHILD desirous to regard the sanctity of the Sabbath, but not having learned to avail himself of the use of books, selected a very large one, and bringing it to his mother said, with great gravity,

"Is this a perfectly suitable volume for Johnny to read on Sunday?"

A BOY having complained to his father that his brother Bill had thrown the Bible at him, and hurt him on the head, the father replied:

"Well, you are the only member of my family on whom the Bible ever made the least impression."

"WILLIE, my dear, pass the butter."

"Thirtainly, thir; takthes me to pathe anything. Butter ith a common thubthantive, neuter gender, agreeth with hot buckwheat caketh, and ith governed by thugar—molatheth underthood."

A SON of Erin inquired at the post-office in San Francisco, last week, for a letter.

"What is your name?" said the clerk.

"O!" said he, "sure you will find it on the back of the letter."

A LITTLE girl, watching a cloud of dust in our streets, driven before the wind, exclaimed to her mother: "See, there is dust enough wasted to make several people."

Pacific Mail Steam Co's Steamships

— FOR —

NEW YORK, JAPAN AND CHINA

Will be Dispatched as follows:

LEAVE WHARF CORNER OF FIRST AND BRANNAN STREETS, at 11 o'clock A.M. of the following dates, for PANAMA connecting via Panama Railroad with one of the Company's splendid Steamers from ASPINWALL for NEW YORK.

On the 6th, 14th, 22d, and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Transatlantic Company's Steamer for St. Nazaire, and English Steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English Steamer for Southampton, South America, and P. R. R. Co.'s Steamer for Central America. Through tickets can be obtained.

Departure of the 6th connects with English Steamer for Australia.

The following Steamships will be dispatched on dates as given below.

STEAMERS FOR MAY, 1868.

May 22d—CONSTITUTION, Capt. Wm. H. Parker, connecting with RISING STAR, Capt. Conner.

May 30th—SACRAMENTO, Captain J. M. Cavarly, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock.

Through tickets to Liverpool by the "Cunard," "Inman," and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired, an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship GREAT REPUBLIC, Capt. S. Doane, will be dispatched June 3d, at 12 o'clock, noon, from wharf corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting at Yokohama with the Steamship COSTA RICA, for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Co.'s Office, corner of Sacramento and Leidesdorff Sts.

OLIVER ELDRIDGE, Agent.

ILLUSTRATION OF DIVIDENDS OF PROFITS

—OF—

United States Life Insurance Comp'y,

NEW YORK.

OFFICE, NO. 40 WALL STREET.

CASH ASSETS EXCEED $2,700,000.

SIXTH TRIENNIAL DIVIDEND.

The Board of Directors have this day declared a Dividend of FORTY PER CENT. for the three years ending at the 4th March, inst., to holders of all Policies then in force, on the whole sum of the annual participating premiums received during the said three years; and an additional Dividend of TWENTY PER CENT. on the whole sum of all previous Dividends and Additions, to holders of such Policies who have fulfilled their engagements with the Company, both Dividends being payable and available in the various modes explained in the Company's Prospectus.

For example, on a policy paying one hundred dollars a year of participating premium, the profits for each year and the total at each year on this system are:

Year.	Yearly.	Total.	Year.	Yearly.	Total.
1	$40 00	$40 00	28	$206 39	$2702 28
2	40 00	80 00	29	206 39	2908 63

LANGE'S COMMENTARY.

In our notices of books that appear from time to time in The Occident, we have endeavored to give such a representation of their contents and design as may be relied upon by those who value our criticisms and desire to buy books for themselves and their families. There is no department of the paper in conducting which we have been more conscientious, or respecting which we have felt more responsibility, although our limited space has obliged us to be very brief in speaking of each book. There are some works, however, which cannot be thus treated, their own reputation and our estimate of their worth demanding that they receive special commendation. Such a work is the Commentary of Professor Lange, in connection with other eminent European divines, and translated from the German under the direction of Dr. Schaff. Several volumes of the Commentary have successively appeared, the two latest being upon a number of the Epistles and Genesis. We most heartily recommend it as one of the most valuable expositions of the Scriptures with which we have been familiar, and do not hesitate to say that it should be one of the first series of books purchased by a young minister, while hardly any older commentary already on the shelves of ministers more advanced in the profession can be regarded as rendering this unnecessary. We say thus much, not because we agree with all the views presented by the eminent men who have contributed to it, for we find some things to which we cannot assent, but because we have rarely found comments so suggestive and stimulating, and this is the chief value of a commentary, beyond the mere imparting of information concerning persons, and places, and customs. If the remainder of the series shall equal the volumes now published, it will be the best and most complete exposition of the Bible of which we have any knowledge.

We have an object in these remarks, in addition to that which relates to the work itself. There are many clergymen who long to possess it, who would be greatly profited by it, and whose people would share that profit were it in their libraries, but they are not able to buy it, nor can they take enough from the salaries they receive to add even less expensive books to the scanty list to which they are now limited. Why will not the churches to whom these clergymen minister place such valuable books in their hands? The answer may be given that ministers often change their places, and therefore soon the churches which have supplied them would no longer reap any advantage from their gifts. But this can be made permanent, whoever may be their pastor, if they will gradually collect a library of such expensive and essential books, to be owned by the church itself. Once established, it will be easy to add to the list any new work that may be published, and in the course of a few years a collection will be gathered of which the church may be proud, and by which all may be profited.

In a new country, this seems to be specially necessary; yet, so far as we know, it is not the habit of our churches thus to strengthen and cheer their pastors, and we trust some of them will set the example. The right kind of books for a nucleus can be purchased readily of our prominent booksellers, like Bancroft & Co., or Roman & Co., of San Francisco, and we assure those who may be interested in the suggestion that if they will practice upon it they will find their interest greatly increased.

When such a library is commenced by any church we doubt not "Lange's Commentary," published by Scribner & Co., of New York, will have a prominent place in it.

H. H. Bancroft & Co. have placed on our table:

David, the King of Israel; by that venerable, and always delightful author, Dr. Fred. W. Krummacher. Harper & Brothers, New York.

Words of Comfort; by Alfred Nevin, D.D. Randolp, N. Y.

Early Piety; by Thomas Guthrie, D.D. The name of the book, and the name of the author, are commendation enough for this charming little book. Strahan & Co., London.

Something about Jesus.

A. Roman & Co. have sent us:

The Three Little Spades; by Anna Warner; a beautiful and successful attempt to cultivate in children a love for flowers. Harper Bros., N. Y.

The Story of a Chinese Boy. An excellent and attractive Sunday School book. American S. S. Union, Philadelphia.

The School Girl in France. Robert Carter & Brothers, N. Y.

Norwood; by Henry Ward Beecher, of which we gave a notice some weeks since, but which has been read by us with more interest, now that we have been able to give it more time.

Magazines received:

Atlantic Monthly, for May; Ticknor & Fields, Boston. Sunday Magazine, for April; Strahan & Co., London. The Broadway, for May. Biblical Repertory; Peter Walker, Philadelphia. Catholic World; Catholic Publication House, N. Y. Hours at Home; Chas. Scribner & Co., N. Y.

EDUCATIONAL.

Diverting Attention.

Two young men went out to hunt near San Rafael. Seeing a deer, one of them quickly remembered, from a book of travels, a suitable piece of strategy. He ran away from his companion to another side of the same field. Here he lifted up his arm. The deer, catching sight of him, gazed in wonder; but while so doing was shot by the other. Again in a stable, in the same place, a horse seemed to bear the dressing of a hurt very patiently. The explanation was, that a twist had been taken in his lip, and his attention was called away from the wound to that. The diverting of the attention is an art which needs sometimes to be practised by teachers and parents, as well as by hunters and doctors. Subjects often arise in children's minds which we wish to expel; either because the imaginations they provoke are very unprofitable, or because they are beyond human power to explain. We wish to avoid any possible resemblance to the famous

> "Dr. Parker,
> Who made things darker
> That were dark enough before."

But, oftentimes, were we to attempt the expulsion of such subjects directly, we would only make matters worse; the unprofitable imagination, or query, would only the more resolutely adhere to the mind. The escape is, then, to divert the attention and engage the expulsive power of a new idea.

C. R. C.

Children's Dress.

We are all familiar with the damage which may be done by too tight a waistband. It not only impedes superficial circulation, but cramps the free movement of important interior organs—such as those of digestion and respiration. Hence, boys should always wear suspenders; although they may be excused from calling them by the grim appellation of "gallowses." But the waistband is not the only offender against youthful health; another culprit is the garter. The latter copies the former only too successfully in impeding circulation, and must be held responsible for many instances of injury from cold feet. Late writers recommend, in place of the garter, the stocking-supporter—an elastic band joining the child's stocking to his waistband. Where a simple device of this sort will at all contribute to so important an end as health, it would seem to be our wisdom and duty to employ it. C. R. C.

AGRICULTURAL.

Variety in Farming.

The tendency of farming in this country has been toward specialties. Before the war of the rebellion the South grew cotton; it bought its food, its clothing, its luxuries; individuals grew rich and the people and soil grew poor.

The prairie States raised corn, which was sold for ten cents per bushel, burned for fuel, and monetary panics became chronic in the West.

New England and the middle States practiced variety in farming, and the water-wheel and steam engine worked everywhere in sight of the plow and the reaper. With them flourished a stable prosperity, and they stood, best of all, the terrible drain of resources.

Looking the world over, in the past or present, we find those communities and nations which found their agriculture on the fewest varieties of products, likewise the least prosperous, powerful, and stable. The practice of devoting the farm mainly to the growth of a single product, is opposed to all principles of scientific and common-sense agriculture. The one-product system of necessity abstracts from the soil more than it can legitimately return; it demands continuously the same mechanical and chemical conditions of the soil, like elements of plant food, and the point may be reached where the single variety will fail altogether, yet leave the earth capable of producing other crops abundantly. Thus it seems as if nature herself declared against this system by refusing to support it any length of time in one locality. The one-crop farmer is also less independent than if practicing mixed husbandry, inasmuch as he is compelled to depend to a certain extent on the market to supply his family and the demands of his business. Neither can he conduct his labor with the same economy that he could if growing a variety of crops. At certain seasons he has little to do, and at others he is overwhelmed with work. His risks also are greater approximating to those of commercial transactions, without having the compensatory chances of equally large profits.

Variety of crops also makes variety of work, which relieves the tediousness of the business. In short, a mixed husbandry is the only scientific, common-sense, self-sustaining, and, therefore, permanent system of agriculture; it renders the farmer, the community, and the nation independent, and its fitness is recognized, in the light of the recent changes, both in the corn and wheat fields of the West and on the cotton lands of the South.—*State Capital Reporter.*

An Old Farmer's Slate.

Writing about improvements reminds me that a farmer does not always *think* of what is needful and may be done when leisure times occur, and it recalls to my mind the practice of a large and successful farmer, who at his death left his affairs in a prosperous condition, and his premises in complete order. His neighbors often wondered at the ease with which he conducted his operations; he never hurried, but the right thing was always done at the right time, and his work never lagged. Much of the improvement he made was in odd spells, when the routine of regular farm work was broken by rainy weather, or

after finishing the work on a crop, and while waiting for another to get to the proper stage. He kept a large slate hanging in the kitchen where all his workmen could see it, and whenever a job occurred to him it was noted on the slate. For instance, some of his entries ran thus: "Make a gate for the brook lot." "Clean out the open ditch in the wheat field." "Lay a new floor on the scaffold over the barn-floor." "Bury the large stone in the middle lot." "Get some white-wood trees to mill for making garden-fence pickets." "Plant shade-trees along the road-side." "Dig the alders out of the fence-corners, and look out for the wild mustard that came up where the threshing-machine stood in the field last year."

In this way his slate was filled, and if a leisure half-day occurred, his men all had plenty of work; and if the master happened to be absent, the slate told the workmen what to do. After a time it was his custom to lay out the day's work on the slate each evening previous, and when a job was finished the record was erased. To get the slate clean was the ambition of the workmen.—*Moore's Rural.*

Let Well Enough Alone.—When you have a good strawberry or raspberry, that suits your soil, don't throw it aside for any new sort with a high-sounding name and a high-sounding praise; but stick to it. If the new sort turns out to be a real acquisition, you can grow it, if you like, quite time enough to enjoy any good qualities it may possess. We know of persons who are always changing their varieties of small fruits—always experimenting—and are nearly always without a good supply. In our experience of a series of years we have found the "let-well-enough-alone" policy to be the best. When convinced that a new variety of this or that was an improvement, it was adopted and recommended, and our readers, we think, will vouch for us that we have not often been mistaken.—*Germantown Telegraph.*

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

The Evening Wind.

Spirit that breathest through my lattice, thou
That cool'st the twilight of the sultry day,
Gratefully flows thy freshness round my brow;
Thou hast been out upon the deep at play,
Raising all day the wild blue waves till now,
Roughening their crests and scattering high their spray,
And swelling the white sail. I welcome thee
To the scorched land, thou wanderer of the sea.

Nor I alone—a thousand bosoms round
Inhale thee in the fulness of delight;
And languid forms rise up, and pulses bound
Livelier, at coming of the wind of night;
And, languishing to hear thy grateful sound,
Lies the vast inland stretched beyond the sight.
Go forth into the gathering shade; go forth,
God's blessing breathed upon the fainting earth!

Go, rock the little wood-bird in his nest,
Curl the still waters, bright with stars, and rouse
The wide old wood from his majestic rest,
Summoning from the innumerable boughs
The strange, deep harmonies that haunt his breast:
Pleasant shall be thy way where meekly bows
The shutting flower, and darkling waters pass,
And where the o'ershadowing branches sweep the grass.

The faint old man shall lean his silver head
To feel thee; thou shalt kiss the child asleep,
And dry the moistened curls that overspread
His temples, while his breathing grows more deep;
And they who stand about the sick man's bed,
Shall joy to listen to thy distant sweep,
And softly part his curtain to allow
Thy visit, grateful to his burning brow.

Go—but the circle of eternal change,
Which is the life of nature, shall restore,
With sounds and scents from all thy mighty range,
Thee to thy birth-place of the deep once more;
Sweet odors in the sea-air; sweet and strange,
Shall tell the homesick mariner of the shore;
And, listening to thy murmur, he shall deem
He hears the rustling leaf and running stream.

—*Bryant.*

The Conversation of Women.

It is very well to call the talk of women trifling and frivolous; if it is pleasant and graceful, it is all that can be desired. Conversation should be the relaxation, and not the business, of life; and the moralists who require that it should always be of "improving" character have no true idea of its proper social uses. Improving! have we not books, lectures, institutions, and complicated educational machinery enough of all kinds to improve us all off the face of the earth, if nature did not oppose a little wholesome duncehood to this sweeping tide of instruction? Must the schoolmaster still follow us in our little holiday? If the "queens of society" will only give us talk which shall be bright without ill-natured sharpness, playful without silliness—if they will show us that affectation, vanity, jealousy, and slander are no necessary ingredients in the social dialogue, but that rather they give an ill-savor to the wittiest and the cleverest play of words—if they will remember that good-humor, sympathy, and the wish to please for the sake of giving pleasure, will lend a charm to the most common-place thoughts and expressions—their conversation will "improve" us, perhaps, quite as much as most popular lectures and some popular sermons. The talk that puts you in good humor with yourself and with your neighbors is not wholly profitless. If it has but made half an hour pass pleasantly, which with a less agreeable companion would have been spent in gloomy silence, broken by spasmodic efforts, resulting in disgust at your own and his or her stupidity, it will have effected one of the ends for which speech was given us.—*N. Y. Observer.*

Domestic Life.

I am afraid that our domestic life will not bear looking into. I fear that our houses will not be found to have unity, and to express the best thought. The household, the calling, the friendship of the citizen are not homogeneous. His house ought to show us his honest opinion of what his well-being consists in when he rests among his kindred, and forgets all affectation, all compliance, and even all exertion of will. He brings home thither whatever commodities and ornaments have for years allured his pursuit, and his character must be seen in them. But what idea predominates in our houses? Thrift first, then convenience and pleasure. Take off all the roofs from street to street, and we shall seldom find the temple of any higher god than prudence. The progress of domestic living has been in cleanliness, in ventilation, in health, in decorum, in countless means and arts of comfort, in the concentration of all the utilities of every clime in each house. They are arranged for low benefits. The houses of the rich are confectioners' shops, where we get sweetmeats and wine; the houses of the poor are imitations of these to the extent of their ability. With these ends housekeeping is not beautiful: it cheers and raises neither the husband, the wife, nor the child; neither the host, nor the guest; it oppresses women. A house kept to the end of prudence is laborious without joy; a house kept to the end of display is impossible to all but a few women, and their success is dearly bought.—*Emerson.*

The Ice and the Snow.

"You are as white as a sheet" said the ice to the snow. "You are falling; are you faint?

"My robe is spotless, my flakes harmless, and my fall noiseless," replied the snow.

"I think you lack firmness," quoth the ice, "and more solidity and weight would render you less the sport of wintry winds."

"We've more to fear from the sun, than from the wind," answered the snow.

"Indeed!" observed the ice. "I should pity your weakness on the approach of such a foe."

"I shall commend myself to his mercy, by my whiteness and purity," said the snow.

"I shall resist his power by my hardness and strength," returned the ice.

The sun now spread his beams on our two cold friends. The snow began to weep and the ice to melt.

"Where's your whiteness and purity now?" said the ice.

"And where's your firmness and strength?" inquired the snow.

"We are returning to water from whence we came," said the ice.

"Why 'tis not death but change," joyfully exclaimed the snow.

"By this change we are becoming one," said the ice.

"And seeking the lowest place," replied the snow.

"We can now ascend to heaven," said the ice, "whereas we never could while I retained my boasted firmness, and you your vaunted whiteness."

Death is not a destroyer, but a restorer to the believer.—*Southern Churchman.*

Honest.

In the good olden days, which our fathers tell us were so much better than these, two unlettered Christian men met to settle accounts, Mr. Smith found himself owing Mr. Jones fifty-seven dollars and some odd cents.

"No matter about the money, brother, no matter at all," said Jones; "I only wanted to see how we stood, and you can pay me just when you've a mind to."

"Well, I hav'nt the money by me," said Smith, "but I'll tell you what—I'll give you *my note*, and that will fix it all straight and sure."

"I ain't a mite afraid to trust you, without a note," quoth Jones; "but if you feel any better to give me one, why, you can, I suppose."

So, after whetting up a pen-knife, and converting a goose-quill into a pen, after pouring a few drops of vinegar into the dried up inkstand; after much rummaging for the disused "letter-paper;" and after studious consultation of an old arithmetic, as to the proper form of a note, the important paper was at last duly executed, and Jones, having deliberately looked over his friend's writing, and dried it before the open fire, handed the note back to the signer, saying, "Now brother, you keep the note, so for to see how much you've got to pay."

"Well," said Smith, "I guess I will, for I am the master hand to forget, 'specially if there are odd dollars and cents."

So Smith kept his own note, and when he was ready to pay it, took it to Jones and handed it over with the money, saying,

"And now, brother, you keep the note, so for to show you've got your pay."

Although we may not believe with Pope, that "an honest man's the *noblest* work of God," we would not resist the conviction that these were noble men, or fail to honor such nobility, whenever or wherever found.—*Herbert Newberry.*

The Young Folks.

How Truth got into a Well.

Once upon a time there were two grand families who set up house-keeping. I don't mean to tell you where—only that they were named Bogus and Japan. Bogus was a great stock broker, and had made money in a curious way, through two fierce animals he kept. One was a bull, the other a bear. Sometimes he made the bear growl, and frightened the people so much that they just gathered up their dollars and paid him to keep it still. Then he would let the bull out, and you should have seen the commotion he caused. Then he would shut them both up and spring a *mine* on the community; and credulous people would go too near it, and by-and-by it would explode and crush a good many of them. But Bogus managed to get all the money there was flying about. He would keep all snug for a little while, till the explosion was forgotten, and suddenly appear again, throwing dust into folks' eyes.

There was no end to the ways in which Bogus made money. He wasn't a swindler, nor a gambler. Indeed, he would scorn to be seen with such cheating fellows; but, as I said before, somehow, he got a good deal of other people's money. Yet he always said, they let him have it with their eyes open, and nobody was to blame but themselves, which was anything but comfortable for people to hear who had been bitten by his bear, or gored by his bull.

One thing, however, I must say: that very often he compensated their misfortunes by giving them quantities of stock certificates, which would be sure to come up in the market some day; to say nothing of good mining claims, and various unavailable property, in distant localities, not easy of access.

Japan was a dainty sort of a fellow. Everthing he had was lacquered—so that what *seemed* to be, never *was*. If he told you anything of importance, it dwindled to such a small item when the gilding was scraped off that you would not know it for the same story. And he had such a way of seeming to deal in realities, and, withal, such insinuating manners, that it was very hard to avoid being deceived, both in him and his wares. He had the queerest way of changing his business continually. One month he was in the dry goods line; the next in the hardware business. He had a great trade in patent medicines; and as for jewelry, and watches, it was wonderful how many establishments he owned.

Gift enterprises, and grand schemes for realizing a million of dollars from an outlay of a hundred, were his especial forte; and the very persons who had been most frequently attacked by the bull and bear of Bogus were the ones who fell victims to the trickery of Japan.

Well, as I told you, they went to housekeeping as next door neighbors. Bogus built a house with a swell front, to imitate granite, and got up extensive stables, and dashed about with fast horses, and gave dinner parties, and patronized art, according to his understanding of it, and altogether, got himself and his wife and daughters up regardless of expense. He had a coat of arms painted on the pan-

cls of his carriage, and a footman in livery to open the door. Bogus gave a good deal to churches, too. Sometimes he would donate a piece of land, at other times he would give several shares of "copper" stock, the mines being located in the mountains of the moon, and immensely rich. The land generally adjoined the mines, and would be nice for building-lots—some day.

Japan's religious idea was to help the missionary cause, and so he would send a large invoice of goods from his jewelry manufactory, for the "natives," that being his general term for all unconverted heathen. They were to buy these at very low figures, and all over and above a certain sum was to go to "the cause," though what Japan meant by "the cause" it was rather hard to understand.

The Bogus and Japan families had for neighbors the Shams. They, also, had a great house and called their place "Shamland." You ought to have seen the statues, and bronzes, and urns on the lawn—though people did say they were only imitations, made of painted wood. It was queer, too, how Sham talked about Bogus; and ridiculed Japan, and how the daughters of Bogus and Japan ignored the acquaintance of the Shams.

Poor little Mrs. Truth dwelt just opposite these great houses, in a neat painted cottage, with a pretty grass plat before the door, and a quaint little bird-cage hung out in the sun. She was just the tidiest little body that ever was seen, and yet, somehow, the great families over the way did not like her so near them. They had, it is true, called upon her in a patronizing sort of way, and Bogus told her his wife would be so glad to see her, only that she was ill just then, and perhaps it would be better to defer the visit until some company they had left them. The fact was, Bogus and his wife were a little ashamed to receive visits from any one so poorly clad as Mrs. Truth.

But I wish, my little girls and boys, you could have seen her—she was so beautiful. Her large, bright eyes never said one thing while her lips were saying another. She never sent off a half-fledged little "evil report," so that some one could teach it to fly, and when it came back, no one would know it from a great big Lie! She never pretended to be delighted and charmed to see people she did not care anything about. She had a whole drawer full of queer things, which she called "insinuations and surmises," and when anybody came to her house who she thought had dropped these things, she very gently told them what transformations they were capable of undergoing, and how they grew and swelled, and sometimes exploded just like a torpedo, doing a great amount of damage; then she had a big bundle of "suspicions" carefully tied up and put under lock and key, and these were just like lucifer matches, they were so easily set on fire, and sweet Mrs. Truth would shake her head over them, and sadly say, "Behold, how great a matter a little fire kindleth," and somehow those who had owned these articles, after spending a little time with Truth, would throw them away as the most worthless trash in the world.

I only wish I had time to tell you all about her, but somebody else will want a little room in THE OCCIDENT to tell the children a "story with a moral," and so I must hurry on and tell you how the neighbors—Bogus, Japan, the Shams and Truth—got on together.

In the first place, Bogus said he did not like over-the-way neighbors. He was sure Mrs. Truth was watching him, and somehow she seemed to find out all about his speculations, and just as sure as she did, they were frustrated. Japan agreed with him, and said he never saw anybody with such penetrating eyes as she had. She seemed to see right into the heart of things, and he didn't believe she was interested in "the cause."

Sham was more severe on her than the rest. He even said bad words about her, and told how she uncovered all his plots when he least expected it. Japan did not know whether he meant garden-plots or some other kind of plots, and so, by way of finding out, he adroitly said:

"Yes; she sprinkles her seeds wherever she can get a chance;" for Japan never asked anybody a direct question, or gave a direct answer—because the Shams said it was not polite.

How these three were annoyed with the proximity of Truth! The Misses Sham and Bogus, when they were putting on their chignons, and "respirators," and overlaying their cheeks with rouge and powder, fancied she was peeping at them through the shutters. But this was a very mistaken idea. When people are trying to deceive others, the consciousness of their deceit always induces them to believe they are watched, and renders them very unhappy. If they could only understand and feel that an unsleeping Eye sees their very thought, they would take little heed of what their fellow creatures might think concerning them.

It is no stranger than true, however, that when Truth was where they could see her, they always felt uncomfortable, for she carried about her such an atmosphere of moral purity that the Boguses, Japans, and Shams naturally shrank away from her.

Things went on in this way for a long while. Bogus never put his foot out of doors but what he spied her somewhere, and Japan would scream out, "There she comes!" while Sham had a way of taking off his hat and coat whenever she came near. Truth, however, went innocently upon her way—feeling sad often enough, and praying God to help her make the world happier and purer.

Sham, one night, proposed to Bogus and Japan to present Truth with a homestead lot ever so far out in the country, so as to get rid of her, and said he would build a house on it. But when they proposed it to her, with great seeming cordiality, to their surprise, she said she did not think the little birds, and wild flowers, and clear streams in the country needed her, and that she could do more good by staying just where she was. God had given her her work to do in the world, and among men and women, and it behooved her to work while it was yet day, and then she offered to show the trio who were so averse to her a more beautiful way than they had ever yet known—a way of pleasantness and a path of peace.

But alas! alas! they were wise in their own eyes, rich in their own conceit, and they left her—rebuffed and ashamed, it is true, but not overcome. The wicked three resolved to effect by stratagem what they could not otherwise accomplish, and so, one dark night, they met together, and going to the simple home of the lovely lady, they bound her hand and foot, and carrying her off, threw her into a deep well. She neither screamed nor resisted them, but when the morning came, her habitation also had disappeared, and these wretched people, thus deprived of their kind neighbor—who so often warned them by her very presence—fell into courses more and more repugnant to goodness and purity, and still go about the world, possessed with the spirit of the evi one, "seeking whom they may devour."

As for Truth, she escaped from the well, and wanders up and down the earth, clad in fair, white garments, loving and pitying even her enemies. But it is said the Shams, and Boguses, and Japans often steal out and look wistfully into the clear, deep waters, where they fancy her penetrating glance still meets theirs, and thus, when their children sometimes inquire for the sweet little singing-bird, and speak of the lovely garden, and wonder what has become of Mrs. Truth, their parents, with singular sadness in their tones say: "Ah, Truth lies at the bottom of a well," and it is so fated that they shall nevermore come in closer contact with one whom they thus attempted to destroy.

PACIFIC COAST ITEMS.

ACCORDING to the Contra Costa *Gazette*, the anticipations of a fine grain crop in some parts of that county may prove somewhat premature. There is complaint of a large amount of cheat, and the early sowed wheat does not grow so thrifty as usual on account of the packing of the soil by the heavy rains. An unusually large quantity of cheat is also found in Santa Clara Valley and in that part of San Joaquin Valley lying north of the Calaveras, where the Woodbridge *Messenger* estimates that the wheat crop per acre will be but little more than one-half the crop of last year.

AT the California end of the Pacific Railroad, tunnels, mostly through solid rock, succeed each other at intervals of a few miles. Taking the road from Sacramento, the first tunnel is at the distance of 76 miles, through Grizzly Hill, among the lower undulations of the Sierras. Like all the rest, it is 18 feet high and 19 feet wide. Its length is 500 feet. The second is 300 feet long, the third 300, the fourth 100, the fifth 100, the sixth—the great Summit tunnel—is 1,659 feet long, the seventh 100, the eighth 375, the ninth 216, the tenth 509, eleventh 557, twelfth 342, thirteenth 870, fourteenth, on the Truckee, 128, and the fifteenth 80—a total of 6,156 feet.—*Vallejo Recorder.*

A BEAUTIFUL CITY.—The city of Los Angeles is six miles square, and is built upon a level plain, with a slight decline towards the south. The population at present is about 7,000, and is rapidly increasing. The city is favored by miles of vineyards, and presents the appearance of a vast collection of gardens, in which all the semi-tropical productions grow and ripen. There are various kinds of fruit in their most luscious stages of maturity at all times of the year, while the perfume of myriads of plants and flowers diffuses itself through the air alike in spring, summer, autumn, and winter.

FLOWERS AND SHUBBERY.—Those portions of our city which are occupied by private residences, have presented for weeks past a most attractive appearance. The general practice of adorning the grounds around them with roses, is particularly pleasing. These consist for the most part of the most beautiful varieties, and seem to flourish in uncommon vigor. The humid condition of the atmosphere at this season, preserving the sweet odors that arise from the flowers, and the softness of the temperature, impart to our city just now a semi-tropical character.—*Stockton Gazette.*

FROM a gentleman who has been prospecting on the Humboldt River, we have obtained some particulars of the agricultural prospects of that region. He traveled up the river fifty miles above Gravelly Ford. He considers the valley a splendid place for stock, and at various points there are patches of very good agricultural land. As the mountains on either side of the valley at this point are almost destitute of wood, he says the few ranchmen already located there have had to build sod cabins—no other material being available. *Reese River Reveille.*

A LATE steamer brought to this city from New York one of "True's Potato Planters," which performs the labor of twelve men. We are acquainted with its merits, and are satisfied that its introduction will prove a great advantage to those parts of the State which are adapted to the cultivation of the potato.

A SAN FRANCISCO correspondent of the *N. Y. Observer*, to illustrate the diversity of language used in this city, says that he entered a shop to have his boots mended and said to the proprietor, an Italian: "You speak English?" The reply was, "Si, Señor—certainement—You bet!"

A TRIAL of the portable "Fire Extinguisher" at Haywood, which was made on the fair grounds at the close of the late races, is said to have been perfectly successful.

DURING the late heavy frost, the proprietors of the Forest House orchard prevented the failure of their peach crop by building fires under the trees.—*Yreka Journal.*

FRUIT GROWERS are much alarmed by the appearance of curled leaf on the peach trees of Sacramento, Santa Clara, and Alameda counties.

THE champion silver brick of Nevada, from the Wilson mine, Pine Grove, weighs 1,099 ounces, and is worth over 20,000.

THE time for the completion of the Western Pacific Railroad from Oakland to Stockton is estimated at ten months.

FRIEDLANDER'S grain warehouse just finished at North Point, is said to be the largest building in the State.

NINE ships are now on the way from New York to this port, the cargo of which consists chiefly of railroad iron.

ACCOUNTS from Boise City state that times are hard, business dull, and money scarce in that region.

A NEW quicksilver mine has been discovered in San Mateo County, near Redwood City.

THE Indians who murdered the Pierson family in April have been caught and killed.

IT is stated that the publication of the Salt Lake *Vedette* is soon to be resumed.

A STEAMBOAT is being built to run on Washoe Lake.

TELEGRAPHIC SUMMARY.

EASTERN.—There are sensational reports of a plot on the part of Chief Justice Chase and some of the conservative Republican Senators to defeat Grant, and give Chase the nomination....Other dispatches state that Chase will be the Democratic nominee....There is a report that Grant has written a letter declining the nomination.

CONGRESSIONAL.—A bill for the payment for Alaska has been introduced....The House refused the previous question on the bill to incorporate the Puget Sound and Columbia River Railroad....The House has agreed upon an investigation of charges of corruption against members of the Senate acting in the Court of Impeachment....The bill for the admission of Alabama, Georgia, Louisiana, and the Carolinas passed the House—108 to 35....Senator Grimes has been granted an indefinite leave of absence....Congress has adjourned till the 25th.

IMPEACHMENT.—The vote has been taken on the eleventh article. It resulted in 35 for conviction and 19 for acquittal. ....Seven Republican Senators voted with the democrats—Fessenden, Trumbull, Grimes, Henderson, Fowler, Van Winkle, and Ross....The 11th was thought by the Managers to be their strongest article, and there is but little doubt that the President will be acquitted.

FOREIGN.—Accounts from Mexico state that the Government is making progress in restoring order, the revolutionists having been defeated....The news from Japan is still warlike... Minister Adams took his final leave of England and the Queen on the 13th....The lower House of the Austrian Parliament has passed a bill granting the right of jury trial....Much trouble exists at *Port Au-Prince.* Many Americans have been shot, and Salnave threatens to burn the city. Several war steamers have been sent for. ...The yellow fever is raging at Vera Cruz.

WEEKLY MARKET REPORT.

Produce Market.

WEDNESDAY, May 20, 1868.

FLOUR—The Panama steamer this morning carried 2,000 bbls in transit to New York. Market quiet at the following rates for city brands:

Superfine, hf sks, ₱ 196 lbs	$6 25@6 50
qr sks	6 50@6 75
Extra, hf sks	7 00@7 25
qr sks	7 25@7 50

WHEAT—There was a further shipment of 100 tons to New York by the Panama steamer this morning. Sales of 1,000 sks good milling, $2 10; 500 sks fair, $2 05. We quote the range of the market at $2@2 12½ ₱ 100 lbs.

BARLEY—The demand is mostly for small lots, which ranges from $1 75@1 85 ₱ 100 lbs.

OATS—Sale of 250 sks good, $2 50. For round lots from wharf the range is $2 10@2 25, and for small lots from store $2 20@2 40 ₱ 100 lbs.

POTATOES—Old descriptions are selling for all sorts of prices, according to quality and condition. The sales reported to-day aggregate 1,500 sks in lots, 50c@$75c. New command $1 75@2 ₱ 100 lbs.

ONIONS—Small sales of new are reported at 2¼@2½c ₱ lb.

CORN—Red, $2 15@2 20; pale Yellow, $2 25@2 30; deep Yellow, $2 30@2 35; White, $2 25@2 30 ₱ 100 lbs.

RYE—Last sales from wharf were at $2 ₱ 100 lbs.

BUCKWHEAT—Entirely nominal at about $1 75 ₱ 100 lbs.

BEANS—Are jobbing as follows: Bayo, 3¾c; Butter, 4¾@5c; Pea, 5½@6c; small White, 5¼@5½; Pink, 3@3¼c; Red, 2½@2¾c. Wharf prices ¼c less all round.

BRAN—In moderate demand at $22@$25 ₱ ton.

MIDDLINGS—We quote fine at $35@47 50, and feed descriptions at $35@40 ₱ ton.

OIL CAKE MEAL—Sells at $30 ₱ ton from the mill.

HAY—One cargo of very choice sold this morning at $21. The general range is $15@20 for such samples as are usually received.

DAIRY PRODUCTS—As this is the packing season among dairymen, the supplies sent forward to market are moderate, and prices firm, with a hardening tendency. Fresh roll Butter is to-day quoted at 30@32½c; and California firkin, 31@32½c for store and ranch-packed, with sales of 50 firkins in lots; Cheese commands 14@15c for ordinary to choice California dairies, 18c for S. Hough & Son's, and 10@20c for Eastern dairies. Eggs are in fair request at 31@32½c for Hen, and 25@27½ ₱ dozen for Duck.

POULTRY—Live Turkeys 15@16c, and dressed, 16@17c ₱ lb; Hens and Roosters, $6 50@7; Spring Chickens, $4 50@5 for small size; Ducks, $5 50@6 ₱ doz; Geese, $1 75@2 ₱ pair. The quotations for Hens and Ducks show an advance of 50c ₱ dozen as against last week's prices.

PROVISIONS—Oregon Hams are a little off; otherwise the market is firm, at a slight advance for some descriptions. California smoked Bacon is jobbing at 16@16½c; Oregon do, 12¼@13c; California Hams, 16@18c; Oregon do, 15@16c; California Lard, 14@15c, with 15½ for small tins; Eastern do, 12½@13½c ₱ lb. Round lots from first hands, of course, sell less.

WOOL—Sales since last Wednesday have been considerable, aggregating nearly 400,000 lbs, mostly for shipment. Choice shipping grades spring clip are quoted at 17 @18c; medium do, 15@16c, and burry 11@14c ₱ lb. At the close, 30,000 lbs good spring burry, 14½c. The shipment to New York by the steamer this morning consisted of 176,000 lbs.

HIDES—The supply is more liberal. Since last Wednesday, 1,200 California dry have been placed at 14@15c for fair to choice selection.

TALLOW—Sale of 1,000 lbs choice Beef, 7¾c. The range of the market for fair to choice Beef and Mutton is 7¼@7¾c. At the close, 6,000 ₱s good Beef, 7½c ₱ lb.

RIPE FRUIT—Eastern Cranberries are jobbing at 75@80c in 10-gallon kegs; 85c in 5-gallon kegs, and 80c in 5-gallon tins.

—*S. F. Bulletin.*

San Francisco Cattle Market.

Since last Wednesday, the market has been very steady, the demand and supply having both been of a moderate character. The only change from last's weeks quotations that we have to note is a slight decline in dressed Pork.

We quote slaughterers' prices as follows:

BEEF—American, 1st quality, 6@8c ₱ lb.
do 2d do 4@6c ₱ lb.
VEAL—Steady at 7@10c ₱ lb.
MUTTON—In fair request at 5@6c ₱ lb.
LAMB—Ranges from 7@9c ₱ lb as extremes.
PORK—Undressed, 5½@8½c; dressed, 9@11½c ₱ lb—outside figure for best quality grain fed.

Obituary.

We take the following obituary notice from the Honolulu *Friend.* The Rev. Mr. Thurston was the father-in-law of Rev. T. E. Taylor, of Virginia City, Nevada, and had many friends on this coast.

DEATH OF REV. ASA THURSTON.—Another of the American Pioneer Missionaries to the Hawaiian Islands has passed away. The Rev. ASA THURSTON was born in Fitchburgh, Mass., Oct. 12th, 1787, and died in Honolulu, March 11th, 1868, at the advanced age of 80 years. He graduated at Yale College, in New Haven, in 1816, and at Andover Theological Seminary, in 1819. Among his class-mates at Andover, were his Associate, the Rev. H. Bingham; the Rev. Cyrus Byington, missionary to the Choctaw Indians; the Rev. Dr. King, missionary to Athens, Greece; the Rev. Dr. Orville Dewey, and several others who have become distinguished for their talents as divines and scholars. Soon after leaving the Seminary, he was married to Miss Lucy Goodale, of Marlborough, Mass., who has ever been his faithful wife and companion in all the toils, labors and privations of missionary life. They embarked at Boston, Oct. 23d, 1819, with their missionary associates, on board the bark *Thaddeus,* Capt. Blanchard. Before sailing Mr. Thurston made a farewell address in Park Street Church. The vessel reached the islands March 30, 1820, and Mr. and Mrs. Thurston were assigned to the station at Kailua, Hawaii, the old residence of the kings of the Islands. There they resided for more than forty years, until, through infirmities of age, they removed to Honolulu. Here he has spent the few closing years of an eventful life, respected and esteemed, honored and beloved. As a missionary of the American Board of Missions, he has ever labored with great usefulness and success. His knowledge of the native language and character was most thorough. As a preacher, he was ever much beloved by the native Hawaiians, as he spoke their language with great purity and idiomatic accuracy. In the early years of the mission, his labors as a translator were arduous and successful. In this great work, he was associated with Bingham, Richards, Bishop, Green, Andrews, Dibble and others. It fell to his lot to translate parts of Genesis, Numbers, Deuteronomy, and the whole of Samuel, 2d of Kings, and some other parts of the Bible. His funeral was attended on Thursday last, by both Hawaiians and foreigners, from the first Church in Honolulu. The following was the order of exercises; Prayer, in Hawaiian, by Rev. L. Smith; Address, in English, by Rev. E. Corwin; Address in Hawaiian, by Rev. L. H. Gulick; Prayer, in English, by Rev. S. C. Damon; Benediction, by Rev. H. Bingham, jr. The absence of the Rev. Mr. Parker, Pastor of the Church, was much regretted.

If space would allow, it would be easy to indulge in a train of remark, contrasting the present with the past. When our departed Father in the Ministry arrived, all was one wide, moral, heathen waste. Idolatry was abolished, but the work of reducing the language to a written form, and the endless toil of a missionary's life, was to be entered upon. Now, how changed the moral aspect! The deceased leaves a widow and three children and numerous grand-children to mourn his loss. All who were acquainted with the life and labors of the deceased are ready involuntarily to exclaim,

"Servant of God, well done,
Rest from thy loved employ,
And while eternal ages run,
Rest in thy Savior's joy."

CURRENT TOPICS.

The Governor has announced the names of those Regents of the University who were to be appointed by him. We are acquainted with but few of the gentlemen selected, but take for granted that they are able and willing to begin the really formidable work necessary to the organization of such an institution as is proposed. It will not spring up on the splendid site where it is to stand, at the command of those who are to have it in charge. It must be the product of much thought and labor, and self-sacrifice, and we shall have no University unless a working portion of Regents are so fully aware of this that they are willing to give time and study to its demands. No doubt the remaining eight will soon be elected, and then we hope to hear that some wise agent has been sent out to locate the public lands donated by the Government, and that arrangements have been made for the commencement of instruction, at least so far as is necesary that the classes of the College of California may be transferred to the University without serious interruption of their course. We have a noble University on paper, and we have abundant provision for its development in the appropriations that have been made, and in the expressed interest of wealthy citizens, and we have an eager, almost anxious state of public feeling with reference to its success. Nothing is wanting but such efficiency and wisdom on the part of the Regents as shall inspire public confidence, secure the right men for a Faculty, cultivate a love for higher education through the State, and keep its management free from the disturbing influence of mere political issues, and we shall soon have occasion for congratulation and pride as we point to so grand a proof of our progress. The men on whom the responsibility must rest, will have a task of which only the attempt to perform it can give them a just knowledge, but if they succeed, they will deserve, and receive the thanks of a multitude, the most of whom are yet to be born.

The Republican National Convention had one peculiarity by which it was distinguished from many similiar bodies that have assembled in years past. It escaped bitter and protracted dissensions, and finished its work in a very short time. A large part of its work was done before the Convention came together, for it was a foregone conclusion that Gen. Grant would be the nominee for President, and that the essential elements of the platform would be as they have been announced. Respecting the Vice President, there was much feeling and some doubt, but there is very general satisfaction on this side of the continent with the nomination of Mr. Colfax. Of course, we shall know who will be our rulers after the election, but all agree that this will be a formidable ticket. We do not envy the gentlemen who are to run the gauntlet that is always arranged for those who are proposed for our highest offices, and when so many exciting questions enter into the canvass as at this time, the candidates of both parties will be represented as only base. There is food for serious thought in the fact that our people can traduce and dishonor those who before were at least respected, perhaps really admired, as soon as they are nominated for office, with views of politics unlike their own. It would be evidence of too near approach to the millennium for these days, but it would be a most grand spectacle, if this great nation would go through the coming election, both parties having offered worthy men, without the representation to the world that our leaders are fit only to disgrace or ruin us.

It is not easy to understand on what ground the Government of Great Britain has forbidden the deposition of Bishop Colenso. From any point of vision we are accustomed to occupy in this country, it would seem to be safe to leave questions of this kind in the hands of ecclesiastical bodies by which they must be investigated, and by which they can be most thoroughly comprehended, and only gain to error can result when governmental authority interferes to force decisions. If Colenso is a heretic, and deserves to be deposed, the English Church will suffer by retaining him in office. If he is not a heretic, the proper guardians of truth in that Church are the best prepared to ascertain this, and the most likely to treat him with justice. The cases in history are very rare in which any real good has been effected by the State in assuming to dictate a policy to the Church.

Perfect contentment is a gift never bestowed upon man in his private capacity, but the state of the public mind in California, at this time, inclines us to believe that with communities it is different. It would be difficult to imagine more complete satisfaction than that with which the people of our State, as represented by the public press, regard their present condition and future prospects. Eastern readers of our journals must feel convinced that we are a body of enthusiasts or that California is a decided improvment upon the Garden of Eden. Our mining, agricultural, and commercial interests are exhibited in so bright a light, and every portion of the State is represented as enjoying such unexampled prosperity, that some grumbling complaint, or sign of discontent, from some county or city, or even some political or natural convulsion—in fact, anything to break up the monotony of uninterrupted prosperity, would seem almost a relief. No grounds of discontent, however, seem to exist among the people at large, and it is probable that our broad grain fields will yield their immense crop, and that our mines will continue to supply the world with gold. The Pacific Railroad will continue its progress across the continent, bringing us day by day nearer New York. The emigration so long wished for will pour in upon us from the East and Europe, and our cities will increase in population more rapidly than they have in the past. These things cannot be prevented. In fact, we are driven to the conclusion that our enthusiasm is well founded, and the world must indulge us in it.

No one who has observed the progress of events in Continental Europe during the past five or six years, has failed to make the position of Austria prominent in his estimate of the real state of affairs. Indeed, it would be difficult to reach any conclusion touching the political, or religious status of those countries especially identified with the Papacy, if Austria be left out, or misunderstood. The posture of that government, therefore, as defined on several occasions of late, respecting popular education, the Sabbath, and general toleration of religion, has been noticed with much interest, and the recent despatch from Vienna will be received joyfully by all who welcome such indications of good. This despatch states that the Emperor has confirmed the law giving equality to all religious sects; the full scope of which may not be entirely manifest, but its spirit cannot be misinterpreted. Let the remark often made, that there has been no advance against Romanism during the past ten years, be met by the contrast between the imperial sentiment and conduct ten years ago in reference to "the sects," and that indicated by this announcement.

The General Assemblies, as was expected, seem to regard the question of reunion of paramount importance in their deliberations, and the report of the Joint Committee was made the special order for immediate action. So far as can be judged from the abstract of this report, sent by telegraph, there appears to be no reason why it may not meet the wishes of all who really desire reunion. The points respecting which the most discussion has arisen are disposed of in a way that can hardly fail to satisfy both branches of the Church, and we may hope that after the vote of the Presbyteries upon the question, even those who have hesitated will accept the result with gratitude and hope.

The annual season of examination and "closing exercises" in our schools and colleges, which is now upon us, naturally excites much interest among our people. In most of the schools there is manifest improvement in the manner of preparing for these exercises, when compared with the process generally adopted years ago, and we are able to know something about the real proficiency of a portion of the scholars from this exhibition of themselves. There

are some serious objections, however, to all such public displays of children, which render it doubtful whether they are wise, even as now conducted. The most sensitive and diffident, and often those among these who are really the most worthy of credit, are likely to do themselves no justice, becoming far more damaged than benefited by the attempt. The strain on the nerves, as well as intellect, necessary to any success in these closing performances, comes after the powers are all jaded, having been urged to about their full capacity for a year, by the regular studies of the course, and there is danger that this added tension may be too much for those, whose health or temperament renders them peculiarly susceptible to such evil. How far the advantages gained by the mass of pupils from this stimulus throughout the year, furnished by the coming of examination at the end, and the satisfaction to teachers and friends derived from a knowledge, by such means, of the advance made by them, may compensate for the evils that must attend it, we are hardly prepared to judge. We are always greatly interested in these annual educational reviews and feasts, and intend to speak more particularly of several in our paper of next week.

Religious Intelligence.

PACIFIC COAST.

San Francisco, May 26, 1868.

A special meeting of the Presbytery of California is called, to consider the application of Rev. A. J. Compton for a letter of dismissal to the Presbytery of San Jose. Place, The Occident office in this city. Time, Thursday, June, 4th, 1868, at 10 o'clock, A. M. Chas. Russell Clarke, Moderator.

—

The Meeting of the State Sunday School Convention will be held at Calvary Church on Tuesday Wednesday, and Thursday of the coming week. The opening sermon on Tuesday evening will be preached by Rev. Dr. Wadsworth, and the address of welcome will be delivered Wednesday morning by J. W. Stow Esq. The exercises of the Convention will consist of addresses by the most eminent clergymen of the State, discussions on subjects of interest connected with the Sabbath School cause, and illustrations of methods of teaching by those who have devoted special attention to the subject. A large attendance of delegates from all parts of the State is expected, and the labors of the Convention can hardly fail to give a new impulse to the work of religious education on this Coast. It is desirable that the Wednesday evening services of the various churches in this city should be omitted; that the pastors and people may be at liberty to attend this meeting.

—

The Rev. Dr. W. C. Anderson, formerly pastor of the First Presbyterian church in this city, who has been preaching for the last six months in the First Presbyterian church in New Albany, Ind., writes to the *Presbyterian* that as a result of the remarkable religious interest now being experienced in that place, one hundred and ten converts have been added to the First, and one hundred and twenty-two to the Second churches.

—

From the Coast.—A correspondent, "F. R.," writing from Big River, furnishes our readers with the following: "The first thing that attracts the visitor's attention on his arrival in this beautiful village, is the new church. It is one of the most beautiful buildings to be seen outside of San Francisco. Located as it is at the east end of Main street, near the bluff overhanging the grand Pacific, it commands a splendid view of the ocean, the harbor, the river, the bridge, the mills and the surrounding heights crowned with their waving forests of redwoods. This church was erected by the Presbyterian denomination at a cost of about seven thousand dollars. Your readers from the above faint description will see, that, notwithstanding the hard materiality of lumbering and seafaring in which our people are engaged, they are not wholly debarred from devoting a portion of their time to the worship of God, and a portion of their means to the erection of temples dedicated to His name.—*Mendocino Democrat.*

—

Purchase of a Lot for a New Synagogue.—The committee appointed some time since by the Congregation Sherith Israel, to procure a lot for the erection of a synagogue in place of their present house of worship on Stockton street have, after considerable time and labor, secured a most eligible site at the northeast corner of Post and Taylor streets, being 105 by 137½ feet. This is the pioneer congregation on this Coast, and we doubt not that when the time arrives, our people, with their accustomed liberality, will subscribe liberally to enable the congregation to erect a synagogue adequate to their wants. They have our best wishes for the success and consummation of their efforts.—*Hebrew.*

—

We learn from the *Weekly Union*, of Junction City, Kansas, that Rev. John A. Anderson, formerly of Stockton, Cal., was, on the 5th inst., by a very cordial and unanimous vote, called to the pastorate of the Presbyterian Church of that city. Mr. Anderson had been previously laboring in that church for some six or eight weeks with great acceptance.

—

During the next six months Rev. Mr. Morgan will supply the churches of Copperopolis and San Andreas, as well as that of Murphys, as far as may be in his power, and with regularity. Four persons united with the Copperopolis church on the third of May.—*Stockton Independent.*

EASTERN.

Rev. Albert Barnes is about publishing what he calls his last work, "Notes on the Psalms." There is something pathetic in a paragraph in the preface of the forthcoming work; he says that these notes complete his labors in endeavoring to explain and illustrate the sacred Scriptures. "At my time of life, with the partial failure of vision with which I have been afflicted for more than twelve years, with the other cares and burdens resting on me, and with the moral certainty that the infirmities of age, if I am spared, must soon come upon me, I could hope to accomplish no more, and I shall attempt no more."

Prof. Pierce has clearly demonstrated from the tables of mortality of Harvard University, that the excess of deaths for the first ten years after graduation has not been among the best students, but in that portion of each class inferior in scholarship. The real cause of the failing health of college students and other young men is not hard study or hard work, so much as late hours, high living, and the habits of dissipation and excess into which they are too easily enticed.

The *Presbyterian*, in announcing the election of Dr. Green as President of Princeton College, adds: "We understand that at the same meeting of the Board of Trustees, John C. Green, Esq. of N. Y., proposed to add to the endowment of the College, upon certain conditions named in the deed of gift, the sum of $100,000, and also to give to the College real estate in Princeton, contiguous to the College, valued at from $20,000 to $25,000."

Rev. Charles G. Finney, the well known revivalist a number of years since, and the President of Oberlin College in Ohio, has been invited to deliver some lectures to the students of Andover Theological Seminary on the work of the ministry with his own personal experience. He is now seventy-four years of age.

Rev. Dr. Huntington, of Boston, is reading Liddon's Bampton Lectures on the Divinity of our Lord, at the Wednesday afternoon services in Emanuel Church. The *Churchman* commends the Doctor's example in thus making use of the results of the labors of great scholars.

Rev. Dr. C. B. Boynton, pastor of the Congregational Church in Washington City, and Chaplain of the House of Representatives in Congress, has just published a large work entitled, "The History of the Navy During the Rebellion."

John Magee, the coal millionaire, who lately died at Watkins, N. Y., left $30,000 to the American Tract Society, N. Y. and a like sum to the American Bible Society.

Rev. G. C. Curtice declines the call at St. Louis and remains at Elmira.

Installation at Columbus, O.—Rev. J. F. Kendall was installed as pastor of the Second Church on Friday evening, the 17th of April.

FOREIGN.

Mrs. Thompson writes: Several Moslems of the highest class called on me while at Damascus; one of them said:

"Once we thought we must shut up our girls; now we see we must send them to school, and that it is the mother who educates the child."

Another said: "If you establish your school in Damascus, you will soon have five hundred children."

The Greek community, and some of the Jewish families, are equally desirous for an English school, saying, "We will give you a hearty welcome."

The chief mosque of Damascus is a very ancient building, of the finest Greek architecture, which, previous to the Moslem conquests, was occupied as the great Cathedral of St. John. The Moslems will not now allow a Christian or a Jew to approach it. They have, however, in consequence of an ignorance of its meaning, preserved over the portico the beautiful Greek inscription:

"Thy kingdom, O Christ, is an everlasting kingdom, and thy dominion endureth throughout all generations."

Resident Missionaries of the Society of Friends.—Until the last two years it has been an unprecedented thing for the Society of Friends to send *resident* missionaries to foreign lands. Their ministers have been encouraged to visit the most distant regions of America, India, Australia, the Pacific, South Africa, Greenland, etc., but have not till recently made any lengthened stay in one place. There are now, however, three Quaker missionaries resident at Antananarivo, the capital of Madagascar. They send home pleasing intelligence, and seem to have placed their service as teachers at the disposal of the missionaries of the London Society. They are familiarizing themselves by degrees with the language, and speak of the Christian natives as "kind and gentle, and almost idolizing the missionaries," whom they characterize as "earnest, hard-working young Christians." The friends had been visited by a Norwegian bishop and his party, who had been upwards of twenty years in the Zulu country near Natal.

It is said that the Fiji Islanders, to the number of 100,000, about half of the population of the island, have been supplied with the Bible, and are under instruction. There are 17,000 church members, 40,000 scholars in the schools, 38 native ordained missionaries, and a thousand other native helpers. The English Wesleyans have control of this important mission.

One of the "signs of the times" is the calling of a missionary convention of all evangelical missionaries in the Pacific Ocean to meet at Honolulu in June 1870, at the semi-centennial anniversary of the Hawaiian Mission. Immense results have already been achieved, and it is hoped that this meeting will be the means of hastening the completion of what remains to be done.

The mission Conference of the M. E. Church in India has just closed its annual session which was a

season of great interest. The year had been one of great prosperity; several had been converted and added to the church, and the cause had been advanced in all its prospects.

LORD RADSTOCK is preaching in Paris in the American and Wesleyan chapels, and in the elegant drawing-room of Lady Cowper. He is creating an impression in the fashionable circles, and much good is expected from the earnest labors of this real nobleman.

MUCH as we hear of the indifference of the French to all religion, they contributed to the foreign missions of the Papal church in 1866, some $700,000 in gold, nearly as much as was given by all denominations in this country in aid of Protestant missions abroad.

SAN FRANCISCO, SATURDAY, MAY 30, 1868.

GOD AS A KING.

There is a grand sense, in which God's love is at the base of His character and government, since it prompts Him in all things. And that is a wonderful view of God, warranted by Scripture, and precious to every pious heart, which regards Him as most worthy of our love. The appeals that come to us from the representation of Him as our Father, our Benefactor, our Savior, our Refuge, our Almighty Friend, should move us greatly, and affect our lives as well as our feelings. Yet, there may be an evil in the *exclusive* contemplation of God from this point of vision, for we do not here obtain the most glorious apprehension of Him, nor one which most profoundly affects our own souls.

In the condescension by which He comes near to us there is sometimes exquisite delight, and we commune with Him and recline upon His breast, and open our hearts to Him, and feel His own heart beat tenderly towards us, almost *forgetting* that He is the infinitely great and glorious God. There is need of another view, that those emotions of godly fear and humble homage may be excited which are an essential element of real piety, and the spirit may be roused to service as well as admitted to communion. The majesty of the King Eternal, sending forth His commands upon us, and announcing the sanctions He has ordained; the vision of the throne and those bowing before it, vouchsafed to the prophet and forcing from him the confession, as he was filled with dread, "Woe is me, for I am undone!" while with authority he would not and dared not resist, the voice asked: "Who will go for us?" and he answered, without inquiring about the mission, "Here, Lord, am I; send me!" this vision should, from time to time, rise before us, if we would attain the highest qualities of piety. The acknowledgment of God's right to command us gives vigor, and energy, and stability to religion, which are not the result of the mere assurance that He loves us. The belief that our sin trifles with His authority, while it grieves His heart, makes us humble and contrite as we ask for pardon. The truth that His sovereignty subjects all things and beings to His disposal, gives value to His love which inclines Him to supply all our wants, gives emphasis to the precepts He assures us are intended for good, gives stimulus to the efforts we put forth in His service. And our happiness is greatly increased by the unquestioning loyalty we exhibit, and the cheerful obedience with which we tread these higher regions of sincere devotion.

There is apparent reason for attention to this theme in the type of piety that is becoming prevalent in many of our churches. This piety has in it much that is pleasing and beautiful, but there is not that rugged, reliable *substance*, that resolute earnestness of principle, which ought to be manifest in those who are called the people of God. It should not be diminished, perhaps, but it should be made to adorn what must be regarded as the real *granite* of religious character, which, with too little adornment, was conspicuous in our stern and rigid fathers of two or three generations ago. This is formed by the contemplation of God's glory as our King, not so that we shall be ever oppressed with fear, our service only slavish, and our homage forced; but so that His rule shall appear to us as the guaranty of blessing, and His statutes as the expression of His love, while the obedience required will cause delight by its effect upon the character and the experience, and the relation we may sustain to Him will provoke both our reverence and our affection.

There is demand from the times for those who wait for God's commands, more than for those who seek only for tokens of His favor. The great enterprises of the Church are to be promoted by those who rejoice in the authority her Head must ever exercise. Obligation must move on the earnest spirits who will make their path brilliant with the joy they increase by their advance. In this way will be attained the success indicated by the prophecies and providence of God, and those who are thus allied with His purposes will feel that they are safe amid the commotions through which their progress may conduct them, that they will be supplied in all their need from the resources to which they will have access, and that they will be more and more holy in all their career.

ANNOTATIONS.

XI.

FAITH IN FAITH.

As the impure cannot believe in purity, there is a class of skeptics who doubt the sincerity of those who profess to believe. Faith is credible to him who exercises faith. But to him who cannot himself exercise it, the thing is inconceivable in others. Singular as it may seem, there are numerous persons who are not ignorant, in the ordinary sense of the term, but who honestly believe that all the men of real ability who profess faith in the "mysteries" of religion, are hypocrites. Another illusion of the same kind, and which prevails with the same class of skeptical minds is the conviction that religion is losing its hold on society, and is fast dying out of the world. For many generations the more able and cultivated skeptics have been convinced, each in his own day, that the time had at last come when Christianity was to be given up. Hume thought that the next generation would stop building churches; and Voltaire, together with the vast majority of that learned and acute-minded body of men, the encyclopedists, was fully persuaded that the era of enlightenment had dawned, when all civilized people would reject "the fables of Christianity," and none would respect "the priests," except "old women and children." These men were not affecting this confidence; they were perfectly sincere in it. The secret of such an apparently stupid blunder on the part of such able men is simply this: they had nothing in their own intellectual or spiritual experience that was sufficiently akin to the "faith" of a spiritual-minded Christian to enable them to comprehend it at all. They studied it from without, and viewed it by the dry light of the intellect. Of course they thought they understood it, while, with all their acuteness, they knew no more of its inner nature than a man who has lived all his life among polar snows can know of the sensations and feelings that are stirred by the breath of spring in those who inhabit warmer zones.

XII.

OF INTELLECTUAL BELIEF.

There is a large class of men who have an intellectual sympathy with Christianity, and a speculative belief in it, who nevertheless are not practical Christians. Some of these have at one time or another had experiences more or less deep and clear of the power of religion. Some, through a morbid fastidiousness, cannot associate themselves for worship and coöperative work with any organized religious body, and being unable to find a congenial home in any church, have attempted the difficult task of leading a Christian life unsupported by association and sympathy, and the aids derived from church membership. Some are troubled by scruples of intellect, conscience, or taste, and shrink from anything like a "profession of religion." Some are repelled by the worldliness of the churches, and the short-comings often witnessed in the men most officious in ecclesiastical organizations. Of this class of speculative believers the majority probably cherish the idea that to accept the doctrines of Christianity, to defend them, to argue for them, is enough to make a man a Christian. They ignore the imperative personal claim that Christ makes upon every individual, and they seldom seem to realize that without personal spiritual religion, the man who defends it in debate, who advocates and praises it, is doing something which is almost akin to "patronizing" it—a thing to make the devils laugh, and angels weep. The greatest of true Christians feel deeply that no amount of intellectual advocacy can absolve them from the same *personal service* rendered by the humblest believer. To write learned treatises and commentaries, to refute infidel sophists, to compose philosophic essays or poems of the loftiest strain, having the indication or illustration of Christian truth for their object—all this is absolutely worthless by itself. It is an insult to Christianity to offer such services in any spirit that savors of complacency, or of the consciousness of rendering help to a feeble cause. No Christian is so great or learned that he can dispense with the small personal offices of his religion, that he may have more time for intellectual service, as a champion of the faith. To visit the sick, to relieve the suffering, to comfort the afflicted, to be constant in prayer, to maintain an elevated spiritual frame—these are duties binding upon all. When Adelaide Proctor, one of the purest and sweetest of religious poets, was urged to desist from her labors among the poor, which were wearing her out, and told that others could render those humble aids, while she, so rarely gifted with genius, could perform higher work, she replied: "As ye have done it unto the least of these, ye have done it unto ME," and went on with the routine of her painful and laborious ministrations until death found her in the midst of them.

Christian Baptism.

We have traced the employment of water in its ritual use among the religions of mankind as an emblem of purity. We have found it pervading everywhere the services of the heathen, and false religions, cleansing and purifying the body, as a suitable and fit preparation and symbol of the purification of spirit required by the Deity in approaches to Him. Jehovah Himself introduces it into the temple service appointed to His people, wherein the divers and frequent ablutions which sanctified to the purification of the flesh, typified the coming baptism of the sanctifying spirit. John baptized for the *remission* of sins, and finally the Apostle Paul, in Hebrews, transfers the typical purification of the temple services to the work of Jesus Christ, basing his argument for the spiritual cleansing of the blood of Christ, though infinitely superior in its power and efficacy, on the well known and acknowledged nature and design of the Old Testament ablutions sanctifying to the purifying of the flesh. In short, we have seen how in the Bible, and out of it, the cleansing virtue in the element of water, in ablutions and baptism, is employed to signify purification of spirit, until now we

stand in the presence of the Savior before His ascension, and hear Him institute the rite of baptism as a sacramental ordinance in His Church forever, with all the associations of purity which pertain to it, arising out of the natural virtue of the element employed; its use among the religious rites of mankind; its adoption in the worship of the temple, and with the prominent idea of purification attached to it, as the proper and natural acceptation of the term with the people among whom the rite was instituted.

I intend to look at this sacrament in two aspects. Let us first see how its meaning is foreshadowed in the Scriptures before its appointment by our Savior, taking note first of the prediction of the Baptist respecting the nature of the work to be performed by the coming Messiah.

In Matthew iii: 11, we read the words of the Baptist: "He that cometh after me, He shall baptize you with the Holy Ghost and with fire; whose fan is in His hand, and He will thoroughly *purge* His floor." Here we are brought face to face with the office of the Lord Jesus as a baptizer; a spiritual baptism, indeed, but with the work of purgation and purification presented distinctly before us as the concomitant of baptism, "*He will thoroughly purge His floor.*" John here lays his hand on the key-note which sounds through all Christ's work as set forth in the Gospel, a work of spiritual purification, significantly denominated, by the Baptizer Himself, a *baptism.* Here, by the declaration of John, the purifying idea which we have up to this time carefully traced in various ritual services and ordinances denominated baptism, passes into and becomes incorporate in Christ's greater and more thorough spiritual baptism.

Christ's work in this spiritual baptism is still a work of purification—"He shall *thoroughly* purge his floor." The baptisms of the Jews reached only to the flesh. John's baptism was for the remission of sins and amendment of life. Christ's baptism, predicted by John, was that of the sanctifying spirit—just what the prophet Malachi foretold of Him: "And he shall purify the sons of Levi, and purge them as gold and silver." Just what the Jews expected in view of that prophecy. And Christ, when He bids His disciples to go into all the world and *baptize,* incorporates in the ordinance, by the employment of this term, the significance of that thorough spiritual purification and sanctification which Christ Himself, as predicted by John, will perform through the sanctifying spirit, working by His presence to the end of the world—the appropriate sacrament, sealing and symbolizing this spiritual work, in the well known and established element of purification, the baptismal water.

Next comes Christ's enunciation to Nicodemus—"Except a man be born of water and the spirit, he cannot enter into the Kingdom of God," declaring the necessity of a thorough spiritual purification through the operations of the Holy Ghost, as essential to an entrance to the Kingdom of God, the same work of spiritual baptism which John declared it was Christ's office to perform, and which the ordinance of baptism aptly represents.

Let me quote the teachings of commentators on this passage: "To a Jewish ecclesiastic so familiar with the symbolical application of water, in every way and form of expression, this language was fitted to show that the thing intended was no other than a thorough spiritual purification by the operation of the Holy Ghost. Indeed, this element of water and the operation of the Spirit are brought together in a glorious evangelical prediction, in Ezekiel, 36: 25–27."

"Baptism embodies in a public ordinance the great general truth here announced, that a cleansing, purifying operation of the spirit in every one is indispensable to an entrance into the Kingdom of God." (Brown.) "Water was used among the Jews in divers washings and baptisms. John used it in his baptisms, and Jesus in His initiatory ordinance. This was the emblem of that spiritual washing without which no man can be admitted to the true Church as a living member of the same." (Scott.) "Except a man be born of water and the spirit—except his heart be purified by that inward washing of the Holy Spirit of which water has been the constant emblem, he cannot enter into the Kingdom of God. Water is really present in the sacrament of baptism as an outward sign and seal of the spiritual and divine energy which inwardly cleanses us." (Bezan.) "The soul was considered in a state of defilement on account of past sin. Now (after baptism), as by water the body was washed, cleansed, refreshed, so, by the influences of the Holy Spirit, the soul was to be purified from its defilement, and strengthened to walk in the way of purity and holiness." (Adam Clarke.) I need not add to this unvarying testimony the fact that the new birth by water and the Spirit is symbolized by baptism.

Let us pass now to that very wonderful event which took place after the death of Christ, which the Apostle John narrates in these words: "But one of the soldiers, with a spear, pierced His side, and forthwith came there out blood and water." In all ages of the Church this mingled flood has been taken to represent the blood of expiation and the water of purification—the one symbolized in the Lord's Supper, the other in the baptism.

Let us now review the ground passed over. John predicts Christ's work as a *baptism,* retaining the idea of purification, but exalting its nature and efficacy in the dignity of the person, Christ, and the efficacy of the agent, the Holy Spirit, and the thoroughness of the work of sanctification.

Jesus Christ, in his conversation with Nicodemus, determines the necessity of the inward change in the new spiritual birth signified by the water and the Spirit. And then the mingled stream of blood and water, flowing from the pierced side of Christ have been taken in all ages

> "To be of sin the double cure,
> To cleanse from guilt and break its power."

The blood of expiation and the water of purification, which, conjoined with the Holy Spirit, are the three witnesses on earth which testify of Christ—the one, in the Sacrament of the Supper, testifying of Christ's death and the power of His atoning blood; the other in that of baptism, the perpetual emblem of the polluted sinners sanctified by faith and grace from the Lord Jesus; and the third in the continual work of the Holy Ghost, in the power of the Gospel in the hearts and lives of men.

I cannot close this article without entering my protest against the idea of some that the use of water as a purifying emblem does not go into the ordinance of baptism, but having done its work all through the Word of God, until the institution of the Sacrament, now passes out of it forever and is lost to the Christian view. Nay, rather the idea culminates in Christian baptism, and as the blood of Christ flowing from His pierced side, represented in the Sacrament of the Supper, speaks continually better things than the blood of Abel, so the water, also, of that mingled stream, its purifying efficacy represented in baptism, shall speak forever, not of the purifications of the flesh, but of the washing of regeneration and renewing of the Holy Ghost, until the Church, Christ's mystical body, shall be presented pure and spotless in the presence of the Father with exceeding joy. F. B.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Seventh Term of this Institution will commence on Wednesday, January 22d, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

☞ For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

Correspondence.

Letter from New Jersey.

Princeton, N. J., April 30, 1868.

After a very pleasant voyage down the Pacific and up the Atlantic, I arrived in Princeton a few days ago. It may be that the incidents of our journey contain more than a personal interest. We had our "clerical corner" at the table, and our frequent meetings of the "clerical convention," and Bro. B., (whose duty it was to furnish a question for discussion in the interval preceding the presentation of the dessert) has made an imperishable mark upon the minds of all who were within the sound of his voice or the glance of his eye.

Our ship's company (like all others) contained a very fair representation of the world at large. We had characters of all sorts, and nearly all nationalities were represented among us. There were the profane, as well as the religious; the revelers, as well as the serious and devout. We had our Doctors of Divinity, with their grave countenances, and we had our fast men who did not live quite soberly. There was Judge A, who carried his bottle under his arm to the table; Mr. B, who boasted of not having been in a church for fifteen years, though his mother had been a pious lady; Capt. C, who thought it quite correct to be more emphatic than reverent, even in the presence of the ladies. We had our pleasant scenes, our gatherings for religious worship on the Sabbath, our little musicals in the ladies' sitting-room (and that was a very delightful one when, in sight of Absacom Light, off the coast of New Jersey, we sang "Home Again,") our social gatherings, in which new acquaintances were formed and the old cemented.

There were innumerable things that occurred during our voyage which will form the staple of our conversation for days to come. No one will be likely soon to forget the small gentleman who imagined himself a successor of the Apostle Paul, but resembled him only in the inferiority of his bodily presence; nor the "general view" of our saloon, which "the artist" gave in a group of card-players, (very much as J. Ross Browne gives a "general view" of Constantinople—a dog-fight in the foreground, towers and minarets in the distance); nor the "birds I view" of the Pacific, which every one has enjoyed who has stood in the stern of the steamer at any time during the first few days out from San Francisco; nor the smart boy whose "good thing" was, that the *Captain's house* (*i. e.* the ship) did not suit him, *because there was too much water in the yard!*

Our Isthmus ride was, beyond description, delightful and refreshing, and after we had changed oceans, and lost—I regret to say—the comfortable freedom from sickness that most enjoyed on the quiet Pacific, and began to emphasize more and more the "only—days more," devout gratitude rose in our hearts because we were soon to be at rest in our desired haven.

Our arrival in Princeton was at a time of special interest, as the session of the Theological Seminary was just about to close. On Tuesday, the 28th inst., we were present at the Seminary Chapel, and heard the closing address of Rev. Dr. Craven, of Newark, to the Senior Class. The address was one of much interest, and delivered in a very impressive manner. At its close, Rev. Dr. Snodgrass (senior member of the Board of Directors) presented their diplomas to the members of the graduating class. Of the thirty-nine persons who have just completed their course in this institution, we understand that eight have in contemplation, or are under appointment for missionary fields. It is an interesting fact that this number is larger than that of any three classes during the last twelve years. We had the opportunity of participating in the ordination of one of the young brethren (a personal friend) under appointment as a missionary to Siam.

The Trustees of the College of New Jersey, at their last meeting, held yesterday, the 28th, elected Rev. Dr. McCosh, of Belfast, Ireland, to the Presidency of the institution, Rev. Dr. Green, of the Theological Seminary, having declined the position (to which he had been invited), on account of his preferences for the chair of Oriental Literature, now occupied by him in the Seminary.

The friends of the College will be pleased to learn that a generous friend (John C. Green, of New York,) has just made a donation of $100,000 in United States bonds, and $20,000 in real estate, to this venerable seat of learning. The gift is both seasonable and richly deserved, and it is hoped many sons of Nassau will express their appreciation of their Alma Mater in a like worthy manner.

We are happy to find that there is much in the atmosphere of Princeton that favors the growth of those feelings of cordial harmony, and that desire for union among Presbyterians which prevail to such an extent upon your coast, and of the existence of which your interesting paper is a monument.

But lest I should trespass on your patience, I will defer until another time the mention of other items of interest. W. R.

Some Account of Life in Japan.

A correspondent of the New York *Times*, writing from Hiogo, the Japanese port recently opened to American commerce, says:

"Hiogo is virtually the port of Osaka. The harbor affords a fine anchorage for all sized vessels. But the town is mean and small, and in general appearance not unlike the majority of Japanese cities. One long, tortuous, and not over clean street, winds from end to end, lined by little low shops, where oranges, dried fish, and vegetables are vended. At the northern end are the foreign concessions, along which the Japanese are building a mole and breakwater. The custom-house and several European buildings are approaching completion.

Leaving the town, a fifteen-minutes' walk inland, past neatly cultivated fields, exhibiting a surprisingly thorough system of agriculture, brings you to the foot of a range of partially wooded hills, which rise in unbroken succession as far into the interior as the view from the loftiest summit can extend. Every available space of ground is cultivated. In many places the hill sides are terraced almost to their summits.

Either from a proper regard for their own interests, or an unusually generous appreciation of our own, the authorities attach a guard of one or more two-sworded officials to every party on landing. This guard follows closely those whom he joins from the moment he reaches the shore until he leaves it again, never for a moment losing sight of those under his care, or allowing them to straggle away. Just now, however, they are becoming more careless in this respect. But a system of espionage will continue to obtain in Japan as long as Japanese affairs remain in their present uncertain and troublous condition.

The American officers seldom carry any arms, unless it is a small revolver in a breast pocket. But it is amusing to see the English officers with huge pistols strapped about the waist, bustling through the streets, and frequently small "middies," who have grown too large for their short-sleeved jackets, with side-arms as large as boat-howitzers.

Cows are used as beasts of burden. They shoe them with a straw sandal, not unlike those worn by the people, and guide them by a ring passed through the nose. Occasionally you will meet a high official on the back of one of these 'swing-footed' beasts, his armor-bearer trudging behind him with some insignia of his rank. And a long line of these animals winding up through the hills, on their way to the interior, laden with bags of rice, with a bell tinkling from the saddle, and a bareheaded driver in odd costume, encouraging them with low vociferations, is a sight picturesque and interesting, and reminds one of those Eastern pictures of

"The tinkling throngs
Of laden camels and their drivers' songs."

The city of Osaka is situated on a small river which empties into the bay of that name. It is thirty miles from the Kioto, the capital of the Mikado, or spiritual head of the empire, and only twelve from Hiogo. It contains a population of nearly four hundred thousand, and is one of the first cities of Japan. The streets are broad and clean, and laid out with great regularity. Canals intersect the city in all directions, crossed by over two hundred bridges, many of them of elegant design. There are one or two rather interesting temples, not unlike some of the finer places of worship to be seen at Canton, China. But the Tycoon's castle is the most interesting feature of the whole city. It is built of granite blocks of immense size, and one is impressed with the mighty power exhibited in raising them to their present elevated position. These stones are said to have been contributed each by a separate prince, and the castle itself is over three centuries old."

MISCELLANY.

The Mistaken Generosity of a Canary Bird.—A lady in this city has a bird hanging in its cage by the window, the door of which is occasionally opened and his canaryship permitted to enjoy the freedom of the room. A day or two since he happened to fly on the mantle-shelf, whereon was a mirror. Here was a new discovery of the most profound interest. He gazed long and curiously at himself, and came to the conclusion that he had found a mate. Going back to his cage he selected a seed from its box and brought it in his bill as an offering to the stranger. In vain he exerted himself to make his new-found friend partake, and becoming weary of that, tried another tack. Stepping back a few inches from the glass, he poured forth his sweetest notes, pausing now and then for a reply. None came, and, moody and disgusted, he flew back to his perch, hanging his head in shame and silence for the rest of the day, and although the door was repeatedly left open, refused to come out again.—*Dubuque Times.*

The American Girl.—It is the belief of certain well-meaning men, who were not born in Constantinople, that if the American girl were called on to meet a portion of her expenses by her own labor, she would be publicly a greater blessing, and personally healthier, wiser and happier. It is even believed that her outlay, instead of increasing, would diminish. Practiced in the mystery of keeping accounts, aware by experience of the difficulty of earning money, she would become clever enough to save it. With something to do, she would put less mind, time, and purse into the pursuit of pleasure. Mated at last with a poor man, (so many are incorrigibly vicious that way!) she would share his burden rather than crush him with it. If all women now were thus, we should have no cause to cry, as we are sometimes tempted to do, "Oh! for the slow but cheap girl of thirty years ago!" Whether democracy is capable of some such self-saving miracle as we have indicated, remains to be seen.—*Nation.*

All for Show.—The world is crazy for show. There is not one person in a thousand who dare fall back on his real, simple self for the power to get through the world, and extract enjoyment as he goes along. There is too much living for the people. There is no end to the aping, the mimicry, the false airs, and the superficial airs. It requires rare courage, we admit, to live up to one's enlightened convictions in these days. Unless you consent to join in the general cheat, there is no room for you among the great army of pretenders. If a man dares to live within his means, and is resolute in his purpose

not to appear more than he really is, let him be applauded. There is something fresh and invigorating in such an example, and we shall honor and uphold such a man with all the energy in our power.

DR. HOLLAND has the following reflections, on seeing a little lame boy, who was singing a cheerful song:

"It is pleasant to say to him, and all the brotherhood and sisterhood of ugliness, that there is every reason to believe that there is no such thing in Heaven as a one-legged or club-footed soul—no such thing as an ugly or misshapen soul—no such thing as a blind or deaf soul—no such thing as a soul with tainted blood in its veins; and that out of these imperfect bodies will spring spirits of consummate perfection and angelic beauty—a beauty chastened and enriched by the humiliations that were visited upon the earthly habitations."

THE CALIFORNIA GIANTS OUTDONE.—Recent researches in Australia show that trees are growing there whose height exceeds those found in California, which were supposed to be the tallest in the world. The tallest actually measured was 480 feet high; but another, with a circumference of 81 feet four feet from the ground, was estimated to be over 500 feet high. The tallest spire in Europe—that of the cathedral of Strasburg, is 466 feet high, and the pyramid of Cheops is 480 feet. The timber of this species of trees is said to be excellent, the growth more rapid than that of any others known, while they have the ability to resist and even flourish in the greatest drought.

New Publications!

The greatest success of the age! 100,000 copies of the New Edition of Wells's Every Man His Own Lawyer, already sold. Agents making from $10 to $25 a day. The work embraces 650 large 12 mo. pages of information, indispensable to every man and business woman, and is sold at the low price of $2 50. For full particulars and terms to agents, address

Subscription Department of
H. H. BANCROFT & CO.,
Booksellers and Stationers,
San Francisco.

A number of other firstrate Works now ready for canvassers. Send for circulars and state territory desired.

Oxford Bibles.

The superior excellence of the Bibles printed at the Oxford University Press is proverbial among all who prize correctness of the text, and clearness and beauty of typography and binding. The Oxford editions are the standard from which other editions are copied, and are therefore acknowledged as superior.

The Subscribers, who act as

SOLE AGENTS IN THE UNITED STATES

or these Bibles, keep all varieties and sizes, from the 48-mo. to the Folio. They select the following, which they strongly recommend.

THE SUNDAY SCHOOL BIBLE. Printed in clear type and well bound in arabesque - - - - - - - - 50 cents.

THE PEW BIBLE. Printed in large type and bound in morocco, $2 00; Turkey morocco, $3 00.

THE STUDENT'S BIBLE. Printed on fine paper, in beautiful type, with References and Maps, and an Index to the persons, places, and subjects occurring in the Scriptures. Turkey morocco, - - - - - - - - - - - - $4 00

THE CLERGYMAN'S BIBLE. Printed in large, clear type, with References and Maps, and an Index to the persons, places, and incidents occurring in the Scriptures. Bound in Turkey morocco, - - - - - - - - - - - - $5 00

THE PULPIT BIBLE. Beautifully printed in very large, clear type, demy, 4to. Bound in Turkey morocco, - - - $20 00

THE FAMILY BIBLE. Beautifully printed in large type, containing Family Record, with or without References, Plates, and Maps, in every style of binding, from $17 00 upwards.

Pacific Mail Steam Co's Steamships

—FOR—

NEW YORK, JAPAN AND CHINA

Will be Dispatched as follows:

LEAVE WHARF CORNER OF FIRST AND BRANNAN STREETS, at 11 o'clock A.M. of the following dates, for PANAMA connecting via Panama Railroad with one of the Company's splendid Steamers from ASPINWALL for NEW YORK.

On the 6th, 14th, 22d, and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Transatlantic Company's Steamer for St. Nazaire, and English Steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English Steamer for Southampton, South America, and P. R. R. Co.'s Steamer for Central America. Through tickets can be obtained.

Departure of the 6th connects with English Steamer for Australia.

The following Steamships will be dispatched on dates as given below.

STEAMERS FOR JUNE, 1868.

June 6th—CONSTITUTION, Captain Parker, connecting with HENRY CHAUNCEY, Capt. Gray.
June 18th—GOLDEN CITY, Capt. Lapidge, connecting with OCEAN QUEEN, Capt. King.
June 22d—GOLDEN AGE, Capt. Farnsworth, connecting with RISING STAR, Capt. Conner.
June 30th—SACRAMENTO, Captain Cavarly, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock.

Through tickets to Liverpool by the "Cunard," "Inman," and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired, an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship GREAT REPUBLIC, Capt. S. Doane, will be dispatched June 3d, at 12 o'clock, noon, from wharf corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting at Yokohama with the Steamship COSTA RICA, for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Co.'s Office, corner of Sacramento and Leidesdorff Sts.

OLIVER ELDRIDGE, Agent.

ILLUSTRATION OF DIVIDENDS OF PROFITS

—OF—

United States Life Insurance Comp'y,

NEW YORK.

OFFICE, No. 40 WALL STREET.

CASH ASSETS EXCEED $2,700,000.

SIXTH TRIENNIAL DIVIDEND.

The Board of Directors have this day declared a Dividend of FORTY PER CENT. for the three years ending at the 4th March, inst., to holders of all Policies then in force, on the whole sum of the annual participating premiums received during the said three years; and an additional Dividend of TWENTY PER CENT. on the whole sum of all previous Dividends and Additions, to holders of such Policies who have fulfilled their engagements with the Company, both Dividends being payable and available in the various modes explained in the Company's Prospectus.

For example, on a policy paying one hundred dollars a year of participating premium, the profits for each year and the total at each year on this system are:

Year.	Yearly.	Total.	Year.	Yearly.	Total.
1	$40 00	$40 00	28	$206 39	$2702 23

Current Literature.

RECENT PUBLICATIONS.

The Natural Wealth of California.

H. H. Bancroft & Co. have just published, and will offer for sale by subscription, the most complete work upon all the natural features of our State that can interest either our own citizens or foreigners, which we have had opportunity to examine. Indeed, it is the only single book which furnishes extensive and reliable information on the variety of subjects it presents, viz: "The history, geography, geology, natural history, population, wealth, industry, products, and resources of California."

The author is Titus Fey Cronise, who has been aided in his investigations and inquiries by some of the most eminent men on the Pacific Coast, and by some of the ablest writers on natural science in our land.

It is impossible even to allude to details in a general notice of so extensive a work, and we shall not attempt to do this; but while we commend it, after pretty careful examination, as one of the most valuable in its matter, and one of the most beautiful in its execution, of the works recently published that have come into our hands, we desire to call attention to the need of just such a book at this crisis in our history.

An unprecedented interest, amounting almost to enthusiasm, has sprung up in the Eastern States, and in Europe, respecting California. Emigrants, in numbers beyond those of any former year, are crowding towards these shores, with the purpose to make this region their home. The day of mere adventurers has passed. The day when no more was desired, as knowledge of the State, than whether gold could still be found, and where it must be sought, has a place only in history. The men who are coming now want to know about the climate, the agricultural resources, the different undeveloped sources of prosperity, the conditions of success for industry and capacity, that are here peculiar. In regard to most of these points there is surprising ignorance, even among those who have some general intelligence, so that often men are landed from the steamers without a knowledge of the face of the country, or the natural avenues into the interior. Hence the wisdom of issuing a volume that gives all the particulars which such persons need to know, and in our judgment a larger sale, relatively, will be made of the work in the East than among our own people. It will be studied on the voyage. It will be a text-book for communities from which large numbers are contemplating removal. It will turn the attention of many to this State who now think of it as an unknown land, and thus increase such emigration as will be healthy and reliable.

But not only thus will this book be of public value; it will contribute much important material to the archives of natural history and science, for the study of those in colleges and schools who desire to become familiar with a region in some respects *sui generis*. The information it contains makes it a necessary part of every general library, and to multitudes who have attached almost visionary ideas to the very name California, it will have the interest awakened by the realization of what has seemed so fanciful. We have anticipated the work with no little desire that it might meet the manifest demand of the time, and we are happy that it exceeds our expectations, and must have a permanent place in the valuable literature of the country. We make the following brief extracts:

HINTS TO THE IMMIGRANT.

The immigrant will meet with some difficulty in seeking a location for a settlement in California, of which he should be advised. We have only two navigable rivers, and but few railroads completed as yet. Several new railroads are projected, however, and will probably soon be constructed through a number of fertile valleys. The cost of railway traveling is ten cents a mile, and steamboat fare is generally five cents per mile. On all the stage lines twenty cents per mile is the usual fare, except when an occasional opposition reduces it for a short time. Distances are great between settlements, and the cost of living is tolerably high. To get suitable land at low price requires considerable travel by stage. On this account the immigrant, to save his purse, should take counsel of some trusted friend, and confine his examination to a few localities.

Farmers in the Atlantic States generally prefer the neighborhood of a river, or at least of a running brook. We have but two streams worthy the name of rivers properly so called—the Sacramento and its confluent, the San Joaquin. The lands on their border are almost entirely swamp, or subject to overflow. They breed fevers and mosquitoes, and have few tributaries that are not dry, or nearly so, in summer, and also are subject to wide overflow in winter. As a general rule, the immigrant will find it safer to seek other localities than those near the watercourses. Almost everywhere in the valleys, water is obtained at moderate depths, and wind-mills can be readily employed. This suffices for the family, the cattle, and the gardens of the farmer. His grain crops do not need summer water, nor do his fruit trees, when once rooted.

ADVANTAGES.

Among the minor advantages to farmers, enjoyed in California, a few may be mentioned. They are not obliged to work half the season of summer to provide food for carrying their stock over winter. They save three-quarters of the expense of fuel needed in the Atlantic States under the present system. They have no cattle stables to clean, no manure to cure, haul, and spread. Our mild winters lighten the work and exposure of women. Vegetables of all kinds can be had fresh from the garden all the year, with very trifling shelter for a short time in winter. Fruit is and ever will be plenty and cheap. The two latter items are great promoters of health, as well as economy. Fowls pick up a good living all the year. Though the country is bare of trees, the new settler may have shade and ornament in four years, equal to what he is accustomed to expect in seven elsewhere, for tree-growth is very rapid, and it has little interruption in winter. His home may have flowers trailing around it all the year, by very little attention. Thus, though at present the settlers give little or no care to such things, it is in the power of those who choose, to attach their families to their homes, and give them a settled and contented feeling, which the immigrant should study to cultivate. In no other country are the elements so favorable to them in this respect.

The Cottage Bible and Family Expositor, published by Brainard & Sampson, of Hartford, is now being sold by agents among us, and should be bought by many who need a short and practical commentary on the Scriptures. Its notes, and illustrations, and maps adapt it to the use of children as well as adults, and while excellent for family reading, it is sufficiently critical to be of value to Sunday School teachers, and even to ministers, in preparation of familiar expositions. We hope it will be purchased, not merely to lie on parlor tables, but to be regularly and carefully studied.

EDUCATIONAL.

Ridicule.

Ridicule is a weapon that should be directed, in the school-room and in the family, chiefly against ideas and practices, and not against persons. That teacher exposed himself to just indignation who once, hereabout, made a speech like this: "Boys, I have an idea. (Laughter.) G—— O—— is the greatest blockhead in this school." Moreover, when we ridicule ideas and customs, let us be very sure that they are such as we would attach ridiculous ideas to willingly. Most of us have heard an absurd answer to the first question of the Assembly's catechism. This may have been coined by some one who had at heart a sincere reverence for the truth, but it seems to us that, in making sport of solemn things, he played with dangerous fire; like children, thoughtlessly building bonfires of driftwood on the beach, and thus luring, by a false light, noble vessels upon the rocks. As a specimen of the practices to which we may usefully attach ludicrous ideas, take that of men's inscribing their names in public and notable places. A friend of ours once remarked that he was effectually cured of the folly by a little fling of ridicule which he saw in Egypt, on a pyramid. There, on a great rock, some tourist had laboriously carved that most perishable of all his possessions—his name. But some later traveler had, underneath it, cut the homely but trenchant word, "stone-cutter." C. R. C.

Acquiring Words.

A man of long memory can easily recall when he first heard many important words. And hardly any one is so short in memory that he cannot remember when he first heard certain words or phrases, less common in their occurrence. Examples from our own experience are the words *wynze* and *lissome*. If we mistake not, the first effect of a new word, or a new usage of an old one, is to divert attention from the idea, or fact, which the word was intended to convey. This reads us a short lesson in education. We wish our young folks to go forth into the world to collect ideas and facts. We wish them to attend to what is said by others. Let us furnish them, then, with words, and with the various uses of words. A person trying to attend to an idea conveyed through a strange word, is like one trying for the first time, to look at a face through an opera glass; he is so much taken up with the instrument that he does not more than half discern the object. Or, he is like a lady trying to look at fireworks from a carriage with restless horses; he fails to enjoy the spectacle because he is so much troubled by the peculiarities of his foothold for seeing it. C. R. C.

A Teacher's Talk to his Boys.

Boys:—Welcome back, one and all, to this dear old school-room! Dearer to me, doubtless, than to you: for within these walls I have spent ten years of my maturer life. You come with various and conflicting emotions. Several of you, indeed, leave home for the first time, and this separation is sad and strange. But you must learn to follow reason, and not feeling. You will find throughout life, that we must often put our wishes, as a sacrifice upon the altar of duty, and happy is he who early learns to make it a free-will offering. What is wisest is best, but what is best is not always pleasantest. Resolve to face your future, for you must make it. You must step forth into life, for what you call your home, is not to be your permanent abode. It is your father's home, and he will stay in it, we trust, till he dies: but will you? Do you wish it? Do you purpose it? No. Yours is the fledgeling's nest, the returning place of its puny circuits, till it takes its last adventurous flight. In a few years it will be yours to visit, and its pleasant halls and generous cheer will always welcome your returning steps. But it will be yours to visit only, not to live in.

A good school is perhaps the best passport to that active and responsible sphere in which you must act your part. It is a sure stepping-stone to college or

business. To some it has proved the best home they ever remembered. We trust that all here will find it at least only second to their own. But one thing is certain because now proven by long experience and abundant testimony—*home is not the best place for education.* Whether this be owing to parental imperfections as to the views, method, discipline, or conduct of a true education, or to the absorption of parents in cares or pleasure, one or all, we know not. The facts remain. The history of the leading men of the race proves it: for, as a rule, they have either trained themselves, or have gone abroad for development. May your entrance here be but the beginning of your greatness.

Perhaps some one returns on compulsion. We trust this is not often the case here, nor should we be willing to have it. You must yield now to superior will, and if time shall show your unfitness, it cannot be best for you to remain. We wish the school a unit—to have as it were one company with one mind and one will, moving with even and elastic step toward one goal—the gaining of knowledge and the preparation for life.

All of you return with bodies rested and minds relaxed by long repose. You really wish to study, but almost shrink from that high bracing of the will and that strict government of the body and mind, of nerve and sense, which belong to a thorough school and college life. Exercise will soon cure these unpleasant feelings, and bring the glow and energy in which the true laborer excels.

Some of you come still burdened by a morbid sense of your deficiencies. Your wasted opportunities, your misdirected energies, your idleness or ill health, have spoiled the past and placed you below your fellows. But never despair! You are young yet. Only be earnest, and brave, and steadfast, and true to your own mind and heart, and you will yet have a worthy future. Waste no moments in upbraidings. If the past be a dead past, bury it. Act "in the living present." Nothing weakens the mind more surely than pensive brooding over the past, or vague dreamings of the future. One should be manly even in his repentings. Say, "If I have done wrong, I will do so no more." A new term of study begins. *Nunc novus nascitur ordo.* To-day you enter upon a new series of feelings, purposes, and actions. Rejoice that you live to begin a new course of duty—that a fresh, clean page is handed you on which you can inscribe deeds of light.—*Advance.*

AGRICULTURAL.

Do You Keep a Household Journal?

It would probably be irksome to many at first, but would soon come to bea pleasant part of the dailyt routine. The pocket d aries published so cheaply in all our large c ties havei space enough to enter every thing that would be desirable. If one of these, furnished with a good pencil, were kept in a basket beside the needle-case and the scissors, it would take but a few minutes each day to make a record of passing events. One of the items appropriately kept in such a journal should be the household expenses, and there is usually a place at the end of these diaries where such accounts can be arranged in an orderly manner, and footed up at the end of each month. The family expenses might be arranged under the heads of table, wardrobe, fuel, lights, service, education, travel, etc., and at the end of each month the heads of the family could tell very nearly whether they had spent more than they had earned. The whole secret of thrift in the household depends upon spending less than the income. Multitudes take no particular pains to ascertain either their income or expenses. They never know whether they are getting on or falling behind. They are never ready to settle accounts, and they live upon credit until nobody will trust them. It is true there are some difficulties in the way of a farmer keeping such an account, that would not embarrass a day laborer or a salaried man. These receive so much in wages or salary, and know definitely how much they have to spend every day or every week. But the farmer provides very largely for his own wants, owns his house, perhaps, supplies his own fuel, and, in large part, his table. But it would not take long to ascertain how much wheat, corn, rye, potatoes, poultry, etc., of his own production, are consumed in the family, and what their market value is. If the estimate were made it would enable him to tell very nearly the expenses of his housekeeping each month, and at the close of the year, when the account of crops was taken, he could tell very nearly what his income was.

This definite knowledge would operate favorably upon a farmer's fortune in many ways. He could check extravagance if he found it. He could retrench expenses, if he found he was living beyond his income. He could get the new carriage, or harness, or the piano for Kate, if his expenses justified it, without any uncomfortable apprehensions. If a man is not clear-headed enough to keep accounts and live within his income, his wife should take hold and help in his book-keeping. The temporal prosperity of the family depends upon correct figures.

Other items should find a place under the appropriate dates—births, deaths, and marriages in the circle of near relatives and friends, the beginning of the school, remarkable extremes in the weather, political, social, and ecclesiastical events, the blossoming of fruit trees, and the first appearance of birds in the spring, the time of sowing or planting the principal crops, the several plantings in the garden, and everything likely to be of interest in future years. Such a record faithfully kept, would introduce system into the whole household. It would lead to definite knowledge of many things that now pass unobserved. It would cultivate the habit of observation, which is worth quite as much upon the farm as in any other calling. It is often a matter of great importance to know just when an event happened, when a tree was planted, when it bore its first fruit, the date of a cold snap, and the record of the thermometer. Legal decisions involving large sums frequently depend upon the memory of such small events. Recording them in a journal preserves an accurate knowledge of them, and is valuable for reference in future years. Not the least inducement to keep such a journal is its value as an heirloom to the children, ever increasing in interest as it goes down to the coming generations. What would we give for such a record of the incidents in the daily life of our early ancestors in this country! It would afford a very good outline of their domestic life and of their characters. It would be better than their portraits, for it would show us their surroundings, their style of living, and much of the men and women themselves. The bold doctrine of Sartor Resartus that clothing makes a man may not be true. If we could add to the work of the tailor that of the school-master and the pastor, the grocer and butcher, and all the men with whom they had daily intercourse, we should see our forefathers very much as they were. Keep a household journal.—*Hartford Herald.*

FAMILY READING.

The Common Lot.

Once in the flight of ages past,
There lived a man—and who was he?
Mortal, where'er thy lot is cast,
That man resembled thee.

Unknown the region of his birth;
The land in which he died—unknown;
His name has perished from the earth;
This truth survives alone,

That joy, and hope, and grief, and fear,
Alternate triumphed in his breast:
His bliss and woe—a smile, a tear!
Oblivion hides the rest.

The bounding pulse, the languid limb,
The changing spirit's rise and fall—
We know that these were felt by him,
For they are felt by all.

He suffered—but his pangs are o'er;
Enjoyed—but his delights are fled;
Had friends—his friends are now no more;
And foes—his foes are dead.

He loved,—but whom he loved the grave
Hath lost in its unconscious womb.
O! she was fair, but naught could save
That beauty from the tomb.

He saw whatever thou hast seen;
Encountered all that troubles thee;
He was whatever thou hast been;
He is—what thou shalt be.

The rolling seasons, day and night,
Sun, moon and stars, the earth and main,
Erewhile his portion, life and light,
To him exist in vain.

The clouds and sunbeams, o'er his eye
That once their shade and glory threw,
Have left in yonder silent sky
No vestige where they flew.

The annals of the human race,
Their ruins since the world began,
Of him afford no other trace
Than this—*there lived a man!*

—*Montgomery.*

When to Labor and when to Rest.

As a general rule, the best portion of the day for severe labor, either mental or physical, is before noon. The vital forces of the body and brain, after the recuperation afforded by a good night's rest, are then in their best condition for active and effective labor. The mind is clearer, fresher, and more elastic, and the muscles respond to the mandate of the will with greater readiness and freedom. The experience of many will seem to contradict this. For instance: persons who, from necessity or otherwise, have formed the habit of performing their hardest labors in the afternoon or evening, will assert that they can do it easier at such time than in the morning, and true enough they can, so long as they are subject to that habit; but once let them discontinue that course, and form the habit of doing their hardest work in the early part of the day, and they will soon perceive a decided improvement in the ease with which their work is performed, and also that they can do more in the same length of time, and with less fatigue than they previously could later in the day.

As Nature indicates the time to labor, so does she, even more plainly, point out the time for rest. In the "still hours of night" Nature sleeps and rests, and so should man. Man requires on the average, when in health, about eight hours' sleep out of the twenty-four, and it should all be taken during the hours of darkness. In sickness, it is often well for the patient not only to sleep all night, if he can, but also to sleep some in the daytime. In health, day-sleep is unnecessary, if night-sleep can be had.

Severe labor of any kind should not be performed either a short time before or soon after eating; but light, gentle exercise or recreation at such times is not only not objectionable, but, for persons in health particularly, a decided advantage. No one should labor with the mind or body, while suffering from pain or fatigue. Under such circumstances, labor exhausts vitality with great rapidity. The universal remedy for fatigue is rest.—*The Herald of Health and Life.*

Died Poor.

"It was a sad funeral to me," said the speaker; "the saddest one I have attended for many years."

"That of Edmonson?"

"Yes."

"How did he die?"

"Poor—poor as poverty; his life was one long struggle with the world, and at disadvantage. Fortune mocked him all the while with golden promises, none of which were realized."

"Yet he was patient and enduring," remarked one of the company.

"Patient as a Christian—enduring as a martyr," was answered.

"Poor man! He was worthy a better fate. He ought to have succeeded, for he deserved success."

"Did he not succeed?" questioned the one who had spoken of his perseverance and endurance.

"No, sir, he died poor as I have said. Nothing that he put his hand to ever succeeded. A strange fatality seemed to attend every enterprise."

"I was with him in his last moments," said the other, "and I thought he died rich."

"No, he left nothing; the heirs will have no concern as to the administration of the estate."

"He left a good name," said one, "and that is something."

"And a legacy of good deeds done in the name of humanity," said another.

"And precious examples," said a third.

"Lessons of patience in suffering, of hope in adversity, of heavenly confidence when no sunbeams fell upon his path," was the testimony of another.

"And high truths, manly courage, heroic fortitude."

"Then he died rich!" was the emphatic declaration. "Richer than the millionaire who went to his long home the same day, a miserable pauper in all but gold. A sad funeral, did you say? No, my friend, it was rather a triumphal procession. Not a burial of a human clod, but the ceremonial attendant upon the translation of an angel. Did he not succeed? Why, his whole life was a series of successes. In every conflict he came out victor, and now the victor's crown is upon his brow."

"Any soulless, grasping man, with a share of brains, may gather in money and learn the art of keeping it; but not one in a hundred can bravely conquer in the battle of life as Edmonson has done, and step out of the ranks as a Christian."

Honor Your Business.

We commend this paragraph, from the London *Economist*, to all who have a "vocation."

"It is a good sign when a man is proud of his work or his calling. Yet nothing is more common than to hear men finding fault continually with their particular business, and deeming themselves unfortunate because fastened to it by the necessity of gaining a livelihood. In this spirit men fret, and laboriously destroy all their comfort in the work; or they change their business, and go on miserably, shifting from one thing to another, until the grave or the poor-house gives them a fast grip. But while occasionally a man fails in life because he is not in the place fitted for his peculiar talent, it happens ten times oftener that failure results from neglect and even contempt of an honest business. A man should put his heart into everything that he does. There is not a profession that has not its peculiar cares and vexations. No man will escape annoyance by changing business. No mechanical business is altogether agreeable. Commerce, in its endless varieties, is affected, like all other human pursuits, with trials, unwelcome duties, and spirit-tiring necessities. It is the very wantonness of folly for a man to search out the frets and burdens of his calling, and give his mind every day to a consideration of them. They belong to human life. They are inevitable. Brooding over them only gives them strength. On the other hand, a man has power given to him to shed beauty and pleasure upon the homeliest toil, if he is wise. Let a man adopt his business and identify it with his life, and cover it with pleasant associations; for God has given us imagination, not alone to make some poets, but to enable all men to beautify homely things. Heart varnish will cover up innumerable evils and defects. Look at the good things. Accept your lot as a man does a piece of rugged ground, and begin to get out the rocks and roots, to deepen and mellow the soil, to enrich and plant it. There is something in the most forbidding avocation around which a man may twine pleasant fancies, out of which he may develop an honest pride.

OUR life ought to be very different on these two suppositions: one that we may abide here forever; the other that it is certain we cannot remain here long, and uncertain whether we shall remain even an hour. The latter supposition is our case.—*Pascal.*

THE YOUNG FOLKS.

The Young Witness.

A little girl nine years of age, was a witness against a prisoner, who was on trial for a crime committed in her father's house.

"Now Emily," said the counsel for the prisoner, upon her being put in the witness box, "I desire to know if you understand the nature of an oath."

"I don't know what you mean," was the simple answer.

"There, your Honor," said the counsel, addressing the court, "is there any thing further necessary to show the force of my objection? This witness should be rejected. She does not know the nature of an oath."

"Let me see," said the judge. "Come here, my little girl."

Assured by the kind tone and manner of the judge, the child stepped toward him and looked up confidently in his face, with a calm, clear eye, and in a manner so artless and frank that it went straight to the heart.

"Did you ever take an oath?" inquired the judge. The little girl stepped back with a look of horror, and the red blood mantled in a blush all over her face and neck as she answered—

"No sir."

She thought he meant to inquire if she had ever blasphemed.

"I do not mean that," said the judge, who saw his mistake. "I mean, were you ever a witness before?"

"No sir; I never was in court before," was the answer.

He handed her the Bible, open.

"Do you know that book?"

She looked at it and answered, "Yes, sir: it is the Bible."

"Do you read it?" he asked.

"Yes, sir, every evening."

"Can you tell me what the Bible is?" inquired the judge.

"It is the word of the great God," she answered.

"Well, place your hand upon this Bible, and listen to what I say;" and he repeated slowly and solemnly the oath usually given to witnesses.

"Now," said the judge, "you have sworn as a witness. Will you tell me what will befall you if you do not tell the truth?"

"I shall be shut up in prison," answered the child.

"Anything else?" asked the judge.

"I shall never go to heaven," she replied.

"How do you now this?" asked the judge again.

The child took the Bible, and turning rapidly to the chapter containing the commandments, pointed to this one—"Thou shalt not bear false witness against thy neighbor." "I learned that before I could read."

"Has any one talked with you about your being witness in court here against this man?" inquired the judge.

"Yes, sir," she replied. "My mother heard that they wanted me to be a witness, and last night she called me to her room, and asked me to tell her the ten commandments; and then we kneeled down together and she prayed that I might understand how wicked it was to bear false witness against my neighbor, and that God would help me, a little child, to tell the truth as it was before Him. And when I came up here with father, she kissed me and told me to remember the ninth commandment, and that God would hear every word I said."

"Do you believe this?" said the judge, while a

tear glistened in his eye, and his lip quivered with emotion.

"Yes, sir," said the child, with a voice that showed that her conviction of its truth was perfect.

"God bless you my child," said the judge; "you have a good mother. This witness is competent," he continued. "Were I on trial for my life, and innocent of the charge against me, I would pray God for such a witness as this. Let her be examined."

She told her story with the simplicity of a child, as she was; but there was a directness about it that carried conviction of its truth to every heart. She was rigidly cross-examined. The counsel asked her many troublesome and awkward questions, but she varied from her first statements in nothing.

The truth so spoken by that little child was sublime. Falsehood and perjury had preceded her testimony. But before her testimony falsehood was scattered like chaff. The little child, for whom a mother had prayed for strength to be given her to speak the truth as it was before God, broke the cunning devices and matured villainy to pieces like a potter's vessel.

I need not say that the man was found guilty, and that he was sent to prison for nearly two years. I hope he was a better man when he came out.—*N. Y. Observer.*

True Courage and Benevolence.

"A cheerful word of sympathy
May scatter clouds away.
One little act performed in life,
Turns darkness into day."

On a warm summer afternoon a lazy breeze stole through the windows of a little hot district schoolhouse, lifting the white curtains, and rustling the leaves of the copy-books that lay open on the desks. Thirty or forty scholars of all ages were bending over their writing, quiet and busy; the voice of the master, as he passed about among the writers, was the only sound. But though silent, this little hot school-room had its heroes and heroines as certainly as the wider sphere of life.

The bell rings for the writing to be laid by; and now comes the last exercise of the day, the spelling, in which nearly all the school joined. At the head of the class is a delicate little girl, in a blue dress, whose bright eyes and attentive air show that she prizes her place and means to keep it.

Presently a word, which had passed all the lower end of the class, came to Eunice. The word was privilege. P-r-i-v, priv-i, privi, l-e-g-e-lege, privilege," spelled Eunice. But the teacher, vexed with the mistake at the other end of the class, misunderstood her, and passed it. The little girl looked amazed; the bright color came into her cheeks, and she listened eagerly to the next person, who spelled it as she had done.

"Right," said the teacher; "take your place."

"I spelled it so," whispered Eunice to herself, tears springing to her eyes as she passed down. But, too timid to speak to the master, she remained in her place, inwardly determined to get up again.

But her trials were not yet over. Many expedients were tried in the school to keep out the arch-enemy of the schools—whispering. At length the following was adopted. The first whisperer stood upon the floor in front of the teacher's desk. Here he acted as monitor; when he detected another, he took his seat, and the next offender kept a sharp look-out to find some one to take his place; for at the close of the school, the scholar who had the whisperer's place was punished very severely—as the school phrase was, "took a feruling!" This plan appeared to operate very well, every one dreading to be found the last on the floor; but though it secured an orderly school, many of the parents and scholars doubted its justice.

The boy who was on the floor when Eunice lost her place, was an unruly, surly fellow, who had smarted for his faults often before; and as school drew near its close he began to tremble. The instant Eunice's whispered complaint reached his ear, his face brightened up; he was safe now. And when the class was dismissed he said. "Eunice whispered, sir."

Eunice rose, and in a trembling voice related what she had said: but the teacher saw no excuse in it, and she was called to take the place of the ungenerous boy who told on her.

Books had been put away, and the waiting school looked on in sorrow as Eunice left her seat to take the dreaded punishment. She was one of the best scholars, bright, faithful, sweet tempered, a general favorite. Every one felt that it was unjust, and many angry glances were directed at the boy who was mean enough to get a little girl whipped. Overcome with shame and fears he stood up by the desk, crying bitterly, while the teacher was preparing to inflict the punishment.

At this moment a tall boy stepped out of his seat, and going to the desk said:

"Are you going to whip Eunice, sir?"

"Yes, I never break my rules," the teacher said.

"We will not see her whipped!" said the boy, in an excited voice. "There is not a boy here, but one, that would see her whipped. Whip me sir, and keep your rule if you must, but don't touch that little girl."

The master paused; the school looked on tearfully.

"Do you mean to say that you will take the punishment?" asked the teacher.

"I do sir," was the bold reply.

The sobbing little girl was sent to her seat, and without flinching, her friend stood and received the punishment that was to have fallen on her. The school was dismissed, and the boys paid him in admiration and praise for all he had suffered, while the grateful little girl blessed him from her heart for a noble and generous boy, who had saved her from the greatest shame and suffering.

I said the little school had its heroes, and this was one of them. Do you think this conduct admirable?

Now for the moral.

The punishment received by this noble boy was Christ-like; it was one of suffering from his own free will, the punishment that was to have been borne by another.

You see—do you not?—that this is just what Christ did, who bore our sin in His own body, on the tree—the Savior of men. How great the gratitude each of us owes to such a friend.

Story of a Dog.

Many people laugh at the idea of being careful of a dog's feelings, as if it were the height of absurdity; and yet it is a fact that some dogs are as exquisitely sensitive to pain, shame, and mortification as any human being. See, when a dog is spoken harshly to, what a universal droop seems to come over him. His head and ears sink, his tail drops and slinks between his legs, and his whole air seems to say, "I wish I could sink into the earth to hide myself."

Prince's young master, without knowing it, was the means of inflicting the most terrible mortification on him at one time. It was very hot weather, and Prince being a shaggy dog, lay panting, and lolling his tongue out, apparently suffering from the heat.

"I declare," said young master George, "I do believe Prince would be more comfortable for being sheared." And so forthwith he took him and began divesting him of his coat. Prince took it all very obediently; but when he appeared without his usual attire every one saluted him with roars of laughter and Prince was dreadfully mortified. He broke away from his master, and scampered off home at a desperate pace, ran down cellar and disappeared from view. His young master was quite distressed that Prince took the matter so to heart; he followed him in vain, calling "Prince, Prince!" No Prince appeared. He lighted a candle and searched the cellar, and found the poor creature, cowering away in the darkest nook under the stairs. Prince was not to be comforted; he slunk deeper and deeper into the darkness, and crouched on the ground when he saw his master, and for a long time refused to take food. The family all visited and condoled with him, and finally his sorrows were somewhat abated; but he would not be persuaded to leave the cellar for nearly a week. Perhaps by that time he indulged the hope that the hair was beginning to grow again, and all were careful not to destroy the illusion by any jests or comments on his appearance.—*Queer Little People, by Mrs. Stowe.*

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

Also, SCHOOL FURNITURE.

WARREN HOLT,
305 Montgomery Street.

PACIFIC COAST ITEMS.

They have had a very severe hail-storm and water-spout on White River, which came very near drowning out all the residents. The storm reached nearly to Posy Creek, a distance of twenty miles. Many of the hail-stones were as large as quails' eggs and in many places the timber was completely shorn of its foliage. Lately we have had more heavy rain, accompanied with strong wind, than has ever been known in the valley at this season of the year. In some localities it has almost ruined the crops, laying the grain as flat as if it had been rolled. It is feared, also, that the grape crop has been injured to some extent by the rain beating off the blossoms.—*Visalia Delta.*

In view of the recent formation of an association by the spiritualists "for the more general diffusion of *our religious opinions*," the *Courrier de San Francisco* says that it understands all kinds of liberty, even the "liberty of the absurd," but while the asylum at Stockton is insufficient to accommodate those who claim admission, it cannot understand the propriety of establishing schools to fit people for that institution.

The citizens of Salt Lake City are engaged in a desperate warfare against the grasshoppers. The latter have the advantage in numbers, and although "bushels" of them have fallen in the strife, yet the remainder press nobly on. The former, however, hope to succeed by their superior generalship. Not having investigated the subject, we are not prepared to give an opinion as to which party is in the right.

The *Enterprise* claims that the water-power in Oregon City is equal to any in the world. It also states that the county contains valuable mines of copper, iron, and coal, and large quantities of lime and building stone of excellent quality. With such resources as these, the people of Clackamas County have a right to expect great prosperity in the future.

Notwithstanding the constant discouragements thrown in his way, Mr. Newman seems to possess wonderful recuperative powers. The silk factory lives and weaves by his extraordinary efforts. Raw silk is arriving—the machinery is in operation—silk is being manufactured. Success to energy and enterprise. Success to the San Jose Silk Manufacturing Company.—*San Jose Patriot.*

On the day of the Yamhill Union Convention, a gentleman of Salem crossed the river at Chau-po-eg, stopped at a farmhouse on business, and found only a little girl at home. To his inquiries the rosy little web-foot answered, that "Father has gone to the Union Convention at Lafayette, and *Mother is out plowing.*"—*Oregonian.*

Preparations are being made by the officers of the various agricultural societies throughout the State for exhibitions to take place this fall which shall greatly surpass any previous efforts in that direction.

Our markets are at present supplied with delicious trout from Lake Tahoe. They reach us almost as fresh as when first scooped from the crystal waters of the lake.—*Territorial Enterprise.*

The "Society for the Prevention of Cruelty to Animals" will commence its work on June 1st. That success may attend its labors is the wish of every good citizen.

The Oregon and Idaho Telegraph Company has been incorporated, and will, if sustained by the public, complete the line from Portland to Boise City this summer.

The Labor Exchange has made arrangements to supply information in regard to the Government lands open to preemption.

Brigham Young has taken a contract to grade the Union Pacific Railroad from the head of Echo Cañon to Salt Lake City.

Vacaville is to be connected with the Sacramento and Vallejo Railroad by a branch road four miles in length.

The fruit in the vicinity of Walla Walla, Washington Territory, has been greatly injured by the late frosts.

Enthusiastic meetings are being held throughout the State to ratify the nomination of Grant and Colfax.

A flouring mill is being built at Benicia, capable of turning out 400 barrels of flour in twenty-four hours.

The "Alameda County Farmers' Club" has been organized, and weekly meetings are held at Haywood.

The funeral services of the late Senator McDougall took place at Grace Church last Sunday.

The jury in the Swaney-Seale murder case, at Stockton, failed to agree, and were discharged.

The *Rising Star*, which left New York on the 23d, has 1,000 California passengers.

Rasey Biven, editor of the Monterey *Democrat*, died on Thursday, May 21st.

The Helena (Montana) *Herald* claims for that city a population of 11,000.

They had a snow-storm at Virginia City on the 21st.

The fare on the overland stages has been reduced twenty-five per cent.

The manufacture of brooms is carried on extensively at Marysville.

The last steamer brought 700 Chinese to this city.

TELEGRAPHIC SUMMARY.

Political.—Grant and Colfax were nominated by the Republican Convention at Chicago. Both of them have made speeches accepting the nomination. The platform adopted justifies impeachment, favors equal suffrage in the ex-States, but affirms the right of loyal States to regulate suffrage for themselves. It denounces all forms of repudiation, but favors an extension of time for the payment of the debt and equalization of taxation....Great enthusiasm prevails in the East over the nominations....Reports are still prevalent of Chase's intention to put himself into the hands of the Democrats as a candidate....Geo. C. Gorham is the California member of the National Republican Committee.

Impeachment.—The prospects for conviction seem a little better since the Convention, but Wilson and Boutwell, of the Managers, believe that the President will not be convicted. ....Stevens has prepared three new articles of impeachment. ....A final vote is expected this week....Charges of bribery and corruption continue to be made against Senators whose vote displeases the authors of the charges.

Eastern.—A frightful and fatal disease has broken out and is rapidly spreading among the cattle near Springfield, Ill....Burlingame and the Chinese Embassy arrived in New York on the 22d inst....A thousand volunteers are to be raised in the United States for the Papal army....The family tomb of General Putnam has been broken open by robbers, and the jewels, and even the bones, of the dead carried away....A general movement is to be made against the Indians in Arizona....The Connecticut River is higher than at any time before this season, and has done much damage to the crops.

Foreign—The Emperor of Austria has signed a law equalizing all religious sects in his dominions....The British Government has forbidden the deposition of Colenso, Bishop of Natal....It is rumored that the Fenians are preparing to make a more formidable raid on Canada than any preceding one....Prince Albert has recovered from his wound, and is returning home....The Cretans are still victorious, but there are 60,000 Cretan refugees in Greece, who experience great misery.

WEEKLY MARKET REPORT.

Produce Market.

Wednesday, May 27, 1868.

Flour—Except a slightly improved feeling in Bakers' Extra, we have nothing to report. We quote jobbing rates for city mills as follows: Superfine, hf sks, ₱ 196 lbs, $6 25 @6 50; do, qr sks, $6 50@6 75; Extra, hf sks, $7 00@ 7 25; do, qr sks, $7 25@7 50.

Wheat—Beyond some demand for distilling, there is nothing worthy of remark. The range for good to choice is $2 10@2 15, the market being apparently firm at these figures. Sales of 500 sks good shipping, $2 12½; 200 sks choice, $2 15 ₱ 100 lbs.

Barley—The demand is quiet at the nominal range of $1 75@1 85. Sales of 300 sks light feed, $1 72½; 500 sks good do, $1 75 ₱ 100 lbs.

Oats—Quotations have assumed a wide range—say $2 10 @2 45. Sale of 200 sks ordinary, $2 12½ ₱ 100 lbs.

Potatoes—For good descriptions of old the market is firm at 55@65c for Bodega, and 70@85c for Humboldt. Sale of 200 sks new Mission, in small lots, $1 70@2 ₱ 100 lbs.

Onions—Are in moderate supply, jobbing at 2½c @ lb.

Corn—Red, $2 15@2 20; pale Yellow, $2 30@2 35; deep Yellow, $2 30@2 40; White, $2 25@2 30 ₱ 100 lbs.

Rye—Nominal at $2@2 05 ₱ 100 lbs.

Buckwheat—Dull and nominal at about $1 75 ₱ 100 lbs.

Beans—Sale of 100 sks Butter, 5c. We quote jobbing rates as follows: Bayo, 3¾c; Butter, 4¾@5c; Pea, 5½@6c; small White, 5½@6; Pink, 3¼@3½c; Red, 2⅜@2¼c ₱ lb.

Bran—In fair demand at $25 ₱ ton.

Middlings—We quote fine at $45@40, and feed descriptions $35@32 50, the medium quotation being 34.

Oil Cake Meal—Remains steady at $30 ₱ ton.

Hay—New descriptions $14@15, and old $15@21 ₱ ton, with sales of about 70 tons within the range.

Mustard Seed.—Sale of 600 sks ordinary California red, private.

Dairy Products—Fresh roll Butter is a little scarce, ranging from 30@35c; California firkin is in good supply at 30@35c, the latter an extreme figure, with sales of 30 firkins dairy-packed at, 32c, and 10 firkins do at 34c. Cheese is quoted at 14@16c for the various California dairies, and 18c for S. Hough & Son's; Eastern Cheese ranges at 16@20c ₱ lb, with sale of 3,000 lbs (English dairy) ex steamer, private. Eggs are in good demand at 31@32½c for Hen, and 25@27½c ₱ dozen for Duck.

Poultry—Supplies are generally light. Live Turkeys are quoted at 16@18c, and dressed do, 18@20c ₱ lb—none of the latter in market; Hens are scarce at $7 50@8 50; Roosters, $6@7 for old, and $7 50@8 50 for young; Spring Chickens, $5@7; Ducks, $4 50@5 50 ₱ doz; Geese, $1 75 @2 for old, and $3 ₱ pair for young.

Provisions—Prices are essentially the same as last week. California smoked Bacon, 15@16c; Oregon do, 12½@13c; California Hams, 16@18c; Oregon do, 15@16c; California Lard, 14@15c, with 15½ for small tins; Eastern do, 12½@13½c. The above are jobbing prices.

Wool—In round numbers, the sales since last Wednesday aggregate 500,000 lbs. Small lots of extra choice spring have been sold as high as 19@20c. At the close the market is hardly so firm. We quote choice shipping grades, 17@ 18½c; medium do, 15@16c½; burry, 11@14c ₱ lb. Sale of 10,000 lbs fall clip shipping grades, 11@13½c.

Hides—Sales since last Wednesday include 126 Mexican dry, 13c; and 1,150 California dry, 14½@15½c for usual selection.

Tallow—The supply continues meagre and the market moderately active at 7¼@7¾c for good to extra choice Beef and Mutton, the bulk of the sales being at 7½c ₱ lb.

San Francisco Cattle Market.

Beef, Veal, and Mutton are steady at unchanged figures. Lamb and undressed Pork have declined about 2c ₱ lb since last week.

We quote slaughterers' prices as follows:

Beef—American, 1st quality, 6@8c ₱ lb.
do 2d do 4@6c ₱ lb.
Veal—Steady at 7@10c ₱ lb.
Mutton—In fair request at 5@6c ₱ lb.
Lamb—Plentiful at 6@7c ₱ lb.
Pork—Undressed, 4½@7¾c; dressed, 9@11½c ₱ lb—outside figure for best quality grain fed.

—*S. F. Bulletin.*

MARRIED.

At the Larkin Street Presbyterian Church, May 24th, by Rev. J. H. McMonagle, George L. Kenney, of this city, and Cecelia M. Derby, of Buffalo, N. Y.
[Buffalo papers please copy.]

Sabbath School Books.

I have the most complete assortment of Sunday School Books, Cards, Question Books, and Sunday School Music Books, in the city.

Also, a fine assortment of Stationery. Paper and envelopes stamped with purchaser's initials, without charge.

A liberal discount made to Sunday Schools, Teachers, and Clergymen.

Just received, five hundred "Songs of the Sanctuary."

CHILION BEACH,
Bookseller and Stationer,

CURRENT TOPICS.

The acquittal of the President is received over the country with few evidences of disappointment and few tokens of rejoicing. Everybody supposed that the Senators who had so distinctly announced their opinion in the first vote, would show themselves of the same mind in the final decision, and probably the demonstrations respecting their action which were designed to effect a change, only rendered them the more firm. There are no indications that the result will have any particularly unfavorable influence upon the country. Indeed, the whole affair is likely to be passed over as only a temporary occasion of excitement, from which the people will recover rapidly, with that remarkable elasticity and buoyancy which has tided us over so many dangers in our history. That dangers so threatening, and, in the view of those accustomed to form conclusions respecting other nations, so inevitable, can be passed by us with so little harm, furnishes comment upon the nature of our government that must have great influence abroad. Our greatest danger is in the possibility that we may feel ourselves secure, whatever may betide; forgetting to be thankful, and becoming reckless in our independence. Of all nations, we should be most avowedly and thoroughly *Christian*, and the God who has so signally blessed us should be acknowledged, while we receive His favors.

Temperance is awakening new interest in almost all parts of the land, and with good cause. The excitements consequent on the war, and the habits so generally cultivated in the camp, have greatly multiplied the evils of drunkenness, until these are too manifest and fearful to be unnoticed by any. In all our large cities, the different grades of places for the sale of liquor, from the gilded saloon to the lowest underground den, have become so numerous that it is really astonishing that such a multitude of them can be supported. In the country, new means for the supply of those who wish to drink have been introduced, till actual intemperance is well-nigh as prevalent among farmers as among dwellers in towns. There is urgent necessity that some more effective measures be devised, or some new efficiency be communicated to those already employed, for the arrest of the enormous tide on which are floating so many interests that should be cherished as valuable and noble. The different temperance organizations established in this State are somewhat aroused to an apprehension of this necessity and are putting forth more than their usual efforts—we are glad to know with more than usual success. All temperance men should cooperate with them, in some way that will be effective, and a public sentiment should be formed that will stand opposed to every phase of this evil.

The graduates of Union College on the Pacific Coast will learn with sadness that President Hickok has felt constrained to resign. The fact is a misfortune, but the reason he gives for it adds much to the evil which must result to the College. It has been known for years that some partisan feeling existed between those who reckon themselves the special friends of Dr. Nott and those who thought Dr. Hickok should have more control, inasmuch as the responsibility came chiefly upon him; but after the death of the venerable President and the formal election of Dr. Hickok as his successor, it was hoped that all unhappy differences would expire. This hope appears not to have been realized, as the note accompanying the resignation declares that he regards the breach between the parties in the Board of Trustees, and in the Faculty, to be perpetual, if he does not retire. A committee has been appointed to wait upon the President and confer with him on the subject, but none who know him will have any idea that new arguments can be presented which he has not well considered, and no doubt he will insist that his resignation be accepted. The effect on the prospects of the College must be serious, and it will be exceedingly difficult to obtain a man both able and willing to bring it up to a point of permanent success. We regret the necessity to make the attempt, while we trust that it may not be vain.

A Statement in one of our exchange papers from Texas suggests some thoughts that may be worthy of note in all new countries. It was to this effect. The writer had taken pains to learn, and stated that in all denominations throughout that State the pastors of churches are so poorly supported that they are obliged to give attention to other employment to eke out their salaries, and that the churches are making little if any, progress. Now, although he did not connect these two facts in the relation of cause and effect, we will do so, and commend them to the young churches of our religion. It is fully established that the divine method of success is wise, viz: the settlement of competent men as leaders in the church, who shall devote themselves *wholly* to their work. It is not economy to make it impossible for these men to do this, nor to oblige them to give such close heed to their expenses that they cannot watch over the interests committed to their charge with every power devoted to success. Churches may *exist*, and only half support their pastors, but they will not *flourish*, and really become aggressive in their influence, unless they render them free from anxiety respecting temporal affairs, so that they can prosecute their plans with vigor for the promotion of Christ's Kingdom. It is often difficult for those who are passing through the trials of commencing an organization in a new village, or neighborhood, to understand this feature of economy. Yet facts will prove, that while a minister who is not willing to share self-denial with his people is not worthy of support, one who shows himself to be the man for the work should be made free from other cares, if rapid and satisfactory progress would be attained.

The monarch of Utah is a master of kingcraft. Brigham Young would have taught James the First. His policy is, the isolation of the Mormons. In pursuit of it, his strokes have been masterly. Success, as well as philosophy, has paid tribute to his genius. First, he secured geographical isolation. He led a grand exodus from Illinois and Missouri to the desert. Dr. Francia, Dictator of Paraguay, followed the same policy of segregation. But the geographical part of it was already achieved for him. Paraguay was isolated by nature. But the great Mormon's achievements in moral isolation are even more heroic. His stringent liquor law has kept away the rougher sort of Gentiles. His success in disquieting land titles, when it suited his convenience, has discouraged the better sort. Perhaps the dagger, too—as in the case of Dr. Robinson—has done service in extreme cases. His last stroke is just announced. He takes the contract for grading that part of the Atlantic half of the Pacific Railroad which adjoins Salt Lake. He thus secures work for his idle hands. Many of these he has now, since Montana is raising its own produce. But especially does he thus keep away a host of Gentile laborers and superintendents. We watch these strokes of policy with interest. It is a sort of battle—one man against the whole modern tendency to assimilation. But we have no doubt of the issue. The Saints of Utah will soon be as much of a tradition as the Pillar Saints.

The increase of recklessness as to the value of life must be noticed by all readers of newspapers. The number of murders should excite serious thought, the sickening details of which constitute much of the reading which is supposed to be most interesting, and suicides and assassinations have never been so frequent as within the past six months. What is the reason? Perhaps no one reason can be assigned, but could we trace the several immediate reasons to their occasion, we should find this to be the unnatural and almost unlimited *excitement* that seems to be craved by all classes of our people. Sensual, intellectual, emotional, spiritual excitement, affecting health, business, the relations of life, and the religious experience, is eagerly sought, and under its influence we are pressed beyond all proper and normal means of enjoyment and success. Disappointment results oftentimes, from which some seek relief in attempts to wrest from others what they could not gain themselves; while some, in despair, destroy their own lives, as the most direct mode of escape from evils their inflamed state of mind has greatly

magnified. Those who would not adopt such means of relief in their deliberate hours, being kept in an excited condition by the physical or mental habits they have formed, yield to the suggestions of passions that are unbridled, and kill themselves, or others, or both, thus driven on. We shall find this sacrifice of life will continue to increase, until there is a change in the habits of many of our people. Reason, religion, the authority from within and above, by which we were made to be controlled, must be permitted to bear sway. A conviction of responsibility to God must lead to a more calm, and serious, and well ordered life, then we shall be more safe, and more happy, and more successful, in the various relations of society.

RELIGIOUS INTELLIGENCE.

PACIFIC COAST.

SOME months ago a meeting was held in the First Presbyterian Church of this City on behalf of the Prison Commission, when some remarks were made by the Pastor bearing especially on the religious condition of our prisoners in San Quentin. These remarks seem to have produced effect on one hearer at least; for Dr. Eells has just received a letter from the Rooms of the Tract Society, New York, acknowledging the receipt of twenty dollars from an unknown gentleman who was present at that meeting, to be applied in payment for copies of the *American Messenger*, which are to be forwarded for distribution in the Penitentiary. We shall be happy to be the agent for our unknown friend, and do not doubt that the one hundred and thirty copies of this excellent paper thus furnished the prisoners will be of great profit to many of the hundreds so much in need of religious influence.

—

THE Union Sunday School Picnic of the Calvary and First Presbyterian Churches last Saturday, was largely attended, and seemed to be much enjoyed, especially by the children. The pleasure of the company was not at all diminished by the fact, that several schools, including the Missions, were represented, and the cultivation of the union feeling was not the least advantage resulting from the exercises of the day.

—

SERMON FOR THE STUDENTS OF THE COLLEGE SCHOOL.—Sunday morning, Rev. E. G. Beckwith, Associate Principal of the Oakland College School, preached, in the First Congregational Church, a sermon expressly intended for the students of the School. The text taken was, "And so Tibni died and Omri reigned." It was shown that such was the result of all earthly ambition—a short epitaph in history. His remarks were very eloquent, and were calculated to inspire young minds with noble ambition.—*Oakland News.*

—

A CORRESPONDENT sends us some items from the thriving village of Rocklin. He says: "We have a flourishing Sabbath School, with a small library of choice selections, bought with money contributed by the citizens, to advance morals and Christianity. Last week the Good Templars organized a lodge here, and the work of reformation goes bravely on."—*Auburn Stars and Stripes.*

—

A CONGREGATIONAL Church was organized last Sabbath at Oakland Point. The sermon was preached by Dr. Stone of this city, and all the exercises were very interesting. The population of that part of Oakland is rapidly increasing, and we are glad that a church is to be furnished so soon for their accommodation.

RUSSO-GREEK CHURCH.—The Greek-Russian Sclavonian Orthodox Eastern Church and Benevolent Society are about to solicit subscriptions for the erection of a place of worship in this city. A number of collectors, including the Russian Consul, have been appointed, and subscription papers will soon be circulated.—*Times.*

—

IMMERSIONS.—Yesterday morning, six or seven young persons were immersed in the creek at the foot of Webster Street. A revival has for some time been progressing at the Baptist church in this city, and some of its fruits are seen in the conversion of the persons immersed yesterday.—*Oakland News.*

EASTERN.

THE anniversary of the Presbyterian Board of Foreign Missions was held recently, in the Fifth Avenue Presbyterian Church, New York City, corner of Nineteenth Street. The annual report shows that the Board has seventy-nine foreign missionaries, eleven missionary physicians, twenty-one ordained, native, and licentiate preachers and assistant missionaries from this country, besides the wives of the missionaries and one hundred and eighty-four native helpers, or in all a force of three hundred and seventy. The receipts of the Board have been $285,308; the expenditures, with the debt of last year ($35,472), have been $312,828, leaving a balance against the treasury of $27,620. The sermon was preached by Rev. John Hall, D.D., pastor of the church.—*Presbyterian.*

SOME young men of Hartford (and it is a custom which is not at all peculiar to that city) have been in the habit of going to one of the Episcopal churches to hear the fine music and leaving before the sermon. The custom had become so annoying by its disturbance of the worship, that a notice was posted on the doors on a recent Sabbath, stating that they would be locked until the close of the service. In the haste of the young men to get good seats they did not wait to read the notice, but rushed in, and when they attempted to rush out during the service they were caught. The doors were fast and they were compelled, though unwillingly, to listen to a sermon. It is to be hoped that it did them good. This may serve as a hint to other churches.—*Observer.*

ANOTHER CHURCH OUT OF DEBT.—The West Presbyterian church (Dr. Hastings'), in West 42d St., N. Y., was fifteen months ago, $75,000 in debt. An effort was made to reduce it, and about $20,000 secured. A short time ago, one member of the church, by personal effort, in *two weeks*, raised $50,000, and $5,000 additional having been secured, this church, which, five years ago, broke ground for its building, is, by the blessing of God, entirely free from debt. We congratulate the church and commend the example to others.—*Religious Herald.*

DR. DURYEA'S NEW CHURCH.—At a meeting of the congregation of the Classon Avenue church, Brooklyn, the Trustees were authorized to go on immediately with the erection of the new edifice on Classon Avenue. Nearly $40,000 of subscriptions for pews have already been obtained, and so favorable are the prospects for being able to sell more than is desirable to dispose of, that by a resolution introduced at the meeting, the Trustees are directed to dispose of only $20,000 worth more. The extention of the present chapel is nearly finished.—*N. Y. Evangelist.*

THE corner-stone of the Metropolitan Presbyterian Church, in Washington, D. C., was laid on the 14th of April. The church being under the shadow of the Capitol, in a population of 15,000 souls without any other Presbyterian church, and with a fast growing congregation, seems to afford the best point for the erection of a new house of worship. It is proposed to erect a large edifice of the same material as that of which the Smithsonian is built—Seneca brown stone.—*Presbyterian Banner.*

SPIRITUALISM.—Horace Greeley sums up as the result of a number of years' investigation and observation of Spiritualism, that the thing itself is inexplicable; that men and women have not been made better by it—on the contrary have grown lax in their notions of marriage, divorce and moral purity; and that the aggregate of insanity and suicide has been increased by Spiritualism. A good many others will agree with him.—*Boston Journal.*

THE Faculty of the Theological Seminary at Princeton sends to each Presbytery a list of the students under its care, with the record of absences from the stated exercises of the Seminary during the year. The Presbytery then is able to call candidates to account for these neglects of duty. The plan is excellent, and would be well followed by all seminaries of divine instruction in the church.—*Observer.*

REV. R. J. BRECKINRIDGE, D.D., has written a letter, which has been published, expressive of his long-cherished opposition to instrumental music, and stating that for years such have been his conscientious scruples that he has refused to be present, much less to preach, in any Presbyterian churches where instruments are used, except they were silent when he officiated.—*Chicago Presbyterian.*

REV. JAMES FREEMAN CLARKE, a Unitarian minister of Boston, pastor of the late Governor John A. Andrew, has been invited, says the *Christian Register*, by an *orthodox* clergyman in Connecticut to preach his ordination sermon, and his church, which is Unitarian, has been invited to have delegates attend the Council.

NOT VERY CREDITABLE TO CHRISTIANS.—Some one, curious in these matters, has made a calculation in regard to the salaries paid to ministers in this country, and the number of sermons preached—that the average price paid for a sermon, take the land through, is only three cents.—*Messenger.*

REV. CYRUS BYINGTON D.D., the venerable missionary to the Indians is now at the Bible House New York, superintending the printing of a translation of the Bible for the red man. There are sixteen (Presbyterian) churches among the Choctaws with a membership of 1700.

REV. A. A. WOOD, D.D., of Geneva, has received a call to the Second Presbyterian Church of Elmira. Rev. Joel Wakeman, D.D., of Painted Post, has received and accepted a call to the Presbyterian church of Campbell.—*American Presbyterian.*

REV. DR. OSGOOD, a prominent Unitarian minister of New York, declares his positive conviction of the Divinity of Christ, but denies His Deity. In doing this, what is his meaning? If Christ is divine, is He not God?

THE *Ambassador* (Universalist) says: "Neither Unitarianism or Universalism thrives on Long Island. East of Brooklyn, there is not a society of either denomination, except that in Huntington. And here the society is small."

THE Rev. James Kent Stone has resigned the presidency of Kenyon College, Ohio, to take effect on the 25th of June next, and has accepted the presidency of Hobart College, at Geneva, Western New York.

REV. GEORGE DE FOREST FOLSOM has resigned the pastorate of the First Congregational Church and Society in Fair Haven, and his church and society have accepted the same.—*Congregationalist.*

REV. H. J. VAN DYKE, of Brooklyn, has gone South for his health, and to administer to the wants of the people there, a sum of money having been put into his hands for that object.—*Observer.*

REV. A. D. L. JEWETT has received a call to the First Presbyterian Church, New Brunswick, N. J., and his pastoral relation to the church at Throg's Neck, N. Y., has been dissolved.

THE Midnight Mission of New York last year rescued seventy-seven fallen women, of whom forty-six were permanently reformed.—*Presbyterian.*

FIFTY-ONE persons were added to Rev. Henry Ward Beecher's church by profession, and twenty by letter, at the last communion.

FOREIGN.

THE British Consul, Moore, in his recent consular report, states the population of Jerusalem at 18,000, of whom about 5,000 are Mohammedans, 8,000—9,000 Jews, and the rest Christians of various denominations. The number of pilgrims who annually resort to the holy city, is 6,000—8,000. The local Turkish Government has commenced a carriage road between Jaffa and Jerusalem, which it is thought will be completed this present spring. This is a very great improvement, and will be greatly prized by travelers. Two lines of telegraph *via* Beyroot and Alexandria connect Jerusalem with Europe.—*Hartford Churchman.*

THERE are within 150 miles of Cape Comorin, the southern extreme of India, 89,000 native Christians. Of these the Church Missionary Society instructs 36,000; the London Missionary Society, 29,000; the Society for the Propagation of the Gospel, 18,000; and the American Board 6,000. These Christians are very poor, but are doing what they can for supporting the Gospel. Those under the care of the Church Missionary Society, pay at the rate of 35 cents each per year for each child and adult for religious purposes. The wages for a day's work is but a few cents.

AT a church in Leeds, the rector lately gave notice that the "young ladies" who were candidates for confirmation, would meet at the parsonage; but that "the young women" were to assemble in the schoolroom! It is a question which of the two female sets was the most complimented—the ladies who were not considered womanly, or the women who were not regarded as sufficiently ladylike to assemble at the parsonage.—*Independent.*

A MEETING of the "Catholic Association for the Suppression of Drunkenness" was recently held in Exeter Hall, London, the headquarters of English Dissenters and Evangelical Churchmen. The meeting was presided over by Archbishop Manning, who made a strong temperance speech, and advocated the compulsory closing of public houses on Sunday.

REV. DR. JESSUP, a missionary for twelve years past of the American Board in Syria, recently stated at a public meeting in New York, that a few years since there was only one printing press in Syria, now, there are *sixteen*, and books in Arabic from these presses may find readers from Liberia throughout Africa, Turkey, Arabia, Persia, India, and to the very gates of Pekin in China.

A NUMBER of Greek Christians at Caiffa having recently declared themselves Protestants, the Committee of the London Church Missionary Society have sanctioned the appointment of a Catechist to instruct them, and another missionary has been stationed at Nazareth, where a new and substantial church has recently been erected.—*Zion's Herald.*

AMONG the two millions of people by whom Yeddo, in Japan, is inhabited, there is not a beggar in the streets, not a man unable to read, not a boor, not a drunkard, not a ruffian. The women are beautiful, the men are robust and energetic, there is no trouble about fashions, education is universal, books are plentiful, though there are no newspapers.

THE enormous distribution of the Word of God and of Protestant tracts at the Paris Exposition has caused a remarkable religious awakening in France. This has brought into great notice their various Protestant institutions, and caused a considerable increase of applications for information and help.

LETTERS from Rome announce that Pius IX. does not disguise his intention of nominating Cardinal Bonaparte as his successor; this is, by his own account, the best means of securing French aid for the maintenance of the Papal temporal power.—*Protestant Churchman.*

DISRAELI is not of the Jewish religion. His father embraced Christianity before the Premier was born.

THE ORGAN QUESTION.—The Hamilton Presbytery, by a vote of 11 to 2, decided to allow the use of instrumental music in churches, whenever congregations unanimously or by large majorities desire it.—*Montreal Witness.*

FRENCH PROTESTANT MISSIONS.—The French Protestants, though comparatively few and poor, are engaged in the work of foreign missions. They have long had a mission in South Africa.—*Zion's Herald.*

THE Established Presbyterian Kirke of Scotland, pays $15,000 in annuities to ministers' widows. The Secretary who disburses the fund, receives a salary of $3,000, and his clerk $750.—*London Times.*

THE "Christian Dressmakers" is the title of a new society in Paris, established for the purpose of discouraging low-necked dresses. The members take a solemn oath not to made such garments.

San Francisco, Saturday, June 6, 1868.

THE GRANDEUR OF SIMPLICITY IN CHARACTER.

Grandeur relates rather to what is massive and majestic than to any object in its details. Hence the necessity that the grand be simple. The distant mountain, lifted in its rugged outline against the sky; the ocean, rolling forever the same within its shores; the canopy of heaven at midnight—are wonderful in their grandeur, yet nothing could be more simple as we view them—that is, more severed from everything else, and impressing us with their solitary majesty.

We have like feelings, sometimes, when viewing splendid works of art—as Raphael's noblest paintings, the St. Peter's at Rome, Powers' statue of Washington; yet it is always the severe simplicity seen in the proportion, the arrangement, the general effect, which moves us, and the awe we experience when in the presence of these works would diminish at once if this should cease to be their chief peculiarity.

Now, the grandeur of character is seen in the same peculiarity; not in its extreme finish, or detailed ornaments, which require so near inspection that defects are also observed, but in the bold, and often stern displays of the man in his more marked and peculiar features. Thus we look upon Paul, ever revealing in the synagogue, the palace, the tent-maker's shop, on Mars Hill, in Corinth, in the hall of Festus, the prison of Rome, and at the place of execution, the same nobility and splendor of a simple purpose. Thus we look upon Luther, whose simplicity of character was the marvel of the man. Thus Calvin, Knox, Huss, Wickliffe, and others of more modern times, appear to us, limned upon the background of the dark days in which they lived, not so much in the delicacy of beauty as in the sublimity of grandeur, the glory of their fame being in their simple faith and their noble devotion. Our own forefathers had this as their common peculiarity. As we look back upon them we see much that we cannot approve; many of their acts, some of their sentiments, and their manners generally, as the light of our days shines upon them, should be discarded. But there is one feature of their character for which they will have evermore the admiration of the world, as it distinguishes them from any other race of men, and has left its blessed influence on their descendants, viz: the stern, unyielding, yet always grand simplicity they ever exhibited, and which, notwithstanding the sneers of those who cannot appreciate either them or the times in which they lived, will cause their names to be honored, so long as there shall be men to pay respect to manhood's loftiest exhibition. And there are not wanting those among us who present a character that demands similar respect for the majestic peculiarities which cause them to tower above the ordinary level of human nature. These men are singular, but that which renders them singular is eternal. It is like the essential principles of truth, which rise unshaken amidst the flood of ages that sweeps all transient things away, as grand, as noble, though they stand alone, as when surrounded by the objects of beauty, or worth, that for a season seemed a portion of their value. So does character become the priceless bequest of him who gains it, to the race, while at the same time, he keeps it all for himself; and there is nothing finite more sublime in its grandeur.

SCHOOL EXAMINATION.

The experience of the past two weeks can hardly be very satisfactory to those who are the friends of education, rather than the friends of any particular school or seminary. It is difficult to know why nearly all the schools should select the same week, and the same days of the week, for their examinations; and a change in time, by some mutual understanding, would be very agreeable to the public, and would not be attended with any disadvantage to the schools. By the present arrangement no one can attend any number, and very little opportunity for a comparative judgment respecting them is afforded. So far as we were able, through others on whose opinion we could rely, we have endeavored to ascertain the character of the examinations in most of the schools in the city and vicinity, a brief note of which we give in this general summary.

The public schools appear to have given great satisfaction, as they might be expected to do from the manner in which they have been conducted through the year, but as quite extended accounts of their several departments have been given in the daily papers, we will not repeat what has been published respecting them.

The Pacific Female College, under the direction of Rev. E. B. Walsworth, has closed the year with unusual tokens of prosperity, and the classes gave proof of careful training, and real progress. The recitations in the advanced class were worthy of particular commendation, and the music tastefully interspersed was such as we like to hear from our daughters and friends in our homes. We learn that Mr. Walsworth has purchased the edifice, and will hereafter have entire control in the management of the institution. We have no doubt of his abundant success.

The City Female Seminary, so favorably known by our citizens, as conducted by Rev. C. R. Clarke, fully sustained its established reputation in the exercises with which the year was closed. That which is particularly prominent in this school is the range of knowledge acquired by the pupils, beyond the mere text-books through which they pass, and the ease with which they express this in their examinations. With no possibility of special preparation, by training and crowding the memory, for this purpose, there is a very pleasant readiness and clearness in the answers of the young ladies that give much pleasure to those who understand the real object of education. The seminary has never been more patronized, and has never been more worthy of patronage than during the past year.

The Young Ladies' Seminary, of Benicia, of which Rev. C. T. Mills is Principal, exceedingly interested us with the series of tests furnished during its closing exercises, of the proficiency made by the pupils, and with the manifest delight and *esprit de corps* with which they regarded the school. The examinations were all well sustained, but the senior class deserves marked notice, as having shown peculiar talent and culture. The exhibition on the last evening was superior in all its parts, fully justifying our expectations from the past reputation of the Seminary, and giving assurance of future fidelity to all the interests of those who may become its pupils.

The Oakland Academy, which has steadily increased in popularity, and become more thoroughly equipped from year to year, under the supervision of Rev. David McClure, furnished clear proof that now it is completely prepared for the successful training of boys in the several branches of academical instruction. It is a thorough school, judging by the examinations, which were attended by little display, but which showed that the scholars understood what they had studied. The new building and excellent domestic and Christian influences of this Academy, render it very attractive to parents who seek a safe and pleasant place of education for their boys.

The University College celebrated its first Commencement this year, as the first class it has prepared for graduation has now completed the assigned curriculum of study. We feel particular interest in this College, not merely on account of its real merits which are enough to excite interest, but also because it has a special relation to the Presbyterian Church of the State. It has received the attention of prominent men in this Church, and has been largely supported by their money, and has been watched in its progress with pride by many who appreciate the relation of the Church to true education. Of course, its first commencement was hailed with delight, and a large audience assembled to witness the exercises. These were of a character to convince all that real college discipline and attainment are possible in California, and the graduates would take fair rank with the average classes in Eastern colleges. The addresses of President Veeder and Dr. Woodbridge, and the poem by Rev. Mr. Buel, were excellent, and gave a new impulse to the infant institution.

We began with the purpose to say nothing in special notice of the public schools, yet we cannot consent to close this summary without allusion to the Boys' High School, which certainly gave remarkable demonstration of its ability to develop and strengthen the powers. The young gentlemen who took part in the exhibition did admirably, in any view of them, and our citizens should be proud of such means of education for all as this High School supplies.

We intend to refer to the Commencement exercises of the College of California and the Society of Alumni, in our issue next week.

STATE SUNDAY SCHOOL CONVENTION.

Much fear was mingled with the hope cherished by the friends of the Sunday School work in this State lest the Convention which has just been held in this city might fail to be as productive of good as have been like conventions in the older portions of the country. We had known of the healthful yet stimulating influence thus exerted on individuals and on the cause, and all felt that there is great need of such influence among us, but assemblages of this kind have never been very successful in California, and it might be that only those living in the city and vicinity would attend, and no general benefit would result. The facts have completely removed this fear, and caused all friends of this important department of Christian work to rejoice that the Convention was called. At the beginning it was manifest that the object was not that eloquent speeches might be made respecting the advantages of Sunday Schools, and those engaged in them might congratulate each other on what they are doing. The programme of exercises adopted made known the purpose that the whole effect of the Convention should be *practical*. The questions for discussion were those which relate to the highest success in teaching and gaining influence over scholars; and the remarks made upon them, though often differing in some points, were direct, the expression of experience and thought, and such as would *suggest* much

to all who heard them. The addresses were upon themes best adapted to awaken interest and elicit new ideas and valuable reflections, and they were delivered by those who have given years of study and observation to the methods of success in Sunday Schools. Of necessity, there was little foolish or unprofitable talking. The delegates were not here to be harangued, but to consult. The object to be gained was too sacred and important to admit of idle, aimless, time-spending, and though there must always be in such assemblies some who are not sensible of the end to be gained, and the best means of gaining it, there were less of this class in the Convention than may often be found.

We were not able to be present as much of the time as we desired, yet no doubt we express the universal conviction when we say that all were profited by its exercises, and will be more ready to attend such conventions in years to come.

In these general conferences we gain a common stock of experience and study, and each may appropriate and make valuable to others the results which all have reached in the various departments of the work. The best methods of teaching, and influencing, and saving children are worth all the attention we are likely to give them, and we should welcome any aid of which we may avail ourselves.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Seventh Term of this Institution will commence on Wednesday, January 22d, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

Correspondence.

Letter from Napa County.

Napa, May 28, 1868.

At the request of your correspondent, who writes from Bloomfield, in The Occident of the 23d, I subjoin the substance of my remarks on infant baptism, made at Healdsburg on the second Sabbath of this month:

The Covenant of Redemption existed from eternity between God the Father and God the Son. This covenant entered into operation immediately on the fall of man. It began to take form in Abraham's time. God gave him circumcision as a sign or seal of his interest in that covenant, and commanded him to circumcise his male infant children, as they were included in the covenant, and had a right to this token of recognition. In giving this sacrament to Abraham and his children, God bound Himself to be their God, recognized them as his children, and declared them entitled to all the benefits of the Covenant of Redemption, or, as it is more properly called, when speaking of it as it relates to Christ, and believers and their children, "The Covenant of Grace."

At the same time, God required Abraham to be careful that every man child was circumcised, as it was the mark by which they were to be recognized as God's children and servants.

By neglecting this simple ordinance the parent dishonored God's Covenant of Grace, and his child had consequently no right to any of the saving benefits of that covenant.

The duty of Christian parents to present their infant offspring to God is as obligatory now on them as it was on Abraham in his time. But as there is no longer any call for the blood of believers, or for the blood of their little ones, seeing that the blood of Jesus Christ, the Son of God, cleanseth from all sin, our Lord gave His New Testament Church the significant ordinance of baptism to supply the place of circumcision, as one of the two sacraments, saying, "Go ye, therefore, and teach all nations, baptizing them in the name of the Father, and of the Son, and the Holy Ghost." The water used in baptism signifies, first, the blood of Christ, by which believers and their children are justified in the sight of God; and second, the sanctifying influences of the Spirit of God, as sayeth the Apostle Paul: "And such were some of you, but ye are washed, but ye are sanctified, but ye are justified, in the name of the Lord Jesus, and by the Spirit of our God."

Children of believers are federally holy—that is, they are included in the Covenant of Grace, as Peter said to the Jews, on the Day of Pentecost, "for the promise is unto you and to your children." Accordingly they have a right to baptism, as the token of recognition by God and His Church; not only so, but the child of one believing parent has an undoubted right to baptism, as Paul again declares: "For the unbelieving husband is sanctified by the wife, and the unbelieving wife is sanctified by the husband; else were your children unclean, but now are they holy."

It may be remarked on this verse, that it is only by their interest in the Covenant of Grace, through their parents or parent, that infants are holy, for notice these words, "*else were they unclean.*" It is by entertaining wrong ideas on this point, and by believing that all children are naturally holy beings, that so many Christian parents are able to feel at ease while their little ones are still unclean, and unwashed in the cleansing blood of the Son of God.

Christ recognized the infant children of these believing parents who brought their babes to Him as subjects of this spiritual kingdom, saying, "Suffer little children," or, as the original signifies, *nursing* children, "and forbid them not to come unto me, for of such is the Kingdom of Heaven." And we know of no other way by which little helpless ones can come to Christ, but only as the man who was sick of the palsy came, when he was carried to Christ by his believing friends. (See Mark ii: 3.)

Let Christian parents follow the example of Noah, and carry their children with them into the ark of safety. But some may inquire, "What difference can sprinkling make?" Let such look in the twelfth chapter of Exodus, and read from verse 21st to verse 24th, and they will see that there was then a material difference, and that the safety of the first-born child was dependent on the *sprinkling* of blood.

That infant baptism was observed in the Apostolic Church is inferred from Acts xvi: 15, where we read that Lydia was baptized and "her household," and at the 33d verse we read that the jailor of Philippi was baptized, and "all his." Were there no children in Lydia's household, or among the "all his" of the jailor of Philippi? It remains for those who are opposed to the practice of infant baptism to prove that there ever has been a period in the history of the Christian Church when the infant children of believing parents were not baptized.

I am yours,

James Wylie.

Letter from New Jersey.

Princeton, N. J., May 9, 1868.

There is now rising from the college grounds at Princeton a singular building, which cannot fail to attract the attention of the visitor in these classic shades. I refer to the new observatory. The main building consists simply of a large circular tower, now about half completed, and when finished, to be surmounted by a revolving dome. At each side of this main tower there are adjoining smaller buildings, to be used for various purposes, as need may require. The large central portion is to be devoted to the telescope, which, it is expected, will be the finest in the country. The preparations for the location of the instrument are of the most thorough and substantial character. One would hardly suppose that in a district where earthquakes are not so common as in the great city of the Pacific, and indeed, are almost unknown, it would be necessary to dig down twenty feet and more and lay the foundation upon the unbroken rock; but this is what has been done. The space between the solid rock and the surface has been filled with stone and cement, and upon this rises a pyramid of solid masonry, twenty feet square at the base, and tapering gradually as it ascends, until it ends in a platform of two large stones, making an area on the summit of the pyramid of about ten feet square. On the platform is placed the pedestal for the telescope. First, a huge block of Quincy granite, whose lines are exactly parallel with the points of the compass. This foundation stone does not rest with its whole surface upon the top of the pyramid already described, but, in order to possess perfect steadiness, is so cut that it stands as if upon feet, having contact only at the extremities with the subjacent masonry. This stone is about twice as long as it is broad, and bears upon it two stones of less dimensions, on the highest of which the telescope is to have its resting-place.

When completed, this observatory will be a great addition to the scientific department of the College. Besides this building, other substantial improvements are in contemplation, and the friends of Nassau Hall look hopefully forward to the future.

Although reliable information has not as yet reached us as to the acceptance of Dr. McCosh of the Presidency of the College, this conclusion is anticipated by all.

The venerable Dr. McLean retires from his chair after having occupied it much longer than any preceding President, and I am happy to say that his appearance justifies the hope that he may still for many years watch with interested eye the progress of the institution whose interests he has so long and so well directed.

W. R.

The Christian Conscience.

It is a grand and glorious thing, this higher and nobler part of man, dwelling in perpetual sunshine; this of which we may say, almost with the poet, that

> "Its great bright eye most silently
> Up to the Throne is cast;"

looking evermore above the letter of the law to its spirit; casting its bare arms, free from the fetters of precedent and human tradition, ever up into the pure blue sky; feeling for love; feeling for truth; feeling for justice:—a grand and glorious, but a wayward and fitful thing; slumbering for centuries in nations, dormant for long years of a man's life; but when it wakes, when it speaks, leading at any cost, however perilous, straight into conflict, straight into solitude. straight into bereavement.

A strange thing, too, for it may speak ever so low and armies cannot silence it. Its utterances may savor of folly, or of imprudence, or of inaptitude for practical life; but they drop like seeds into the great heart of mankind; they fashion policies, they rule empires; that which was erewhile shouted as the name of an enthusiast, that which was just now branded upon the flesh of a martyr, shall before long glitter in gems on a sceptre, and float out to the breezes as the righteous emblazonment of a realm. And a fearful and a dangerous thing it is too; for in the midst of successful iniquity, or disregarded equity, let it but lift up its voice, and brave men turn cowards; let but one note of that voice be heard from the lisping tongue of a child, and bold workers of wrong, and busy toilers for gain, and the world's idlers, shrink and shrivel up, as if the icy north wind had blown upon them; because they know that a power swifter than the telegraph, and keener than the lightning, prints all its words in that book of remembrance, which the angel shall hold open when all mankind shall meet before God.

But we must not treat of man's conscience, even in Christian countries, as being infallible, or universally enlightened. It is clear in its testimony, it is trustworthy in its verdict, only in proportion as men have become Christians. In every Christian land there is a certain number of persons, greater or less, according to the purity or corruption of its Christianity, who form, as it were, the focus of the bright light of the Christian conscience. Sometimes they are banded together, and acting on the public; but this can only be where the utterance of opinion is free. And even in such lands, the men of pure and clear Christian conscience often know not one another, and work not together. They are separated by barriers of rank, or of sect, or of other circumstance; and it is not till God's Providence has made utterance inevitable that it is discovered how irresistible a power is gathering in secret. Thoughts that it would take a bold man to utter on a platform to-day, may to-morrow be carried like a tide-wave over the land, and may the next day have become a confessed basis of national action. Of course, in lands where utterance is not free, the Christian conscience is crushed and borne down. But even there it is in the long run, repressed and borne down in vain. Like the up-bursting of the boiling granite from the central heat, it will find its way through the chinks and leaks of the thickest and tightest impost of artificial rule; or, if it cannot, it will end by up-heaving and shattering in a moment the compact crust of ancient and prescriptive wrong.—*Dean Alford.*

Agents Wanted

At once, to canvass for the

MOST POPULAR SUBSCRIPTION BOOKS

Of the Season.

The following works are now being canvassed in several counties of the coast and with the best of success, and good men can do well on any one of them in territory which has not been canvassed.

MACKENZIE'S 10,000 RECEIPTS.—The best book of the kind ever published. SIX HUNDRED COPIES have been sold in a single county in California, and the county not finished.

BEYOND THE MISSISSIPPI.—Containing over 200 illustrations. In several instances the commissions of our canvassers upon this work alone have amounted to over $100 a week.

BANCROFT'S MAP OF THE PACIFIC STATES.—Fifth edition; revised to the present time. Decidedly the best map of the coast in existence.

WELLS' EVERY MAN HIS OWN LAWYER.—As high as sixteen orders in a single day have been taken for this work. It is useful to every one.

PEOPLE'S BOOK OF BIOGRAPHY.—A new work, just ready, by the popular writer, James Parton. A great number of the subjects are self-made men, "Who paved their own way in this world," who were "architects of their own fortunes." Reading like this inspires the young with courage and stimulates them to emulate such examples. A very large sale is expected.

NATURAL WEALTH OF CALIFORNIA.—Comprising Early History, Geography and Scenery, Climate, Agriculture and Commercial Products, Manufactures, Mining, Railroads and Commerce, Population, Educational Institutions, and a detailed description of each County: together with much other valuable information. One large octavo vol. The finest work ever gotten up on the Pacific Coast. Published by H. H. BANCROFT & COMPANY, San Francisco.

LOST CAUSE.—The only Southern History of the war published. Very large sales have been made in the territory now already worked. A new revised and enlarged edition is now ready.

THE AMERICAN WHEAT CULTURIST.—Practical details for selecting and producing new varieties and cultivating on different kinds of soil. A new work just ready.

HISTORY OF THE SECRET SERVICE OF THE UNITED STATES.—"The most exciting and interesting book ever published."

In addition to the above list we have many other first-class works which offer good inducements to active men and new works constantly received.

Those desiring an agency on any of these works will please apply at once for terms to agents, etc., etc., and name two or three counties that will be satisfactory, when their first choice will be given if possible.

Pacific Mail Steam Co's Steamships

— FOR —

NEW YORK, JAPAN AND CHINA

Will be Dispatched as follows:

LEAVE WHARF CORNER OF FIRST AND BRANNAN STREETS, at 11 o'clock A.M. of the following dates, for PANAMA connecting via Panama Railroad with one of the Company's splendid Steamers from ASPINWALL for NEW YORK.

On the 6th, 14th, 22d, and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Transatlantic Company's Steamer for St. Nazaire, and English Steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English Steamer for Southampton, South America, and P. R. R. Co.'s Steamer for Central America. Through tickets can be obtained.

Departure of the 6th connects with English Steamer for Australia.

The following Steamships will be dispatched on dates as given below.

STEAMERS FOR JUNE, 1868.

June 6th—CONSTITUTION, Captain ——— connecting with HENRY CHAUNCEY, Capt. Gray.
June 13th—GOLDEN CITY, Capt. Lapidge, connecting with OCEAN QUEEN, Capt. King.
June 22d—GOLDEN AGE, Capt. Farnsworth, connecting with RISING STAR, Capt. Conner.
June 30th—SACRAMENTO, Captain Parker, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock.

Through tickets to Liverpool by the "Cunard," "Inman," and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired, an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship GREAT REPUBLIC, Capt. S. Doane, will be dispatched June 3d, at 12 o'clock, noon, from wharf corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting at Yokohama with the Steamship COSTA RICA, for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Co.'s Office, corner of Sacramento and Leidesdorff Sts.

OLIVER ELDRIDGE, Agent.

ILLUSTRATION OF DIVIDENDS OF PROFITS

—OF—

United States Life Insurance Comp'y,

NEW YORK.

OFFICE, No. 40 WALL STREET.

CASH ASSETS EXCEED $2,700,000.

SIXTH TRIENNIAL DIVIDEND.

The Board of Directors have this day declared a Dividend of FORTY PER CENT. for the three years ending at the 4th March, inst., to holders of all Policies then in force, on the whole sum of the annual participating premiums received during the said three years; and an additional Dividend of TWENTY PER CENT. on the whole sum of all previous Dividends and Additions, to holders of such Policies who have fulfilled their engagements with the Company, both Dividends being payable and available in the various modes explained in the Company's Prospectus.

For example, on a policy paying one hundred dollars a year of participating premium, the profits for each year and the total at each year on this system are:

Year.	Yearly.	Total.	Year.	Yearly.	Total.
1	$40 00	$40 00	28	$206 39	$2702 23

Sermon,

PREACHED BY REV. JNO. G. FACKLER, IN THE CENTRAL CHURCH, SAN FRANCISCO, MARCH 22, 1868, ON A COMMUNION SABBATH.

"Unto you, therefore, which believe, He is precious."—I Peter 1: 7.

It has been remarked by an earnest-hearted commentator, that the Apostle Peter, in his epistles, makes special mention of *four* precious things as belonging to the religion of our Lord Jesus Christ. These are, "precious *faith*," "precious *hope*," "precious *blood*," and "precious *Savior*." Each of these might be the theme of a series of instructive discourses, without exhausting the subject. I propose, however, mainly to confine attention this morning to a consideration of the apostle's precious *Jesus*. Of course the discussion will necessarily involve some of the ideas involved in the other objects of preciousness to Christian believers.

When we speak of a thing as precious, we may be said to mean by it: first, the great *price* or *costliness* of the thing, as, for example, a precious *stone*. This, from its rarity or scarcity, would be likely to be all the more costly. A thing is precious when it is in itself of great value or worth—possessing qualities that are peculiar to itself. As, for example, in Proverbs it is said of *wisdom*: "She is more precious than rubies." Again, a thing is precious when it is highly prized and much esteemed. An instance of this is given in the account we have of the "child Samuel ministering unto the Lord before Eli," where it is declared, "And the word of the Lord was *precious* in those days; there was no open vision." The meaning unmistakeably is, that, as a rule of faith and conduct, God's revealed will was greatly valued by the people who had it. And once more, we may say that a thing is precious in view of the actual benefits and advantages it secures to them who possess it. Thus, *bread* would be precious to one in a starving condition; *water* would be precious to a man ready to perish without it; and so *help* would be precious to an individual exposed to great peril, and crying in his distress for deliverance.

Now, I think it will not be difficult to show that all these ideas are included in this word precious, as we find it in the text, applied to the Lord Jesus. He is precious in the sense of the amazing costliness of His sacrifice for sinners. His is the only offering that could be acceptable for the lost and ruined. There never has been, and there never can be, but *one Jesus*. "There is none other name under Heaven, given among men, whereby we must be saved." He is precious, therefore, in the intrinsic value of His person and work. In this regard He stands isolated in the universe of God. He has a *name*, "which is above every name." There is in Him an infinite depth of merit, that swallows up the value of all things else. He is precious in that He is dearly esteemed and prized by those who entrust the keeping of their all to His hands—a depository, in which are laid up the treasures of every needed supply. And again: He is precious because of the *positive* blessings He alone secures to those that believe in Him. He is bread to the hungry soul; He is water to the thirsty; He is actual deliverance to the imperiled, helpless, and lost. "Unto you, therefore, which believe, He is precious."

But beyond what has been already said, it will be well for us to inquire into some of the particulars concerning Christ that furnish the ground of our rejoicing and hope in Him. Attention to these particulars will serve to heighten our appreciation of Him as one precious to the believer.

I. In the first place, my brethren, consider that the work that the Savior accomplished was by the direct *appointment* of God the Father. Now, what every builder needs, as a preliminary to any structure he would rear, is a foundation. Of this your observation assures you. In the matter of all education, and especially professional education, there are what we term rudimentary or first principles to be learned, as a foundation for all that is to follow. And so in the matter of moral character and conduct, there must be certain well ascertained truths recognized as the starting-point of all future growth and progress. Now, Christianity has its first principles, as unquestionably as any other system. If there is a Heaven, and if there is a moral character needed, to fit us for a residence in that holy place, there must be a foundation on which that character is to be built. The apostle, in the opening verses of the chapter before us, states distinctly that Jesus Christ is "a living stone, chosen of God and precious;" on whom the Church, and every individual member of it, is to "be built up a spiritual house." He quotes from the prophet Isaiah to show that it was by the very *appointment* of God that this thing should be: "Behold, I lay in Zion a chief cornerstone, *elect*, precious; he that believeth on Him shall not be confounded." In the application of this figure of a *stone* to Christ, we have very clearly set forth the idea of His invincible strength, as a foundation for the Church, which is to have an eternal duration. In the fullest sense it is true that our Lord and Savior voluntarily offered Himself as a substitute for lost and perishing sinners; but it is also true, and should never be forgotten by any, that He came into our world by the appointment of His Father. He did not thrust Himself, unbidden, between God and the transgressor. He was an "*elect stone*," "chosen" for a specific work, and therefore, as Peter says, "a *precious* stone." And not only this, He is a "*living* stone," having everlasting life in Himself and communicating that life to all who build upon Him. Hence, the marvelous language of our apostle here addressed to believers: "*Ye, also, as living stones*, are built up a spiritual house, a holy priesthood, to offer up spiritual sacrifices acceptable to God by Jesus Christ." There is no truth taught in these Scriptures more clearly than that a *divine life* pervades the soul of every lover of Jesus. And you may know, beyond all reasonable doubt, every one of you, whether you are on this "living stone," by the activities of your spiritual nature. There is a warm life in Jesus Christ. It is not possible to come in contact with Him without becoming ourselves "living stones." The Church of Christ is a great Temple, but it is not composed of dead materials. Nor is it an empty, unfurnished edifice—*cold, cheerless, bare*. By no means. The Holy Spirit brings into it a thousand graces and adornings, beautifying all its parts, and cementing them more and more, as the building enlarges and grows under the hands of the Great Architect. Our religion is a thing of *comfort*. If there is no hope or joy in your profession, you may know that you are not on the Foundation. If there are no earnest and increasing spiritual desires in your experience, then Christ is not precious to you. And if He is not precious to you, what evidence have you that you *believe* in Him? The text affirms a distinct proposition. It means just one thing—*one only*. It means that "to you which believe *He is precious*."

II. We are now prepared to notice a little more closely *the medium through which Christ is here said to be precious*: "Unto you which *believe*." Something more is needed than a simple assent of the mind to the story of Jesus *as true*. Something more is needed than the additional *consent* of the mind to the truth of the story. These mental processes may bring a soul *near* to Christ; but they are not sufficient to make Him *precious* to that soul. There is another and a final step to be taken; *the soul must trust Christ*; must lay itself on Him as the only foundation. This is faith; this is believing, *assenting, consenting, consenting, trusting*. Faith brings distant objects near, and makes them real; it is the telescope of the soul. It brings Christ near to the spiritual vision, that we may behold His beauties and learn to admire and love Him.

Some years ago, during a visit to the wonderful Falls of Niagara, I gazed through a large trihedral prism upon the immense volume of water, as it swept over the awful precipice, and I cannot describe to you the glorious effect it produced on the sight. Every object upon which my eyes rested was outlined with great distinctness, and the rays of light were caught up and thrown in all the gorgeous colors of the rainbow over the descending flood. I think I shall never forget the forms of beauty in which that whole scene was clothed. Now, God's Word, in some degree, may be likened to that magnificent prism. Through it the faith of the Christian, looking up to the Lord Jesus Christ, beholds the rays of Divine truth lighting up His Person, and character, and work, with a glory absolutely indescribable. And as the blessed King in Zion is thus brought within the range of the believer's vision, his delighted soul cries out: "*He is the chief among ten thousand; yea, He is altogether lovely!*" Moreover, when once the eyes of faith have caught this enrapturing view, the trusting and rejoicing heart is sure to pray, "Lord, *increase* my faith!" For it must not be forgotten that the larger our faith, the more extended will be the view of the wonders of our Redeemer. And this leads me to remark that when a sinner believes, Christ is precious to his soul.

1st, *In His Person*. As the Son of God, He is seen by faith, clothed with infinite majesty and dignity. As the Son of man, He is beheld in the sinless perfection of our nature. As the glorious God-man, "Grace is poured into His lips," and He appears fairer than the sons of men. There may be a mystery, as there undoubtedly is, in the doctrine of the Incarnation. To human reason it may be an insoluble mystery; but it does not follow, by any means, that the acceptance of the doctrine is a *violation* of reason. The fact that we cannot understand the *mode* of such an existence offers no barrier to our belief in it as a necessary condition to our reconciliation with God. On the contrary, where the Gospel scheme of mediation between God and man is submitted to our consideration, it is seen to be the only system capable of awakening a rational hope of our recovery and restoration. The reason of men, so far from staggering under the suggestion that a mediator between Heaven and earth *must bear the nature of both*, is positively bound to *approve* it, as the one only conceivable expedient in such an emergency. If the great principle of representation is to be recognized in the matter of our relations to God, it is readily discovered in the person of Christ. Hence, it is absolutely essential to our peace of mind that we should believe in the doctrine of "*God manifest in the flesh*."

Take away the incarnate mystery and you destroy at once and forever the idea and the hope of a *mediator*. Take away *mediation*, and clouds of wrath and retribution, gathering around the throne of Almighty Justice, will eternally forbid the approach of sinful man to his offended Master. Take away the *Person* of Christ, as the God-man, and you pluck the sun out of the heavens and leave the world to wretchedness and gloom. "Unto you, therefore, which believe, He is precious," *in His Person*.

2d. But again: Jesus is precious *in His character*. If you regard Him simply as *human*, you find Him towering above all the sons of men. Drop for a moment from the mind all idea of the *divine* in Him, and behold Him as the Christ of history only. From the beginning until now He appears as the great central figure of the world. In the faultless features of His character, He is lifted up so far above mankind that even those who deny His divinity, confess Him as dwelling in the regions of unapproachable perfection. From childhood to manhood, and from manhood to the Cross—in Galilee and Jerusalem; in the fishing-boat with His disciples, and in the Temple, disputing with priests and Pharisees; in the mountains praying by night, and in the midst of multitudes, uttering His solemn instructions; in the house of Simon the leper, and at the feast in the house of Matthew the publican; in Bethany, partaking of the hospitality of Martha and Mary, and at Jericho, talking with the blind beggar; on Olivet, weeping; in the "supper room," celebrating the Paschal supper with His disciples; in the garden, agonizing; in the moment of betrayal; before Pilate

and Herod; on the cross and in death—yea, at every point in His earthly career, it is impossible to detect one trace of a sinful thought or emotion, one mark of defect in His character. When Pilate declared to the Jews on the morning of the crucifixion: "*I find no fault in Him,*" he expressed a judgment that has been reaffirmed by thousands and tens of thousands in every subsequent age. Now all this, I say, is true of Jesus Christ, on the side of His human nature; but when we look at Him as divine and human, with all the attributes of both natures in constant manifestation, oh, it is then that He becomes "precious to them that believe;" precious beyond all power of thought.

3d. Once more: To us that believe, Christ is precious in *the gracious doctrines that He taught.* I think no man can read these Scriptures carefully and candidly without considering the fact that on every subject proper for us to know, Jesus has spoken with the utmost clearness. With the Bible in his hand and a lawful desire in his heart, any one may find all the instruction that his immortal interests require. There is not a question—no, not one, which our anxious souls have ever asked about the matter of our duty and happiness, that He has not answered, and answered fully. He has not only told us what we need, but He has made known the *remedy* for every want, and how we may obtain it. He has lifted the curtain that hides the future from the present scene of things, and given us a view into the measureless depths of the world to come. The great question, the question of absorbing interest to the heart of humanity; the question, "*If a man die, shall he live again?*" our blessed Lord has forever settled in favor of the hopes and yearnings of the soul. Oh! what a proclamation of gladness is it to hear from the lips of the "Teacher come from God," the testimony He bears to them that believe in Him—"Because I live, ye shall live also. He that believeth in me, though he were dead, yet shall he live." Yes, yes, my brethren, "unto us which believe" He is precious," in His character of Teacher and Revelator. I do not wonder that multitudes of eager listeners hung upon His words. He uttered sayings that have gone thrilling through the earth and down the ages, sweeping human hearts with the voice of power, and calling up from the deep of the soul the energies of immortality! Strike out from the thoughts, and language, and hopes of mankind all that Jesus Christ taught, and you instantly impoverish the world in respect to everything that is truly noble and good. There would not be moral and religious truth enough left to illumine a single question of human happiness, or send one ray of light beyond the mouth of the sepulchre.

4th. But above every consideration, Christ is "precious to us which believe," *because of the work He has wrought for us, and the motive that led Him to accomplish it.* Jesus did far more than to tell a race of fallen beings of their helplessness and need of salvation. To have convinced the world of its awful sin and ill desert, without the offer of an adequate remedy, would have been to leave us in despair. We are indebted to the infinite compassion of Christ for the whole method of our recovery. He Himself becomes our salvation. How precious He is to them that believe may be estimated on the ground of two considerations. *First, of the great misery from which He delivers us; and secondly, the positive blessings secured and given to us.* We can form no correct opinion of the work of our Lord and Savior without keeping this two-fold idea before the mind. Deliverance from death is unquestionably a great cause of gratitude. To be taken in our helplessness from "the horrible pit;" to be lifted out of the "miry clay," is surely wonderful mercy and kindness. But this is a very *partial* representation of what is meant by Gospel salvation. Salvation has *two* parts, which can never be separated without marring the whole idea. The Psalmist gives utterance to the true conception of it when he says, "I waited patiently for the Lord, and He inclined unto me and heard my cry. *He brought me up, also out of an horrible pit, out of the miry clay.*" Now, here we have set forth the first part of the work done for the helpless and exposed soul. He is delivered from his peril; "*brought out*" as it is said, from the danger about to overwhelm him. But this is not all. Following this deliverance is the bestowment of something else, without which the other would be incomplete. Listen to what David further says was done for him: "*And He hath set my feet upon a rock and established my goings.* And He hath put a new song in my mouth, even praise unto our God." It is easy to see how this view of the subject is calculated to heighten the believer's joy and increase the sense of his obligations to his Lord and Redeemer. "Snatched from hell and the grave; ransomed from death and despair." Oh, this is surely ground of rejoicing! But the soul wants more, and has more, in Christ; it has One mighty and able to take charge of all its eternal interests, and bear it on and upward to a heaven of unbroken rest and happiness. Thus it is that by all the wretchedness and misery we escape, and by all the joy and gladness we have, and shall forever have, Jesus "is precious unto us that believe."

5th. And still again: Christ is "precious unto them which believe," from the further fact, *that He daily imparts consolation and grace, and inspires the hope of better things to come, by the promises of His word.* The Holy Spirit is truly the Comforter of God's people. He dwells with them and in them. He is Christ's great Witness-Bearer to the souls of men. It is His testimony that assures us of our acceptance in the Beloved. In the absence of His bodily presence, our glorious Redeemer is not unmindful of his children for one single moment. He does not leave them to struggle in the awful conflict of a sinful world, alone and unaided. "I will not leave you comfortless. I will send you another Comforter, that He may abide with you forever, even the Spirit of Truth." Oh, what words of tenderness are these, and what matchless kindness do they show to be always in the great heart of our loving Lord! You have had an experience of the consolations and joys here referred to. And as the waves of delight have swept over your souls, while Jesus spoke to you by His Spirit, and owned you for His children, each of you has cried out in the transport of your bliss:

> "Yes, thou art precious to my soul,
> My joy, my hope, my trust;
> Jewels to thee are gaudy toys,
> And gold is sordid dust."

In grief or gladness, in prosperity or adversity, living or dying, "unto them that believe, He is precious." It is one of the glories of our holy religion that, while it heightens our enjoyment of all that we may lawfully possess, it is never more comforting to the child of God than when he is about to be separated from everything else. I have known men to be stripped of what many would term their earthly all—relatives, friends, property, position, health—and yet they never lost the sunshine of their Savior's presence. They carried His image enshrined in their hearts, and as the eyes of their faith gazed upon it they felt that they could find a heaven of satisfaction in Him.

6th. And now, finally, let me remark that Jesus is precious in the double consideration that He never ceases to remember us, nor lets us forget Him. It is a wonderful expression of His loving-kindness that He has established this blessed ordinance in the Church. If He asks us to "remember" Him in our observance of this holy sacrament, He also pledges Himself in it to remember us. Oh, who that knows the proneness of our sinful hearts to forget the Author of every mercy, does not feel profoundly thankful that our condescending Redeemer has set these sweet memorials of His work, and passion, and death before the eyes of His followers as a perpetual reminder of the debt of love and gratitude they owe to Him?

It does seem to me that nowhere and at no time in all his experience ought the believer to find Christ more precious to Him than when celebrating the ordinance of the Sacred Supper. It is bleeding, dying love we see to-day exhibited in these emblems. Brethren, this is not a feast of mourning. This is not an occasion for lamentation. If ever those who believe in the Son of God as a sacrifice for sinners should be joyful in the Author of their salvation, it is at such a time as this. By no means let us repress a single tear of penitence or contrition, in view of our own unworthiness, as we approach this table, but by all means let us have joy and gladness as we hold communion with Him who is always precious to them that believe. Blessed Jesus, we will remember Thee this morning as the sinless One, who didst render an acceptable obedience for us! We will remember Thee in Thine agony and blood, bearing the penalty due to our guilt and transgression! We think of Thee as our Reliever from death and hell, and the Restorer of our souls to the friendship and favor of an offended Father! We think of Thee as breaking through the mighty bars of the grave and coming forth, "leading captivity captive!" We think of Thee, here at Thy table, in all the rich consolations of Thine infinite grace; the Soother of all our sorrows, the Life of all our delights! Oh, Jesus, enthroned in light and glory, Thou art still our Friend and Brother! We look up to Thee as our Mediator, and we commit, without one fear or misgiving, the momentous interests of our souls into Thy hands! We accept thy sacrifice as a full satisfaction for us before the Throne of Justice! We behold Thee as "the Lamb of God, which taketh away the sins of the world." We believe in Thee; we trust in Thee, and Thou art very "precious" unto us!

The American Sunday School Union

Having commenced the Sunday School Missionary work on the Pacific Coast, we are ready to aid in organizing Sunday Schools and aid existing needy Schools.

We have just received a fine and large assortment of the publications of the Society, which we supply to Schools at reasonable rates. We also supply the periodicals of the American Sunday School Union. The

CHILD'S WORLD,

a beautifully Illustrated Paper for Children and Youth. Monthly, at 12½ cents each per year for ten copies and upwards, and 24 cents for the semi-monthly. Also,

THE SUNDAY SCHOOL WORLD,

a Sixteen-Page Quarto Monthly Paper for Sunday School Officers and Teachers, at the low rate of Fifty Cents per Year. No Sunday School Teacher should be without this paper.

Rev. Richard Newton, D.D., the Editor of these papers, is acknowledged to possess unsurpassed abilities as a Sunday School writer. The above rates are in Currency.

Catalogues of the Society's publications, and Sample Copies of its Periodicals furnished gratuitously on application to Wm. F. Peters, care P. O. Box 1007, or at the Depository, 302 Montgomery Street, (Second Floor, Room No. 2,) San Francisco, Cal.

Incompleteness.

Nothing resting in its own completeness,
Can have worth or beauty: but alone
Because it leads and tends to farther sweetness,
Fuller, higher, deeper than its own.

Spring's real glory dwells not in the meaning,
Gracious though it be, of her blue hours:
But is hidden in her tender leaning
Towards the summer's richer wealth of flowers.

Dawn is fair, because her mists fade slowly
Into day, which floods the world with light;
Twilight's mystery is so sweet and holy,
Just because it ends in starry night.

Life is only bright when it proceedeth
Towards a truer, deeper life above;
Human love is sweetest when it leadeth
To a more divine and perfect love.

Childhood's smiles unconscious graces borrow
From strife that in a far-off future lies;
And angel glances veiled now by life's sorrow,
Draw our hearts to some beloved eyes.

Learn the mystery of progression duly;
Do not call each glorious change decay;
But know we only hold our treasures truly,
When it seems as if they passed away.

Nor dare to blame God's gifts for incompleteness;
In that want their beauty lies; they roll
Towards some infinite depth of love and sweetness,
Bearing onward man's reluctant soul.

—*Miss A. A. Proctor.*

Tired.

Yes, I am tired, dear. I will not try
To stem the ebbing current any more,
Nor vex with fruitless prayer the iron sky,
Nor dew with idle tears the barren shore.
The rippling waves that kissed my happy hand,
The waves with laughing music in their flow,
Sadly I watched them o'er the broadening sand,
But I am very tired—let me go.

Too long my chafing pride has stooped to strive
To fan the embers into life again;
No faith can keep the flickering flame alive,
The lingering vigil is but lingering pain.
Too late the voice assumes a tender tone;
Too late the lip in loving smiles is drest;
The tide is out; the last faint spark is gone,
And I am very tired—let me rest.

Yes, tired—neither angry nor ashamed;
Each wretched mode has fret its feverish hour;
Let the pale bud lay withered and unclaimed—
Dead, or to gracious sun or pitying shower.
Perchance some little life may linger yet
In the crushed stem and withered leaves we see;
But what avails repentance or regret—
I am so tired—tired let it be.

I did so much; I am all worn and cold;
I strive no longer; that which must be, must;
I could not give your hand the strength to hold,
I could not give your heart the depth to trust.
How you will miss me! I could weep your want
Of the close, silent love that fenced you so;
The cup I filled was neither weak nor scant,
But I am very tired—let it go.

—*Tinsley's Magazine.*

Gen. Fisk and the Theater.

A lady friend of Mrs. Fisk called on them the other evening at their rooms in the St. Nicholas Hotel, and requested them to go with her to the theater and hear Mr. Booth in Romeo and Juliet.

"I can not go," said the General, "I have an engagement."

"Ah, but you can get released from your engagement," she insisted. "What is it, if I may be so impertinent?"

"It is the evening for my prayer meeting," he replied, "and I make it a point always to be present when possible.

The lady seized his hand and tears filled her eyes as she exclaimed, "General, you have preached me the best sermon I have heard for many a month. I, too, am a member of the church, and ought to be as punctual and faithful in my duties as you are, but I am not. But do you really think it is wrong to attend the theater?" she added, after a slight pause.

"It would probably do *me* no harm," he replied: "But suppose I were to go for this season. Mindful only of my own pleasure or of its influence on myself, I take my seat. Yonder is a young man who has been enticed to the place, not without some misgivings of conscience; he casts his eye up, and says to himself with some satisfaction, 'Ah, there is General Fisk. He is a good Christian man, I heard him deliver an address to a Sabbath school the other Sabbath; surely I must be all right in Christian company.' No," said the noble Christian man, "I can not lend my influence to that which is corrupting the youth of our land and debasing society."—*Christian Advocate.*

It's Me.

Passing a neat little martin-box of a house last evening, we happened to see a man waiting at the door for admittance. At the instant, a green blind above opened just a little way, and by the gas-light we caught a glimpse of a pair of briliant eyes, and a flutter of something white, and a bird-toned voice softly said,

"Who's there?"

"It's me," was the brief response. The eyes and flutter disappeared from the window, like stars in a cloud, and we almost fancied, as we passed on, we could hear the pattering of two little feet upon the stairs, winged with welcome.

It was a trifle; it all happened in an instant, but it haunted us for an hour. "Its me." And who was "me?" The pride of a heart's life no doubt; the tree a vine was clinging to: the "Defender of the Faithful" in the best sense in the world.

"It's me!" Many there are who would give half their hearts, and more than half the hope in them, for one such recognition in this "wide, wide world!" On "Change," in the Directory, in the Post Office, he was known as A. B. C. Esq.; but on that threshold and within these walls, "it's me," and nothing more; and what more is there one would love to be?

Few of all the hearts that beat so wildly, warmly sadly, slowly, can realize a true soul amid the din and darkness of the world, in that simple but eloquent, "it's me." As if he had said:

Now I am nothing to all the world,
For I'm all the world to thee.

A Pity to Have an Empty Seat.

A few weeks ago, a gentleman was obliged to go to a distant *depot* at an hour when there was no conveyance thither. So, although very weary, and not strong, he was obliged to set out on a walk of two or three miles. After he had gone a little way he was overtaken by a gentleman and a little boy in a carriage. The fine horse was at once reined in, and his owner said with a smile, "I presume, sir, you are going but a short way; but this little fellow insists on my asking you to ride with us. I told him, no doubt you were going to the first station; but he said, 'The gentleman is a stranger, father; it is very easy to *ask* him. It always seems to me such a pity to ride with an empty seat."

Now, that ride which cost the gentleman neither money, time, nor trouble, was a real blessing to a weary minister of Christ; and he told him so when he thanked him, and the dear boy who prompted the civility.

"It is a way he has, and always had, sir," replied the father. "From his cradle, he could never enjoy what he could not share with others. If he has any new gift or pleasure, his first thought is for those less favored. It is a way he got from his mother."

It was truly a beautiful "way" that boy had; and it should be a lesson to all boys, and boys' mothers, too, who hear of him. The little things of to-day will grow into great things of years to come. The boy who is selfish with his toys and his comforts, will be so with his money and his sympathies when he is a man; for the heart grows harder, rather than softer, by the flight of time.

A carriage is not the only place, where "it is a pity to have an empty seat." It is a pity to have one in the Church, or in the Sunday School; and there would be a less number so, if all the boys had the spirit of the little fellow of whom we have written. Say with him, "It is easy to *ask*!" and then go among the boys you know, and urge them to fill an empty seat. You can do far more in this way, than your minister or teacher can.—*South. Churchman.*

The Young Folks.

Grandma's Dreams.

BY EMILY H. MILLER.

I wonder what grandma is thinking about,
As she sits in the corner there,
With the firelight shining into her eyes,
And over her silver hair?
She has laid her knitting across her knee,
And folded her hands so thin,
And I know that her thoughts are far away,
In spite of the children's din.

I'm sure it is something strange and sweet,
That brightens her eyes so dim;
Perhaps she is seeing the golden gates,
And hearing the angels' hymn!
And she smiles to think that she soon will cross
Where the wonderful river rolls,
And gather the rose of her youth again,
In the beautiful garden of souls!

—*Little Corporal.*

A Case of Conscience.

A HINT TO YOUNG MEN.

Henry Hunt was teller in the First National Bank. Everybody had faith in Henry Hunt. His character was as clear as a glass paper-weight. You could see straight through to the heart. But his head, as you will see, was not always as clear as his heart.

He was standing behind the counter alone, one day, when his uncle George came in.

"Well, Henry, I've made up my mind, rather suddenly, to sail to-morrow; and here are five thousand dollars in greenbacks, which I've no time to invest. Take care of them and get me a good interest if you can."

"Why what a quick start you make! But I'll do the best I can with your money."

They chatted awhile, till at last his uncle bade him a warm good-bye, and was off.

Henry put the money into the vault, and for some days was so busy that he hardly gave a thought to it. But the next week James Harte and he were alone in the bank, one day, after bank hours. He had balanced his account and done up his other work, when as he happened to go into the vault, he caught sight of the little tin box that held his uncle's money.

"There, now," he said to James, "is that five thousand dollars. Something must be done with it."

Let us listen to the talk that followed.

"Why don't you put it into United States bonds?"

"I don't know. The Sonora gold mine promises fifteen per cent. sure, with a fair prospect of fifty."

"A very moderate promise for a gold mine."

"Yes; so much the more likely to be safe. Uncle asked me to get him a good interest. Seven per cent. would be good. To be more than just I'll call it eight. Fifteen per cent. would then leave me seven for myself."

"But, my dear fellow, you've no right to do any such thing."

"And pray why not, I should like to know? Isn't eight per cent. good interest? If he has that, with the principal all safe, don't he get his full rights?"

"But this Sonora business is a doubtful affair. You ought not to run such a risk."

"Stuff! Hasn't Mr. Rundle given the matter careful thought? And hasn't he put in five thousand?"

"He had a right to risk his own money if he chose."

"There's no risk worth speaking of. Besides, risk isn't *loss*. When uncle gets his money back, principal and interest, how much will it hurt him to know that there has been some little risk about it?"

"But suppose you lose it, every dollar! And there's another thing about it, suppose it should be lost, could you repay it?"

"Why, no, I haven't a dollar in the world."

"Then your uncle takes the risk don't he?"

"Yes, I suppose he does—what there is of it."

"Well, now, don't you know that risk is as much a business commodity, bought and sold every day, as beef or broadcloth? Don't you know that the Life Insurance companies hold that they have paid you squarely for your $100 when they have taken the risk for a year of being obliged to pay you, say $8,000? And don't you see that if your uncle is

made to take the risk, the benefit of it, if any, is *his* property, not yours?"

"I never thought of that before."

"Then it's high time you had! But there's another point in this matter. If you own an apple-tree, who owns the apples it bears?"

"I do, of course."

"Well, if your uncle owns this $5,000, who ought to have the fruit of it: in other words the interest?"

"You are cramming me into rather a close corner!"

"No I'm not. The truth is doing it."

"But look here. I can turn the tables on you. Has not skill, business tact, a marketable value?"

"Certainly."

"Well, then; if by my shrewdness, I get fifty per cent. for this money, haven't I a right to be paid for it?"

"Not at all, unless you have made some bargain to that effect. Suppose a man should come by night, without your consent or knowledge, and enrich and prune your apple-tree; and then in the fall, should demand half the fruit of it. Would you acknowledge the claim?"

"Well, no. But I should feel pretty mean, if I didn't give him some of it."

"Just so; but you wouldn't let him demand it. The facts about this matter, then, are, first, that your uncle, because the money is his, has sole right to the interest of it, unless by a bargain with you, he gives up part of his right; and secondly, that he has full title to it because the risk is his; and so whatever profit may come out of the risk."

"But suppose I were able and willing to take the risk?"

"So far, so good. But that would not make the *money* yours, or authorize you to get profit out of it without the owner's consent."

Henry thought long and soberly over the talk It set the whole thing in a new light before his mind He resolved to follow *James'* advice. And if any o my young readers are in any such quandary, let me urge them, "Go and do likewise."

Little Lillie was Right.

One day a lady was teaching a class of little girls in Sunday-school.

"My dear children," she said, "How soon may we give our hearts to God, and become true Christians?"

They didn't answer at first. Then she spoke to them one by one. Turning to the oldest scholar in the class, she asked:

"What do you say, Mary?"

"When we are thirteen."

"What do you say, Jane?"

"When we are ten."

"What do you say, Susan?"

"When we are six."

At last she came to little Lillie, the youngest scholar in the class.

"Well Lillie," she said, "and how soon do you think we may give our hearts to God?"

"Just as soon as we feel that we are sinners, and know who God is," said Lillie.

How beautiful an answer that was! and how true! Yes, "as soon as you feel you are a sinner, and know who God is," you may give him your heart and become a Christian.

EVERYBODY BUT BOB.—A very little boy, after giving every body a good-night kiss, kneeled at his mother's side to say his evening prayer. He repeated "Now I lay me down to sleep," etc., and continued, "God bless papa and mamma, and make them good Christians; God bless little Jimmie, and make him a good boy."

His mamma added, "God bless everybody."

At this last sentence he was silent. His mother repeated it a second, and a third time; when he raised his head and said:

"Everybody but Bob, mamma. Bob drowned my cat to-day."

Are there not some older children who can pray for "everybody but Bob?" Remember that the Savior has taught us to pray, "Forgive us our debts as we forgive our debtors."—*Religious Herald.*

Good to begin well, but better to end well.

A Plea for the Little Folks.

Don't expect too much of them; it has taken forty years, it may be, to make you what you are, with all their lessons of experience; and I dare say you are a faulty being at best. Above all, don't expect judgment in a child or patience under trials. Sympathize in their mistakes and trouble; dont ridicule them. Remember not to measure a child's trials by your standard. "As one whom his mother comforteth," says the inspired writer, and beautifully does he convey to us the deep, faithful love that ought to be found in every woman's heart, the unfailing sympathy with all her children's griefs. When I see children going to their father for comfort, I am sure there is something wrong with their mother.

Let the memories of their childhood be as bright as you can make them. Grant them every innocent pleasure in your power. We have often felt our temper rise to see how carelessly their little plans are thwarted by older persons, when a little trouble on their part would have given the child pleasure, the memory of which would last a lifetime. Lastly don't think a child a hopeless case because it betrays some very bad habits. We have known children that seemed to have been born thieves and liars, so early did they display these undeniable traits; yet we have lived to see these same children become noble men and women, and ornaments to society. We must confess that they had wise, affectionate parents. And whatever else you may be compelled to deny your child by your circumstances in life, give it what it most values—plenty of love.—*Episcopal Methodist.*

"THE EASIER TO CARRY ME."—In a Chinese Christian family at Amoy, a little boy, the youngest of three children, on asking his father to allow him to be baptized, was told that he was too young; that he might fall back if he made a profession when he was only a little boy. To this he made the touching reply:

"Jesus has promised to carry the lambs in his arms. As I am only a little boy, it will be the easier for Jesus to carry me."

This logic of the heart was too much for the father. He took him with him, and the dear child was, ere long baptized. The whole family—the father, mother, and three sons—are members of the mission chapel at Amoy.

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

Also, SCHOOL FURNITURE.

WARREN HOLT,
305 Montgomery Street.

PACIFIC COAST ITEMS.

A LATE number of the Cumberland *Presbyter* contains *five* of our "Current Topics," *two* of which are credited. We also notice the article entitled "Spelling Schools" going the rounds of the papers without credit, together with several shorter items. We are glad that THE OCCIDENT is appreciated by the papers of the State, and that they show their appreciation of its merits by making liberal extracts from its pages. Doubtless the failure to give us proper credit is the result of an oversight.

PORTLAND and East Portland are building up rapidly. Property is enhancing in value, and the people are buoyant and hopeful. This is the legitimate result of railroads. Our mines, manufacturing privileges, almost fabulous agricultural resources, and climate, are attracting the attention of laborers, mechanics, capitalists, and men of leisure. The land of "web-foot" is no longer a term of reproach, and those who have been wont to sneer at us through groundless prejudice, are astonished at our beautiful prairies, grass-clad hills, and never-failing harvests.—*Corvallis Gazette.*

HAYES CITY, on the Pacific Railroad, contains fifteen hundred people, nearly one-half of whom subsist by selling whisky to the other half. The Gospel has never been preached in that place. Shooting at each other is the standard amusement of the lively population—four persons having been shot in a single week recently. Might is right, and the revolver is the court of first and last appeal. It has not rained there for six months.—*Grass Valley Union.*

QUITE a spirited discussion is going on among the State papers concerning the advantages of the proposed plan for shipping grain in bulk. Strong arguments are presented on both sides, but certainly, if grain can be shipped in that manner without injury it is desirable that farmers be relieved from the great burden of buying sacks.

THE President of the Vacaville school, in his annual report given at the last commencement, states that there has been an unusual amount of sickness among the scholars during the past year. The whole number of students for the year has been 228, of which two graduate.

WE learn from the *Territorial Enterprise* that experiments are now being made with the peat found in great abundance in the valley of the Humboldt, with a view to using it as fuel for the locomotives on that part of the railroad. It is said to burn well.

A CORRESPONDENT from Camp Bowie, Arizona, writes, "There are but few items of public interest to be picked up in these parts. The Indians are being fed by Uncle Sam at one post, while they are stealing and murdering at another, not a hundred miles off.—*Montana Herald.*

THE snow is still six feet deep on the Summit. As soon as it melts, the gap in the rail-road will be closed. During the summer, that part of the road which is liable to be impeded by snow will be covered with sheds.

AT a saw-mill in this place, a few days ago, three logs were sawed from one tree, making 24,000 feet of inch lumber. Had the tree been sound, 30,000 feet would have been produced.—*Santa Cruz Sentinel.*

WE have this week heard several parties inquiring for miners to work in their hydraulic claims, but we are informed that they are not to be had in this vicinity.—*Dutch Flat Enquirer.*

WORK has been commenced on the building at Union Square intended for the Mechanics' fair. It is to be a great improvement on the awkward structure of last season.

ACCORDING to the report of the Librarian of the Mercantile Library, 2,818 volumes have been loaned during the year. Of these 2,044 were works of fiction.

THE Sacramento *Record* says that there are orange trees in that city on which may be found ripe oranges, those half-ripe, and so on down to the blossoms.

WE notice that many accidents have happened this season from men falling upon the knives of mowing machines while in motion.

ON the 27th inst., sixty houses were burned in the town of Jackson, Cal. Most of them were occupied by Chinese.

AT the Labor Exchange there continue to be more applications for laborers of all kinds than can be supplied.

A NEW steam plow has been invented at Oroville, which is, of course, far superior to all which have preceded it.

IT is said that in the last twenty years, more than sixty vessels have been wrecked in our harbor.

MANY of the military companies are to be mustered out immediately, by order of the Governor.

A PLEASURE TRAIN will run from Vallejo to Calistoga on the Fourth of July.—*Vallejo Recorder.*

COACHES are now running from Salt Lake to Helena, Montana, 600 miles, in four days.

HAY is worth seven dollars a ton in Marysville.

THE Western Pacific Railroad is now graded within eight miles of Stockton.—*Gazette.*

THE Salem *Record* says that the oldest orchards in Oregon are either dead or dying.

OVER 10,000 lbs of strawberries are received in this city from San Jose, daily.

BUSINESS is dull in Stockton, as it usually is at this season of the year.—*Gazette.*

A GYPSUM QUARRY has been discovered in Lower California.

THE Democrats have carried the election in Oregon.

TELEGRAPHIC SUMMARY.

EASTERN.—James Buchanan died on June 1st....Gen. Stoneman is to command the district of Virginia....Reverdy Johnson is to be Minister to England....The Methodist Conference has voted to admit lay delegates.

POLITICAL.—Immediately after the vote acquitting the President, Stanton sent in his resignation. The President then nominated Schofield, whose nomination has since been ratified by the Senate, with a resolution to the effect that the President had no right to remove Stanton....Schofield has taken possession of the War Office....Grant has written a letter, accepting the nomination and the platform. He will not, however, adhere blindly to any "policy," but will use every effort to bring about peace in the nation....Stanbery has been re-nominated....Chase's position is still doubtful. ....It is reported that Seward has resigned.

IMPEACHMENT—is at last settled. The Senate, on the 26th, voted to acquit the President on the second and third articles, and then adjourned, as a court, *sine die.*

CONGRESSIONAL.—The Senate refused to pass a vote of thanks to Chase for his conduct during the trial....The House passed the Indian appropriation Bill....The Arkansas bill is still under discussion.

FOREIGN.—The North Germ. Gov't has abolished imprisonment for debt....Revolutions against Juarez are still reported from Mexico....The Bavarian Government has made a treaty with the United States for the protection of the rights of naturalized American citizens....Parliament has adjourned till June 4th....The panic in Canada still continues. No battles have yet been fought; but the Fenians threaten great things.

WEEKLY MARKET REPORT.

Produce Market.

WEDNESDAY, June 3, 1868.

FLOUR—The shipment to Asia by the *Colorado* to day consisted of about 1,900 bbls. Sales include 450 bbls Oregon, ex steamer, private. It is understood that considerable purchases have been made on account of Australia, the particulars of which have been withheld. We quote city mills as follows: Superfine, hf sks, ₱ 196 lbs, $6 37½@6 50; do, qr sks, $6 62½@6 75; Extra, hf sks, $7 25@7 50; do, qr sks, $7 50@7 75.

WHEAT—The China steamer this morning carried 3,000 centals. The amount would have been larger but for the delay in the arrival of expected lots. Sales to-day include 175 sks choice Santa Clara, $2 25; 324 sks do, $2 62½; an advance of 2@12½c since yesterday.

BARLEY—The market is apparently very firm at $1 85@$1 95 for feed and brewing. Sales include 2,000 sks choice, private; 1,200 sks brewing, $1 92½; 1,300 sks Coast, $1 92½ ₱ 100 lbs.

OATS—Small sales are reported within the range of $2 20@$2 40 ₱ 100 lbs for fair to choice.

POTATOES—Fair to choice Bodegas are selling at 50@62½c, and Humboldt, 70@85c. Sale of 200 sks Humboldt, 75c. New Mission are quoted at $1 75@1 80 ₱ 100 lbs.

ONIONS—Choice Red are jobbing at 2⅝c; White, 2¼c ₱ lb.

CORN—Sale of 400 sks Yellow, $2 30, and 100 sks White, $2 37½, an extreme figure. Red is quoted at $2 15@2 20; pale Yellow, $2 30@2 35; and White, $2 30@2 35 ₱ 100 lbs.

RYE—Nominal at $2@2 10 ₱ 100 lbs.

BUCKWHEAT—Demand nominal at $1 75 ₱ 100 lbs.

BEANS—White descriptions are very firm at an advance. The jobbing rates as follows: Bayo, 3¾@4c; Butter, 5@6c; Pea (very scarce), 9@10c; small White, 6½@7; Pink, 3½@4c; Red, 2¼@2½c ₱ lb.

BRAN—In good demand at $26@27 ₱ ton.

MIDDLINGS—Fine are quoted at $45@50, and feed descriptions $33@35 ₱ ton.

OIL CAKE MEAL—This article is gradually gaining in popular favor; quotable at $30 ₱ ton from the mill.

HAY—Old is quite firm at $15@20. Sale of one cargo of good new at $14 ₱ ton.

DAIRY PRODUCTS—Choice fresh roll Butter has advanced to 37½c for small lots, the range for medium to choice being 32½@37½c. California firkin Butter is in lively demand, principally for shipment to the interior. The sales for the week aggregate 500 firkins, the market closing firm at 35c; no good Eastern firkin offering. Cheese commands 14@16c for ordinary to choice California dairies, and 18c for S. Hough & Son's; Eastern Cheese 16@20c ₱ lb; Eggs 32@33c for Hen, and 27½c ₱ dozen for Duck.

POULTRY—Supplies continue light. Live Turkeys are quoted at 16@17c, and dressed do, 18@20c ₱ lb; Hens, $7 50@8; Roosters, $6 50@7; Spring Chickens, $4@5 for small and $7@8 for large size; Ducks, $4 75@5 25 ₱ doz; Geese, $1 75@$2 ₱ pair.

PROVISIONS—California smoked Bacon, commands 15½@16½c; Oregon do, 12@13c; California Hams, 16@17c; Oregon do, 15@16c; California Lard, 14@15c, with 15½ for small tins; Eastern do, 13@13½c ₱ lb. The above are jobbing prices.

WOOL—Dealers report the market quiet at ½c decline. Good clean shipping grades of spring clip are quoted at 17@17½c, while a few extra choice lots command 18c; medium grades, 15@17c, and spring hurry, 12@14c. The sales since last Wednesday aggregate about 200,000 lbs, showing a considerable falling off from the previous week.

HIDES—The importation of Hawaiian per *D. C. Murray* is on account of local consumption. Sales since last Wednesday of 1,250 California dry, usual selection, for export, 14@15c ₱ lb.

TALLOW—The range for fair to choice Beef and Mutton is 7¼c@7¾c, the bulk of the sales being at 7½c ₱ lb.

San Francisco Cattle Market.

Beef is firm, at a slight advance for second quality. Mutton and Lamb are easier. Pork is also a little off.

We quote slaughterers' prices as follows:

BEEF—American, 1st quality, 6@8c ₱ lb.
do 2d do 5@7c ₱ lb.
VEAL—Steady at 7@10c ₱ lb.
MUTTON—Easy at 5@5½c ₱ lb.
LAMB—Ranges from 5½ to 7c ₱ lb.
PORK—Undressed, 4½@7½c; dressed, 7@11c ₱ lb, for the various qualities.

—*S. F. Bulletin.*

MARRIED.

In this city, by Rev. A. L. Stone, D.D., on Thursday, June 4th, WM. HENRY KNIGHT and ELLA J. WATERS, both of San Francisco. No cards.

CURRENT TOPICS.

The resolution of the State Sunday School Convention, respecting our duty to the 60,000 Chinese who are on this coast, is worthy of the spirit and object of those thus assembled. We hope it will not be a dead resolution, but become a quickening power in the churches and Sunday Schools, and Christian hearts of the State. There are difficulties in the nature of the case, attending all attempts to enlighten and evangelize the heathen, but these difficulties are diminished, not increased, by their being in the midst of us. Those who have seriously and with perseverence endeavored to teach the Chinese to read, or respecting the principles of science or in regard to the truths of our religion, have found less obstacles than they anticipated. For the most part, they are eager to learn, and they learn readily. Their prejudices against the gospel are not so formidable as many suppose, and while wisdom, and patience, and kindness must be exercised by those who would gain a lasting hold upon them, most cheering success will reward all who thus try to elevate and bless them. Let the spirit of this resolution be a living influence in the Sunday Schools of the State during the year to come, and we shall have very different reports at the next Convention concerning the number of Chinese who are thus being instructed in the way of life.

None can be more ready to honor the soldiers of our recent war than we. We never meet one in life without a disposition to show some token of respect; we are in full sympathy with the feeling that would cherish the memory of the dead, and hallow with gifts and offices of love the places where they sleep. The proposition that a day be set apart on which the living should visit the graves of their dead comrades, and strew them with flowers, and testify regard by martial honors for the cause they served, and for which they suffered, was received with joy by the grateful citizens of the land they saved. And the scene was at once beautiful, impressive, and grand, as the procession moved through the throng of men, women, and children, burdened with flowers, yet receiving a new contribution on every block, towards Lone Mountain. At the Cemetery, the multitude was so great that the city seemed to have transferred its population, for a time, to the city of the dead, with every device with which to beautify those small and quiet homes. Nor would we have the pageant less imposing, or the number less of those desiring to offer such proofs that our dead soldiers are remembered. But why must it be on *the Sabbath?* Why should a Christian people be diverted thus from duties they ought not to neglect, or disturbed in services they ought to render? Would not our citizens regard such an occasion, unless a day was devoted to it which is released from the demands of business? Must religion be put aside, or patriotism fail of exhibition? We confess, much as we respect the purpose of the demonstration, we were made sad by the display that changed the Sabbath into such a scene, and we will not believe that it could not have been as beautiful, and impressive, and grand, had some other day been chosen for the pageant.

The death of Ex-President Buchanan excites many thoughts connected with the life of a man once so prominent, but now so little missed, which may be very profitable. He was a man of pure intention, for the most part, who deserved and gained the confidence of those who knew him best. He had abilities and features of character which entitle him to be regarded as a statesman, and a portion of his public life illustrates this judgment of him. As a citizen, and neighbor, and private gentleman, there are few of those who have held high positions in this country who are so worthy of esteem. Yet, probably there is hardly a thoughtful man in the nation who does not regret that he was ever President, and none are more sincere in this regret than was Mr. Buchanan himself. He was not equal to the emergency in which he was obliged to administer the government, and his course awakened the pity of multitudes, the indignation of multitudes, and the sympathy and approbation of very few. His life, since he retired from public labors, has been almost secluded, and while his friends and neighbors mourn that so kind and genial an old man has gone, no interest suffers, no vacancy in national affairs is permanent, no schemes of general profit will fail, because he no longer lives. History will give him a place more honorable than many of our generation are willing to assign him, but will not omit the record, that he suffered himself to be President of the United States.

The General Conference of the Methodist Church has wisely yielded to the desire of a large number who seek the highest efficiency of that Church, and provided for lay representation in ecclesiastical bodies. The advantages of such an element in the active administration of denominational interests will be apparent, and the Church will become more in sympathy with the genius of our times and government. We hope that after a few more years of discussion, the General Conference will also provide for permanent pastorates, when these are desired. The itinerant system need not be abandoned, and should not be, for it is admirably adapted to the state of a new region, and to old regions that are sparsely populated; but the privilege can be granted to churches able to support pastors, to retain those who are useful indefinitely, and great advantage would result. There is evident progress towards this change.

The annual report of the Librarian of the Mercantile Library in this city, among other interesting statements, furnishes this food for reflection, that seventy-two per cent. of the books taken from the Library during the year were books of fiction, and twenty-eight per cent. of all other kinds. It is not true that all works of fiction are worthless, nor is it true that the Mercantile Library Association has not been reasonably judicious in the selection of these books from which its members may draw, yet this fact has a phase of sadness, when one thinks of what might have been substituted for at least half of this seventy-two per cent., with undoubted profit. The principal portion of those who read the volumes o any public library are young. They are, therefore, not merely to be affected by what they read, but are cultivating habits of reading that will have great influence upon their characters and lives, and these habits cannot be as profitable as they should be when stories become the chief food for which they acquire a taste. Parents should know what books their children take from the Library, and induce them to select a proper share of those that are instructive aud useful, with those that are entertaining, and young persons themselves should guard against the cultivation of an exclusive love for what is only exciting and unsubstantial.

Now that the contest at Washington, which has so long diverted the public attention from the consideration of more important interests, has at last been settled, and the work of admitting the Southern States has been commenced anew, with good prospects of satisfactory progress, the question of finance must take the front rank among the questions of the day. "How shall the national debt be paid?" is a problem which appears so difficult to some of our journals that they despair of being able to solve it without resorting to a partial nullification of our obligations. There is, however, no necessity for resorting to expedients of such doubtful justice, as will be evident from a simple examination of the amount of the debt. It has been estimated that if the debt were funded at six per cent., the annual interest would be a little more than two per cent. of the average earnings of the common laborers of the country, and only one-half per cent. of the accumulated capital. In order to leave a wide margin, suppose it to be one-half per cent. on both capital and labor. Double this per centage, that, beside paying the interest, the principal may be gradually diminished. Double it again, that ample allowance may be made for the cost of collection, and we have a tax of two per cent. on income and capital. This would be a heavy burden, but by no means insupportable. The people expect to be taxed heavily, and will bear the burden cheerfully, can they feel confident that the money paid by them is devoted to

its legitimate purpose. It remains for the financiers of the country to inspire the people with that confidence, by adopting a system which shall reduce the cost of collecting the tax to the minimum rate, and shall divide the burden according to just principles between the several interests, without "trying to discriminate in everybody's favor." Too much dependence, however, should not be placed on any "system." When a private individual becomes involved in debt, he can only recover himself by strict economy and attention to business, and there are strong reasons for believing that a nation must proceed in the same manner. Any one of the plans now advocated by the different papers and political leaders, if faithfully followed and accompanied by strict economy in the expenses of government, and a willingness on the part of the different interests to bear each its own share of the burden, might accomplish its purpose. Without these accompanying elements, the most brilliant system that the human mind can devise must fail.

Religious Intelligence.

PACIFIC COAST.

Presbyterian Festival.—A pleasant affair to all who participated in it, was the festival given by the ladies of the Presbyterian congregation, at the Pavillion, on Wednesday and Thursday evenings, May 27th and 28th. The weather on both evenings was favorable, and the room was filled with a delighted assemblage of ladies and gentlemen until a late hour. Ice-cream and cake, and strawberries and cream abounded; and the more substantial viands, such as coffee, oysters, sandwiches, and the like, were discussed with such evident relish as to require no other evidence of the culinary skill of those who provided them, and the winning grace with which they were served by fair hands to the discussers of subjects so interesting. The hall was beautifully and tastefully decorated with evergreens and flowers in profusion, and boquets innumerable dispensed fragrance through the room, and adorned every table. Music, too, gave animation and spirit to the occasion, and "all went merry as a marriage bell." Amount realized, after deducting all expenses, $450. No raffling, dancing, or anything detrimental to the cause of Christ.—*Mountain Democrat.*

The Sabbath School of the Green Street Congregational Church celebrated their ninth anniversary on last Sunday morning. The church was beautifully decorated with flowers, evergreens, and mottoes. After the devotional exercises and singing by the scholars, the Superintendent read his report, which shows the school to be in a very prosperous condition. There are 280 scholars belonging to the school, and the average attendance during the past year has been 234. The library contains 700 volumes. Addresses were made by Rev. E. C. Bissell and Mr. J. M. Haven, after which the prizes were distributed to the scholars.—*Times.*

The General Conference of the Methodist Episcopal Church has reversed the action of the California Conference in suspending Mr. S. D. Simonds, four years ago. Mr. Simonds was at that time Presiding Elder of the San Francisco District, and was suspended on account of certain views in regard to the resurrection and the Trinity.—*Times.*

The Strawberry Festival on Wednesday evening, given by the ladies of the Presbyterian church, Marysville, in aid of the Organ Fund, was very successful, netting $200. The ladies having the work in charge are entitled to much credit.—*Sutter Banner.*

EASTERN.

At the Hartford Ministers' Meeting Monday morning, May 4th, there were thirty-six ministers present. A pastor asked advice in regard to baptizing the children of converted Roman Catholic parents where they had been previously baptized by the priest, and this interesting question is to be discussed at an early day. The same matter has been before the pastor's meeting in Boston, more than once within a few years, and it has been decided here that the evils of recognizing the administration of the ordinance by the regularly constituted authorities of any established Christian church would probably be less than those of exalting unduly the importance of the rite, as such, by its repetition.—*Congregationalist.*

Rev. Dr. Breed, of Philadelphia, has published, through the Presbyterian Board, a brief but thorough argument against the theatre, showing what the stage has been, is now, and will be, and must be, while human nature is as it is. He exhibits the opinions of ancient heathen philosophers and of modern actors themselves, uniting in the truth that the theatre is a school of vice. We are especially struck with the fact that the word *pomps*, which occurs in the Episcopal Prayer Book, where the candidate for baptism renounces the pomps and vanities of the world, was employed with special reference to theatrical shows. And the early Church excluded both actors and spectators from her sacraments. If any reader of this is in doubt as to the right or wrong on this subject, we advise the reading of Dr. Breed's tract.—*Observer.*

General George G. Meade has issued a circular soliciting contributions in aid of the Protestant Episcopal church of Atlanta, Georgia. The General says: "Believing that my position will add weight to the appeal now made to Christian friends, and desirous of showing those who are by law placed under my command that neither I nor the people of the North entertain for them any feelings but those of kindness and brotherly love, and that while we deplore the cause and regret the consequences of the war, we are willing to assist in relieving the suffering it has unintentionally occasioned. I venture to make this appeal to you to aid me in raising a fund to be appropriated to putting the house of our Heavenly Father in proper order, and furnishing it in a becoming manner."—*Instructor.*

Sunday Schools.—Our Sunday Schools show an increase in number of children, amounting to 241,819, being some 18,000 more than the addition to our membership. The conversions reported also exhibit a large advance. New publications have been issued from the press, local libraries have been enlarged, and an increased interest has been awakened in the modes of instruction. The formation of Sunday School teachers' institutes has added to this interest, and has been of great service to the cause. How far additional encouragement should be given to this department of labor is worthy of your careful consideration.—*Zion's Herald.*

Father Hecker claims that the Roman Catholic Church numbers one-third of the American population; and that if the membership of his church increases for the next thirty years as it has for the thirty past, in 1900 Rome will have the majority, and will be bound to take the country and rule it. The statement has in it enough of truth to make Protestants serious, but Father Hecker's "if" is a weak point in the logic by which he reaches his conclusion. —*Advance.*

Carlton & Smith, of New York, have published a list of the religious newspapers in the country, numbering 174; of which Maine furnishes 3, New Hampshire 1, Vermont 3, Massachusetts 11, Rhode Island 1, Connecticut 3, New York City 21, Philadelphia 14, Cincinnati 13, Chicago 9, and San Francisco 8. There are 36 Methodist papers published, 30 Baptist, 23 Presbyterian, 13 Catholic, 7 Universalist, and 6 Congregational.

The Hon. Thomas Talbot, of Gov. Bullock's staff, has offered to build a church, costing not less than $10,000 for the Baptist Society of Billerica, Mass. He also agrees to pay $300 annually toward the support of preaching, and to give the Society $5,000 at his death, for the same purpose. Mr. Talbot is a Unitarian.—*Congregationalist.*

Rev. Dr. George Duffield, one of the oldest and most influential members of the Presbyterian Church, speaking in a late meeting of the Presbytery of Detroit, on the subject of union between the Old and New School Presbyterian Churches, said it was his opinion that the committee of the General Assembly would have another meeting to consider the matter, and that it would eventually end in no union being established.—*Instructor.*

Rev. Albert Barnes is suffering from a renewed and serious difficulty in his eyes, which threatens total blindness. He has been obliged to write with the aid of a machine, such as was used by Mr. Prescot. His blindness is not yet total; but there are alarming indications, increasing rather than diminishing, that he may become like so many other literary laborers a blind old man.—*Independent.*

The pastor of the Vernon Center Church, on a recent Sunday, noticing several in slumbers, stopped in his sermon, and announced the hymn, "Rouse thee, sinner, from thy sleep," and at the conclusion of the reading, remarked that they would omit the singing and went on with the discourse. The eyes of the "sinners" were too widely opened to close again that day.—*Exchange.*

The pastoral relation of Rev. James H. Taylor to the Second Church at Orange, N. J., was at his request, dissolved by the Presbytery of Newark at its late meeting—the entire session of the church and the great body of the congregation expressing their deep regret.—*N. Y. Observer.*

Rev. E. H. Fairchild, who has been engaged for the past two years as Financial Agent in raising the new endowment of Oberlin College, having fulfilled that commission has resumed his former position as Principal of the Preparatory Department at Oberlin.—*Advance.*

The Old Market Street Church, New York, has awakened to new life under the pastorate of that indefatigable worker, the Rev. John Lyle. It has received one hundred additions on profession since he took charge of it.—*Observer.*

There is a colony of Welsh, Congregationalists in belief, at Ligona, on Cape Elisabeth, Maine. They are to have a preacher, Rev. Daniel A. Evans, now of Yale College, who speaks both Welsh and English.—*Portland Press.*

The health of Dr. Gurley is not improving. He has been obliged to give up his trip to California. He is in New York and is confined to his room, and there is but little hope of his recovery.—*Presbyter.*

Strong efforts are being made in Boston to establish *free* churches, or those partially free. A number of the Episcopal churches have voted to throw open their doors to all who will come in.

Rev. Dr. Lincoln, of the Central Baptist Church of Providence, has resigned his charge to accept the Professorship of Church History in Newton Theological Institution.

The Center Church and Society in New Haven have invited Rev. George L. Walker, late of Portland, Maine, to become their pastor. Salary $4000.

Thirty-nine young men have just graduated at the Princeton, N. J. Theological Seminary, quite a number of whom intend to be foreign missionaries.

Bishop Clark, Episcopal, of Rhode Island announces that Mr. Hubbard of Westerly, is to be tried for exchanging pulpits with a Baptist.

Rev. Lewis H. Reed, of Syracuse, N. Y., has just been called to the Eighth Presbyterian Church of Chicago.—*Advance.*

An effort is making to get Rev. Dr. Rice late of this city, to be President of Westminster College in Missouri.

FOREIGN.

The Union Question in Scotland.—The Presbyterian union question has been discussed at great length in the Edinburgh Free Presbytery, and

they have adopted Dr. Brown's overture to continue the union negotiations, as against Dr. Bonar's proposal to close them, by 38 to 21. The opponents of the union threaten a disruption or secession in the event of the Free Church amalgamating with the United Presbyterian.—*Independent.*

LORD DUFFERIN has made himself the talk just now by addressing a letter to the agents of his estates in Ireland, Province of Ulster, in which, taking it for granted that the Irish Church establishment must soon cease to exist, and with it the Regium Donum and the Maynooth Grant, his lordship states his intention of guaranteeing his tenants, most of whom are Presbyterians, a sum equal to the amount of the Regium Donum, should that grant be withdrawn. This letter has been criticised from various points of view. Some have questioned the wisdom of the course taken by Lord Dufferin, on the ground that every landlord cannot afford to follow such an example, and that very unpleasant comparisons and contrasts may be drawn by the poorer classes in consequence. The Protestants of Belfast have in many instances commented on the letter with some severity, and one Rev. gentleman has gone so far as to say, that it was part of a plot to divide and alienate the Presbyterians and Episcopalians, and to arrest the Protestant agitation in Ulster.—*Congregationalist.*

BURMAH.—Our Baptist friends are prosecuting their mission work in Burmah with great success. Mr. Cross, one of their missionaries, writes:

"The reports from the jungle are far more interesting than they have been since 1862. All parts of the field have been thoroughly visited by the traveling preachers, and these are, for the most part, the ordained preachers. There were six ordained men at the meeting, and they report some thing over three hundred baptisms. The destitute churches are again asking for preachers, and rebuilding their fallen down chapels; and heathen villages are also asking for teachers. The olden days of Toungoo seem in some measure to be returning. A vast field is opening to the east of us. We see how inadequate are all the means of men and money which we now can command."—*Zion's Herald.*

REV. LEON PILATTE of Nice, France, has just arrived in New York upon a special mission to various benevolent societies, and to the churchs at large, on behalf of the Evangelical Society of France. This Society represents the Evangelical element in France as separate from the State Church, and is already well known in this country through its excellent representatives, Rev. Messrs. Bridel, Fisch, Frederic Monod and Theodore Monod, as well as by Mr. Pilatte, who visited America several years ago, for the same cause. In view of growing necessities of its work, the Society desires to enter into closer relations of coöperation with the American and Foreign Christian Union, and other American societies which have occasionally aided it heretofore.—*N. Y. Evangelist.*

CHEERING NEWS FROM THE MISSION FIELDS.—The Lord is greatly blessing the labors of Christian Missionaries in nearly every mission field throughout the world. Good tidings from China, India, Germany, South America—everywhere souls are converted and saved. Let the church give thanks and praise God, and increase her contributions to sustain this glorious work.—*Zion's Herald.*

Publisher's Notice.

All persons are forbid publishing or manufacturing any imitation of a work entitled "SHERWOOD'S WRITING SPELLER," a copyright of which is secured, according to law. Any infringement upon the copyright of this work will render the offending parties liable to prosecution. Parties in California who have infringed upon the copyright of this work, by manufacturing and selling a similar book, are requested to render a statement of the number disposed of to H. H. Bancroft & Company, San Francisco, with whom we have arranged for the publication and sale of the work upon the Pacific Coast.

PROSPERITY OF SOUL.

In the calculations of most men, prosperity relates to everything else except the soul; and this, because they believe that care for its welfare really has little bearing on our happiness. Without speaking of its other advantages at this time, let us inquire whether this estimate is not incorrect—whether spiritual cultivation does not have a healthful effect on one's own enjoyment. It certainly will tend to prevent the rule of *selfishness* in the strife for what we seek, and in the regard we cherish for it after it is possessed. Sometimes this selfishness takes that lowest and meanest form—mere love for what can be gained, without reference to what it may bring us; the love of the miser for his money, the love of man in high position for his power. Sometimes it relates to the gratification, or the real benefits that may come as *incidental* to success in worldly affairs—as, the luxuries for the appetite, the contributions to the taste, the facilities for display, which are made possible through the possession of money or power. In the *first case*, a due regard for the *soul* places such low enjoyment in miserable contrast with its welfare, so that it may be doubted whether one can be absolutely selfish who has not first deluded, and withered, and robbed his soul of all its natural worth and eminence; while he who admits these is hardly tempted to such self-humiliation. A prosperous spiritual nature will always assume, readily and by right, its normal elevation. It will frown upon meanness. It will resist what is unmanly. It will hold in check what is wicked and reckless of the rights that should be regarded. The fruit of soul-cultivation is generosity, nobility, kindness, reverence, a well-balanced estimate of ourselves and of others, and a clear apprehension of the value of what God has given to be subsidiary and subordinate. You must go among those whose souls are a waste, a mere wilderness of worthless, tangled growth, if you would find tyrants, men-haters, lovers of all that is earthly, sensual, devilish. There may be men of trained intellect among them; there may be men of refined esthetic development; but there will be none of broad, thorough, elevating culture, that true prosperity of which man, as in the image of God, is capable. And could this become universal, the wilderness would give place to the beauty and bloom of the garden of the Lord—mere selfishness being torn up, rooted out, and cast forth from the soil where it has had possession.

Then, in the *other case*, where only that form of it is presented which seeks what may gratify, and please, and profit ourselves, such regard for the soul will sanctify all these sources of satisfaction, and render them avenues through which real spiritual delight and advantage may come to us. Go with one thus prepared among the beauties or sublimities of nature, and you will find him in liveliest sympathy with every mood in which she may be found, and keenly appreciative of all her scenes. Go into his home, and you will find there the specimens of art and the libraries of literature, that have another purpose than to adorn the walls and fill the cases. They are the food, and the expression, of cultivated taste, and through them his delighted spirit holds communion with what is elegant, and inspiring, and refined, being made better by their influence. Go with him when he travels, and in all that he sees, and hears, and learns, not mere curiosity, nor a feeling of necessity that he be intelligent, nor a desire to get the worth of his money, will prompt and govern him; but everywhere will appear the eager search of the *soul*, for something to answer its demands, and the pleasing proof that this search is not in vain, till you will feel that none profit so much by travel as does he whose whole nature is alive to the opportunities thus afforded. Education, to such a man, is a mighty lever by which he is borne upward among the noblest truths and the sublimest minds. Association with others is not the idle passing of an hour, but the supply of good by which he grows, as he is made a man of broader, better, worthier purposes and views, and, of course, purer and higher enjoyment. The springs from which he feels *inclined* to drink are the most refreshing he could find. The pleasures for which he has any desire are the most exquisite he could know. His standard is elevated. His attainments are lasting. His satisfaction is positive, and is the expression of his nobler nature, when fitted to decide what is happiness. Thus does the fragrance of his soul's prosperity exhale upon all his other success, adding greatly to its ability to give him pleasure, and making all he has charming and abiding; and its ratio determines his true enjoyment.

COLLEGE OF CALIFORNIA.

This College has gathered around it in years past more of the literary atmosphere and associations which are found in connection with eastern institutions of learning than has any of the young colleges of this State. The Society of Alumni, embracing a large portion of the graduates from the East, has been accustomed to hold its anniversary exercises at the time of Commencement, and the occasion is anticipated with much interest by those who would not have all memories of college life fade out of their minds. This year more than usual interest attached to the Commencement, because it would be the *last*, since the College is now, by the terms of its proposition to the State, to disincorporate and become merged in the University, which will be fully inaugurated before another year shall pass. A class of four received their diplomas, after by examination and public addresses they had testified their fitness to be thus honored, and the other classes of the College gave proof that a high order of scholarship is required by those who have charge of its instruction, and that among the bequests it will make to the University not the least will be the young men now pursuing the prescribed course of study.

Rev. J. A. Benton delivered the address before the literary societies, his theme being *Empire*—the empire of man over the world, and of mind over matter, of which those who heard it speak in high terms.

Rev. J. E. Dwinell delivered the annual address before the Alumni, and fully sustained the reputation he has long had in California, as a man of ripe thought and culture.

The Poem of Mr. Stoddard was short, but of much merit, and it was read in such a manner as to exhibit its beauties, which is not always true of poems.

The concise account of Vice President Willey, of the connection of the College of California with the University, was an interesting part of the exercises, and quite appropriate, because it is just that history shall know for what considerations and how this College now goes out of existence.

The Alumni Festival was attended by a large company, and under the leadership of Rev. Dr. Stone, the President, the exercises were very pleasant, and by the variety of wit, eloquence, and pathos, maintained the interest till a late hour, when all separated in hope of reunion next year, at the first Commencement of our State University. No one can doubt, from the pulse of this meeting, that great things are expected of those who are to have control of the University and shape its character at the beginning of its history. The cultivated men of the State are full of enthusiasm with the prospect. They are ready to give their sympathy, and money, and influence in its support, but they want a broad foundation, and the evidence of such spirit, and energy, and wisdom in the Regents as will be the assurance of success. In this they will hardly be disappointed, and our people will soon look with pride on one of the grandest institutions for advanced education in the country. Let the young men who are contemplating college life, wait for a season, rather than leave their homes to enter Eastern colleges, for we shall need all the patronage our population are likely to furnish to give the University real success, and it will be worthy of all it will receive.

Christian Baptism.

We have found in the investigation of this subject that when Jesus Christ gave this authoritative commission to the Apostle: "Go ye into all the world and preach the Gospel to every creature. He that believeth and is baptized shall be saved," that *ritual purification* was the common and acknowledged meaning of the term baptism, and when our Savior used it to signify an ordinance of His Church, we must either adopt the absurd and profane theory that in its employment by the great Head of the Church, it deteriorated in its meaning and significance, or we must admit that as it hitherto had done, so it still continued to express purification, and not only so, but when He adopts it, who by His very office was to be a purifier, employing for this purpose not the water only, but the sanctifying influences of the Holy Ghost, through them "thoroughly purging His floor," the idea of purification becomes intensified and elevated in its significance in baptism. So long as He continues to be present in the administration of the ordinance, according to His promise, and so long as He employs the sanctifying influence of the Holy Spirit in its divine and infinite energy, to cleanse and purify the heart. Such, also, must continue to be its meaning.

I hold, therefore, beyond all controversy, that in the adoption and appointment of baptism by the Lord Jesus Christ as an institution of His Church, the ordinance, with its ordinary and general idea of purification, signifies also the work of the Holy Ghost in its more exalted work in cleansing and purifying the heart from sin, and that such also will appear to be its significance as its administration is prescribed in the New Testament, or in the nature and effects of the ordinance as referred to by the sacred writers.

"Arise and be baptized and wash away thy sins, calling upon the name of the Lord." On this passage Dr. Hackett thus comments: "This clause states a result of the baptism *in language derived from the nature of the ordinance*; it answers to 2: 38. Submit to the rite in order to be forgiven. In both passages baptism is represented as having this *importance* or *efficacy*, because it is the sign of the repentance and faith, which are the conditions of salvation. There can be no question as to the mode of baptism in this instance, for if it be maintained

that baptisai is uncertain in its meaning, a definition is added in *apolousai*, which removes the doubt."

It is not possible for me to perceive what this verb *apoluo* has to do with *mode*, though this matter does not concern me at present; but while I am not able to see how it settles the mode, *yet it does most certainly determine* the essential idea, for, in the words of Prof. Hackett, "if there be any doubt of the meaning of *baptisai*, a definition is added in *apolonsai*, which removes the doubt." Agreeing, therefore, with Prof. Hackett, that *apolqusai* settles the meaning of *baptisai*, let us go to the Lexicon to see what *apolousai* means, and I find these definitions given by Robinson: to *wash*, *wash away*, and *set free*, sustaining most conclusively the position I have assumed respecting the ordinance of baptism, that the essential idea is purification. This meaning of *apoluo* agrees with the definitions of Liddell, and Scott, and Donegan. The former, in the illustration of the meaning of the term, gives us the following from the classics: "To *wash* the brine off the shoulders; to *wash* a wound from blood."

In 1 Peter, 3:21, we read: "The like figure thereunto baptism doth also now save us (not the putting away of the filth of the flesh, but the answer of a good conscience toward God) by the resurrection of Jesus Christ." I present this text from the First Epistle of Peter as the crown of the whole argument. The use of the element of water in the ordinance is referred to in the salvation of Noah and his family, while the idea of purification as its well known and acknowledged power and attribute is referred to in the clause, "not the putting away of the flesh," and still further its higher and more efficacious spiritual virtue is asserted in the clause, "Baptism doth also now save us," not mere external cleansing, "the putting away the filth of the flesh," but the answer of a good conscience toward God by the resurrection of Jesus Christ.

If I were called upon, then, to define the intent of baptism, I would plant myself on this text, and show that the baptismal water which, in the natural virtue inherent in the element is the emblem of purity, when employed in the sacrament, declares the purifying efficacy of the Holy Spirit applied to the heart; for as the natural water cleanses the filthiness of the flesh, so baptism, carrying with it the response of a good conscience, purifies, sanctifies, and saves the soul, through faith in His righteousness who was raised from the dead, not by any means by the external ordinance, but by the internal work signified by it, and which always attends the administration of the ordinance when received in faith.

There are some texts which, although they do not refer to the sacrament of baptism in the use of the term itself, yet have unmistakeable reference to the ordinance, as Ep. 5:26: "That he might sanctify and cleanse it, *with the washing of water* and the Word." This passage is thus paraphrased by McKnight: "That He might sanctify her (the Church) and fit her for becoming His spouse, *having cleansed her emblematically by baptism*," as brides were wont to be cleansed with a bath of water, and with the word from the superstitions of heathenism and Judaism. Also, Tit. 3:5: "Not by works of righteousness which we have done, but according to His mercy, He saved us *by the washing of regeneration*, and the renewal of the Holy Ghost."

McKnight thus comments: "Through baptism, *called the bath of regeneration*—not because any change in the nature of the baptized person is produced by baptism, but because it is the emblem of *the purification of his soul from sin*. Hence Ananias, in alluding to the emblematical meaning of baptism, said to the apostle, 'Arise and be baptized, and *wash away thy sins*.' The real change in the nature of the believer is not effected by baptism, but by the renewing of the Holy Ghost, mentioned in the next clause. Hence our Lord, whom the apostle hath followed here, joined the two together in his discourse to Nicodemus—Jno. 3:5: 'Except a man be born of water and the Spirit, he cannot enter into the Kingdom of God.'" F. B.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Seventh Term of this Institution will commence on Wednesday, January 22d, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

International Hotel,

SAN FRANCISCO, CAL.

This favorite house is located on Jackson Street, a few doors west from Montgomery, on the same street with the Post Office, Custom House, and United States Court. The Land Office and principal Places of Amusement are within one block of the House. The International Hotel offers the greatest inducements for Families. It is capable of accommodating three hundred persons. The House is conducted on TEMPERANCE PRINCIPLES. The Furniture is quite new and in perfect order. The Table will always be supplied by the best in the Market. Two good Barber Shops, a Bath Room, and a Laundry are attached to the House.

The Prices for Board and Room will vary, according to the kind of Room, from $1 50 to $2 00 per day.

The International Coach will be at each Steamboat and Car, plainly marked "International Hotel," to convey passengers to the House, FREE, and to any part of the city at the cheapest rate, according to the distance. From the House to all of the Steamers, cents. F. E. WEYGANT, Proprietor.

And Manufacturers of

BROOMS, PAILS, TUBS, WASHBOARDS, Etc.

215 and 217 Sacramento Street,

Between Front and Davis,

SAN FRANCISCO

Correspondence.

Letter from New York.

New York City, May 15, 1868.

I have been in the city several days, attending some of the anniversaries—that of the American Tract Society; that of the American Missionary Association, and some others. Last evening it was my privilege to be present at the nineteenth anniversary of the American and Foreign Christian Union, a society which was organized for the purpose of carrying on mission work among the Romanists of Papal countries, and in Europe and America, seeking to oppose to the aggressions of Popery the strong barrier of a united Protestantism.

An abstract of the report of the Society contained encouraging accounts of progress in various parts of the world. In some of the republics of South America, as well as in several countries of the Old World, a larger religious freedom has been enjoyed within the past year than at any preceding period in the Society's history. While Italy occupies the place of greatest importance, and gives promise for the most speedy returns for the outlay of evangelistic labor, Greece, France, and Hungary are also inviting and interesting fields, and in all of these the Society has entered upon its work with good prospects of success. The Paris chapel is reported free from debt.

Greece has six missionaries; Hungary one. Mexico is regarded as a field of great interest. Miss Rankin has left her seminary on the Rio Grande to a successor—Mr. Park—while she has gone to open a much larger institution in Monterey. The finances of the Society were reported to be in a highly satisfactory condition.

Addresses were delivered by several able speakers, members of the Society, and missionaries from abroad.

Rev. Leon Pilatte, of Nice, France, pastor of an evangelical church, furnished many interesting and suggestive facts relating to the state of religion in the country from which he came. He mournfully lamented the power of despotism which prevailed in the Empire, extending even to matters of religious worship, not permitting the assembling of more than twenty persons "without due authorization," which requirement, in many cases, amounts to a total prohibition. He himself was able to procure "due authorization" to deliver a lecture against gambling only after a lapse of seven months. Imprisonment and a fine is the penalty for printing a tract. In view of these and like facts the speaker appealed for aid to the Protestants of America.

Henry H. Jessup, Missionary from Syria, gave an account of the energy and perseverance of the Jesuits in the East, and the very serious embarrassment occasioned to Protestants by these unscrupulous and misguided men. It appears that every effort of our missionaries calls forth a corresponding and antagonistic effort on the part of the emissaries of Rome. The Jesuits are all over Syria, and have all the modern appliances of the printing press, the book, tract, and child's paper, wherewith to reach the masses and counteract the agencies employed by Protestant evangelists.

Rev. Henry C. Riley, of Santiago, gave encouraging accounts of the progress of Protestantism in Spain, and of the readiness of Spanish Christians to carry the Gospel to their brethren of Mexico, had they the means wherewith to carry out their desires.

The closing address of Rev. Dr. Duryea was (as those that had preceded it,) full of vigorous thought and eloquent earnestness. Rome is an unrelenting virulent, merciless adversary. Her energies never were more fully exercised than now. Her boasts of success and universal dominion never more confidently uttered. Her treacherous and artful devices never more assiduously employed. Let Protestants beware how they hastily conclude that she is wounded unto death, lest too late they feel upon their liberties her grasp.

W. R.

Political Duties of Christians.

The Christian is in his proper place and at his assigned work when, either in his individual or organic relations, he is exerting every power with which God has endowed him for his country's good. It was always so by a natural right and by the organic law of the Bible, under any style of government. Much more is it so in such an assorted and illustrated democracy as our own, where each individual is a coördinate and responsible element of the federated empire, and where majorities actually grasp the sovereignty and sway the fate of the nation. The issue that is sought to be created by an interested class of unscrupulous men, and to be stereotyped into a public sentiment, is that there is a natural repugnance between religion and politics. If the term politics is applied and wholly confined to the present party machinery which makes itself officious in, and assumes control of, these public interests, then the sentiment is undoubtedly true and important. But this is neither its proper nor its popular significance. It is intended to express all that relates to the governmental interests of the country, its principles, organism, and operations, and over all these Christianity claims legitimate and controlling jurisdiction. It propounds patriotism as one of its elemental virtues, and fastens its obligations as by a law on every conscience. By the whole current of Bible history and inculcation, and by the literal proclamation of its Author, the State, however constituted, if only it be recognized as the State, is an ordinance of God, and if an ordinance of God, then the godly, by the persuasions of their faith and by the oath of their discipleship, are its natural supporters and champions. Who else should be? Who have equal interests involved? Who besides has the assured resources for such a trust? and who the same divine commission? The Church, it is true, has no partnership relations to the State, and no favors to ask of it, except that it use its carnal weapons to defend her from her carnal foes. But the State, especially our State, has everything to ask of the Church—its order, its strength, its beneficence, its very existence. Whatever distinguishes us as a State among the nations for the excellence, grandeur, and promise of our history and institutions, can be traced with the assurance of actual demonstration to that style of Christianity as a cause that cradled its infancy and nurtured its maturer life, and still pervades and dominates through all its elements.

Christianity is the only power that ever did or ever can prepare men for self-government. It goes where no other power can go, into the secret place of the conscience, by methods unknown to all other influences, with an authority that every faculty is preconfigured to recognize at once as ranking all other authority, and in the name of God, and presenting as its motives the sanctions of His omniscient eye, the mercies of His munificent providence, and the alternatives of the felicities of Heaven and the horrors of perdition, it demands a life of virtue, sobriety, truth, industry, honesty, benevolence, and obedience to lawful powers, as of divine ordination. Such a power, at once radically conservative and constitutionally progressive, cannot be dangerous to a virtuous State. Nor can the State dispense with it and live. It is not a State religion that is needed, but a religious State, one whose organic and statutory principles shall conform to the precepts of Christianity, whose officials shall impersonate its spirit, and whose career shall coöperate with its own beneficent mission. As practical piety is doing that which is right towards God, and practical philanthropy is doing that which is right towards men, so practical patriotism is doing that which is right towards the State. It is an affair of the conscience, and recognizes the moral law of the Bible as of universal application and of supreme authority. Every other patriotism but this is counterfeit and conceals selfish and sinister designs.

The Christian, then, is in the line of his calling and at his appropriate work when he is seeking to put the governmental interests of his country, in its structure and functions, under the formative inspiration and guardianship of the religion of Christ. If a jealous vigilance for an ordinance of God, the preparation and the prompting of men for the duties of such a Christian citizenship, and securing to the Church and the world the benefits of a well ordered and religious State, does not come legitimately within the sphere of the ministries of Christianity and the circumference of her jurisdiction, what in the universe does? Whether the Christian in the discharge of his political duties coöperate with or condemn the present system of party organizations, are questions not now considered. They are reserved for a future communication. What is asserted now is, that no shrinking from the discharge of an unwelcome duty can excuse, and no assumption of exclusive control can exclude, the Christian from personal and active participation in determining the principles upon which the government of his country shall be founded, and the men who shall be chosen to administer it.—*N. Y. Evangelist.*

MISCELLANY.

The water in Lake Michigan is said to be five inches lower than has been known for 18 years, and 30 inches lower than it was six years ago. This calls to mind some curious facts in regard to the rise and fall of the lakes. It has been ascertained that, with considerable regularity, there is a periodical ebb and flow in the lake, the water rising gradually from seven to nine years, and subsiding in the same manner, while, at long intervals, the waters reach an unusually high stage, exactly corresponding with the rise and fall of the waters of the sea at the spring tides.

Another noticeable fact is that, in the spring, at a period when the discharge into the lakes is greatest, and when they are least effected by evaporation, the water is invariably the lowest. In the fall, after the subsidence of the spring freshets, and when under the full effect of the summer's droughts, and after the evaporation has been the greatest, it is found that, instead of any abatement in their volume of water in their basins, there has been a gradual rise during the entire summer. These are the facts, and although they have engaged the attention of scientific men, no solution has yet been reached. It is become apparent that the lakes are not affected by freshets, droughts or evaporation. But whether these phenomena are the effect of subterranean channels and outlets, a sort of mystic connection which brings the lakes within the influence of inter-oceanic currents is still an unsolved problem.—*Chicago Times.*

Dr. Thomas, when Bishop of Salisbury, used to tell the following story: "While I was chaplain to the British factory at Hamburg, a gentleman belonging to the factory died at a village about ten miles distant. Application was made to the pastor of the parish for leave to have him buried in his churchyard, but, on being told that he was a Calvinist, he refused.

'No,' said he, 'there are none but Lutherans in my churchyard, and there shall be no other.'

This being told me (says Dr. Thomas) I resolved to go and argue the matter with him, but found him inflexible. At length I told him he made me think of a circumstance which once happened to myself when I was a curate in Thomas Street. I was burying a corpse, when a woman came and pulled me by the sleeve in the midst of the service, saying,

'Sir, sir, I want to speak to you.'

'Prythee,' says I, 'woman, wait till I have done.'

'No, sir, I must speak to you immediately.'

'Why, then, what is the matter?'

'Sir,' said she, 'you are burying a man who died of the small-pox next to my husband, who never had it.'

The story had the desired effect, and the pastor permitted the bones of the Calvinist to be interred in his churchyard."—*Presbyterian.*

"OWES ME A LIVING."—It is among men who try to get a living by some shift or trick of laziness that we hear the familiar words, "The world owes me a living." A loafer who never did a useful thing in his life; who dresses at the expense of the tailor, and drinks at the cost of his friends, always insists that "the world owes him a living," and declares his intention to secure the debt. I should like to know how it is that a man who owes the world for every mouthful he ever ate, and every garment he ever put on, should be so heavy a creditor in account with the world. The loafer lies about it. The world owes him nothing but a very rough coffin, and a retired and otherwise useless place to put it in.

The world owes a living to those who are not able to earn one—to children, to the sick, to the disabled and the aged—to all who, in the course of nature, or by force of circumstances, are dependent; and it was mainly for the supply of the wants of these that men were endowed with the power to produce more than enough for themselves. To a genuine shirk the world owes nothing; and when he tells me with a whine that the world owes him a living, I am assured that he has the disposition of a highway robber, and lacks only his courage and his enterprise.—*J. G. Holland.*

WE take the following passage from the "Personal Recollections of Charlotte Elizabeth:"

Her father came in while the staymaker was spreading out her buckram, whalebone, etc.

"Pray what are you going to do with the child?"

"Going to fit her with a pair of stays."

"For what purpose?"

"To improve her figure. No young lady can grow up without them."

"I beg your pardon; young gentlemen grow up very well without them, and so can young ladies."

"Oh, you are mistaken. See what a stoop she has already! Depend upon it, that girl will both be a dwarf and a cripple, if we don't put her into stays."

"My child may be a cripple, ma'am, if such is God's will; but she shall be one of his making, not ours."

As a consequence of the father's obstinacy, and ignorance of what is requisite to make a lady, his daughter grew up without headaches, dyspepsia, and other lady-like maladies.

Agents Wanted

At once, to canvass for the

MOST POPULAR SUBSCRIPTION BOOKS

Of the Season.

The following works are now being canvassed in several counties of the coast and with the best of success, and good men can do well on any one of them in territory which has not been canvassed.

MACKENZIE'S 10,000 RECEIPTS.—The best book of the kind ever published. SIX HUNDRED COPIES have been sold in a single county in California, and the county not finished.

BEYOND THE MISSISSIPPI.—Containing over 200 illustrations. In several instances the commissions of our canvassers upon this work alone have amounted to over $100 a week.

BANCROFT'S MAP OF THE PACIFIC STATES.—Fifth edition; revised to the present time. Decidedly the best map of the coast in existence.

WELLS' EVERY MAN HIS OWN LAWYER.—As high as sixteen orders in a single day have been taken for this work. It is useful to every one.

PEOPLE'S BOOK OF BIOGRAPHY.—A new work, just ready, by the popular writer, James Parton. A great number of the subjects are self-made men, "Who paved their own way in this world," who were "architects of their own fortunes." Reading like this inspires the young with courage and stimulates them to emulate such examples. A very large sale is expected.

NATURAL WEALTH OF CALIFORNIA.—Comprising Early History, Geography and Scenery, Climate, Agriculture and Commercial Products, Manufactures, Mining, Railroads and Commerce, Population, Educational Institutions, and a detailed description of each County: together with much other valuable information. One large octavo vol. The finest work ever gotten up on the Pacific Coast. Published by H. H. BANCROFT & COMPANY, San Francisco.

LOST CAUSE.—The only Southern History of the war published. Very large sales have been made in the territory now already worked. A new revised and enlarged edition is now ready.

THE AMERICAN WHEAT CULTURIST.—Practical details for selecting and producing new varieties and cultivating on different kinds of soil. A new work just ready.

HISTORY OF THE SECRET SERVICE OF THE UNITED STATES.—"The most exciting and interesting book ever published."

In addition to the above list we have many other first-class works which offer good inducements to active men and new works constantly received.

Those desiring an agency on any of these works will please apply at once for terms to agents, etc., etc., and name two or three counties that will be satisfactory, when their first choice will be given if possible.

Subscription Department,
San Francisco, Cal.

Oxford Bibles.

The superior excellence of the Bibles printed at the Oxford University Press is proverbial among all who prize correctness of the text, and clearness and beauty of typography and binding. The Oxford editions are the standard from which other editions are copied, and are therefore acknowledged as superior.

The Subscribers, who act as

SOLE AGENTS IN THE UNITED STATES

or these Bibles, keep all varieties and sizes, from the 48-mo. to the Folio. They select the following, which they strongly recommend.

THE SUNDAY SCHOOL BIBLE. Printed in clear type and well bound in arabesque - - - - - - - - - 50 cents.

THE PEW BIBLE. Printed in large type and bound in morocco, $2 00; Turkey morocco, $3 00.

THE STUDENT'S BIBLE. Printed on fine paper, in beautiful type, with References and Maps, and an Index to the persons, places, and subjects occurring in the Scriptures. Turkey morocco, - - - - - - - - - - - - - $4 00

THE CLERGYMAN'S BIBLE. Printed in large, clear type, with References and Maps, and an Index to the persons, places, and incidents occurring in the Scriptures. Bound in Turkey morocco, - - - - - - - - - - - - $5 00

THE PULPIT BIBLE. Beautifully printed in very large, clear type, demy, 4to. Bound in Turkey morocco, - - $20 00

THE FAMILY BIBLE. Beautifully printed in large type, containing Family Record, with or without References, Plates, and Maps, in every style of binding, from $17 00 upwards.

THOS. NELSON & SONS,
137 Grand Street, New York.

The prices quoted above are in U. S. Currency, and any of the books will be mailed free on receipt of price.

Thomas H. Selby & Co.

Pacific Mail Steam Co's Steamships

— FOR —

NEW YORK, JAPAN AND CHINA

Will be Dispatched as follows:

LEAVE WHARF CORNER OF FIRST AND BRANNAN STREETS, at 11 o'clock A.M. of the following dates, for PANAMA connecting via Panama Railroad with one of the Company's splendid Steamers from ASPINWALL for NEW YORK.

On the 6th, 14th, 22d, and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Transatlantic Company's Steamer for St. Nazaire, and English Steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English Steamer for Southampton, South America, and P. R. R. Co.'s Steamer for Central America. Through tickets can be obtained.

Departure of the 6th connects with English Steamer for Australia.

The following Steamships will be dispatched on dates as given below.

STEAMERS FOR JUNE, 1868.

June 13th—GOLDEN CITY, Capt. Lapidge, connecting with OCEAN QUEEN, Capt. King.
June 22d—GOLDEN AGE, Capt. Farnsworth, connecting with RISING STAR, Capt. Conner.
June 30th—SACRAMENTO, Captain Parker, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock.

Through tickets to Liverpool by the "Cunard," "Inman," and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired, an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship GREAT REPUBLIC, Capt. S. Doane, will be dispatched June 3d, at 12 o'clock, noon, from wharf corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting at Yokohama with the Steamship COSTA RICA, for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Co.'s Office, corner of Sacramento and Leidesdorff Sts.

OLIVER ELDRIDGE, Agent.

ILLUSTRATION OF DIVIDENDS OF PROFITS

—OF—

United States Life Insurance Comp'y,

NEW YORK.

OFFICE, No. 40 WALL STREET.

CASH ASSETS EXCEED $2,700,000.

SIXTH TRIENNIAL DIVIDEND.

The Board of Directors have this day declared a Dividend of FORTY PER CENT. for the three years ending at the 4th March, inst., to holders of all Policies then in force, on the whole sum of the annual participating premiums received during the said three years; and an additional Dividend of TWENTY PER CENT. on the whole sum of all previous Dividends and Additions, to holders of such Policies who have fulfilled their engagements with the Company, both Dividends being payable and available in the various modes explained in the Company's Prospectus.

For example, on a policy paying one hundred dollars a year of participating premium, the profits for each year and the total at each year on this system are:

Year.	Yearly.	Total.	Year.	Yearly.	Total.
1	$40 00	$40 00	28	$206 39	$2702 23
2	40 00	80 00	29	206 39	2908 62

SHORT STUDIES FOR SUNDAY SCHOOL TEACHERS.

It is a very hopeful peculiarity of our times, that the attention of the Church is directed, by so many means, to the Sunday Schools. The result is to be, not merely the increased number of children and youth of this generation who may be gathered under the influence of Bible instruction, and the new interest that will be felt by teachers in the work they have assumed, but a very marked improvement in the method of teaching, and greater advantages from the schools, which will become permanent and be transmitted to other generations. The Conventions, and Institutes, and scores of books, by which those who have given special thought to the subject, or have had peculiar experience in the work, are able to communicate their ideas to others, are to have an abiding effect, and while there may be some views presented that are wholly fanciful, and practically of little worth, there will be much valuable matter for study and practice on the part of those who may avail themselves of such help.

We have heard many addresses, and read many books, upon the various themes suggested by the common subject, but none have seemed to us more really useful and interesting than the little volume with the above title, written by Dr. C. S. Robinson, lately of Brooklyn, and for sale by Bancroft & Company, of this city. The points presented are those upon which teachers need most instruction and encouragement. They were the outgrowth, or rather the expression, of the author's experience, and he deals with them in such a manner as to commend them to the common sense and Christian interest of all who have a heart for this work. The chapters entitled, *The Model Teacher; Words to the Weary; Manifesting Truth; Intelligent Study*, and *The Teacher Taught*, are full of thoughts that any one can ponder with profit, and they will render him a more cheerful and successful worker in the Sunday School.

THE SCIENCE OF KNOWLEDGE.

When this remarkable work appeared in Germany, the nature of the subject proposed for discussion in its pages, the great reputation of Fichte, its author, and his avowed purpose by it to put an end to mere metaphysical speculation, created a public anticipation which the book failed to realize. The reason for its translation into our language is stated by the translator to be, that it may achieve this end among us. So sanguine is he of this that he tells us: "Whether success will come at once, or after many years, I do not choose to speculate upon, but the certainty has always been in my mind that sooner or later the science of knowledge will be taught in every college and university of the land, as the science of all sciences, as the science which will, when once recognized, put a stop to those stale and unprofitable metaphysical speculations, by indulging in which mankind has wasted time and energies enough to advance true culture beyond the most daring dreams."

It may be questioned whether even Fichte can accomplish a work so difficult as this, and a study of his book, marvelous as it is in some respects, will hardly convince one that it is to have such brilliant success. Still, the tendency of the argument is to diminish the growing evils which spring from speculation, and even though it should never become a text-book in our colleges, it will find a place in the libraries of our men of thought, and will have an influence upon the methods of thought of all who read it.

Fichte had been charged with atheism by those philosophers he so definitely attacked, and the translator has therefore appended to the main matter of the work a chapter on the *Religious Significance* of the Science of Knowledge, from which, had we space, we would gladly make extracts at length, which entirely release him from this charge, though his ideas of religion would certainly not be regarded as evangelical. The book is the product of a wonderful mind, but the *heart* has very little to do with it, and can gain little from it. Published by J. B. Lippincott & Co., of Philadelphia, and sold by H. H. Bancroft & Co.

We have also received from H. H. Bancroft & Co:

John Milton and His Times.—A book written by Max. Ring; translated by F. Jourdan, and published in this country by D. Appleton & Co. The author has many of the peculiarities of method and style of Miss Muhlbach's works, and his book is likely to be read with much pleasure by those who take interest in historical romances.

Geyslin's Poultry Breeding; published by A. Williams & Co., of Boston; full of valuable suggestions on the subject.

The Divine Teacher.—Charles Scribner & Co., N. Y. A beautiful collection and arrangement of our Savior's recorded sayings.

We have also upon our table—

The Congregational Review, for May. Boston: M. H. Sargent.

The Galaxy, for June. New York: Sheldon & Co.

The Catholic World, for June. New York: Catholic Publication House.

The Sunday Magazine, for May. London: Strahan & Co.

Putnam's Magazine, for June. Bancroft & Company, San Francisco.

Hours at Home. New York: Scribner & Co.

Presbyterian Quarterly. J. M. Sherwood.

EDUCATIONAL.

Oakland College School.

The annual examination at this deservedly popular institution has been held during the past week. This school ranks among the very first on this coast. Its popularity is shown by the fact that the accommodations have to be enlarged each year, on account of the rapidly increasing number of students who wish to avail themselves of its advantages. That the institution is in every way worthy of patronage no one can doubt who has had the pleasure of being present at the examination. The teachers who have charge of the several departments are men of experience and ability, and under their instruction the students have made more than ordinary progress. It is in the classical department, perhaps, that the greatest proficiency was shown, but the examination in other departments was but little less satisfactory. We are glad to see that so much attention is paid to physical culture, and we consider the honor of holding the champion bat of the Pacific Coast to be by no means the least of the honors to which this school is entitled. We regret that want of space prevents us from publishing the details of the examination, and of the interesting exhibition which closed the exercises.

The examination of the scholars of Mrs. Blake's Oakland Academy took place on Monday, June 5th, and was in every way satisfactory to the friends and patrons of the institution. The young ladies were quite closely questioned concerning their several studies by professional teachers who were present, and showed, by the accuracy of their replies, that their acquirements in the solid branches were by no means superficial, while the pleasing music which enlivened the exercises, and the paintings and drawings with which the room was adorned, gave evidence that the "accomplishments" had not been neglected. The graduating exercises took place at the College School Hall in the evening, in the presence of as many people as the hall could contain, and consisted of music, reading of essays, select readings, etc. Some of the essays displayed more than ordinary ability on the part of the writers. Special interest was aroused by the calisthenic exercises, which were gracefully performed to the music of the piano. The three young ladies who graduated received their diplomas from Rev. S. H. Willey, who made a short address on the occasion.

Teaching by Pictures.

Pictures, orally explained, may be made a powerful auxiliary in education. How powerful they may prove as an ally appears from the success with which they have been used at times as the sole means of conveying instruction. The case of Philip Doddridge is here in point. He says: "My mother taught me the history of the Old and New Testaments, before I could read, by the assistance of some blue Dutch tiles in the chimney-place of the room where we commonly sat." And the following occurs in the "Life of Mrs. Sherwood:" "One of the pictures in her father's house was a representation of the martyrdom of Stephen, and one of the earliest feelings which she had of the character of the Lord Jesus as the Friend of man was obtained from the view which that picture gave of Him, as looking down from Heaven upon the martyr." But it is not only children who have at times received their education from pictures, but even adults. An example of this class has lately come to our knowledge, from the history of the Hudson Bay Company. A trader married an Indian woman, and at once set about teaching her to read. Like many other husband instructors, he manifested impatience, whereat she vowed irrevocably that learn to read she never would. Her husband found that she was an Indian indeed, and that he must adapt himself to unalterable circumstances. His wife's vow did not prevent her endeavoring to learn from pictures, and so he at once resorted to these. Illustrated works of all kinds were ordered, and the wife, being really desirous to learn, and having naturally a strong mind, soon became one of the most talented women with whom our informant in the matter ever conversed.

C. R. C.

AGRICULTURAL.

Number of Useful Plants.

A German author states that the number of useful plants has risen to about 12,000, but that others will no doubt be discovered, as the researches yet made have been completed in only portions of the earth. Of these plants there are 1,350 varieties of edible fruits, berries, and seeds, 108 cereals; 37 onions; 460 vegetables and salads; 40 species of palms; 32 varieties of arrow-root, and 31 different kinds of sugars. Various drinks are obtained from 200 plants, and aromatics from 266. There are 50 substitutes for coffee, and 129 for tea. Tannin is present in 140 plants, caoutchouc in 96, gutta percha

in 7, rosin and balsamic gums in 387, wax in 10, and grease and essential oils in 330; 88 plants contain potash, soda, and iodine; 650 contain dyes, 47 soap, 266 weaving fibers; 44 fibers used in paper-making; 48 give roofing materials, and 100 are employed for hurdles and copses. In building, 740 plants are used, and there are 615 known poisonous plants. One of the most gratifying developments is, that of 278 known natural families of plants, there are but 18 species for which no use has yet been discovered.

Clearing Up about the House.

Order and neatness are virtues greatly to be commended. It is often remarked that cleanliness is next to godliness. Now if this may be said of a person, why may it not of one's premises? What we are driving at is to have some of the farmers and others who own places, show a little more regard for cleanliness and neatness about their places, about the outbuildings as well as the dwelling house, inside and outside. The spring of the year is the best time to attend to this important work. Take hold with a hearty determination to set things to rights, to make the place look better than ever before. Don't be extravagant, but do as many of these things as your means will allow and that need be done. Possibly the house may need a coat of paint on the outside; if so don't neglect it. All these things pay in the long run; they tell upon the habits and tastes of ourselves and our children; they are calculated to make home pleasanter and therefore happier, so don't neglect them.—*Cleaveland Messenger.*

MUTTON vs. PORK.—Physicians recommend mutton as the most wholesome meat, the easiest digested, and best suited to invalids; while pork, as everybody knows, is the most unwholesome flesh eaten. In England, mutton is a favorite dish, and we apprehend it is to this, rather than roast beef, that the Englishman owes his robust health and rosy complexion. Our people eat too much pork and too little mutton. And yet, as a contemporary well remarks, "mutton can be produced pound for pound at less than half the price of pork; yields more nourishment when eaten: and keeping sheep does not exhaust a farm to the extent feeding hogs does. Sheep can be kept during the winter on hay and turnips, or mangle wurtzel, or sugar beet, while hogs will not do without at least some corn."—*Vermont Farmer.*

HOW TO BREAK CATTLE TO LEAD.—Take two animals of about equal size and strength, and tie them together with a strong rope, by placing one end around the horns of one animal and the other end around the horns of the other, and make them fast, as for leading, or tying up, leaving three or four feet of rope between the inner horns, and turn them into a field free from trees. Let them run, pull and haul, until they are tired of it, and they will walk side by side and feed together. Then take off the rope and they will ever after lead with the docility of a child, even though the first occasion may be years afterwards. It is much better than for a man to be jerked around all day by a wild heifer or steer, and more effectual. We have tried it and know.—*Columbia Post.*

TO PREVENT CATTLE FROM JUMPING FENCES.—The following singular statement was made at a late meeting of the American Institute Farmers' Club at New York:

"To prevent steers from jumping fences, clip off the eyelashes of the under lids with a pair of scissors, and the ability to jump is as effectually destroyed as Samson's power was by the loss of his locks. The animal will not attempt a fence until the lashes are grown again. Of this we are informed by Samuel Thorne, the great breeder of Duchess County, who assured us that he had tested it upon a pair of breachy oxen. As it is of great value to him, he hopes it will be tried by others."—*New York Times.*

A PRACTICAL farmer says that he has often noticed that calves would thrive better on milk that is not rich in butter than on what is commonly called very rich milk. The nutritive elements of milk reside chiefly in the caseine. If you have a cow that gives particularly rich milk, and one that gives a quality poorer in butter, it is better to feed the calf on the milk of the latter. The calf will thrive better, and you will get more butter from the milk of the first cow.

PRUNING TREES.—In all cases where it is desired to impart vigor, so far as this can be done by mere pruning, it should be performed after the fall of the leaf, and before the swelling of the buds in spring. With quite hardy trees, it may be done in winter; but with those inclining to be tender, and which are always made more so by excision of the limbs, it should be deferred until early spring. Any one who entertains a doubtful opinion on the subjects of summer pruning, had better try the experiment. Let him prune one row of trees in winter, or early spring, and the next row in June.—*Country Gentleman.*

APPLE worms may be caught in large numbers by winding hay ropes around the trunks of the trees immediately before the worms begin to leave the fruit. The grubs will hide in the ropes for the purpose of spinning their cocoons, and may be found by unwinding the coils.

Seeds! Seeds! Seeds!

NEW YORK SEED WAREHOUSE,

427 Sansome Street, near Clay.

GARDEN, FIELD, FRUIT, FLOWER, AND TREE SEEDS.

GRASS AND CLOVER SEEDS,

FOR LAWN OR FIELD CULTURE

— Also, —

DUTCH BULBOUS ROOTS,

Imported direct from Holland.

CHOICE SEEDS FROM TROPICAL COUNTRIES,

Comprising

FLOWERS, CLIMBERS, SHRUB,

TREE, AND FRUIT SEEDS.

Orders, by Mail or Express, will receive prompt attention. Descriptive Catalogues forwarded by mail, post-paid, when desired. Address orders to

The American Sunday School Union

Having commenced the Sunday School Missionary work on the Pacific Coast, we are ready to aid in organizing Sunday Schools and aid existing needy Schools.

We have just received a fine and large assortment of the publications of the Society, which we supply to Schools at reasonable rates. We also supply the periodicals of the American Sunday School Union. The

CHILD'S WORLD,

a beautifully Illustrated Paper for Children and Youth. Monthly, at 12½ cents each per year for ten copies and upwards, and 24 cents for the semi-monthly. Also,

THE SUNDAY SCHOOL WORLD,

a Sixteen-Page Quarto Monthly Paper for Sunday School Officers and Teachers, at the low rate of Fifty Cents per Year. No Sunday School Teacher should be without this paper.

Rev. Richard Newton, D.D., the Editor of these papers, is acknowledged to possess unsurpassed abilities as a Sunday School writer. The above rates are in Currency.

Catalogues of the Society's publications, and Sample Copies of its Periodicals furnished gratuitously on application to Wm. F. Peters, care P. O. Box 1007, or at the Depository, 302 Montgomery Street, (Second Floor, Room No. 2,) San Francisco, Cal.

Family Reading.

Daniel Gray.

If I shall ever win the home in heaven
For whose sweet rest I humbly hope and pray,
In the great company of the forgiven
I shall be sure to find old Daniel Gray.

I knew him well; in fact few knew him better;
For my young eyes oft read for him the Word,
And saw how meekly from the crystal letter
He drank the life of his beloved Lord.

Old Daniel Gray was not a man who lifted
On ready words his freight of gratitude,
And was not called among the gifted,
In the prayer-meetings of his neighborhood.

He had a few old-fashioned words and phrases,
Linked in with sacred texts and Sunday rhymes;
And I suppose, that, in his prayers and graces,
I've heard them all at least a thousand times.

I see him now,—his form, his face, his motions,
His homespun habit, and his silver hair,—
And hear the language of his trite devotions
Rising behind the strait backed kitchen-chair.

I can remember how the sentence sounded,—
"Help us, O Lord, to pray and not to faint!"
And how the "conquering-and-to-conquer" rounded
The loftier aspirations of the saint.

He had some notions that did not improve him,
He never kissed his children,—so they say;
And finest scenes and fairest flowers would move him
Less than a horseshoe picked up in the way.

He had a hearty hatred of oppression,
And righteous words for sin of every kind;
Alas, that the transgressor and transgression
Were linked so closely in his honest mind!

He could see naught but vanity in beauty,
And naught but weakness in a fond caress,
And pitied men whose views of Christian duty
Allowed indulgence in such foolishness.

Yet there were love and tenderness within him;
And I am told that when his Charley died,
Nor Nature's need nor gentle words could win him
From his fond vigils at the sleeper's side.

And when they came to bury little Charley,
They found fresh dew-drops sprinkled in his hair,
And on his breast a rose-bud gathered early,
And guessed, but did not know, who placed it there.

Honest and faithful, constant in his calling,
Strictly attendant on the means of grace,
Instant in prayer, and fearful most of falling,
Old Daniel Gray was always in his place.

A practical old man, and yet a dreamer,
He thought that in some strange, unlooked-for way,
His mighty Friend in Heaven, the great Redeemer,
Would honor him with wealth some golden day.

This dream he carried in a hopeful spirit
Until in death his patient eye grew dim,
And his Redeemer called him to inherit
The heaven of wealth long garnered up for him.

So, if I ever win the home in Heaven
For whose sweet rest I humbly hope and pray,
In the great company of the forgiven
I shall be sure to find old Daniel Gray.

—*J. G. Holland.*

A Star Hidden by a Thread.

David Rittenhouse, of Pennsylvania, was a great astronomer. He was skillful in measuring the size of planets, and determining the position of the stars. But he found that, such was the distance of the stars, a silk thread stretched across the glass of his telescope would entirely cover a star; and moreover, that a silk fibre, however small, placed on the same glass, would cover so much of the heavens that the star if a small one and near the pole, would remain obscured behind that silk fibre several seconds. Thus a silk fibre appeared to be larger in diameter than a star.

You know that every star is a heavenly world, a world of light, a sun shining upon other worlds as our sun shines upon this world. Our sun is eight hundred and eighty-six thousand miles in diameter, and yet, seen from a distant star, our sun could be covered, obscured, hidden behind a thread, when that thread is near the eye, although in a telescope.

Just so we have seen some who never could behold the heavenly world. They always complained of dimness of vision, dullness of comprehension, when they looked in a heavenly direction. You might strive to comfort them in affliction, or poverty, or distress; but no, they could not see Jesus as the Sun of Righteousness. You might direct their eyes to the Star of Bethlehem through the telescope of faith and holy confidence; but alas, there is a secret thread, a filament, a silken fibre, which, holding them in subserviency to the world, in some way obscures the light, and Jesus, the Star of Hope, is eclipsed, and their hope darkened. There are times when a very small self-gratification, a very little love of pleasures, may hide the light. To some sinners, Jesus, as Savior, appears far off; but far off as he may appear, he certainly can be and shall be seen where the heart lets nothing intervene.—*S. S. World.*

Strong Characters.

Strength of character consists of two things—power of will and power of self-restraint. It requires two things, therefore, for its existence—strong feelings and strong command over them. Now, it is here we make a great mistake; we mistake strong feelings for strong character. A man who bears all before him, and before whose bursts of fury the children of the household quake—because he has his will obeyed, and his way in all things, we call him a strong man. The truth is, that he is a weak man; it is his passions that are strong; he, mastered by them, is weak. You must measure the strength of a man by the power of the feelings he subdues, not by the power of those which subdue him. And hence composure is very often the highest result of strength. Did we never see a man receive a flagrant insult, and only grow a little pale, and then reply quietly? That is a man spiritually strong. Or did we never see a man in anguish stand as if carved out of solid rock, mastering himself? Or one bearing a hopeless daily trial remain silent, and never tell the world what cankered his home peace? That is strength. He who, with strong passions, remains chaste; he who, keenly sensitive, with many powers of indignation in him, can be provoked, and yet restrain himself and forgive—these are the strong men, the spiritual heroes.—*Rev. F. W. Robertson.*

African Women.

M. Chaillu, in his work on the gorilla, thus writes of the African women:

"I shall never forget the kindness of those women to me while I was sick. Poor souls! they are sadly abused by their task-masters. They are the merest slaves. They have to do all the drudgery. They receive blows and ill usage. And yet, at the sight of suffering their hearts soften, just as women's hearts soften in our more civilized lands. No sooner did sickness attack me than these kind souls came to nurse and to take care of me. They sat by me to fan me; they brought more mats for my bed; they bathed my burning head with cold water; they got me refreshening fruits from the woods. At night, when I awoke from a feverish dream, I used to hear their voices, as they sat around in the darkness, pitying me, and contriving ways to cure me. When I think of these things, I cannot help thanking God for them; that wherever I have gone, he has made human hearts tender and kind to me; that even under the black skin of the benighted and savage African, He has implanted something of his own compassionate love."

Expanding the Lungs.

Step out into the purest air you can find; stand perfectly erect, with the head and shoulders back, and then fixing the lips as if you were going to whistle, draw the air through the lips into the lungs. When the chest is about half full, gradually raise the arms, keeping them extended, with the palms of the hands down, as you suck in the air, so as to bring them over the head just as the lungs are quite full. Then drop the thumbs inward, and after gently forcing the arms backward and the chest open, reverse the motion by which you draw your breath, until the lungs are empty. This process should be repeated immediately after bathing, and also several times through the day. It is impossible to describe to one who has never tried it, the glorious sense of vigor which follows this exercise. It is the best expectorant in the world. We know a gentleman the measure of whose chest has been increased by this means some three or four inches during as many months.

The Young Folks.

The Persevering Boy.

The month of December in the year 1807 was unusually cold and blustering. In some instances, cattle and swine, poorly sheltered, were found badly frozen; winter had come on so suddenly that many were unprepared for it; while the effect of such severity in the weather was disheartening to young and old.

There was one exception, however, and that was a youth of fifteen summers, tall and gaunt, who sat one stormy evening in the old-fashioned chimney corner of his father's humble dwelling, reflecting on his own situation and planning what he would do to improve it. There was one fixed purpose in his mind, and this was to get an education. How to accomplish it he could not as yet imagine, for though his will was inflexible as iron, his power of conception was not yet developed. He had been to a school in the neighborhood the previous winter, but this avenue to learning was now closed to him. As he sat on the old-fashioned stool amid the noise and confusion of the family around him, and the hoarse sighing of the tempest without, his thoughts were something of this nature: "Winter has commenced, I long to be at my studies. The best part of the year, and the only time I can call my own is passing away; what shall I do?"

As if in answer to this question, there was a knock at the door, and presently a neighbor walked in covered with snow. He had been to a village beyond, and was returning to his home, when the bright light of the pine knots attracted his attention.

Our youth in the corner nodded good evening to the guest; but his mind was too deeply absorbed to listen to the chit-chat which followed. The great question, "What next?" was still undecided, and his brow knit more and more, as he reflected on the difficulties in his path, which, however, not one moment deterred him from pursuing it.

Presently he was roused by a voice:

"Jo! Did you hear, Jo? There is a school in Plainfield. Neighbor G. says it's a good one, taught by Master Maynard."

Jo rose slowly from his seat, a look of cool resolve stamped on every feature.

"I shall go to Plainfield in the morning," he said quietly.

"But how can you get there? It'll be awfully drifted; the snow is a foot deep now, and the wind blows a gale."

"I'll get there somehow, I reckon."

"But," remonstrated the father, "I don't see the way for you to go to Plainfield. I can't pay for your board nor schooling, much as I'd like to do it."

"I know that, father, but I'm determined to have an education."

Bidding the family good night, he mounted to his humble chamber in the loft, saying to himself, "Yes, that is the next step. I'll go to Plainfield, and I'll go to-morrow. What's a few drifts of snow to me, when I am determined to get where I can be at my books. Perhaps this Master Maynard will help me to contrive a way to get an education."

The next morning the thermometer was down to zero, and the banks of snow in front of the house covered the stone walls. but not one whit daunted, our young friend started off as soon as it was light, a small package of clothes and books slung over his shoulder with a stick, in search of "larnin," as his father called it.

On entering the school-room in time to see that the fires were sufficient for the severity of the day, Master Maynard observed sitting on a bench, and warming himself by the blazing logs, a youth whom he had never seen before. There was an expression on his brown face which fixed the attention of the teacher, and the following conversation took place:

"Have you come to join the school?"

"Yes, sir, I have walked seven miles this morning to do it."

"Are you acquainted with any one in Plainfield?"

"No, sir."

"Have you no friends to lend you a helping hand?"

"No."

"How do you expect then to get along?"

"I don't know, I thought I'd come and see you about it—I'm determined to get learning before I'm much older.

There was something in the cool, resolute manner in which the youth undertook to conquer difficulties that interested the teacher. He told the stranger to remain through the day, and he would see what could be done. Before night he had made arrangements in the family where he was boarding that the young man should remain, paying his expenses by labor out of school hours.

Our friend now gave himself diligently to study, and soon convinced his teacher that, though not possessed of brilliant talents, his will to acquire knowledge was indomitable. Through the winter he made good but not rapid progress, and so much interested his teacher by his perseverance, that at the close of the term, that gentleman made arrangements with a clergyman who resided four miles from his father's house, to hear his recitations.

At last he was prepared for college and the theological school, being one of the earliest members of the Seminary in Andover, from which place he went to Greece as a missionary of the American Board of Commissioners for Foreign Missions.

I scarcely need say that I have given the early history of Dr. Jonas King, whose indomitable perseverance, amid discouragements and persecutions, has done so much for the redemption and Christianization of Greece, and has excited the admiration of the whole Christian world.—*Chicago Presbyterian.*

Love is the Best Force.

Once two little boys were on their way to school. They were brothers, and their names were John and Frank. John was the older of the two, and he liked to rule Frank by sharp words; but Frank did not like to be ruled in that way.

"Come on—quicker, quicker. What a slow coach you are!" said John.

"It is not late, and the day is hot," said Frank.

"I tell you I want to get to school in time to clean out my desk," said John. "Come you *shall* come."

And then John tried to pull Frank along by main force; but, the more John pulled, the more Frank made up his mind not to yield.

While the dispute went on, they came to a place in the road where a man was trying to make a horse pull a great load of stones. The horse stopped to rest, when the man began to beat him.

This the horse did not like, for he had tried to do his best; so he stood stock still. In vain did the man lay on the lash: the horse would not start. In vain did the man swear at him: the horse did not mind his oaths.

Just then a young man came up, and said to the man with the load of stones, "Why do you treat a good, brave horse in that way? He would pull for you till he died, if you would only treat him kindly. Stand aside, and let me show you how to treat a good horse."

So the man stood aside; and the young man went up, and put his arm round the neck of the horse, and patted him on the back, and said, "Poor old fellow! It was too bad to lash you so, when you were doing your best, and just stopped a moment to take breath."

And so the young man soothed the poor beast, by kind words and soft pats with his hand; and then said to him,

"Now, good old horse, see what you can do! Come, sir, we have only a few steps more to the top of the hill. Get up now. Show that you will do for love what you would not do for hate."

The horse seemed to know what was said to him, for he started off at a strong, brisk pace, and was soon at the top of the hill.

"There, my good friend," said the young man to the driver, "I hope you see now that love is the best force; that even beast will do for you, when you are kind, what they will not do when you are harsh."

John heard all these words, and they set him to thinking. At last he said to Frank:

"It is a hot day, Frank; and it is not late. Let us walk through the lane to school."

"No, John," said Frank, "I will take the short cut, and will walk just as fast as you want me to; So, come on."

"Frank," said John, "love is better than hate—isn't it?"

"Oh, yes, a thousand times better!" cried Frank.

As chance would have it, they that day read in school a fable, two thousand years old, which I will now tell you.

The North Wind and the Sun had a dispute as to who could show the more strength. They agreed that the one who could first strip a man of his cloak should be the victor.

First the North Wind tried his strength; he blew, and blew, with all his might; but blow as hard as he could, he could not do much. The man drew his cloak around him more and more tight; he would not let it be torn from him. So at last the North Wind gave up the tug, and called on the Sun to see what he could do. The Sun shone out with all its warmth. The man could not bear the heat; he soon grew so warm that he had to take off his cloak; and so the Sun became the winner in the trial.

Love has more strength than hate.—*Nursery.*

"Wake Up Solomon."

"Wake up Solomon. It's time to get up," shouted young Harry to his sluggish brother one fine July morning, as he jumped gaily out of bed, and began dressing himself.

"What time is it?" yawned Solomon.

"Nearly six," replied his brother; "and mind Sol, we start at seven."

"It's too early to get up yet," said Solomon. "I'll snooze till a quarter of seven." So the lazy fellow turned round and was soon fast asleep again. When he awoke his room looked very full of sunshine. The house was very quiet, too, and rubbing his eyes, he muttered,—

"I wonder if it is seven o'clock yet?"

Crawling out of bed, he dressed himself and went down stairs. There was nobody in the parlor, nobody in the sitting room, nobody in the dining room.

"What can be the matter?" thought Solomon, as he rang the bell for the maid to bring him his breakfast.

"Where are they all?" he asked as soon as she appeared.

"Gone to the city," replied the maiden. "They started two hours ago."

"Why, what time is it?"

"Nine o'clock."

Nine o'clock! But why didn't they call me?"

"You were called at six o'clock. and you wouldn't get up. Your father wouldn't have you called again. He said he would teach you a lesson."

"It's too bad!" cried Solomon, dropping his head upon the table and bursting into tears.

It was too bad that the lazy boy did not learn the lesson of that morning so as to turn over a new leaf in the book of life. I am sorry to say he did not. He loved sleep. He hated work. He was the slave of lazy habits, and is so to this day.

What sort of a man will Solomon Slowcoach be? Well, if he don't die of idleness before he becomes a man, he will be a shiftless, good-for-nothing fellow. He won't have any knowledge, because he is too lazy to study; nor any money, because he is too lazy to work; nor any good character, because he is too lazy to conquer himself.

Wake up, Solomon! Wake up, my dear boy! Shake off the chains that are upon you! Be manly, be wide awake, be something! If you don't wake up, you will soon be a lost boy. Wake up, Solomon, wake up! If you don't, you will make a shipwreck of your life.

A Baby's Soliloquy.

I am here. And if this is what they call the world, I don't think much of it. It is a very flannelly world, and smells of paregoric awfully. It's a dreadful light world, too, and makes me blink, I can tell you. And I don't know what to do with my hands; I think I'll dig my fists in my eyes. No, I won't. I'll scrabble at the corner of my blanket and chew it up; and then I'll holler. Whatever happens, I'll holler; and the more paregoric they give me, the louder I'll yell. That old nurse puts the spoon in the corner of my mouth in a very uneasy way, and keeps tasting my milk herself all the while. She spilled snuff in it last night, and when I hollered she trotted me. That comes of being a two-days'-old baby. Never mind, when I'm a man I'll pay her back good. There's a pin sticking in me now, and if I say a word about it I'll be trotted or fed, and I would rather have catnip tea. I'll tell you who I am. I found out to-day. I heard folks say, "Hush! don't wake up Emmeline's baby!" and I suppose that pretty, white-faced lady over on the pillow is Emmeline.

No, I was mistaken, for a chap was in here just now and wanted to see Bob's baby, and looked at me, and said I was "a funny little toad, and looked just like Bob." He smelt of cigars, and I'm not used to them. I wonder who else I belong to. Yes, there's another one—that's "ganma." Emmeline told me, and she took me up and held me against her soft cheek and said, "It was ganma's baby, so it was." I declare I do not know who I belong to; but I'll holler, and may be I'll find out.

There comes Snuffy with catnip tea. The idea of giving babies catnip tea when they are crying for information: I'm going to sleep. I wonder if I don't look pretty red in the face. I wonder why my hands won't go where I want them to.—*Springfield Republican.*

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

Also, SCHOOL FURNITURE.

WARREN HOLT,
305 Montgomery Street.

Sabbath School Books.

I have the most complete assortment of Sunday School Books, Cards, Question Books, and Sunday School Music Books, in the city.

Also, a fine assortment of Stationery. Paper and envelopes stamped with purchaser's initials, without charge.

A liberal discount made to Sunday Schools, Teachers, and Clergymen.

Just received, five hundred "SONGS OF THE SANCTUARY."

CHILION BEACH,
Bookseller and Stationer,
34 Montgomery Street, opposite Lick House.

PACIFIC COAST ITEMS.

A CORRESPONDENT of the *Solano Press* writes: "Arriving at Napa, we could not help observing the great improvement in the appearance of the town since our last visit. Large and substantial buildings are being erected, business is lively and the citizens appear to be impregnated with enterprise and genuine go-ahead-ativeness. The town is now lit by gas, streets are sprinkled every day, and the people talk quicksilver and "feet," and Napa has all the conveniences of a city, except a public hall. This is pre-eminently the place of fine residences, and we are not surprised that all the people take great pride in the beauty and progress of the town.

ALL graduates of Colleges or Universities who desire to become members of the "Associated Alumni of the Pacific Coast" are requested to send their names and an initiation fee of three dollars to C. A. Wetmore, Oakland, Secretary of the Association.

THE Supervisors of Alameda County have raised the salary of A. L. Fuller, County Superintendent, to $1,800 so as to enable him to give all his attention to the schools. A good example, which should be followed by other counties.

ACCORDING to the *Post*, they have in Santa Barbara the largest grape-vine in the world. It is nearly fifty years old, measures three and one-half feet in circumference, and produced last season more than six tons of grapes.

IT is now stated, with some degree of plausibility, that had it not been for a lack of votes on the Republican side, the Democrats could not have carried the election in Oregon.

A MAN in Yolo claims $50,000 from the State for a plantation of mulbery trees, under the "Act for the Encouragement of Silk Manufacture in California."

THE Society of California Pioneers has rejected the proposition to admit to membership all who came to the State before her admission to the Union.

AT the June election, the people of Washington Territory will vote upon organizing a State Government.

DURING the month of May, sixteen vessels left this city to engage in the fisheries on the northern coast.

PREPARATIONS are being made in all parts of the State to celebrate the Fourth of July.

TROOPS are being distributed along the Union Pacific Railroad to protect trade and labor.

THE telegraph is completed between Dalles and Portland, Oregon.

THE State Teachers' Institute will meet on June 16th.

THE Alpine County jail has never had an occupant.

A SNOW STORM at Gold Hill on June 3d.

HONEY LAKE.—This body of water is said to be from twenty to twenty-five feet deeper than ever previously known, and the water is still rising. Honey Lake, like many other similar bodies of water on the Pacific slope, has no visible outlet. The streams leading into the lake are nearly run down to their common depth. It must be that the underground outlets of the lake are in a measure closed, or that extensive springs, as is reported, have broken out within the lake. At all events, the hay and farming land for miles about the lake is threatened with destruction.—*Sage Brush.*

BY a majority vote of the citizens of San Diego, all the public lands are to be put into the market for sale. In accordance with this decision of the people, the Board of City Trustees have passed an ordinance offering the said lands for sale at prices, and in tracts according to situation, from one dollar and twenty-five cents to fifty dollars an acre. Parties desiring to purchase can now be accommodated by calling on the city authorities, paying their money, and taking their deeds.—*Times.*

THE wool crop of Colusa County has increased about one-third since last spring. The *Victor* took down last trip over $30,000 worth, even at the present low prices. The *Colusa* took down much more on her last trip, besides what other little boats have been doing. We think it safe to estimate the wool clip of the Upper Sacramento counties this spring at $500,000.—*Colusa Sun.*

A. FAIRBANK, of this place, has raised from sixty acres of his farm, only once plowed, two crops of grain, producing 3,000 bushels, and the third crop is now standing on the ground, and will yield 1,000 bushels more, making 4,000 bushels from sixty acres, by once plowing.—*Woodbridge Messenger.*

SISKIYOU COUNTY is becoming noted for its wild honey, and in a few years our mountains will be abundant with swarms of wild bees. They are constantly found in various sections, and the honey is of the richest quality.—*Yreka Journal.*

A CARDING MILL has been started at Olympia, Wash., producing the first wool rolls ever made north of the Columbia River.—*Oregonian.*

WE have noticed lately a steady line of movers going southward.—*Roseburg (Oregon) Ensign.*

PETROLEUM did not work satisfactorily on the *Amelia* as a substitute for coal, and she has accordingly resumed her position between here and the city, with her coal furnace replaced.—*Napa Register.*

THE area now covered with growing grain between the Stanislaus and Tuolumne rivers is equal to 360 square miles.—*Tuolumne News.*

AT the falls of the Willamette, at Oregon City, the fall available for power is forty-two feet.—*Enterprise.*

ELDER KNAPP wants to buy a farm in California and spend the rest of his life among us.—*Spare Hour.*

THE farmers about Los Angeles have commenced harvesting their wheat, barley etc.—*Republican.*

A LUMP of gold was found last week at Remington Hill, which weighed 240 lbs.—*Nev. Gazette.*

THE wheat-fields in the vicinity of Centerville show indications of rust.—*Alameda Gazette.*

TELEGRAPHIC SUMMARY.

CONGRESSIONAL.—The Senate has elected George C. Gorham as its Secretary, in place of Forney, resigned....On hearing of the death of Buchanan, the Senate adjourned, and the House voted to appoint a committee of seven to attend the funeral....The Senate has passed a Specific Contract Act....The House has given the Chinese Embassy a reception....A resolution in favor of taxing U. S. bonds was referred to the Committee on Ways and Means....The Arkansas Bill has been passed and sent to the President....The discussion upon the admission of other States is still going on. The House agreed to the amendment admitting Alabama....A bill has been introduced transferring the Indian Bureau from the Department of the Interior to that of War. It is proposed to form two States out of Texas.

EASTERN.—The public debt has increased during the month of May by $9,717,059 18....Sprague is to be again U. S. Senator from Rhode Island....Rollins, Commissioner of Internal Revenue, has resigned....The Senate has rejected McClellan's nomination as Minister to England....The Government has arrested two ironclads at New Orleans, on suspicion of being about to sail for Peru....Buchanan's estate is estimated at $300,000..The Fenians are still preparing for a raid on Canada....The Radical candidate was elected Mayor of Washington....A Fenian Convention was held at Detroit (Mich.) on the 1st inst....The regular adjournment of Jeff Davis' trial has taken place....The executive offices were draped in mourning in respect to the memory of Buchanan....A complimentary dinner is to be given to Senator Fessenden in Boston by some of the most prominent citizens. Florida has ratified the thirteenth and fourteenth amendments to the Constitution of the United States....Ross Browne has sailed for California....The steamship *Nevada* from New York to Vera Cruz was wrecked off Hatteras.

FOREIGN.—The Spanish Government has authorized the establishment of additional telegraphic lines in the Gulf of Mexico....Salnave has been defeated at Port au Prince....The released Abyssinian prisoners have reached Suez....The Russians have been successful in Bokhara....200 deaths are reported daily at Callao from yellow fever....The Pope has sent an agent to this country to enlist troops. Garibaldi protests....Romero is coming to New York....The Emperor of Russia has set free all Siberian exiles of foreign birth, and all Russians and Poles exiled for less than twenty years. Riotous demonstrations have been made at Luxembourg in favor of France....It is believed in Paris that there will be war in Europe before next autumn.

WEEKLY MARKET REPORT.

Produce Market.

WEDNESDAY, June 10, 1868.

FLOUR—Sale of 800 qr sks Oregon Extra, private. Jobbing rates for city mills are as follows: Superfine, hf sks, ₱ 196 lbs, $6 62½@6 75; do, qr sks, $6 87½@7; Extra, hf sks, $7 87½@8; do, qr sks, $8 12@8 25.

WHEAT—The market is dull, good to choice milling being quoted at $2 40@2 50 ₱ 100 lbs.

BARLEY—Sales include 400 sks brewing, $1 92½; 1,000 sks do, $1 97½; nominal range of the market, $1 90@2 ₱ 100 lbs.

OATS—Sale of 1,200 sks Oregon, private; market quotable at $2 20@$2 40 ₱ 100 lbs.

POTATOES—Good to choice Bodega, 60@75c; Humboldt, 90@$1; new Mission, $1 75@1 90 ₱ 100 lbs.

ONIONS—Choice Red are jobbing at 2¾@3c; White, 2¼@2½c ₱ lb.

CORN—Prices are steady, Red $2 15@2 20; pale Yellow, $2 25@2 30; deep Yellow, $2 30@2 35; White, $2 30@2 40. Sale of 400 sks White, $2 37½ ₱100 lbs.

RYE—Very scarce. Held at $2 25@2 50; 100 sks sold at $2 50 ₱ 100 lbs.

BUCKWHEAT—Small sales within the range of $1 75@$1 85 ₱ 100 lbs.

BEANS—Supplies are well concentrated and market firm. We quote jobbing rates as follows: Bayo, 4½@4c; Butter, 6@6½c; Pea (very scarce), 10c@12½; small White, 8c; Pink, 4c; Red, 2½@3c ₱ lb.

BRAN—Is in better favor, selling at $27@30 ₱ ton.

MIDDLINGS—Fine are slow of sale at $45@50; feed descriptions, $35@37 ₱ ton.

OIL CAKE MEAL—Continues steady at $30 ₱ ton from the mill.

HAY—The market is still weak at $10@15 for new, and $14@18 ₱ ton for old.

DAIRY PRODUCTS—Butter is more plentiful, and prices a little weak. We quote good to choice fresh roll and firkin at 35@37½c, with sale of about 500 firkins since last Wednesday, chiefly at the inside figure. Cheese is in good supply at 14@16c for ordinary to choice California dairies, and 18@19c for Eastern. Eggs are a little scarce and prices firm at 36@37½c forHen, and 30c ₱ dozen for Duck.

POULTRY—Prices of all descriptions have advanced in consequence of a limited supply. Live Turkeys are quoted at 18@20c, and dressed do, 20@22c ₱ lb; Hens, $7 50@8 50; Roosters, $7@8 for large size; Spring Chickens, $5@7; Ducks, $5@5 50 ₱ doz; Geese, $2 50@2 75 ₱ pair.

PROVISIONS—We quote jobbing prices as follows: California smoked Bacon, 15@16c; Oregon do, 12@13c; California Hams, 16@17c; Oregon do, 15@16c; California Lard, 14@15c, and Eastern do, 13@13½c ₱ lb.

WOOL.—Prices are essentially the same as last week, namely, clean shipping grades of spring clip, 17@17½c; extra choice do, 18c; medium grades 15@17c, and spring burry 12@14c ₱ lb. The market has been generally quiet, though at the close there is a little more activity, the demand being almost exclusively confined to lots for shipment. In round figures, the sales since last Wednesday aggregate 300,000 lbs.

HIDES—About 1,200 California dry sold during the week, principally for export, 14@15c ₱ lb for usual selection.

TALLOW—Continues steady at 7¼@7¾c, at which figure about 20,000 lbs have been sold since last Friday, mainly for local use.

San Francisco Cattle Market.

The market is well supplied and the demand tolerably active; nevertheless quotations are substantially unchanged.

We quote slaughterers' prices as follows:

BEEF—American, 1st quality, 6@8c ₱ lb.
do 2d do 5@7c ₱ lb.
VEAL—Steady at 7@10c ₱ lb.
MUTTON—Easy at 5@9c ₱ lb.
LAMB—Ranges from 5½ to 7½c ₱ lb.
PORK—Undressed, 4½@7½c; dressed, 7@11c ₱ lb, for the various qualities.

CURRENT TOPICS.

The Fifteenth Annual Report of the Mercantile Library Association furnishes renewed evidence of the energy for which our people have acquired so enviable a reputation. Besides the usual statistics of books issued during the year and the relative proportions of the various subjects which have engaged the attention of their readers, showing, we may state, nearly fifteen times as many volumes under the head of romance as under any other head, we are informed concerning the progress of founding a permanent home for the Association during the coming years. It appears that three hundred thousand dollars may be taken as a fair estimate of the pecuniary value to be placed upon the property in the possession of this literary society; and while there is resting thereon a very considerable debt, the officers are cheerful rather than despondent as they consider the outlook for the future. An enterprise of such sterling merit may well command the confidence of an enlightened community, and San Francisco could better lose almost any other of its leading institutions than to allow the Mercantile Library Association, for any extended period, to remain under burdensome debts incurred for its magnificent addition to the creditable list of public buildings so favorably impressing the minds of strangers upon landing from their weary voyage.

It is an easy and natural transition from the courage and faith manifested by the movers in the Mercantile Library Association, as above noticed, to the same elements of character so frequently developed in the erection of structures for exclusively religious purposes. In this new land, especially in the interior, where population is constant only in the one fact of changeability, and where the Christian Church is so frequently overshadowed by the unchristian world, it is peculiarly affecting to the thoughtful mind to notice the intense longing which is cherished by the few who lovingly remember the Eastern privileges for social worship to have a house wholly consecrated to God, wherein the Sabbath days may be duly honored in the assembling of themselves together. With few names and with little money among the few, the effort is made to secure a "new church;" the few devote days and nights of anxious thought; they become suppliants for coin to a degree they would once have thought impossible; and they generally succeed in procuring the requisite amount—not indeed to pay for their building, but to justify some hope that if they start they can sometime, somehow, pay for the same. It is by such efforts that this land is to be held for Christ, for the spirit which finds this expression is one not to be content with simple physical success; it must work for worshippers, if it have a house of worship to which they may come. Moreover, it should be remembered as one of the difficulties incident to progress in this direction upon this coast, that the fluctuations of population here introduce an element of uncertainty in all plans for the planting of churches which was comparatively unknown in the early days on the Atlantic side. An American citizen who has traveled as far as to California, seems by that fact to acquire a fatal confidence in his own traveling abilities, so that his having a home to-day in a specified locality is little more than sufficient to raise a slight presumption that he will be found in that locality three months from to-day. But courage and faith will continue to build churches, and it is safe to believe that God will not suffer any such efforts to be totally lost so long as their results may honor Him. When they cease to honor Him, no Christian could wish his work to stand.

The subject of foreign missions is entitled to renewed consideration in view of the appeals issued almost simultaneously by the great organizations through which the branches of the Presbyterian Church are accustomed to manifest their liberality in this direction. The Presbyterian Board and the American Board of Commissioners both report increasing wants, promising fields waiting for men, constant calls for activity in their respective departments of benevolent effort, and an apparent failure in the churches to respond as they might and should to the indications of Providence that our human efforts can command the divine blessing in the conversion of perishing heathen. The two branches of the Church represented in the Synod of the Pacific and the Synod of Alta California reported to the General Assemblies of last year 2,896 members, and contributions to the cause of Foreign Missions $881, being an average of thirty and one-half cents to each member. The average contribution made by each member of the Church in the United States towards this cause was sixty-two and one-half cents. It is fair to assume that this last average is not beyond the ability of one church on this coast to attain, being little more than five cents per month for each reported communicant. This interest of the Church militant is one not to be safely forgotten in the midst of our local struggles; it should rather be ever prominent in the thoughts of our ministers and laymen; one to be labored for, prayed for, given for, until the banner of Christ shall wave in triumph over all the lands he came to redeem.

The action of the New York Young Men's Christian Association in refusing to accept from the State an appropriation of five thousand dollars, is noteworthy, in that it furnishes a long-needed precedent. We presume that organization could have made an excellent use of the money so offered, and that any private individual would find no difficulty in securing the acceptance of a like amount for the purposes legitimately belonging to the province of the Association; but when the acceptance of a State donation would imply an acquiescence in the righteousness of the principle that the State may discriminate between religious denominations, as in the case before us, in effect establishing a State Church, so far as pecuniary endowments will accomplish such a purpose, it was right that the proffered donation should be respectfully declined.

At the recent State Convention of Sunday School teachers something was said showing the practicability of special training for persons who are called to teach the truths of the Bible to the children upon the Sabbath Day. In no position, perhaps, is there greater need of wisdom than in the Sabbath School, and in few positions is it common to inquire less into the special preparation which has been made for usefulness by those who are entrusted with such power. In the present condition of things it is probably impracticable to require of Sabbath School teachers any special examination to ascertain their ability rightly to divide the Word of Truth; but when the Christian spirit in the churches has so far become general and fervent that the number of candidates for the charge of classes shall exceed the demand, when the members of the Church shall duly estimate the preciousness of imparting a saving knowledge of Jesus Christ to the youth of the community, and shall properly appreciate the truth of the ancient writing that "he that winneth souls is wise," it will be a matter of surprise that persons were ever allowed to teach in the Sabbath School without special evidence of special adaptation to the work. Under present circumstances it is good to be assured by the highest authority that "the foolishness of God is wiser than men, and the weakness of God is stronger than men," and that "God hath chosen the foolish things of the world to confound the wise."

Probably the largest Bible class in the world is that conducted in connection with Mr. Spurgeon's church in London, by Mrs. Bartlett, of which an interesting account is given in a recent number of the *Sunday School Teacher*. It is stated that on the first Sabbath of its organization, about eight years ago, three persons were present, and at the end of the first month there were fourteen regular attendants. The interest awakened increased until after several changes of location, made necessary for want of space, the average attendance became seven hundred, at which it now stands. More than seven hundred persons have been received to the church from this remarkable class. It is true that the "Mrs. Bartletts" in our American churches are very few, but it would seem not only desirable but practicable

for every church to maintain for itself an adult class for Bible study, from which many souls could be influenced to make the choice of eternal life; and until the experiment has been fairly and persistently tried, we shall cherish the conviction that there is ample opportunity for earnest Christian effort within the bounds of every district honored by a church organization. We should add that Mrs. Bartlett's class consists chiefly of women between thirty and seventy years of age, and that the work requires the undivided attention, as may well be supposed, of the noble lady whose efforts have been so signally blessed in its eminent success.

Religious Intelligence.

PACIFIC COAST.

To Clergymen.—It is desired that each clergyman on the Coast should send us, at short intervals, such items of Religious Intelligence as he may be able to gather in relation to the progress of his own or neighboring churches. Of course, if all comply with this request, it will not be possible to publish in full all the items sent in, but, by the use of information thus furnished, we shall be able to make this department of The Occident far more complete and satisfactory than we can do if compelled to depend on the secular papers and accidental sources of information. We hope that clergymen and others will act promptly in this matter, and we are satisfied that by so doing they will greatly benefit themselves, as well as impart new interest to The Occident.

—

Complaint.—A correspondent of the *Times* justly complains of the inaccuracy of the "Religious Notices" published in the Saturday issue of our daily papers. Those who have charge of this matter should see that they are correct or omit them altogether. Strangers spending the Sabbath in the city have a right to select the preacher to whom they wish to listen; and it is especially for their convenience that notices of public worship are published. These notices should never be employed merely as advertisements to attract large congregations.

—

Rev. A. M. Stewart, of Philadelphia, who recently arrived on this coast under commission from the Home Mission Committee at New York, is spending a few weeks at Austin, Nevada, and vicinity, ascertaining the religious necessities and prospects of that region. It is understood that he will contribute to the *American Presbyterian* a series of letters containing his impressions of this part of the world.

—

Howard Presbyterian Church.—At the June communion service of the Howard Presbyterian Church, Rev. Henry M. Scudder, D.D., pastor, twelve persons were received to membership, three on confession of their faith, and nine by letter. The pastor of this church, we are informed, is spending his vacation in a trip to the Yosemite, the pulpit being supplied each morning by Rev. E. G. Beckwith.

—

Dr. Wadsworth's new Church.—On Monday last ground was broken for the foundation of the new church building, which is to be erected by the Calvary Church Society on the fifty-vara lot at the northwest corner of Powell and Geary Streets. We understand that this is to be one of the largest and most elegant structures for public worship on he Pacific Coast.

Exchange.—An exchange for one month between Rev. T. E. Taylor, of Virginia City and Rev. F. L. Nash, of Alameda, is giving each of these brethren a much needed change of scene, and enabling each to continue in active service while being relieved from a large portion of the pressure always attending the pastoral relation.

—

First Presbyterian Church.—At the annual parish meeting of the First Presbyterian Church Society, held on Wednesday evening, June 10th, the following gentlemen were elected Trustees for the ensuing year: H. L. King, J. B. Painter, Wm. Bosworth, D. A. Jennings, Ford H. Rogers, David Hewes, R. B. Dallam, O. F. Willey, Wm. S. Phelps.

—

Rev. Isaac W. Atherton is supplying, for a short time, the church at Carson City, Nevada. He reports an excellent spirit pervading the congregation, and regards the field as one of great promise for the future. The pastor of the church, Rev. A. W. White, is absent on official duty as State Mineralogist.

—

Festival.—Speaking of sociability, reminds us of a good time we had last week at a strawberry festival given by the Ladies' Aid Society at Ione City, an association which is assisting in procuring a parsonage for the Presbyterian church. They meet once a week, and do all kinds of sewing. We men folks are excluded from their afternoon meetings, but they have been promising an evening meeting to which we should be admitted. For refreshments they provided strawberries and cream, cakes, cherries, and a Jacob's well, hoping to add thirty or forty dollars to their fund. Well, we never saw strawberries disappear as fast as theirs did. After all the eatables were gone, except a few cakes, they were sold at auction to the last cookie. Then we bought the boquets and garlands with which the church and study had been decorated. The President, Mrs. Dr. Schonemann, informs us that the Society will realize over one hundred dollars, "and the ladies are perfectly delighted."—*Jackson Ledger.*

EASTERN.

The Forty-fourth Anniversary of the American Sunday School Union was held in the Academy of Music, in Philadelphia, on the evening of the 21st of May. Addresses were given by Rev. D. C. Eddy, D.D., of Boston and Rev. S. Tyng, jr., of N. Y. The treasurer reported the receipts of the Society for the missionary department the past year $98,505. One hundred missionaries have been employed in twenty-two States, who have organized 1,731 new schools, having 10,667 teachers and 70,972 scholars. Visited and aided 6,600 schools, having 49,423 teachers and 397,951 scholars. Amount of donations to needy schools, $17,787 68. Visited 23,632 families and distributed 9,082 Bibles and Testaments. To do this work they have traveled 399,501 miles. They report revivals in many parts of the country, in country schools; and while they report great encouragements, they find much need for more aid. The sales of the publications have been greater the past year than any preceding. The missionary department closes the year with a debt of over $27,000.

The New Unitarian Creed.—The adoption of a written creed by Unitarians, which drove Rev. Francis E. Abbott out of his pulpit and out of the denomination, and induced him to renounce Christianity, and avow himself a Theist, and which threatens to rend the body and drive other members away—was the introduction of the words, "Our Lord Jesus Christ" in the preamble of the instrument on which the Conference was organized. As that phrase occurs frequently in the New Testament, it is a wonder the Bible is not abandoned as well as ignored.—*N. Y. Examiner.*

Brave.—We learn from the Providence *Press* that on the Sabbath following the resolution of the R. I. Baptist Convention disfellowshipping Mr. Malcom's church for rejecting close communion, the same invitation was extended to the communion-table that has been given for many years, and persons of other denominations—Episcopalian, Methodist, and Moravian—were present. From this we suppose that the church has no intention of retreating from the stand it has made on the side of unity and catholicity. The way in which the whole action of the convention was treated, with silent indifference, and the way in which the church kept unaltered its communion invitation, was action speaking louder than words, and saying that no step would be taken on the back track.—*Independent.*

Renunciation of the Ministry.—The Bishop of New Jersey has deposed from the ministry Rev. George H. Williams, for going into secular life. Rev. Mr. Murray, late pastor of the Reformed Dutch church in Market Street, has gone into the law. His case is before the Presbytery to which he now belongs, on a motion to strike his name from the rolls. The matter comes up at the next meeting of the Presbytery.—*N. Y. Examiner.*

Rev. Herrick Johnson, D.D., has entered upon his labors as pastor of the First Presbyterian Church, Philadelphia. On the day that he preached his introductory sermon, Rev. Albert Barnes, whom he succeeds, made an interesting statement of his thirty-eight years of ministry among the people, and commended his successor to them, asking for him the same sympathy and support which he had received. —*Observer.*

Encouraging Facts.—In the Narrative of the Presbytery of Arkansas it is stated that "the membership of the Presbytery has been doubled during the past eighteen months, while the actual working force of ministerial laborers has trebled during the same period, by the addition of brethren actually laboring within our bounds, who expect soon to form ecclesiastical connection with us."

Rev. S. R. Gregory, who is President of Wayland Theological Seminary at Washington, D. C., says that there are in that institution twenty-four colored young men studying for the ministry, twenty of whom are supported by friends in the North, and all of whom are making most decided and encouraging progress in preparation for their great work.—*Instructor.*

Infidelity.— The spiritualists had, a few days since, a gathering in the Music Hall, Boston, where, under the picture of a church with a falling spire and tumbling walls, they had written, "The Old Theology;" and where too they had embellished the blasphemous inscription, "The Fear of God is the Beginning of Folly."

The corner stone of the new Catholic Chathedral in Brooklyn will be laid on the third Sunday in June. The building is estimated to cost $1,300,000.

FOREIGN.

The Papacy Always the Same.—Some of the religious books in the Spanish language, which were put into circulation at the Paris Exposition have reached Spain, causing considerable alarm among the priests. A royal order has been obtained, addressed to the Governor of Malaga, directing him to unite with the clergy in close search for those who, in that and surrounding provinces, are engaged in the distribution of books contrary to the doctrines of the Catholic Church. The persons and books, when found, to be delivered up to the tribunals. Just in proportion as Papacy has power, freedom of thought and conscience is restricted.—*Commonwealth.*

Sabbath Schools in most parts of Germany are hardly known, having been very lately introduced. Two ladies in Berlin were anxious to organize a school, and applied to their pastor for permission. He feared a failure, but gave them permission to start if they would begin with but three scholars each, so that the failure might do but little damage. They now have two hundred boys and girls, and other schools are starting in the city. The

court preacher at Berlin has addressed a letter to the Lutheran clergy recommending the cause.—*Commonwealth.*

Protestant English and Germans have their several places of worship at Lisbon, and the Jews their synagogue. The laws prohibit persecution on account of religious belief. Civil and religious liberty, to an extent probably unknown in any other Popish country, are enjoyed by the people. And the signs of the times would seem to indicate the dawn of a bright day in Portugal, the light of which even her dark and degraded neighbor Spain will not long be able to exclude.—*London Watchman.*

Mission Among the Jews.—It is but sixty years since scarcely a single Jewish convert could be found in all Great Britain. At present there are about twenty thousand on the European continent, and three thousand in England; one thousand of these are ministers of the Anglican Church. At the University of Berlin, it is said, twenty-two of the Professors are converts from Judaism.—*Cleaveland Messenger.*

A gentleman of Montreal has offered to the American Board eight hundred dollars a year, in gold, for ten years, and longer, if life and means are spared, to support a missionary in China, in addition to those who would otherwise be sent.—*Messenger.*

The Word "Selah."

The translators of the Bible have left the word Selah, which occurs so often in the Psalms, as they found it, and of course the English reader often asks his minister, or some learned friend, what it means. And the minister or learned friend has most often been obliged to confess ignorance, because it is a matter in regard to which the most learned have by no means, been of one mind. The Targums, and most of the Jewish commentators, give to the word the meaning of *eternally, forever.* Rabbi Kimchi regards it a sign to elevate the voice. The authors of the Septuagint translation appear to have regarded it as a musical or rythmical note. Herder regards it as indicating a change of tone; Matheson as a musical note, equivalent, perhaps, to the word *repeat.* According to Luther and others, it means *silence!* Gesenius explains it to mean: "Let the instruments play, and the singers stop." Wocher regards it as equivalent to *sursum corda*—up, my soul! Sommer, after examining all the seventy-four passages in which the word occurs, recognizes in every case "an actual appeal or summons to Jehovah." They are calls for aid and prayers to be heard, expressed either with entire directness, or if not in the imperative "Hear, Jehovah!" or "Awake, Jehovah!" and the like, still earnest addresses to God that He would remember and hear, etc. The word itself he regards as indicating a blast of trumpets by the priests. Selah, itself, he thinks an abridged expression used for Higgaion Selah—Higgaion indicating the sound of the stringed instruments, and Selah a vigorous blast of trumpets.—*Bibliotheca Sacra.*

Edward McLean. Jacob Hardy.

McLEAN & HARDY,

Real Estate Agents,

BROADWAY, BETWEEN NINTH AND TENTH STREETS,

Oakland.

No. 14 Stevenson's Block, cor. Montgomery and California,

San Francisco.

Buy, Sell, and Lease City and Ranch Property; Negotiate Loans; Collect Rents; Draw Legal Instruments, etc.

We invite special attention to our Agency from persons in the country, who are desirous of securing homes or investing in the flourishing city of Oakland; also of those who are offering Ranch Property for sale, or in quest of the same.

Our facilities as Real Estate Agents will enable us to furnish reliable information to our customers, and they may depend upon receiving from us thorough and careful attention to their business.

San Francisco, Saturday, June 20, 1868.

TEMPTATION.

This is a word which is used in the Bible in what might be called a good and a bad sense. It has, like many words in our language, two significations, which, though related, give essentially opposite meanings. The word Temptation, in its primary meaning, simply indicates a test, a trial, and hence, in a correct use of it, may be applied to a solicitation to sin, which is at all times wrong, as well as to a condition in which one is placed whereby his virtue is tested and his real character developed. In this latter sense, it can with great propriety, be said that God tempts one, and thus we find that it is said God tempted Abraham. Not in the sense of a solicitation to sin, as the whole history of the transaction shows, but as a test and trial of his faith and the strength of the purpose which that faith inspired. With the most perfect uprightness of intention and purity of conduct, God could call Abraham to the position in which he was placed and tempt or test him with all of the elements which we find were gathered into his trial. It was not a temptation which the ordinary use of this word implies, for there was an absence of any solicitation to sin. That is, there was no deceit—no disguise—do hiding of results, and no attempt to influence passions which would drown the reason and the judgment. In the whole of the strange scene through which Abraham was called to pass, God acted with perfect holiness, and instead therefore, of its being a temptation in the ordinary sense of the word, it was simply an occasion for Abraham to show the strength of his confidence in God and the controlling character of the obedience which he would render to him.

One of the old translations of the English Bible—one used long before our accepted standard version of King James—gives this word more correctly than we now have it. In that translation, it reads: "And it came to pass that God did prove Abraham." He proved him in such a way as to manifest the prevailing disposition of his heart and show what principles governed him. That trial showed whether parental instincts, those most controlling laws of our being had more influence over him than the will and wishes of God. And the glory of his character was secured by the triumph which duty, in this case, gained over all the feelings which he had as a man. It is this which has made his example one of the most noble that man has ever shown, reared a monument to his honor at which our whole race will never cease to look.

But the temptation which in the Lord's Prayer, we are taught to pray that we may not be led into, is a very different thing from that which came to Abraham. This sort of a temptation is an appeal made to the propensities to evil within us. The solicitation which makes this appeal is evil because it comes with disguise and deceit. It hides out of sight the results of the conduct into which it endeavors to lead us, and awakens not a sense of right and of duty, but goes to influence passions, so that reason shall be lost sight of, and conscience be driven from its post in the soul. In such a sense as this, God never tempts any one. He never sends a single solicitation to any propensity of our natures. Hence says an apostle: "Let no man say when he is tempted, that he is tempted of God, for God cannot be tempted with sin, neither tempteth He any man." He may appoint for us rules and laws. He may bring us into providential conditions when all of the ruling traits of the heart will come out, But these conditions instead of ministering fuel to the propensities of evil which are in us, are but occasions to get for our heads such a crown of glory as that which rests on the brow of Abraham and on the brow of that great number who have come out of great tribulation, and who now, with palms in their hands, stand on the Hills of Light. And such conditions, instead of being regarded as an endeavor on the part of God to make us bad, either in character or life, should rather be regarded as occasions to secure the higher reward of virtue, and to open to us doors to new honor and joy, which, without such trials, would forever be closed. It was by just such trials as these providential exposures imply, that the long roll of Scripture heroes gained the high places on which they now stand. We are told that "they endured a great fight of afflictions." "They wrought righteousness—obtained promises—stopped the mouths of lions." "They were tortured, not accepting deliverance, that they might obtain a better resurrection." "Blessed is the man who *endureth temptation*, for when he is tried he shall receive the crown of life which the Lord hath promised to them that love Him."

INDIFFERENCE TO PUBLIC WORSHIP.

A few days since we heard one ask of another this question: "How is it that you and many like you, who are strong in character and influence, do not have enough of interest to attend public worship? I see your family often present, but you, never."

The answer to this question we did not hear, but as we went on our way, these thoughts came up in our mind: How is it that so many in this city, who like this man, intelligent in all matters of human thought—who have in their hands the larger part of the commercial, professional, and industrial interests of the land, ignore all personal responsibility for the support of public worship, or for creating a strong religious sentiment in the communities where they live? Is it because the ministrations of the pulpit are so inadequately sustained? Is it because the Gospel of Christ has really nothing in it which makes it worthy of their regards? Is it because they find in business, relaxation, society, literature, or science that which makes them more intelligent and nobler in character and life than religion, as now understood and inculcated, could make them? Have they, in a word, outgrown the Gospel? Are they standing on a higher plane of sentiment and feeling than that to which that Gospel calls them? Do they believe that it may do well for those of a certain range of thought, but not for those who, like themselves, have reached a point where Gospel motives have no impression and controlling power? If these are not the reasons for this indifference or hostility to religious things what are they? None can deny that there is this indifference or neglect. None can deny that only a moiety of any community are in the habit of a regular attendance upon the public worship of God. None can deny that a large proportion of the churches have, on the day of rest, only an excuse for a congregation, nor that those whose congregations are large are kept up to a maximum standard by pulpit talent of the finest order, and by the co-operative agency and working power of a corps of men and women who would bring success to any cause. Is there not here something which Christian ministers and people should understand much better than they do?

Baptism of the Holy Ghost.

I come now to consider baptism as a symbol of the Holy Spirit's agency on the soul. This was part of the prophecy of John in the announcement of the Savior: "He shall baptize you with the Holy Ghost and with fire." This prophecy of the Baptist became a promise in the mouth of our Savior after His resurrection, when he commanded the disciples to tarry at Jerusalem until they should be endowed with tower from on high, waiting for the promise of the Father, which, saith He, "ye have heard of me;" "For John truly baptized with water, but ye shall be baptized with the Holy Ghost not many days hence."

There are two remarkable instances in which this prophecy of our risen Lord was fulfilled: first, when the disciples were, at the Day of Pentecost, all assembled with one accord in one place, when, after the sound and mighty rushing wind, "there appeared unto them cloven tongues like as of fire, and it sat upon each one of them. And they were all filled with the Holy Ghost and began to speak as the Spirit gave them utterance."

After this signal fulfillment of the prophecy, Peter and the rest of the apostles immediately commenced preaching the Gospel, closing his discourse with these words: "Repent and be baptized, every one of you, for the remission of sins, *and ye shall receive the gift of the Holy Ghost*, for the promise is unto you and to your children."

Let me call attention, also to Acts 10: 47: "Can any man forbid water that these should not be baptized, which have received the Holy Ghost as well as we?" It was pleasing to the Holy Ghost, the infallible source of inspiration, to call the bestowal of His gift, by which the blessings of Christ's work were sealed to the Church, a *baptism*. Jesus Christ had promised this baptism all to the disciples. When Peter saw the work of the Spirit on Cornelius and his companions, he recognized the signal fulfillment of the promise, even to the Gentiles, and immediately proposed baptism, the external symbol and type of the Spirit's baptism, the antitype to which had just been administered by the hand of God Himself in the Holy Ghost which fell on them. The indissoluble connection between the appointed Christian ordinance and the gift of the Holy Ghost, as type and antitype, is signified by the use of the same term by the voice of inspiration, to wit: *baptism*. In the light of these Scriptures, then, the baptism of the believer ceased to be a mere ritual ordinance, but the symbol which Christ Himself has ordained as the sign and seal of the Holy Spirit's work on the heart.

The administration of this ordinance of the Gospel to these Gentiles at the house of Cornelius, after God Himself had plead for them before Peter's companions by the bestowal of the Spirit's gifts upon them, Peter himself defends before the disciples at Jerusalem, dwelling on the fact that as on them at the beginning, so the Holy Ghost fell on the company of Gentiles assembled at the house of Cornelius, and remembering the promised baptism of the Holy Ghost, and seeing its fulfillment in the gift bestowed as upon themselves, has no wish to withhold the spiritual sign and seal of the spiritual baptism. The argument was conclusive, the Jewish Christians acquiesced, when God Himself plead before them with uncontrovertible arguments, and the Gentiles were admitted to the communion of the Christian Church by baptism, solely and only because they had previously, by evidence which could not be controverted, received the promised baptism of the Holy Ghost.

In the same manner, when Paul found certain believers at Ephesus who had not as much as heard whether there be any Holy Ghost, having received only John's baptism, after they had been baptized in the name of the Lord Jesus, and when Paul laid his hands upon them they received the Holy Ghost, and spake with tongues and prophesied. Now, in this connection let it be noted: 1st, that the effusion of the Holy Ghost on the disciples' church, both on the disciples at the Day of Pentecost, and on the Gentiles at the house of Cornelius, to indicate the reception of the Gentiles, is called by the voice of inspiration a baptism.

2d. That the people who heard the Gospel preached by Peter were urged to repentance and faith and the reception of the ordinance of baptism with the assurance that in the reception of the ordinance they would receive the gift of the Holy Ghost according to the prophecy—"for the promise is unto you and your children," the promise recorded in Joel, as before quoted by the apostle: "And it shall come to pass in the last days, saith God, I will pour out of my spirit on all flesh."

3d. The acceptance of the ordinance through faith was invariably attended with the gifts of the Holy Ghost in the New Testament. I hold, then, without possibility of successful contradiction, that baptism is an ordinance appointed by the Head of the Church to signify the bestowal by God, and possession by the believer, of the gifts and graces of the Holy Spirit, because of the identity of the terms, the effusion of the Holy Ghost being called a baptism, and the Christian ordinance; because of the bestowal of the Spirit's graces, the promise is predicated on baptism—"Repent and be baptized, and ye shall receive the gift of the Holy Ghost." Because the administration of the ordinance was attended by manifestations of the gifts of the Holy Ghost to the believer.

Baptism being thus a symbol in Scripture of the efficacious operations of the Holy Ghost on the heart of the Christian, many of the Christian graces are set forth by it. It is a symbol of regeneration—"Except a man be born of water and the Spirit, he cannot enter into the Kingdom of God." It is a symbol of the new life—"Therefore we are buried with Him by baptism into death, that like as Christ was raised up from the dead by the glory of the Father, even so we also should walk in new acts of life."

It is a symbol of sanctification—"That he might sanctify and cleanse it by the washing of water by the Word." It is the symbol of salvation—"the like figure whereunto even baptism doth also now save us."

F. B.

REMOVAL.

Rowland, Bailey & Co.

Have removed their stock of

GROCERIES AND PROVISIONS

From 516 and 518, Washington st.

To 535 & 537 Clay St.

Four doors below Montgomery St. and nearly opposite the Pacific Fruit Market.

They have on hand every article sold in a first-class grocery store, and prices are as low as the lowest.

J. D. ARTHUR & SON,

Importers and Dealers in

Agricultural Implements,

S.W. CORNER CALIFORNIA AND DAVIS STS.

SAN FRANCISCO.

The following works, published by Mason Brothers, New York and Boston, are supplied in California by

H. H. BANCROFT & COMPANY,

San Francisco.

THE LATEST AND BEST OF SCHOOL READERS.

Edwards & Webb's Analytical Series.

ILLUSTRATED BY THOMAS NAST.

First Reader, 28 Cents. Fourth Reader, 90 Cents.
Second Reader, 50 Cents. Fifth Reader, $1.25.
Third Reader, 75 Cents. Sixth Reader, $1.60.
Edwards & Warren's Analytical Speller 25 Cts.

These Readers are COMPLETE IN GRADE, METHOD, MATTER, AND EXECUTION and contain

1. An admirable presentation of the word-method and object-systems of teaching, with a beautiful arrangement of text and illustration.

2. A clear and correct treatise upon the elements of spoken language.

3. Lessons in Phonic Analysis, and exercises for training the organs of speech to the acquirements of a full and distinct articulation.

4. Rules for reading the various classes of selections, and directions for giving due and appropriate expression to every phase of thought and feeling.

5. A most thorough system of Thought Analysis, by which the student is made to observe and appreciate the full sense and scop of each selection.

6. Selections chiefly new. Engaging lessons and stories for younger pupils, and for those more advanced, the best and worthiest specimens of American and foreign literature.

These books are printed from electrotype plates, made from new fonts of clear cut type; the best paper only is used; they are bound in the most durable manner; are sold at the lowest prices, and introduced upon the most favorable terms. Though published less than a year since, they have already been adopted by the Public Schools of New York, Chicago, and many other cities, and are everywhere giving unqualified satisfaction. Specimen pages and circulars sent on application.

A Method for the Piano-forte,

—BY—

WILLIAM MASON AND E. S. HOADLY.

Large quarto volume; illustrated; 240 pages. Price $4.00.

Two editions are published, one with AMERICAN FINGERING, and one with EUROPEAN FINGERING. Purchasers should always state which is wanted.

This work, first published in November, 1867, of which six editions have been called for in rapid succession, has proved to be the most useful, thorough, systematic, and successful text book for instruction upon the Piano-Forte ever published. It is eminently a new method: modern, original, complete. Retaining all that has proved valuable in older works, it adds much that has heretofore never been published, though often tested in private teaching with the best and most successful results. Among the novelties of the work, the ACCENT EXERCISES, introduced by Mr. Mason, are worthy of the attention of every teacher, as presenting unusual advantages of instruction.

The prominent excellences of this book are:

1. Its DEPARTMENTS, theoretical and practical.

2. EXPLANATIONS & DIRECTIONS, such as best teachers give their pupils, and which for accuracy and clearness, have never been surpassed.

3. THE ART OF FINGERING—best modes of overcoming difficulties.

4. THOROUGHNESS and PERFECTION of Lessons.

5. RECREATIONS AND PIECES, skillfully adapted to the requirements of the pupil, and embracing the most attractive and meritorious compositions.

Dr. Lowell Mason's Music Charts,

FIRST SERIES, THIRTY CHARTS, Price $7.50.
SECOND SERIES, THIRTY CHARTS, Price $7.50.

This work, which every teacher of Vocal Music will find extremely useful and convenient, consists of Charts or Diagrams, each of which is 30 by 42 inches in size, designed as aids in teaching classes the Elements of Music and its Notation. They embrace Exercises, Illustrations, simple Songs and Pieces, such as teachers are accustomed to write on the Blackboard, progressively arranged and printed from mammoth type, which can be easily seen from all parts of a large hall.

Care should be taken to order DR. LOWELL MASON'S MUSIC CHARTS. These Charts cannot be sent by mail.

Apples of Gold in Pictures of Silver.

BY EDWARD ROBERTS.

Price in paper covers, 30 cents each, or $25 a hundred; in board covers, 35 cents each or $30 per hundred.

The New Sunday-School Song Book. Containing treasures old and new, many beautiful Songs, the words as well as music of which are now first published, with the choicest of the old hymns and tunes.

MASON BROTHERS, Publishers,
596 Broadway, New York; 154 Fremont St., Boston.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Seventh Term of this Institution will commence on Wednesday, January 22d, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

Miners' Foundry and Machine Works,

SAN FRANCISCO

CORRESPONDENCE.

Letter from Humboldt County.

ARCATA, June 3, 1868.

This is a beautiful village, situated on the northern extremity of Humboldt Bay. Its former name—which is given to it on most of the maps—was Uniontown. Its present name—Arcata—like many of the names of the villages on the Pacific Coast, is of Indian origin, and signifies resting-place. Its name is certainly appropriate. For beauty of site, it is probably not excelled by any other village in the State. To the north and east lies the great belt of redwood timber, with its evergreen branches; to the south, the beautiful bay, with its eight miles of smooth, shining water, and to the northwest a grand prairie, covered with rich verdure and crimson flowers.

Beauty of situation is not, however, our only advantage. The trees afford lumber to the lumbermen. The soil yields fruits, grains, and vegetables in abundance to the farmer, and the bay bears on its waters the vessels to convey the products of the forest and soil to market.

It is also the depot of supplies for the garrison at Fort Gaston, on the Indian Reservation, and for the stores at Orleans and Sawyer's Bars. These supplies are forwarded across the mountains on pack mules—there being no wagon roads. It seems to one who has been accustomed to railroads and horses and wagons, a novel and slow way of conveying freight. But then, they get well paid for it, and that is all a Californian asks. The packer's love of gold dust exceeds his desire of convenience in freighting, and should a railroad be built to carry the supplies, he, perhaps, would exclaim with a sigh, like Othello, "My occupation's gone," or would decry it with as much vehemence as seamstresses decried sewing machines when they were first introduced.

The village is frequently visited by bands of natives, who are commonly called "Diggers." These are very different, in person and character, from the ideas we form of them as described by historians, painters, and poets. The story of Pocahontas is familiar to all readers of history, and is a beautiful example of woman's tenderness and devotion, but the idea it would convey of the feelings of the Indians in general is false, for their natural feelings, as displayed in their acts of cruelty and treachery, are the opposite of tenderness and devotion. The painting of the "Baptism of Pocahontas," in the rotunda of the Capitol at Washington is a specimen of beautiful painting, but conveys a somewhat exaggerated notion of the beauty of the "Digger squaw," and of her religious feelings; for she is preëminently ugly and irreligious.

Longfellow has given to the world "The Song of Hiawatha," in which he describes the Indian life and manners, but his descriptions are poetical fictions, and if he had heard the inconsonant mutterings of the squaws, he would scarcely dignify the sounds with the name of "song," or the whinings around the dead with the name of "sighs." Pinkney describes the Indian's bride as a "graceful female,"

> "Of gentle mien and shape, she seems
> For civil halls designed."

But the squaws that visit here will require considerable hewing down of cheek-bones, lips, and nose, and considerable training in gymnastics, before they will be ornamental visitors in our legislative halls.

The inhabitants of the village and country around consist of representatives from the various States of the Union, and from foreign countries—the former the most numerous. The society is by no means homogeneous, but the rising generation, while it will have features of difference in the individuals, corresponding with the present, will have more points of similarity, and society will be more a unit. The morals of the people are probably above the average of villages on this coast. Indeed, they will compare favorably with eastern villages, where both law and religion have restrained passion for years.

The temperance societies are two, both of which are in a flourishing condition. It is not known that these societies have reclaimed many, but they have restrained many young men, and kept them from frequenting saloons. Even the two saloons claim to be respectable, and the proprietor of one of them is a supporter of the church and Sabbath School.

The religious interest manifested by the people is not as great as it should be. All are for reform, but it is a reform of appearance rather than a change of heart, which is the only real reformation.

There are two churches—Methodist and Presbyterian. The former is without a pastor. The latter seems to be flourishing, as the regular attendance has steadily increased. Its Sabbath School is in a very prosperous condition. Its Superintendent, Mr. Byron Deming, is an energetic, active man in the cause. Within three months it has doubled in interest and numbers—having on last Sabbath, one hundred and sixty-seven in attendance. The infant class numbers about fifty, and the Young Men's Bible Class about fifteen. MIKROS.

Rights and Duties.

However great any one's admiration of our political institutions may be, if he be a just and candid thinker he must admit that they involve great and peculiar dangers. Political Rights are political Duties. The more Rights the more Duties, and these duties are of the most sacred order. It is absolutely indispensible to our national well-being that these duties should be wisely and conscientiously discharged. It is more necessary for us than for any other nation on the earth, that the great mass of the people should be intelligent enough to understand, and virtuous enough to fulfil the political obligations imposed upon them by the possession of the rights they enjoy. The working of our institutions cannot but be mischievous unless universal suffrage is controlled by universal knowledge and virtue. It is true the ends of political government are ends of expediency—the securing, namely, of legislative and other governmental action as shall best maintain order, protection, and security, and best promote the public interests. And through the conflict and counteraction of parties these ends may be so proximately accomplished in the midst of such corruption at the polls, in the legislative bodies, and in the administrative branches of the public service, that we may get on after a fashion and for a long time without falling into anarchy and dissolution.

But it is to be considered that meantime the temptations to corruption growing out of the conflict of rival parties and rival struggles for offices and emoluments are greater or at least of wider prevalance than in any other country in the world. Our political machineries are almost entirely controlled by a vast army of rival politicians, men who make politics a trade or rather a game, and hold the people as pawns for them to play.

We read in the newspapers of the stupendous unprincipled frauds perpetrated at our popular elections, and no one who has watched what has taken place under his own eyes can question the substantial truth of such relations as these newspapers bring from all quarters of the land, and especially our great cities after every election.

Now it is impossible to doubt that the working of our institutions is in this way demoralizing beyond all adequate estimation. Nothing is more undeniably demonstrable than that public corruption in a country like ours must sooner or later eat out the very heart of the private morals of a nation. No pure moral law can go on indefinitely, actuating the private life of the great masses who profligately disregard the principles of morality in their political conduct. Society may hold together after a fashion. The principle of "thieves' law" will prevent it from falling absolutely to pieces. But there cannot long be a pure moral law in the great heart of such a people; and meanwhile government in its highest actual aspect will be little more, or more moral than certain police and other machineries for keeping rogues from damaging each other in a certain number of too severely inconvenient ways!

But how to stem the tide of corrupton, how to counteract the tendencies to which institutions such as ours are so peculiarly liable—this is the great problem that presses on every thoughtful patriotic citizen, every good and Christian man. Everybody will agree it is immensely important that the sacred duties and great responsibilities, inseparable from the possession of political rights, should be taught and enforced upon the great masses from the highest moral and Christian point of view.

But how is this to be done?

It will not be done by politicians and demagogues. We may be sure of that. Many of them openly avow—we have heard the avowal—that in their view politics and morals have nothing to do with each other.

It will not be done, certainly not generally and adequately done, by the popular political press, which is mostly a partisan press—more apt to preach to the ignorant people of their rights than of their duties—than which preaching nothing can be more morally pernicious, exposing and denouncing, indeed, political fraud and corruption in the party it opposes, but too prone to deny, conceal, defend, or excuse it, in its own party.

By whom, then, shall the right moral and Christian instruction of the people in regard to their high and sacred duties as citizens be undertaken?—*Hartford Churchman.*

Sliding Down Hill.

There is nothing in the tropics that can console a man doomed to dwell there, for the loss of northern winters. Monkeys and humming-birds, gorgeous flowers and gigantic vegetation, insects, reptiles, and luscious fruits, which you cannot eat without a cholera, sweltering nights and roasting days. Deliver us from the intolerable delights of a tropical luxury. But a northern winter is full of bracing joys. Indoors all is ruddy and social, and out of doors all is energy and manly joy. A man who has blood and vital spirit, glories in the cold of winter. But of all sports what one can claim superiority over coasting—or as in our boyhood days it was called, "sliding down hill?" Long before we attained the age of a sled, two barrel staves fastened together by the knowing workman, served an excellent purpose, and required no mean skill in sitting and steering—a slight mistake in balancing, and the boy and staves change places—the boy under, the sliding machine on top— and then generally rolling into a promiscuous heap, out of which came some ripping remarks, not made by the sled. Next came the glory of full and real sledship—a sled with runners, and iron or steel shod; a sled painted and lettered. With that we defied the thermometer, and set our faces against the north wind. And how long the hill, a full half mile, is sought—not all of a gentle slope, nor yet too steep, but properly made up, as all hills should be, with a fine, gradual beginning, then a pitch, quite steep, then another long middle slope, a jounce here, a rullock there, a sweep yonder around a point, and a fetching-up place, right along the river. On such a hill-top, with a glorious sled, well muffled and mittened, the boy seats himself on his sled, prouder than ever king sat on his throne. Away he goes, with nimble feet stretching out before him (for a sled carries its rudder at the bow), and whose heels, with skilled touch, steer the flying machine. See him make a leap over the rullock, lifted clear into the air, and coming down with a jounce that makes everything crack. Boys have springs inside of them, under every muscle, on all sides of each bone, and come down with a springy bound, that cars and carriages may envy, but cannot hope to attain. None of your belly flounders. This lying down on a sled like a buckwheat cake on a gridiron; or that side-

way sitting on the hind end of it, with one leg corkscrewed out behind for steering, are not the thing. They are not orthodox. They savor of a compliance with weakness and timidity. A real boy should sit upon his sled fair and square, with his face to his work, and ready to meet all difficulties with his breast to them. Nor let any one decry the long tramp up hill that follows this fierce flight downward. What if it is long, the sled hanging behind, the way slippery, and withal some perils of those avalanches of other boys that come roaring and whirling down? The going up is such an indispensable part of the epic. It is the dark that gives power to the high light. The up makes, by very contrast, the glory of the down.

We never see the snow on the ground, old as we are, that we do not feel the very spirit of the sled again. Though a man's hair is as white as the snow under his feet, he need not be ashamed of a voyage on the sled.

One winter not long ago, when in New Bedford, we found a long street refused to horse vehicles, and set apart for sleds. The selectmen, or whatever their names were, at the public expense, carted on snow where the track was worn; iced it by water thrown on over night; had torches lit and placed along the sides; and the generous people catching the spirit, illuminated their houses, and this preparation was thrown open to men, women, and children. That city is civilized. The part of the millenium which consists in sliding down hill, will begin in New Bedford.—*Henry Ward Beecher.*

June 30th—SACRAMENTO, Captain Parker, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock.

Through tickets to Liverpool by the "Cunard," "Inman," and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired, an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship NEW YORK, Capt. C. M. Fauntleroy, will be dispatched July 3d, at 12 o'clock, noon, from wharf corner of First and Brannan streets, for YOKOHAMA, connecting with the GREAT REPUBLIC for HONGKONG, and COSTA RICA for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Co.'s Office, corner of Sacramento and Leidesdorff Sts.

OLIVER ELDRIDGE, Agent.

ILLUSTRATION OF DIVIDENDS OF PROFITS

—OF—

United States Life Insurance Comp'y,

NEW YORK.

OFFICE, No. 40 WALL STREET.

CASH ASSETS EXCEED $2,700,000.

SIXTH TRIENNIAL DIVIDEND.

The Board of Directors have this day declared a Dividend of FORTY PER CENT. for the three years ending at the 4th March, inst., to holders of all Policies then in force, on the whole sum of the annual participating premiums received during the said three years; and an additional Dividend of TWENTY PER CENT. on the whole sum of all previous Dividends and Additions, to holders of such Policies who have fulfilled their engagements with the Company, both Dividends being payable and available in the various modes explained in the Company's Prospectus.

For example, on a policy paying one hundred dollars a year of participating premium, the profits for each year and the total at each year on this system are:

Year.	Yearly.	Total.	Year.	Yearly.	Total.
1	$40 00	$40 00	28	$206 39	$2702 23
2	40 00	80 00	29	206 39	2908 63

Current Literature.

Extracts from Dr. Bellows' Letters.

FRANCE AND PARIS.

It is impossible to leave Paris or France without an increased sense of the material majesty of the nation and country. The American idea of France is derived too much from English prejudices to be correct, and we look at it too much in our generation through the feelings we have for its immediate government, to do justice to the permanent character which belongs to the people, and to appreciate the immense liberties and privileges which have been slowly wrested from the successive dynasties, and which no regime dares to invade. The industry of the country is so various, its ingenuity and taste so pre-eminent, and its resources so rich and self-contained, that its wealth is easily accounted for, and cannot be readily diminished by bad government. But what is most impressive is the union of longevity with youth. Ages have stored up their accumulations of riches in architecture, arts, and public works. The country is teeming with agricultural labor and experience. Its wines, and silks, and laces supply the world. Its importations are light, its exportations enormous. Its people are sober, industrious, and saving. Life is reduced in all its economies to a finished system. Waste or super abundance is unknown, and the people bear the marks of general health, due to the wisdom of their personal habits, the mixture of labor and leisure, their aptness for recreation and their knowledge how innocently to mingle in social relaxations. A universal pride in their country and a devotion to its glory sustain the government in constant improvements, and the people find their freedom and happiness largely in the provisions made for their daily enjoyment of out-door life in the midst of public gardens, abundant light, and cheap music.

ZURICH AND LUCERNE.

The moment we struck Zurich we found ourselves in this mighty current of summer tourists, and saw at once how deluged with travelers the land was. Lucerne is even more marked with this tide than Zurich. Its quay, commanding one of the loveliest prospects in the world, is wholly occupied by elegant hotels, crowded with guests. Its waters swarm with graceful and swift steamers, hurrying to and fro from village to village and ferrying this restless crowd of scenery-hunters to the various points of interest along these enchanting shores. Row-boats, with gay awnings, keep up the appearance of an endless water-party. The shaded walk running along the quay is the scene of constant rencontres between acquaintances, ignorant of each other's whereabouts, but seemingly not more surprised to meet here than though it were in the streets of London or Paris. Indeed, from every diligence or voiture in Switzerland one catches a bow from some familiar face, and is hardly astonished if our brother or next-door neighbor opens the carriage door as he alights at a way-side inn. What Paris is as a city, Switzerland is as a country, the spectacular centre of all pleasure-seekers.

PRAGUE.

Prague is as prosperous as a city ridden by a Catholic priesthood and population and managed as an Austrian province can be. It is divided between the rich and the poor—like Bohemia itself, which has no middle class. The land is owned by nobles, or rich proprietors, in immense sections, over which are scattered a set of miserable peasants, who are little better than the slaves of their employers. Sometimes a Prince or Count owns a territory of a hundred square miles, and all the population upon it are really his vassals. It is not strange that ten thousand Bohemians have emigrated to America this year. I see them on the streets in wagons, making their way to the depot, *en route* for America. Poor as they are, if they can only touch our shores with their last penny in their hands, they are saved men! Blessed haven to a population which all over Europe is landless and forlorn, and to whom their native soil offers no possible hope of relief from beggary and oppression. In Saxony I met not one beggar. Bohemia swarms with them. Catholicism and mendicity go hand in hand.

AMSTERDAM.

Amsterdam is picturesque in a certain sense. Its old gables, jutting forward and breaking the horizon with their scolloped fronts; the circular shape of the streets; the mixture of land and water; the gleaming canals; the dark brick houses, with their dark green doors, their large windows and their heavy-ironed stoops; the trees in the streets; the arching bridges; the charity-girls on various foundations, all in their several distinctive uniforms; the lumbering wagons, the occasional sledge—a carriage-body on runners, drawn by a horse driven by a man on foot, who drops a greased rag now and then before the runners to lubricate their passage over the pavement; the peasants in their gilded head ornaments and snowy caps; the sober citizens, unsmiling but gracious and formally polite—all give an air of much interest and novelty to the city.

We make the above short extracts from "The Old World in its New Face," Volume 1, a collection of letters written by Dr. Bellows, during a trip in Europe in 1867 and 1868, and published by Harper & Brothers, New York. The name of the author is a sufficient guaranty that these letters are well written and interesting. The social and political aspects of European life are depicted in a clear and instructive manner, but in considering the state of religion on the Continent he evidently views it through the colored glass of his own peculiar ideas, and the disposition to underrate all conditions of religious feeling not Unitarian or "Liberal," which is manifest in its pages, forms the chief defect of the book. It will, however, be popular, and, on the whole, useful. It is sold by Bancroft & Company, San Francisco.

LUTHER'S TABLE TALK.

The preservation of the works of the great Reformer, an account of which is given by Capt. Bell, seems almost miraculous. "After such time as God stirred up the spirit of Martin Luther to detect the corruptions and abuses of Popery," so great was his influence that many princes, abandoning the Popish religion, became Protestants, and to advance the cause of reformation, they ordered that Luther's "Divine Discourses" should be printed and distributed in every parish. Afterwards, the Pope, Gregory XIII, finding that the book was doing much harm to his cause, persuaded the Emperor to order that the book should be burned, and that it should be death to be found in possession of a copy, which order was carried out, and it was supposed that no copy remained. In 1624, however, a gentleman at work upon the foundation of an old house, built by his grandfather, found the book in a perfect state of preservation, and it still being unsafe to be owner of such a work, he sent it to Capt. Bell in England, who afterwards translated it. Several editions of the work have appeared from time to time, all of them, however, being incomplete, and containing many typographical errors.

A beautiful edition of the *Tischreden*, or Table Talk, translated by William Hazlitt, has just been published by the Lutheran Board of Publication, Philadelphia, and is for sale by H. H. Bancroft & Company, of this city. It is far more complete than any previous edition; the matter has been systematically arranged, and the numerous errors of other translators carefully corrected. It is precisely such a work as should be found in the library of all. We can give no better idea of its contents than by making a short extract from the translator's "Introduction." He says: "The contents of the book were gathered from the mouth of Luther, by his friends and disciples, and chiefly by Antony Lauterbach and John Aurifaber (Goldschmidt) who were very much with the great Reformer toward the close of his life. They consist of notes of his discourses, his opinions, his cursory observations in the freedom of private friendship, in his walks, during the performance of his clerical duties, and at table. The reporters were brimful of zeal. Whatever the "Man of God" uttered was forthwith entered upon their tablets. They were with him at his up-rising and his down-lying; they looked over his shoulder as he read or wrote his letters; did he utter an exclamation of pain or of pleasure, of joy or of sorrow, down it went; did he aspirate a thought above breath, it was caught by the intent ear of one of these German Boswells and committed to paper."

A. Roman & Co. have sent us the following stories for young folks, published by Henry Hoyt, Boston:

Pilgrim Street.—A story of life among the poorer class in Manchester, England, in which the difficulties and temptations incident to such a life, and the ability of upright character sustained by the Christian religion to surmount these difficulties, are portrayed in a manner which cannot fail to be interesting and instructive to children and youth.

After Years—by Glance Gaylord. This is a sequel to "Culm Rock," by the same author, and those who have read the latter work will be glad to renew their acquaintance with old friends, the account of whose adventures is continued with undiminished interest in this volume.

Maurice Guilford.—An interesting sketch of boyhood trials, and pleasures at home and school.

Chilion Beach hands us The Clariona, a new collection of Sabbath School music, by Wm. Bradbury.

Atlantic Monthly, for June. Boston: Ticknor & Fields.

The Broadway, for June, New York: Routledge & Sons.

The Family Treasury of Sunday Reading. New York: T. Nelson & Sons.

EDUCATIONAL.

The Teacher's Head.

When the California steamer used to stop at Kingston, Jamaica, there were always on board two human heads. One was that of the captain, and the other was that of the black man, using the top of his skull, like many others like him, to carry coal on board. Now, which of these heads corresponds with the teacher's? The sole business of the negro was to transfer the coal from one place to another, keeping on till the pile was exhausted, or the hold was full. If this be an image of the teacher's work, then all he has to do is to assign lesson after lesson from the text-book, till the "finis" is reached, the child crammed, or the term ended. The business of the captain, on the other hand, was, in the first place, to understand the nature of the vessel which he was commanding, and then to guide it, with a constant exercise of judgment, from New York to Aspinwall. His judgment was ever in exercise in regard to the dangers of the ship; its needs, whether of coal, of water, or of food; its cleanliness, its order, its time, and its cargo. Now, if this be an image of the work of the instructor, what follows? Surely this: that he ought to know the human mind in general, and his scholar's mind in particular; that he ought to use discrimination, constantly, in reference to the

special knowledge recommended to pupils; that he ought not to stop at a coaling station when he only needs food—that is, that he ought not to demand a slateful of arithmetic where a slateful of definitions would more truly supply his pupil's need; and finally, that he ought to examine his pupil, not always from the point of view of the text-book, but sometimes from the point of the pupil's individual condition and general progress from the harbor of ignorance, and unskillfulness, to the destination of knowledge, skill, and power. C. R. C.

AGRICULTURAL.

BEES ON A SMALL SCALE.—There are many householders whose means will not enable them to buy a cow or to provide keeping for her, were they in possession of one. But they may be equal to the purchase of a colony of bees, and to provide hives for the swarms resulting therefrom. Bees, like other stock, require pasturage, but, unlike horses, cattle and sheep, they are free commoners, ranging at will in search of stores, nor can they be arrested and punished for their intrusion upon premises alien to their owners. A single colony of bees, in good condition in the spring, may be counted upon to double or triple their numbers in a single season, securing ample stores for winter consumption, while supplying a gratifying surplus each autumn for household uses. This accumulation will prove most acceptable in families especially, while the price of butter rules so high as to place it beyond the reach of those not blest with elongated and plethoric purses. Try a colony of bees as an experiment.—*Rural New Yorker.*

A WORKSHOP.—A farmer is "accomplished," if in addition to sufficient knowledge of farming to be successful, he has enough of one or two trades, so that he can turn his hand to them, and do fair sort of work as his needs require. Most farmers must do some carpentering, and all ought to be handy with joiner's tools. The ability to use an awl and waxed-end in patching harness comes often in play, and when a man can do a neat bit of soldering, when tinwares leak, he will find his soldering iron and accompaniments among the most essential articles of his shop furniture. Every farm should have a good work shop, with all the tools in it that the farmer has occasion to use, if he can use them well; keep them constantly in order for immediate use.—*American Agriculturist.*

HORSES OVER-REACHING.—A correspondent of the Vermont *Farmer* says that the remedies we now possess to prevent over-reaching in horses are very unsatisfactory; but the best he has found is to shoe the front feet with heavy shoes; heel calks high, toe calks low. Shoe the hind feet with light shoes; low heel calks, high toes. In several cases he has welded a thin lip on the toe of the hind shoe, extending half way up the hoof. This protects the hind hoof from being broken, but is detrimental to the forward shoe in winter by doubling the calks. For interfering, turn the outside heel calks transversely, so as to turn the angle on, and put the toe calk a little to the inside. This plan never failed the writer but twice.

WOOD ASHES FOR STRAWBERRIES.—There is no better fertilizer for strawberries than ashes. We remember that one of the best crops we ever had was raised when the only manure used was wood ashes. All soils will not alike be benefited by such application; but it is always safe to use ashes in connection with other manures. If ashes only are used there are fewer weeds, as no seed can be introduced by the manure.

Links with Heaven.

Our God in Heaven from that holy place
To each of us an angel-guide has given;
But mothers of dead children have more grace—
For they gave angels to their God and Heaven.

How can a mother's heart feel cold or weary,
Knowing her dearer self safe, happy, warm?
How can she feel her road too dark and dreary,
Who knows her treasure sheltered from the storm?

How can she sin? Our hearts may be unheeding,
Our God forgot, our holy saints defied;
But can a mother hear her dead child pleading,
And thrust those little angel-hands aside?

Those little hands stretched down to draw her ever
Nearer to God by mother-love. We all
Are blind and weak; yet surely she can never,
With such a stake in Heaven, fail or fall.

She knows that, when the mighty angels raise
Chorus in Heaven, one little silver tone
Is hers forever; that one little praise,
One little happy voice, is all her own.

We may not see her sacred crown of honor,
But all the angels flitting to and fro
Pause smiling as they pass; they look upon her
As mother of an angel whom they know.

One whom they left nestled at Mary's feet—
The children's place in Heaven—who softly sings
A little chant to please them, slow and sweet,
Or, smiling strokes their little folded wings:

Or gives them white lillies or her beads
To play with; yet, in spite of flower or song,
They often lift a wistful look that pleads,
And ask her why their mother stays so long.

Then our dear Queen makes answer she will call
Her very soon; meanwhile they are beguiled
To wait and listen while she tells them all
A story of Jesus as a child.

Ah! saints in Heaven may pray with earnest will,
And pity for their weak and erring brothers;
Yet there is prayer in Heaven more tender still—
The little children pleading for their mothers.

Adelaide A. Procter.

Men and Manners.

Fanny Fern, in the *Ledger*, has some plain, common sense talk regarding the intercourse of intimate friends, which she thinks is much more reasonably conducted among men than by women. Thus, in order to avoid offending a female friend who may chance to call while a lady is occupied, the latter may not send down word that she is engaged, but must resort to a "white lie," and say that she is "out." Fanny once excused herself to a female visitor because she had an article to write. The visitor, as soon as Fanny had gone, turned to another, with the wild remark: "I suppose she said that to get rid of us—don't you?" Fanny says the intercourse of men with each other has always aroused her admiration. If one wants to read or write in another's company he does so, and no offence is taken.

If one has to leave, he often says no more than "I'm off," or "Good by, old fellow." Sometimes it is only a touch of the hat, or a hand laid on the other's shoulder in passing, and no black eyes follow, no locks of hair fly, nor do any hard words or looks result in the future.

Further fancies follow, regarding the possible conduct of females in imaginary emergencies. We quote:

If ladies smoked—which the gods forbid! do you suppose one lady would allow another to stop her in the street and light a cigar from her lips, when she never was introduced? When she didn't know who her dressmaker was, or where she bought her bonnets? Good heavens!

Did you ever notice if there is anything unexpected occurs in the mutual path of men through the same street, how naturally and frankly they accost each other, though perfect strangers, and converse about it, and go their several ways to their tombstones, after it? Not so, sweet woman! Catch her speaking to "that nasty thing!" How does she know "who or what she is?"

Children are so delicious about these matters. I saw two little girls the other day trying to crack a nut upon the sidewalk by pressing in turn their tiny shoes upon it. Despairing of success, they said to a gentleman passing, "Man, man, crack this nut for us, will you?" His handsome face was luminous with fun as he pressed his polished boot upon it, to the delight of the youngsters and myself. Now these little girls wouldn't have thought of asking a lady to do that, or if they had, do you think she would have stopped to do it?"—*Cleaveland Messenger.*

Responsibility.

A young man in Virginia had become sadly intemperate. He was a man of great capacity, fascination, and power, but he had a passion for brandy which nothing could control. Often in his walks a friend remonstrated with him, in vain; as often in turn would he urge his friend to take the social glass in vain. On one occasion the latter agreed to yield to him, and as they walked up to the bar together, the bar-keeper said:

"Gentlemen, what will you have?"

"Wine, sir," was the reply.

The glasses were filled, and the friends stood ready to pledge each other in renewed and eternal friendship, when he paused and said to his intemperate friend:

"Now, if I drink this glass and become a drunkard, will you take the responsibility?"

The drunkard looked at him with severity, and said:

"Set down that glass!"

It was set down, and the two walked away without saying a word.

Oh, the drunkard knows the awful consequences of the first glass. Even in his own madness for liquor he is not willing to assume the responsibility of another's becoming a drunkard.

What if the question were put to every dealer, as he asks for his license and pays his money: "Are you willing to assume the responsibility?" How many would say, if the love of gain and money did not rule, "Take back the license?"—*Christian Intelligencer.*

Conversation.

Said one who has fought life's battle for more than fourscore years: "Hardly anything makes more mischief in the world than *misreported conversation.* It is the foundation of more quarrels and neighborhood strifes, than any one thing."

"I never repeat a conversation," said a physician to his pastor. Ah, he well knew that his saddle-bags contained no cure for a tongue-wounded spirit.

Pascal says: "If every one knew what every other one said about him, there would not be four friends on earth."

Now, this difficulty of accurate reporting seems to require silence, for conversation will not be repeated without additions and comments, which may be so dovetailed into the original statement as that falsehood and deep injustice would be the certain consequences. *The tongue is the branding-iron of social life*, and when it is heated in that fire of which James makes mention, it will leave scars for the Day of Judgment." No sling-shot can strike harder than the false charge: "You said so and so." The bony hardness of the knuckles of the father of lies is then most apparent.—*Congregationalist.*

Mothers.

Each mother is a historian. She writes not the history of empires or of nations on paper, but she writes her own history on the imperishable mind of her child. That tablet and that history will remain indelible when time shall be no more. That history each mother shall meet again, and read with eternal joy or unutterable grief in the coming ages of eternity. This thought should weigh on the mind of every mother, and render her deeply circumspect, and prayerful and faithful in her solemn work of training up her children for heaven and immortality. The minds of children are very susceptible and easily impressed. A word, a look, a frown, may engrave an impression on the mind of a child which no lapse of time can efface or wash out. You walk along the seashore when the tide is out, and you form characters, or write words or names in the smooth white sand, which is spread out so clear and beautiful at your feet, according as your fancy may dictate; but the returning tide shall, in a few hours, wash out and efface all you have written. Not so the lines and characters of truth or error, which your conduct imprints on the mind of your child. There you write impressions for the everlasting good or ill of your child, which neither the floods nor the storms of earth can wash out, nor death's cold fingers erase, nor the slow-moving ages of eternity obliterate. How careful, then, should each mother be in the treatment of her child! How prayerful, and how serious, and how earnest to write the eternal truths of God on his mind—those truths which shall be his guide and teacher when her voice shall be silent in death.—*Southern Churchman*

The Young Folks.

Morning Rhymes.

Wake, little girl, for the sun is high,
And each little flower has opened its eye:
The robins sing in the cherry-trees,
And the clover bloom is a-buzz with bees.

Wake, little boy, the cattle are lowing,
Down in the pasture old bossie is mooing,
Carlo is barking good-morning "Bow-wow!"
Get up, little boy, and be after the cow.

But first, before going to work or to play,
With grateful hearts let us kneel and pray;
Thanking the dear, good father above
For his ceaseless care and his tender love.

Then we'll go down with sunshiny faces,
Ready to work, to sing or run races;
And all day long we will seek to do
Only the things that are right and true.

—*Little Corporal.*

A Short Rule for Fretters.

A little girl has been visiting me who was a fretter. She fretted when it rained, and fretted when it shone. She fretted when little girls came to see her, and fretted when they did not. It is dreadful to be a fretter. A fretter is troublesome to herself and troublesome to her friends. We, to be sure, have our trials; but fretting does not help us bear or get rid of them.

I have lately come across a short rule for fretters, which they shall have. Here it is: Never fret about what you can't help, because it won't do any good. Never fret about what you can help; because, if you can help it, do so. Say this when you get up in the morning, say it at noon, and say it at night; and not only say, but do.

"But we have our trials," the children say. Yes, you have, and your little trials are as hard to bear as our big ones. But fretting don't help them, nor wishing we were somewhere else, or dwelling upon them until they look a great deal bigger than they really are. Did you ever see that fable about the toad and the plantain leaf?

A toad used to live under a stone beside the brook. He was a pretty fat toad, and got along in the world as well as toads generally do, One day he went out to find something to eat, and hopping about among the leaves by the creek's side, he heard a rustle among them, and said to himself:

"There's a beetle! I like beetles. I'll be quiet and catch him."

So he crept along till he got to it, and stuck out his tongue to get him; but it happened to be a bumble bee! He dropped it like a hot coal, and cried out in the way toads cry, and hopped back to his hole under the stone. He suffered with the pain and was obliged to lie by for two or three days. Hopping back to his home, he plucked a leaf of the plaintain, and took it home for his medicine, and put it in his mouth to cure the sting of the bee. He stayed at home for two or three days, and began to get hungry, and poor, and lean. As he hopped along, he came under the leaf of a plantain, and being very tired, he stopped under the leaf, and looking up, said:

"Oh, what a nice time you plantains have. I should like to change places. Toads have a hard life."

The plantain said:

"Friend Toad, I should like to change, too. I don't see what toads can complain of. I think they have a fine time of it."

"Let me tell you," said the toad. "In the first place, we have to work for our living, and find all we get to eat; and sometimes, when we think we are going to get a beetle, we get a bumble bee. Then, again, in winter time we get frozen up, and when we come out, the boys come along and stone us, and the crows pick us up. Isn't that trouble? while you plantains just have to sit by the river and don't have to work. I should like to change places with you."

"Stop; let me tell you my side," said the plantain. We plantains can't hop about as you can, but have to stay put. If we want a drink of water, we can't go to the creek and get it. We can't move an inch to see the world and visit our next neighbors. Then, the sun shines hot all day, and we have to bear it, and can't hop under a cool leaf as you do. Then, by and by, along comes a cow and nips off our head, or a little worm eats into our heart, and we haven't power to shake him off. I should like to change places with you. You take mine, and I will take yours, for I am so anxious to hop down to the creek and get a drink."

"Stay, stay," cried the toad; "I hear a cricket. Let me get it." And off he went after the cricket and never came back.

So it appears that all have their trials, and the only right way of getting along, is not to wish ourselves somebody else, and fret ourselves because we are not, but contentedly bear our lot, and be satisfied with what God has given us.—*Southern Churchman.*

Tide Marks.

It was low tide when we went down to Bristol, and the great, gray rocks stood up, bare and grim, above the water; but high up, on all their sides, was a black line that seemed hardly dry, though it was far above the water.

"What makes that black mark on the rocks?" I asked of my friend.

"O, that is the *tide mark*," she replied. "Every day, when the tide comes in, the water rises and rises, until it reaches that line, and in a great many years it has worn away the stone until the mark is cut into the rock."

"O," thought I, "that is all, is it? Well I have seen a great many people that carried *tide marks* on their faces." Right in front of me was a pretty little girl, with delicate features, and pleasant blue eyes. But she had some queer little marks on her forehead, and I wondered how they came to be there, until presently her mother said,

"Shut down the blind now Carrie, the sun shines right in baby's face."

"I want to look out," said Carrie in a very peevish voice.

But her mother insisted, and Carrie shut the blind, and turned her face away from the window. O dear me! what a face it was! The blue eyes were full of frowns instead of smiles, the pleasant lips were drawn up in an ugly pout, and the queer little marks on the forehead had deepened into actual *wrinkles*.

"Poor little girl," I thought, "how badly you will feel when you grow up, to have your face all marked over with the tide marks of passion;" for these evil tempers leave their marks just as surely as the ocean does, and I have seen many a face stamped so deeply with self will and covetousness, that it must carry the marks to the grave.

Take care, little folks! and whenever you give way to bad temper, remember the "*tide marks.*"—*Lee.*

Taking a Stand.

Tom ——— was invited to the room of a friend, where he found a party of young men.

"Will you smoke, Tom?"

Tom did not smoke. He said he had given up smoking, and meant to stick to it.

"A little hot punch, Tom?"

"No, *sir!*"—very decidedly.

"We are getting up a club, Tom, and want you, as one of the old croquet club, to join the new one."

Tom still declined, and when asked why, frankly told why. Members of the old croquet club occasionally drank whiskey, and what assurance was there that they would not do the same thing again, or worse? In clubs, or associations of any kind, bad habits of the few often drag the whole club down, and bring its members into disgrace; "So I must stay out," said Tom, "even at the cost of losing a friend."

On his way home, Tom was joined by another of the company.

"I was so glad to hear you say no, Tom," said the young man, who wanted to, but did not quite dare to, unless somebody else took the lead.

Oh, how many thousands of young people, not quite strong enough to say "No" themselves, hail with thankful joy the "No" of a companion. They need holding up. We are not all oaks, able to breast temptation alone. We need support, assurance, the comfort of a strong, brave heart to lean upon.

There is wonderful power in a clear, decided "No." It braces the person who says it; it braces every right minded person who hears him. Oh, if the boys, and the girls, too, would only be true to their conscience, to their convictions of right, to their Christian training, there would not be so many sad wrecks among us.

"Be steadfast," says Paul, "immovable, abounding in the work of the Lord;" and I am sure it is a noble part of His work to strengthen the weak.—*Zion's Herald.*

"Bite Bigger, Billy."

One day a gentleman saw two boys going along in one of the streets of a great city. They were barefooted. Their clothes were ragged and dirty, and tied up by pieces of string. One of the boys was perfectly happy over what he had just picked up in the street.

"I say, Billy," said he to his companion, "wasn't somebody very good to drop this where I could find it? Look sharp, Billy, mebby you'll find something bimeby."

Presently the old gentleman heard the merry voice again saying:

"Oh, golly, Billy, if here ain't most half a peach, and 'tain't much dirty neither; 'cause you haven't found any thing, you may bite first."

Billy was going to take a very little taste of it, when his companion said:

"Bite bigger, Billy; mebby we'll find another 'fore long."

What a noble heart that boy had in spite of his rags and dirt? He was doing good.

There was nobody for him to be kind to but his companion in poverty—the poor, ragged boy at his side. But he was showing him all the kindness in his power when he said, "bite bigger Billy."

There was nothing greedy, nothing selfish about the boy. His conduct shows us, how even a poor beggar boy can do good by showing kindness.

"Bite bigger, Billy; mebby we'll find another 'fore long." Who can help admiring the noble heart of that boy? I would rather have that boy's kind and generous spirit than have a merchant's wealth without it.

"Bite bigger Billy." Think of these words if you are ever tempted to be unkind or selfish to your companions.—*Mountain Democrat.*

The Echo.

Little George had never heard anything of the echo. And accordingly one day when he was out in the meadow, he cried out, "Hurrah, hurrah!" Immediately in the nearest woods he heard a voice sound out, "Hurrah, hurrah!" He was very much astonished. At last he shouted, "Where are you?" The voice cried, "Where are you?" He answered back, "You are a foolish boy." "Foolish boy," echoed back from the woods.

"Now little George became very angry, and still harder he began to shout nicknames into the wood, all of which were echoed very faithfully back again. Then he ran into the wood, and sought all through it for the supposed boy, but he could find nobody. George ran home, and complained to his mother how a bad boy had concealed himself in the wood, and had called him names. The mother answered "This time, my dear little boy, you have betrayed yourself, for it is yourself whom you accused as the 'bad boy;' you have heard nothing but your own words, for as you have often before seen your face in the water, so now you have heard your voice in the wood. Had you spoken in friendly words, then my little George, friendly words would have echoed back to you again.

So it is always; what we suppose wrong in the conduct of another, is mostly only the echo of our own; If we treat every one kindly, they will treat us kindly. But if we are rude and uncivil, we are entitled to expect no better in return.—*Youth's Companion.*

A Happy Heart.

A little boy came to me this morning with a broken arrow, and begged me to mend it for him. It was a very handsome arrow, and was the pride of his heart, just then, so I did not wonder to see his lip quivering, and the tears come into his eyes.

"I'll *try* to fix it, darling," I said; "but I'm afraid I can't do it."

He watched me anxiously for a few minutes, and then said, cheerfully:

"Never mind, mamma; if you can't fix it, *I'll be just as happy without it.*"

Wasn't that a brave, sunshiny heart? And that made me think of a dear little girl, only three years old, whom I once saw bringing out her choicest playthings to amuse a little homesick cousin. Among the rest was a little trunk, with bands of gilt paper for straps—a very pretty toy; but careless little Fred tipped the lid too far back, and broke it off. He burst out with a cry of fright; but little Minnie, with her own eyes full of tears, said:

"Never mind, Freddie; just see what a cunning little cradle the top will make."

Dear little Minnie went to live with the angels a few years ago, but we have a great many such sweet memories to keep of her.

Keep a happy heart, little children, and you will be like sunbeams wherever you may go.—*Little Corporal.*

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

Also, SCHOOL FURNITURE.

WARREN HOLT,
205 Montgomery Street.

PACIFIC COAST ITEMS.

THE twelfth term of the State Normal School will commence on July 1st, and all candidates for admission must be present at that time. The regular exercises will commence on July 6th. The Board of Trustees consists of the following gentlemen: Gov. Haight, O. P. Fitzgerald, State Superintendent, Jas. Denman, Superintendent of San Francisco, M. Cottle, Sup't of San Joaquin County, F. H. Braly, Sup't Santa Clara County, A. Trafton, Sup't Sacramento County, S. I. C. Swezey, and G. M. Sibley. The Teachers are: Rev. W. T. Lucky, A.M., Principal; H. P. Carlton, Vice Principal; Miss E. W. Houghton and Mrs. D. Clark, Assistants.

SANTA BARBARA is situated in a beautiful valley surrounded on three sides by lofty ranges of hills. It has a deep and noble harbor, and in early times, before the advent of Americans, was a place boasting of large foreign commerce—chiefly hides and tallow. It is within thirty hours' sailing of San Francisco, and we have communication with the metropolis once a week. There is also a daily line of stages passing through the town and county, carrying the mail, thus affording us an opportunity of knowing what is going on in the outside world. Farming land is plenty at prices of from one to twenty dollars per acre.—*Santa Barbara Post.*

UKIAH is the focus of an extensive and valuable area of country capable of sustaining a large population, and of producing in abundance many of the commodities of commerce. In water, climate, soil, and timber, nature has lavishly blessed us, and we should rejoice that our lives "are cast in pleasant places." No mosquitoes, no gnats, no fever and ague, no droughts, no famines, no alkali, no tornadoes, and not enough earthquakes and Black Republicans to do much damage.—*Mendocino Democrat.*

THE Virginia *Trespass* thus enlarges on the advantages of that region: "About one inch of cheerful snow fell last night. How beautiful the sagebrush looked this morning, and how pleasant it is to know that we are enjoying the pure, cool, delicious air of the mountains, while hundreds of poor wretches are being smothered by the dense perfume and sickening odors of roses, magnolias, and lilies that make California almost uninhabitable."

THREE gentlemen have arrived in this city, each one of whom represents an association in the Southern States of people who are seeking homes in the far West. These gentlemen will take a trip through the agricultural counties of our State, and upon their report to the associations for whom they act will depend the question whether they come here or go elsewhere.—*Times.*

A CHINAMAN was horribly beaten by his countrymen on Sunday last, because he had cut off his queue and otherwise showed his desire to adopt the customs of the Americans. It is suspected that persons of high rank among the Chinese are responsible for the outrage.

THE gap in the Central Pacific Railroad has at last been closed. The last rail was laid on Wednesday evening. The cars can now run directly from Sacramento to Reno. The vast army of laborers has moved eastward to complete the road to Salt Lake City.

THE State Teachers' Institute has been in session in this city during the greater part of the past week. The meetings have been generally well attended by the teachers and friends of education throughout the State, and have been interesting and profitable.

"THE PAUL TRACT HOMESTEAD ASSOCIATION" offers to give to the "California Academy of Natural Science" a block of land in South San Francisco, on condition that a building costing not less than $10,000 shall be built within two years.

THERE is to be an excursion of teachers over the Central Pacific Railroad to Lake Tahoe, and all who wish to accompany it are requested to register their names at the Office of the Board of Education before the 25th inst.

THE people of Virginia City talk of building a wooden railroad from Reno to a point near that city. The estimated cost is only $2,270 per mile. A wooden track is also proposed between Los Angeles and Anaheim.

A BAND of thirty-five Indians were killed by a party of scouts in Idaho, recently. The valor exhibited by the scouts is apparent when we know that of the band only *thirty* were women and children.

THE Napa *Reporter* says that many of the farmers in that vicinity are making experiments in the culture of the hop, and are satisfied it can be easily and remuneratively cultivated in that valley.

THE daily Overland Stages are now making clock-work time with passengers and mails between this city and San Francisco in 72 hours.—*Los Angeles Republican.*

FROM Sacramento to Washington D. C. in fourteen days is the quickest time on record, made by Surveyor-Gen. Upson.

THE Hesperian College at Woodland, Yolo County, has two hundred students.

THE Salt Lake *News* advises the Bishops to keep watch over the people under their charge, that they don't desert their farms and go to work on the railroad.

VALLEJO has everything necessary to constitute a first-class city, except a few more houses and people.—*Solano Press.*

ONE hundred and twenty-five tons of copper ore were shipped from Stockton to this city on the 10th and 11th of June.

THE stage from Virginia City to Austin was stopped by highwaymen on the 12th., and robbed of nearly $5,000.

THE conchologieal collection of Dr. Newcomb, of Oakland, has been sold to Cornell University for $15,000.

THE New Mercantile Library building was dedicated on Thursday evening, with appropriate ceremonies.

WE have received the first numbers of the *Alameda Democrat*, a new paper published at San Leandro.

ACCORDING to the *Messenger*, they had a shower of small frogs near Woodbridge last week.

BUSINESS is becoming more brisk in the vicinity of Dutch Flat; so says the *Enquirer.*

MARK TWAIN is busy writing a book on the Holy Land.

SOLANO COUNTY has seven newspapers.

TELEGRAPHIC SUMMARY.

EASTERN.—It is said that the President offered the Treasury department to Groesbeck of Ohio....Mayor Heath, of New Orleans, refused to surrender his office when ordered to do so by Gen. Buchanan, and was arrested, but was released on giving up the keys to the Official Bureau....The State Medical Society of Pennsylvania voted against the admission of female practitioners....Reverdy Johnson has been confirmed as Minister to England....Wade Hampton and R. B. Rhett are delagates to the National Democratic Convention. ....The California Stage Company has received the contract for carrying the mails between the terminus of the Union and Central Pacific Railroads at $1,000 per day....Fenian movements are still uncertain. There is a report that Gen. Grant has ordered troops to watch them.

CONGRESSIONAL.—The majority of the House Committee favor an immediate appropriation for the Alaska purchase-money....A motion was made by Gen. Logan for moving the National Capital, but was decisively voted down....The bill for the admission of the Carolinas, Georgia, Florida, and Alabama has been amended and passed by the Senate, and the Senate amendments concurred in by the House....Senator Conness moved that the Pacific Railroad Company be allowed to use as much of Goat Island as they need for depots etc. The question was debated and postponed....Wooley has been discharged from the custody of the House....The Senate Judiciary Committee has reported a bill requiring United States civil officers to take an oath to support the Constitution and faithfully perform the duties of their office, and repealing other disabilities.

FOREIGN.—Advices from Buenos Ayres state that there are indications of disagreement between the Allies, who have not yet taken Humaita....Disraeli and his party have decided to appeal from Parliament to the country. The election will take place in November, and the new Parliament will meet on the 9th of December....Bismarck will take a vacation of three months for his health....The St. Domingo revolution still gains ground. Salnave is shut up in his capital....The war feeling in Peru and Chili against Spain is becoming more intense....Prince Michel of Servia has been assassinated in Belgrave by three men, two of whom have been arrested....The Canadian Government has ordered the authorities of Toronto to be ready to furnish 15,000 men, if they shall be needed, to repel the Fenians....The Ascot Derby race was won by the Marquis of Hastings' colt "Earl." ....The North German Government proposes an international law for the protection of private property on the seas in time of war....Costa Rica declines to sell Prussia a port in the Caribbean Sea.

WEEKLY MARKET REPORT.

Produce Market.

WEDNESDAY, June 17, 1868.

FLOUR—Sales of 500 bbls in lots, current rates. We quote jobbing rates for city mills as follows: Superfine, hf sks, ₱ 196 lbs, $6 37½@6 50; do, qr sks, $6 50@6 62½; Extra, hf sks, $7 50@7 62½; do, qr sks, $7 62½@7 75.

WHEAT—Sale of 4,000 sks choice Santa Clara, for local milling, $2 25; other grades, $2 10@2 20 ₱ 100 lbs.

BARLEY—Sale of 1,000 sks new, private; quotable at $1 80. The nominal range for old feed and brewing is $1 80@1 90. At the close, 300 sks old brewing, $1 85 ₱ 100 lbs.

OATS—Sale of 300 sks fair, $2 30. We quote $2 20@2 40 ₱ 100 lbs as extremes.

POTATOES—Sales of 500 sks new Mission, $1 25@1 35 ₱ 100 lbs.

ONIONS—Choice Red are in fair supply at $1 25@1 37½ ₱ 100 lbs.

CORN—The market is dull at $2 20@2 37½ ₱ 100 lbs for the various kinds.

RYE—Is firmly held at $2 50 ₱ 100 lbs.

BUCKWHEAT—Moves off slowly at $1 75@$1 85 ₱ 100 lbs.

BEANS—The market continue firm at the following rates for jobbing lots: Bayo, 4½c; Butter, 6½c; Pea (very scarce), 12½; small White, 8c; Pink, 4@4½c; Red, 2¾@3c ₱ lb.

BRAN—Sales of 50 tons within the range of $27 50@30 ₱ ton.

MIDDLINGS—Feed descriptions meet with a fair sale at $35@37 50; fine are dull and nominal at $45@50 ₱ ton.

OIL CAKE MEAL—In fair request at $30 ₱ ton.

HAY—One cargo of fair old sold yesterday at $14; choice descriptions would command $15. The range for new is $10@14; same qualities of old sell for $1 higher ₱ ton.

DAIRY PRODUCTS—Fresh roll Butter is more plentiful, and is now quoted at 35@36c; California firkin the same, with light sales; Cheese, 14@16c for good to choice California dairies; S. Hough & Son's, 18c; Eastern, 18@20c ₱ lb. Eggs are firmer, Hen being quoted at 37½@39c, and Duck 30@32½ ₱ dozen.

POULTRY—The market is again easier. Live Turkeys are quoted at 17@19c, and dressed do, 19@21c ₱ lb; Hens, $6 50@7; Roosters, $6@5 50; Spring Chickens, $4 50@6; Ducks, $5@5 50 ₱ doz; Geese, $1 75@2 for young and $2 50@3 ₱ pair for old.

PROVISIONS—We quote jobbing prices as follows: California smoked Bacon, 15@16c; Oregon do, 12@13c; California Hams, 16@17c; Oregon do, 15@17c; California Lard, 14@15c, with 15½c for small tins; Eastern do, 12½@13½c ₱ lb.

WOOL.—The bulk of the spring clip has already arrived; hereafter the receipts will be light. It is estimated that the amount which has thus far arrived is equal to the entire clip of last year. The local mills are still purchasing sparingly. However, the demand for shipment shows no abatement, and lots have been sold far ahead of the facilities for grading. The sales since last Wednesday aggregate about 300,000 lbs, including one lot of 18,000 lbs slightly burry. The market closes active and firm at 17@17½c for clean shipping grades; 15@17c for medium grades, and 12@14c ₱ lb for burry.

HIDES—Sales since last Wednesday aggregate 1,200 California dry, usual selection, 14@15c ₱ lb; Mexican, 12½@13c ₱ lb.

TALLOW—Cood to choice Beef and Mutton may be quoted at 7½@7¾c, as extremes, the bulk of the sales being at 7½c ₱ lb.

San Francisco Cattle Market.

As usual at this season of the year, the demand is light. Quotations are essentially the same as last week.

We quote slaughterers' prices as follows:

BEEF—American, 1st quality, 6@8c ₱ lb.
do 2d do 5@7c ₱ lb.
VEAL—Steady at 7@10c ₱ lb.
MUTTON—Easy at 5@9c ₱ lb.
LAMB—Ranges from 5½ to 7½c ₱ lb.
PORK—Undressed, 4½@7½c; dressed, 7@11c ₱ lb, for the various qualities.

CURRENT TOPICS.

The exodus of our citizens into the country has been more general this summer than in any former year. The reasons for leaving the city are various, having reference both to health and pleasure, and we are inclined to favor the custom rather than to complain of it. Still, there are some evils incident to it that may become serious, unless special care is taken by those who thus interrupt their ordinary habits and duties. It is not unnatural that persons who go from home for a season for the purpose of recreation, should feel that no obligations of a religious character need be assumed by them in their absence. And it is, certainly, very likely that those who remain in town will feel that there is little prospect of accomplishing much, while there are so few to labor, and maintain the various agencies of the Church for general usefulness. The result is that piety languishes in the hearts of those who are away, and the time spent in the country is really lost, so far as efforts to do good are concerned, and the churches in the city languish, because, by common consent, it is assumed that nothing shall be achieved during the summer. There is really no necessity that either of these evils result from a practice that has so much to commend it. Our places of public resort might be supplied with the privileges of Christian worship, and might be centers of healthful religious influence, if all Christian people who visit them would be true to the obligations that are everywhere binding. And our city churches might flourish throughout the summer if those members who remain in the city would take pains to discharge their duties, in attending meetings and supporting other interests, with all the more care because the number is less of those who can be depended on for such service. Surely, it ought not to be true that one-third of the year must be of little or no value to the Church. Let all consider how far they may effect the change, both at home and abroad, which should be greatly desired.

The constantly repeated facts from the South confirm the fears of those who have been unable to see whence would come the bread that should keep the people from starvation. There seems to be a general leveling of all classes under the stern hand of want, and the narratives of suffering are enough both to convince all of the fearful consequences of rebellion, and to excite the pity and sympathy of the most hard-hearted. It would be noble, now that only worthy motives can be supposed to influence such conduct, if the people of the North, where plenty has almost attained to luxury since the close of the war would really contribute what will substantially relieve those who are in so much distress. The sending of a few thousand bushels of wheat from one city, and a few thousand dollars from another, does not afford the help that is needed. Millions of hungry people can be fed only by the gifts of millions of others who may furnish each a little. Some systematic mode of reaching all kinds of persons with the opportunity to subscribe might be devised, and the multitude of small sums that would thus be gathered in a few weeks, under the pressure of the cry that our own countrymen are starving, would bear the sufferers at the South over the months that must elapse before they can gather another crop. We shall be glad to aid, so far as we may be able, in the execution of any plans that may be adopted, and we sincerely hope some plans will be adopted, for the accomplishment of an object so humane and Christian.

Our Baptist friends are setting an example of vigorous preparation for a golden future, by forming a society to secure eligible building lots to be used as the centers of denominational effort as the years may indicate hereafter. Whether their plan contemplates action outside of San Francisco, we are not informed, but there is no conclusive reason why it could not wisely be extended to embrace all towns in the State that promise any considerable degree of permanence. It is still true, however, that the harvest is great and the laborers few, and it may be that attention concentrated on a few points will secure as large a proportion of the present harvest, because of thoroughness in the manner of procedure, as would a more widely diffused effort with less completeness of cultivation.

The California State Normal School has already exerted an influence upon the educational advancement of the State amply repaying all expenditures of time and money that have hitherto been made. The recent election of Rev. Wm. T. Lucky, D.D., as Principal, it is hoped, will secure an increased facility in attaining the objects of the institution, aided, as he will be, by the experienced teachers who have so long been engaged in the practical conduct of the School. Whatever tends to elevate the profession of teaching is sure to receive the sympathy of all good men, and the modern idea of training schools for teachers has now become so fully identified with the educational systems of our country that there is no danger of an attempt to discontinue, by an enlightened commonwealth, the policy of helping the children by furnishing them with teachers "apt to teach," and inspired with professional enthusiasm.

The race between the Central and Union Pacific Railroad Companies is watched by the people with a lively interest, since the efforts which are made by each company, in its zeal to distance its competitor, tend directly to the advantage of the public, by hastening the approach of the time when San Francisco and New York may salute each other as neighbors. Nor is there much anxiety felt about the result, for whatever advantages for the respective companies may be at stake, the people desire only the completion of the road, and care comparatively little which shall win. The Central has hitherto had greater obstacles to contend with, but is said to have done its work in a more substantial manner than the other company. It has, moreover, the advantage of finding plenty of timber for its use along almost the entire route. The Union, on account of the more favorable nature of the ground, and the greater facility of grading, and possibly by the more imperfect character of its work by which it hopes to "fill the bill" in the eyes of Government, a short time ago seemed to have the start of its rival, and its advantage had been increased by engaging the assistance of the Mormons in the work; but it now appears that Brigham Young who, unable to prevent the construction of the road, has determined to derive the greatest possible benefits from it, has made, or is about to make a contract to build a long section also on the Central road, so that this company which naturally has the sympathy of the people of this coast, is by no means beaten yet. The closing up of the gap on the Summit, which has been so long prevented by the snow, having been at last accomplished, the work will go on more rapidly than ever. The contest is becoming day by day more exciting and it is quite possible that, as a result, we may have railroad communication with the East at an earlier date than even California enthusiasm has ever ventured to predict.

The death of Heber Kimball, who has been for years the moving spirit among the Mormons, must have a marked effect upon the religious condition of that strange body of people. He was a man of great ability, and had a remarkable power over the Mormons, because of their confidence in his devotion to their interests. Indeed, there must be a very wide vacancy in the state councils of Utah, for it will be long before Brigham Young will have another adviser upon whom he can lean, as he has been wont to lean upon Kimball, for years past. Whether any change in their policy will be the result, or any good may be hoped for, because an acknowledged leader is dead, must be known only with the lapse of time. There are indications that more than usual commotion and difference of views, has prevailed among the masses of the people, and it is not impossible that this may greatly increase, and become more fully developed, now that so prominent a controlling power is removed.

Much gratification must be felt throughout the Church, from the reports in the Assemblies respecting the progress that has been made in all departments of missionary work. Never have our churches given more money for the proper extension of our Lord's kingdom, and never have our several Boards

and Committees been more effective and economical in the employment of money, than during the year that has just closed. In one view of the fact, it is unfortunate that any of these agencies of the Church should be in debt, notwithstanding such a record of success. But, in another view, it should not be so regarded, for this debt has been incurred because of the very pressure from the demands of open fields and inviting opportunities for effort. The burden should not be permitted to rest upon any of our Boards, and with the prospect of union, there should be the most efficient facilities for advance, with which the combined power of the Church may be brought to bear on the great world. The appeals of those managing our foreign missionary interests, especially, should be heeded without delay, and we do not doubt their treasury will soon be supplied with such an amount as will give a decided impulse to this most worthy cause.

Religious Intelligence.

PACIFIC COAST.

We learn with much regret that Rev. J. A. Skinner has resigned his place as pastor of the First Presbyterian Church of Stockton, and that the Presbytery has dissolved the relation. There are many reasons why it is always unfortunate when a minister who has been successful in his position feels constrained to abandon it, but it is especially to be regretted when one who has become familiar with life in California, and has established a reputation among our churches, finds it to be his duty to return to the Atlantic States. Mr. Skinner will be permitted to leave us only because he feels that he must go, and we cordially wish that he may be as useful in the East as he has been on the Pacific coast. The church in Stockton is one of the best in the State, and we trust they will not be without a pastor for any time who may be able to maintain the interests that must otherwise suffer.

—

Many persons are looking for the arrival of Rev. Dr. Gurley of Washington, on this coast, and we are often asked when he may be expected. In reply, we can only say what the telegraph has announced, viz: that Dr. Gurley was too unwell to sail at the time when he was supposed to leave New York. It may be that his visit must be posptoned for some months, but he will have a hearty welcome when he comes.

—

Open Communion.—The Open Communion Baptist Society recently organized in Brooklyn, is said to be in a very prosperous condition, and preparations are already being made for the erection of a church edifice for its use. The organization of Baptist societies with such principles should be regarded as a sign of progress, and we are glad to hear that this effort is meeting with success.

—

The next Methodist Conference is to be held in this city on the 16th of September. It will be presided over by Bishop Scott of whom the *Advocate* says: "We rejoice at his coming, as a more judicious man is not to be found on the bench, nor one whose administration has given greater satisfaction to the people of this coast."

—

Rev. Mr. McLafferty, of Petaluma, who has been absent on a visit to China, is expected home soon. We learn that his health is considerably improved.

Heterodox.—It is said that there are several prominent Methodist clergymen in this State who agree in their peculiar doctrinal views respecting the Trinity with S. D. Simonds, who was suspended by the California Conference for what it considered heterodoxy, but who has been reinstated by the General Conference.

—

Revival in Sacramento.—Twenty-one persons have been immersed at Sacramento since Elder Knapp arrived in that place. The report that the Elder has been reprimanded by the Baptist Church for Unitarian tendencies is said to be wholly without foundation.

—

New Idea.—At a festival given by the ladies of the M. E. church in Placerville, in aid of the building fund, a wedding was included in the order of exercises. A novel feature, but one which seems to have been perfectly successful in drawing a crowd.

—

Lands of the Bible.—Rev. J. A. Daly is delivering a course of lectures on the Holy Land at the City Hall in Stockton. His travels have made him well acquainted with his subject, and the lectures are said to be of more than ordinary interest.

—

Success.—We are glad to learn that the Floral Festival given by the ladies in behalf of the Young Men's Christian Association, besides affording a source of enjoyment to our citizens, proved also a financial success.

—

The work of erecting the new tower on the Presbyterian church at Vallejo is being rapidly pushed forward. The tower will be fourteen feet square at the base, and over one hundred feet high, including the spire.

—

Rev. B. N. Seymour, at Haywood, has determined to carry the war into the enemy's camp, and will accordingly preach a temperance sermon at the Raiload Depot on Sunday, 28th inst.

—

Rev. J. D. Driver, agent of the American Bible Society, is presenting, in his earnest and forcible manner, the claims of the Society to the Christians of all denominations in Oregon.

—

A fair was held last week by the ladies of the Episcopal church in Vallejo, for the benefit of the Church of the Ascension, the net profits of which amounted to $970.

—

The funeral of Father Cotter took place in Sacramento on the 19th inst. All the prominent members of the Catholic clergy in the State took part in the ceremonies.

—

The Young Men's Christian Association at Stockton is prospering finely, and new members are constantly being received.

—

New Church.—An Episcopal church has been organized in Watsonville. Rev. Mr. Anderson is pastor.

—

Rev. N. Rounds, D.D., has been elected President of Willamette University, at Salem, Oregon.

—

Rev. J. M. Alexander has, we understand, returned to San Leandro from his visit to Nevada.

EASTERN.

The Workingwoman's Home—First Anniversary Exercises.—During the past year, the directors of the Five Points House of Industry have inaugurated a new scheme of benevolence—the Working woman's Home—Mott and Elizabeth Sts.—which has been in operation a little more than five months, and which held its first annual reception on May 7th. The buildings have not been as yet completely furnished, the dormitories of the upper floor being still in the hands of the upholsterer. The cost of the whole establishment, completely furnished, is estimated at $140,000. The Home was opened for reception of boarders, at $3.25 per week, washing included, on October 1st, 1867—seventeen boarders being present at the first meal. The whole number of different persons received for five months has been 248, of which 141 remained in the institution at the date of the report. For five months, ending with February, the largest number in each month were as follows: October, 80; November, 101; December. 105; January, 107; Febuary, 141. The total amount of donation for the year has been $42,224.98. The number of boarders has been thus far too limited to meet current expenses, though it is estimated that two hundred and fifty boarders at $3.25 per week would make the institution a self-supporting one.—*Clevelamd Messenger.*

The graduating class of Union Theological Seminary, in New York, at their farewell meeting, adopted the following preamble and resolutions, which are a pleasing expression of Christian union:

"*Whereas*, We the members of the class of '68 of Union Theological Seminary, representing eight denominations of Christians, viz: Presbyterian (N. S.), Congregational, Reformed, Methodist, Baptist, Episcopal, Lutheran, and Presbyterian (O. S.), are about to separate to our respective fields of labor, and feeling that in our intercourse with each other no denominational differences have at all marred our harmony and Christian fellowship, but that in all things we have been able to study and labor together in the things pertaining to the Master's Kingdom, and feeling that fraternal intercourse can be maintained between the different denominations; therefore

"*Resolved*, That we are more than ever persuaded of the oneness of Christ's people, that the freest Christian intercourse should mark their dealings with each other, and that mutual sympathy and concert of action should govern their conduct in carrying the Gospel to the world."—*N. Y. Observer.*

Presbyterian, O. S.—The Board of Foreign Missions of this Church have missions among the Jews and the Indians of this country; the Romanists of Brazil and the United States of Columbia; in Japan, China, Siam, among the Laos, and in India; in Liberia and Corsica in Africa. In these countries the Board has 79 foreign missionaries, 4 missionary physicians, 21 ordained native and licentiate preachers, 17 assistant missionaries from this country, besides the wives of the missionaries; native helpers, 184—or in all a force of 370. There are 44 organized churches, with a membership of over 1,600; to these, as far as reported, have been added the past year nearly 300 communicants. In the schools are 6,750 children. The receipts of the Board have been $185,308; the expenditures, with the debt of last year of $35,472, have been $312,828, leaving a balance against the treasury of 28,356. The gifts of the children of the Church for this cause were unexampled in her history, amounting to $45,340. The sum of $50,700 has been expended for extra exchange.—*Christian Instructor.*

Presbyterian, N. S.—The Presbytery of Cincinnati at its late meeting passed a resolution on reunion declaring that "such has been the progress toward the desired consummation, so manifestly happy have been the results, so encouraging are the present indications, that we must believe the work is of God. We do therefore express our earnest hope that the reunion of the N. S., and O. S. Churches will be effected, the time and conditions of which we intrust to the Joint Committee and General Assemblies and further leadings of Divine Providence." The Presbytery also took action against promiscuous dancing, as a violation of the seventh commandment, and warning and advising against the practice of this amusement, inasmuch as it tends to destroy the spirituality of God's people, and thus bring great re-

proach upon the cause of the Redeemer.—*Christian Instructor.*

Bishop Janes asserts that the Methodists of the United States paid last year $2,000,000 tax on the tobacco used by them, while the missionary treasury is $70,000 in debt.

It is estimated that $6,000,000 will cover the entire amount paid the ministers of all denominations in the United States, per annum. It is also estimated that it takes a still larger amount to feed the dogs in the same bounds. Dogs are good things in their proper place, and we have no objection to their being fed. So are preachers, and they have at least a claim to support. If, in these days of retrenchment, either expense must be reduced, we think the dogs had better be abated, and the gospel, of which the ministers are the authorized representatives, be retained. People will, of course, be governed by their affinities. If they prefer dogs to preachers, the latter may starve so far as they are concerned.—*Texan Christian Advocate.*

Evangelists in the Episcopal Church.—How to reach the masses who will not come under the ministry of the gospel, is a question that is agitating the Church generally. The Episcopal Church has been opposed to the order of men known as Evangelists or Revivalists. At the recent Convention held in Boston, a proposal came directly before the body to call in some such instrumentality. The proposal was favorably considered, and in a modified form Evangelists will be a part, probably, of the Church force of the Episcopalians.—*Examiner and Chronicle.*

The *Central Christian Advocate*, organ of the Methodist Episcopal Church, states that while in 1862 there were but 32 ministers and 2,141 members of that church in Missouri, there are now about 200 ministers and 26,000 members. An increase of about 4,000 a year. It advocates the division of the State into two conferences, and predicts that four years hence they will each embrace 150 ministers and 20,000 members.

The $100,000 gift of Conrad Popenhusen, Esq., of College Point N. Y., for the establishment and endowment of an institute for education and art in that place, is deservedly attracting public and private commendation.—*Intelligencer.*

Rev. John Corrington, of the Princeton Theological Seminary, will soon sail as a missionary to Siam.—*Intelligencer.*

FOREIGN.

Rev. Lowell Smith, D.D., who has been a missionary to the Sandwich Islands more than thirty years, has just sailed in the *Morning Star* to visit the mission stations at the Marquesas group. He is now one of the veteran corps. A graduate of Williams College of the class of 1829 and of Auburn Theological Seminary in 1832, he has ever since been a successful minister of the gospel among the islands of the sea. There is something heroic and sublime in a life so spent, and crowned with usefulness and the Master's "Well done."—*Christian Commonwealth.*

The *St. Paul's Magazine*, gives a bit of Irish Church statistics which illustrates the condition of that wonderful establishment. In one district there are 49 Protestant families—251 souls. Of these there might be a congregation of 150 persons; enough to fill a good-sized drawing room. To minister to these there are a dean, an archdeacon, a treasurer, a rural dean, a vicar-general, a registrar, four incumbents, two curates. These are all paid, out of the income of the thirteen millions of church property in Ireland, and these people will fight to the last to sustain such a profitable iniquity.—*Cleveland Messenger.*

George Peabody and the Pope.—A statement recently published to the effect that Mr. Peabody on quitting Rome, had left the Pope £200,000, is denied on authority. The Italian papers report more accurately that he had given $10,000 for one of the educational institutions in Rome.—*Intelligencer.*

Young Men's Christian Association.—The twenty-third annual meeting of this association has just been held in England at Exeter Hall, London, presided over by the Earl of Shaftesbury. During the last year assistance was rendered toward the organization of new associations in twenty-one towns in England. There are now in co-operation with the London Association, at home and abroad, 736 societies, having 58,430 members, and 241 others from which no return of members has been received. In England and Wales there are 101 associations, with 11,917 members; in Scotland 47, with 3,098 members; and in Ireland 10, with 817 members. The central Bible Class, in Aldersgate Street, was attended during the year by 3,300 different young men, and the reading-room by 818, of whom 325 had joined the educational classes.—*Independent.*

Rev. J. L. Phillips, of Orissa, India, describes the moral desolation spreading among the Burmese and Karens, from the growing use of alcohol and opium, introduced by the English Government. Some entire villages are ruined; honest, laborious, working men have become idle vagabonds; and some churches have become completely and hopelessly disorganized by this vice, as opium-eaters seldom reform. The English Government realize from this traffic an immense revenue—sixteen times more than is expended for public education throughout the province.—*Christian Instructor.*

THE OCCIDENT.

SAN FRANCISCO, SATURDAY, JUNE 27, 1868.

REUNION.

The vote of the Assemblies, announced by telegraph, and now confirmed by the mails just received, renders the reunion of the two great branches of the Presbyterian Church so nearly certain that we may more confidently consider the probable results than has been wise heretofore. That some of the old men who were former leaders of the Church would be opposed to it, and exhibit their opposition by earnest predictions of the evils that must be the consequence, was to be expected. That those whose prejudices have long governed them in their judgment of others, or whose feelings had been excited by the measures adopted by the party separated from them upon certain practical questions, should believe that their views are really the views of the body with whom they are associated, and therefore no hearty organic union is possible, was to be expected. That the few extreme men on both sides, who believe that the foundations will be removed if the phases of doctrine presented by them are modified in the least, and who are suspicious and prepared to misconstrue, would weep over the manifest approach towards common ground, of these mighty forces of the sacramental host, with the lamentation that only "Ichabod" can be hereafter written on their banners, was to be expected. But that the great host themselves, in both divisions, were ready for the movement, and resolved upon it, and had calculated the results, and were rejoiced by the prospect, is abundantly proved by the vote, and by the detached portions of the debate that preceded it which have reached us.

In the O. S. Assembly the pulse was first indicated by the election of Dr. Musgrave as Moderator, and became more distinct in the manner in which the speech of Dr. Darling, the delegate from the N. S. branch, was received, and in the reply of the Moderator. The long and earnest speeches by Dr. Breckinridge and Dr. Hodge, and others of like sentiments, were heard with respect, and even with emotion, by those who have long been wont to heed the counsels and defer to the opinions of these fathers in the Church, but they did not hold in check the tide that they themselves were convinced was setting with overwhelming force towards union. The most of the debate was conducted by those who did not favor the action, and after they had fully expressed themselves, the Assembly accepted the terms proposed by the Joint Committee by a majority that none expected, but all who were anxious for the issue were delighted to see.

In the N. S. Assembly there was unanimity, substantially, from the beginning, and even the fathers who had been personally connected with the controversies which culminated in the separation, were satisfied that the occasions for controversy have passed away, and there is now a call from the great Head of the Church that we be one. The items of the report adopted by both sides are known, and need not be repeated here. Respecting the Boards, the Theological Seminaries, the publications, and other practical points, the report made such provisions as can hardly meet with reasonable opposition from any quarter, and the corporate rights now held by the two General Assemblies, and by their Boards and committees, are, as far as practicable, to be consolidated and applied for their several objects, as defined by law. The confession of faith is to be received in its proper, historical—that is, the Calvinistic or Reformed—sense; while the various methods of viewing, stating, explaining, and illustrating the doctrines of the confession, which do not impair the integrity of the Reformed or Calvinistic system, are to be freely allowed in the United Church.

The terms of reunion having been approved by the Assemblies, are now overtured by them to the Presbyteries under their care, and if they are ratified by three-fourths of the Presbyteries connected with each branch of the Church, within one year, they are to be of binding force. Then the two Assemblies of 1869, after the conclusion of their business, are to be dissolved by their respective Moderators, who shall require that an Assembly be chosen from all the Presbyteries, to meet in May, 1870, which shall be the "rightful General Assembly of the Presbyterian Church in the United States of America, now, by the grace of God, happily united."

We may hope for this cheering, blessed consummation, yet let all who desire it both labor and pray that nothing cause it to fail.

ENLARGEMENT.—With our next week's issue we shall commence the second volume of THE OCCIDENT. Our efforts to make the paper interesting and useful, if we may judge by the favorable notices that are being constantly received, the frequent quotations made from our pages by contemporaries, and the constant increase of our subscription list, have been reasonably successful. These efforts have, however, been rendered less effective than they otherwise would have been, through want of room. In the belief that the interests of the Presbyterian Church on this coast demand such a step, we shall, at the commencement of the new volume, enlarge THE OCCIDENT by the addition of four pages to its reading-matter, thus making it equal in size, as we certainly shall endeavor to make it in all other respects, to any family paper on the coast. We hope that the change will be acceptable to our friends and patrons, and we doubt not they will see the propriety of showing their appreciation by an earnest and vigorous effort to increase the circulation of our paper.

Summary of Baptism.

In the course of this investigation, we have found that purification by water pervades the religious rites and ceremonies of all mankind, and with such a natural fitness to express the mental and moral purity with which we ought to approach the Deity, that it scarcely requires the supposition of a divine tradition to account for its being adopted as a religious ceremony among people unenlightened by revelation. This purifying virtue of water is also continually used by the sacred writers, in a figurative sense, to express purity of heart and life. God saw fit to employ the element largely in the temple service, and to appoint frequent cleansing with water to secure the appointed ritual purification essential to acceptable worship in His temple, and symbolical of the purity of heart requisite to obtain His favor. We find also in the time of our Savior, that in addition to the ablutions of the temple, the Jews were accustomed to use continual lustrations with water for the sake of their purifying virtue, which they called in the Greek language *baptismoi*. We have found, also, and to this I call particular attention, that while *purification was the predominant and essential idea which attached to the words in the Greek of the New Testament*, that baptizo and baptisma were then adopted and appointed by the Savior to represent an ordinance of His Church, with no indication that the idea of purification was eliminated from them; but, on the contrary, the terms were still employed to express the idea of purification, but more elevated and intensified in their meaning, for they were chosen to represent His work who, by His very office, as foretold by the prophet, was to be a Purifier, and whose perfect purifying work was to be by baptism, thoroughly purifying His blood with the efficient agency, baptizing "with the Holy Ghost and with fire." We found how this higher meaning of baptism, as significant of spiritual purification, was indicated in the direction of Ananias to Paul: "Arise and be baptized, and wash away thy sins." We found, also, that answering to each other as type and antitype, the Christian ordinance and the gifts of the Spirit were both termed baptisms—the former the sacramental baptism; the symbol of the latter, the perfect baptism of the sanctifying Spirit. For proof of this, we showed that the ordinance of baptism was administered to Cornelius and his friends by the command of the Apostle Peter, because the preparatory spiritual baptism had already been experienced by them—"Can any man forbid water that these should not be baptized who have received the Holy Ghost as well as we?" And finally, that baptism generally sealed also to the believer the gracious influences of the Holy Spirit, for Peter and the other Apostles, at the Day of Pentecost, having just experienced the promised baptism of the Holy Ghost, entered at once on the proclamation of the Gospel, declaring that the promised outpouring of the Spirit was now fulfilled, and exhorting the people—"Repent and be baptized, every one of you, in the name of Jesus Christ, for the remission of sins, and ye shall receive the gift of the Holy Ghost."

In view, therefore, of the natural purifying virtue of the element of water; in view of the fact that the *baptismoi* of the Jews, both legal and traditional, were made synonymous with purifications by the law of customary use; that, by the voice of inspiration, the work of the Messiah, who by His very office was a Purifier, was expressed by *baptizo* and *baptisma;* and finally, that Jesus Christ Himself employed the term to foretell the presence and efficacious gifts of the Sacred Spirit in His Church, I am constrained in the very light of the truth itself, to submit this proposition respecting the meaning of baptism.

That the administration of the purifying element of water in baptism signifies the purifying and sanctifying power of the Holy Ghost on the heart of the believer, by which, through faith in the atoning blood of Jesus Christ, he was cleansed from sin, renewed in the temper and disposition of his mind, and consecrated to the service of God. In this I am happy to realize that I have stated no meaning that is novel or original, but with the exception of a small segment of the Protestant Church, I have merely seconded what is expressed in their creeds, and enunciated clearly and distinctly in all their doctrinal instructions, and which determines their practical views in relation to the reception of the ordinance. If it should be asked, then, why I should spend so much time in establishing a proposition so generally admitted, my reply is, I thought the need of the times demanded that the essential idea of purity in the sacrament of baptism, should be re-established and re-affirmed; therefore, I have traced somewhat carefully, and perhaps tediously, this primitive and general use of water, until finally the idea of ritual purity in its use culminates in the Christian sacrament, where the purifying element is

ordained as a symbol to signify the sanctifying power of the Holy Spirit on the heart.

In this view I submit: 1st, that no system of religious faith can be conformed to Scripture, which ignores or discards the idea of purification in the sacrament of baptism, without discarding from their system truths which God has taught in His Holy Word.

2d. That in the translation of *baptizo*, no word which does not set forth the idea of purity, invariably attached to the ritual use in the New Testament, will faithfully render it into another language and adequately express the scriptural idea.

3d. In employing *immerse*, which never in any case has any signification of purity pertaining to it in the English language, any more than *immergo*, in the Latin from which it is derived, to express *baptizo*, which always has this signification in its ritual use in the New Testament, the revisors of the Bible have failed to convey to the English reader the mind of the Spirit as expressed in the original Greek.

4th. By the erroneous rendering of baptizo, by immerse, the revisors of the Bible Union have taken from the Word of God truth which He Himself put into it by the generally received meaning of baptizo among the people who first received the ordinance, and by the meaning attached to it by those who wrote as taught by the Holy Ghost.

5th. To justify themselves before the world for the translation of baptize by immerse, the revisors must show that baptizo, in its use among the Jews of the New Testament, did not convey the idea of purification, or in default of that, that immerse means to purify in its ordinary use in the English tongue, involving in the one case the necessity of showing that our Lord was mistaken in His reply to the Pharisee—Luke 11: 39; or, on the other, that purification, contrary to the testimony of all dictionaries and lexicons, is the general and established meaning of immerse in the English language. Failing to do one of these two things, the revisors are liable to the charge of having broken the fundamental rule of the revision. The exact meaning of the original text, as that *text expressed it to those who understood the original Scriptures at the time they were first written*, must be given in corresponding words and phrases, so far as they can be found in the English language, with the least possible obscurity and indefiniteness. F. B.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Eighth Term of this Institution will commence on Wednesday, July 8th, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

GRAFTON T. BROWN & CO.

Lithographers,

543 CLAY STREET

The following works, published by Mason Brothers, New York and Boston, are supplied in California by

H. H. BANCROFT & COMPANY,
San Francisco.

THE LATEST AND BEST OF SCHOOL READERS.

Edwards & Webb's Analytical Series.

ILLUSTRATED BY THOMAS NAST.

First Reader, 28 Cents. Fourth Reader, 90 Cents.
Second Reader, 50 Cents. Fifth Reader, $1.25.
Third Reader, 75 Cents. Sixth Reader, $1.60.
Edwards & Warren's Analytical Speller 25 Cts.

These Readers are COMPLETE IN GRADE, METHOD, MATTER, AND EXECUTION and contain

1. An admirable presentation of the word-method and object-systems of teaching, with a beautiful arrangement of text and illustration.
2. A clear and correct treatise upon the elements of spoken language.
3. Lessons in Phonic Analysis, and exercises for training the organs of speech to the acquirements of a full and distinct articulation.
4. Rules for reading the various classes of selections, and directions for giving due and appropriate expression to every phase of thought and feeling.
5. A most thorough system of Thought Analysis, by which th student is made to observe and appreciate the full sense and scop of each selection.
6. Selections chiefly new. Engaging lessons and stories for younger pupils, and for those more advanced, the best and worthiest specimens of American and foreign literature.

These books are printed from electrotype plates, made from new fonts of clear cut type; the best paper only is used; they are bound in the most durable manner; are sold at the lowest prices, and introduced upon the most favorable terms. Though published less than a year since, they have already been adopted by the Public Schools of New York, Chicago, and many other cities, and are everywhere giving unqualified satisfaction. Specimen pages and circulars sent on application.

A Method for the Piano-forte,

—BY—

WILLIAM MASON AND E. S. HOADLY.

Large quarto volume; illustrated; 240 pages. Price $4.00.

Two editions are published, one with AMERICAN FINGERING, and one with EUROPEAN FINGERING. Purchasers should always state which is wanted.

This work, first published in November, 1867, of which six editions have been called for in rapid succession, has proved to be the most useful, thorough, systematic, and successful text book for instruction upon the Piano-Forte ever published. It is eminently a new method: modern, original, complete. Retaining all that has proved valuable in older works, it adds much that has heretofore never been published, though often tested in private teaching with the best and most successful results. Among the novelties of the work, the ACCENT EXERCISES, introduced by Mr. Mason, are worthy of the attention of every teacher, as presenting unusual advantages of instruction.

The prominent excellences of this book are:

1. Its DEPARTMENTS, theoretical and practical.
2. EXPLANATIONS & DIRECTIONS, such as best teachers give their pupils, and which for accuracy and clearness, have neve been surpassed.
3. THE ART OF FINGERING—best modes of overcoming difficulties.
4. THOROUGHNESS and PERFECTION of Lessons.
5. RECREATIONS AND PIECES, skillfully adapted to the requirements of the pupil, and embracing the most attractive and meritorious compositions.

Dr. Lowell Mason's Music Charts,

FIRST SERIES, THIRTY CHARTS, Price $7.50.
SECOND SERIES, THIRTY CHARTS, Price $7.50.

This work, which every teacher of Vocal Music will find extremely useful and convenient, consists of Charts or Diagrams, each of which is 30 by 42 inches in size, designed as aids in teaching classes the Elements of Music and its Notation. They embrace Exercises, Illustrations, simple Songs and Pieces, such as teachers are accustomed to write on the Blackboard, progressively arranged and printed from mammoth type, which can be easily seen from all parts of a large hall.

Care should be taken to order DR. LOWELL MASON'S MUSIC CHARTS. These Charts cannot be sent by mail.

Apples of Gold in Pictures of Silver.

BY EDWARD ROBERTS.

Price in paper covers, 50 cents each, or $25 a hundred; in board covers, 35 cents each or $30 per hundred.

The New Sunday-School Song Book. Containing treasures old and new, many beautiful Songs, the words as well as music of which are now first published, with the choicest of the old hymns and tunes.

MASON BROTHERS, Publishers,
596 Broadway, New York; 154 Fremont St., Boston.

Miners' Foundry and Machine Works,

Nos. 245 TO 255 FIRST STREET,

SAN FRANCISCO.

HOWLAND, ANGELL, & KING, PROPRIETORS,

Manufacturers of Machinery for

QUARTZ MILLS, SAW MILLS, POWDER MILLS, FLOUR MILLS, SUGAR MILLS, PAPER MILLS, STEAM ENGINES OF ALL KINDS, AMALGAMATORS OF ALL KINDS, MINING PUMPS, OIL WELL TOOLS, ROCK BREAKERS, HOISTING WORKS,

—AND—

Machinery and Castings of all kinds, either of Iron or Brass, Boilers and Sheet Iron Work, in all its branches.

Shoes and Dies of White Iron, manufactured for, and imported by us, expressly for this purpose, and will last 25 per cent. longer than any other made on this coast.

Russia Iron Screens, of any degree of fineness. We are the only manufacturers on this coast of the "Hicks Engine," the most compact, simple in construction, and durable, of any Engine in use.

PRINTER,

Commercial Street, opposite Miners' Restaurant.

CORRESPONDENCE.

Letter from Amador County.

SUTTER CREEK, June 12, 1868.

If any one doubts that a pastor and editor wearied with work in the city will be refreshed and built up by a short run in the country, I am prepared to remove his doubts by reference to a delightful experience. Having never known anything of the mining region of the State, by personal observation, I resolved to spend a few days where I could probably find as good specimens of the methods employed for getting gold, both from the surface and quartz, as are to be found in any single portion of the mountains, and therefore came to this county. I have not been disappointed, but I have been amazed at all that I have seen, for the processes and results of mining must be seen to be appreciated.

The beautiful sail through the bays and river to Sacramento is so familiar to most of your readers that I will not spend time to describe it, though it was never more charming in the immediate scenery, or more sublime in that more distant, than when enjoyed by the company of whom I was one. The green has not yet all faded from the round-topped hills that guard the Bay, but is the more grateful to the eye from contrast with the yellow of the ripening harvests and mown hay-fields, with which these hills are variegated to their very crests. The fringe of trees along the river, forming a beautiful edge to the immense robe of tules with which the plains are covered, is as luxuriant in foliage as the most favorable climate, and location, and soil can make them. The coast range of mountains, culminating in Mount Diablo, whose grand sides rise into distinct vision for more than a hundred miles as we advance, seems to have for its duty to wall out the sea from this vast expanse, over which no doubt it once rolled without obstruction. While the majestic Sierras, actually dazzling in their splendor, as the sun plays upon them, covered with snow to a depth never before known in June, stand like a line of Titans, as if to protect the coast from all invasion from the interior. Of all these features in the landscape I had a most satisfactory sense as we moved towards the Capital, nor did the elegance and comfort of the boat by which I was hurried on, fail to contribute largely to the pleasure of the trip.

Sacramento is in fine array of foliage and flowers, and but for the water shut in by the elevated streets, and the getting up and down stairs as one passes through parts of the city not yet brought to the *grade*, one might wonder why any of the wise men who were here last winter could have desired a more delightful place for the State Capital. The most wonderful peculiarity of this city, not excepting the Capitol building and the cottonwoods, is the untold amount of dirt that has been carted within the city limits for streets and levee, from some region that seems to be unknown. So long as one does not pay taxes, and does not have to find the dirt, he can well admire the enterprise and skill which have such worthy illustrations, for they will render the city more beautiful and more safe.

The works of the Pacific Railroad in Sacramento are really worth a visit, and they give some intimation at the very beginning, of the enterprise and broad views of the men who are pushing this gigantic thoroughfare across the continent. Nor should the stranger fail to see the Capitol, for, notwithstanding its mixed formation, reminding one somewhat of Nebuchadnezzar's image, it is already a very imposing structure, and promises to be one of the most complete public buildings in the country.

The churches of the city are making some progress, but the tide of wickedness they are obliged to withstand is so strong that they find it difficult to advance rapidly. Elder Knapp is here, having about the same influence as in other places he has visited in the State, and it is said that he desires to spend the rest of his days on the Pacific Coast. The Presbyterian church is in a very healthy condition, so that its future is cheering, and there is reason to believe that, with the increase in population, it will become more and more vigorous and useful.

The ride over the valley railroad to Latrobe opened a new country, and brought me into the scene of untold labors and privations in former days, which are indicated now only by the wide wastes and abounding ruins, far as the eye can reach. Placer mining was once the business on these hills, and plains, and gulches, and the heart is made sick by thought of the sorrows, and disappointments, and pains, and death of the multitude who have toiled here, rather than elated by the knowledge that millions of gold have been washed from these now barren acres. On every side are gullies, and debris, and sluices, and ditches, and the remains of dams, and huts, and rockers, and pans, and it requires but a little fancy to bring back the tireless host of those who were trying to make their "pile" from this desert, cheered by the hope that those they loved would be happier, as well as richer, because of their toil. Poor fellows! Many of them now sleep in nameless graves, scattered among the chaparral; many of them went home with worn-out bodies and little gold; some of them found all they sought, and went away happy; a few only were ever glad they came to this comfortless region. Now, only here and there a Chinaman, living amidst the wreck of the pioneer's labor, and working over the refuse of his search for wealth, gleans the mites that remain, while he is so closely watched that if he happens to strike a vein unseen before, he is driven away by the whites, who claim his discovery as their own gain.

From Latrobe to Sutter Creek I was hurried over a rough mountain road in a six-horse coach, and found little that was either interesting or profitable, except the reflections that were suggested by the contrast between what may now be seen and what was to be seen a few years ago, and the still more wonderful contrast between what is now and what will be within the twenty years to come. These contrasts force themselves upon the traveler through any portion of California, whether his thoughts run backward or forward, and the mingled gloom and hope by which they are attended furnish lessons that it is wise to heed.

At Sutter Creek I reached the goal of my visit to the mountains, in the famous Hayward's, or Amador mine, and resolved to take time enough to explore all connected with it that could have any interest for one unacquainted with gold mining. How strange that the immense loads of rock that are being carted through the streets contain the precious metal for which so much anxiety is felt! One feels a kind of respect for it, as being above the mass of common stone—a kind of aristocracy of rock—not so much because it bears gold as because so much is expended to bring it up from its dark home, twelve hundred feet beneath the surface. Through the kind attentions of the very intelligent and able Superintendent of this mine, I was made familiar with all departments of its working, and while I have no desire to become a miner, I am prepared to look upon miners with more honor for their calling than ever before. I think it takes a man of somewhat more than ordinary material to be content with a life of work in the silence and darkness which prevail twelve hundred feet below the range of what most of us call comfort, and when I was being let down through the shaft, I had sensations which inclined me to believe that one who is safely above ground need have no cause for regret that his fortune does not take him in this direction for his daily bread. After being fairly landed at the bottom, however, I was abundantly repaid for my journey in the marvelous developments of those wide and lofty chambers that had furnished so much to enrich the world. Still, I was not so much impressed with the idea that a vast quantity had been taken out as by the absolutely incalculable mass that remains, all richer and more readily resolved than that which has been used. Let any one who doubts whether this mine may not fail within a few years, go down to its depths and he will doubt no more, for he can see more rock already accessible than has ever been removed. On coming up again to the more familiar scenes that need not the aid of tallow candles that they may be viewed, I went through the crushing mills and other establishments connected with the process of obtaining the gold, and having satisfied my curiosity and increased my knowledge, came away, thankful for the kindness that had been shown me by all the men, and wishing that I might be able to render them some return. I trust they were not all in sympathy with the one who, as I was about to ascend the shaft and a company had assembled to bid me good-bye, being invited by the Superintendent to come and hear me preach the next day, replied that he would much rather I would send them a gallon of lager. Quite a number of them are Cornish men and Christians, who value religious privileges, and when they can attend, are found in church and support its institutions, and I was told that many of them would be glad to spend the Sabbath quietly and profitably with their families, if they could have the opportunity. It is a fearful responsibility to be assumed by any company when they make it impossible for hundreds of their operatives to keep the Sabbath, as God requires, for the sake of attempting to make more money, and it is to be hoped that if no worthier reasons avail, those who conduct our great mines will become convinced soon that it will be economy in the employment of men and animals, and even machinery, to allow all to rest on the Sabbath day.

I was glad to find our Presbyterian churches in this vicinity in a growing condition, the three in Amador, Sutter Creek, and Jackson being under the pastoral supervision of Rev. Mr. Dobbins, to whose labors and perseverance they are much indebted; and that in Ione having been lately supplied with the ministry of the Gospel by Rev. Mr. Hemstreet, formerly of Bloomfield. The need of laborers is everywhere apparent, though, in the nature of the case, the population of these mining districts affords less encouragement in the building up of permanent organizations, because changes are so frequent. He who has a heart for missionary work will not find any more inviting field, and he will find few in which he will be more appreciated by the people.

E.

Denominational Appropriations.

We have heretofore very distinctly expressed the opinion that appropriations of money by the State Legislatures for denominational purposes are not in accordance with the spirit and theory of our government, that they are wrong in principle, and a virtual infringement upon the civil liberty of the citizen. Further reflection only serves to strengthen our con-

victions on this subject, and we are unable to see how any argument can be framed in defense of such appropriations that will bear examination. It is utterly inconsistent with the fundamental principles of free government that the people at large should be taxed for the direct or indirect support of any particular sect, or of the benevolent or educational institutions of any particular sect. The proposition is so obviously true that no American legislator would question it, or venture to act in opposition to it, had not the subject been brought into the political arena, and become complicated with considerations affecting the success of political parties. We think the time has now arrived when it has become one of the plainest and most important duties of that portion of the Press that can venture to discuss the subject impartially and boldly, to give it a larger share of their attention than they have hitherto done. In New York the relative positions of the two great parties are such that the wrong and oppression of general taxation for the benefit of particular denominations, have become almost insupportable. The last Legislature of that State made appropriations for the support of *twenty-one* schools of a particular denomination, in the cities of New York and Brooklyn alone. In three of these cases, the money was given directly to the schools; but in the other eighteen cases it was given, not to the schools, but *to the churches with which they were connected*, "for the benefit of the schools." The effect of these appropriations is to tax the people of New York at large for the benefit of a particular body of Christians; and, beyond all question, there was but one motive for granting such appropriations—that motive was to *secure the vote* of the members of the sect benefitted by them. The men who thus legislated away the people's money were not in any considerable proportion personally interested in any form of religion. They acted as politicians, to secure political ends; and their action was a gross fraud upon the people whom they represented. We do not talk up this subject in a spirit of hostility to religion, or to any religious sect. We believe that without religion and its influences republican institutions cannot endure. We do not wish to attack or persecute any form of religious faith; for we believe that there is scarcely any form in which the religious sentiment presents itself which is not preferable to blank skepticism. But we do wish to check the politicians in their practice of making the whole body of the people contribute to sustain the institutions of a sect, or an ecclesiastical organization; we protest against it as a violation of the fundamental principles of our institutions, as an infringement upon the rights of the American citizen, and as an unrighteous oppression of the tax-payers upon whom is devolved the burden of supporting the expenses of the government.—*Oakland News.*

Pacific Mail Steam Co's Steamships

— FOR —

NEW YORK, JAPAN AND CHINA

Will be Dispatched as follows:

LEAVE WHARF CORNER OF FIRST AND BRANNAN STREETS, at 11 o'clock A.M. of the following dates, for PANAMA connecting via Panama Railroad with one of the Company's splendid Steamers from ASPINWALL for NEW YORK.

On the 6th, 14th, 22d, and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Transatlantic Company's Steamer for St. Nazaire, and English Steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English Steamer for Southampton, South America, and P. R. R. Co.'s Steamer for Central America. Through tickets can be obtained.

Departure of the 6th connects with English Steamer for Australia.

The following Steamships will be dispatched on dates as given below.

STEAMERS FOR JUNE, 1868.

June 30th,—SACRAMENTO, Captain Parker, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock.

Through tickets to Liverpool by the "Cunard," "Inman," and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired, an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship NEW YORK, Capt. C. M. Fauntleroy, will be dispatched July 3d, at 12 o'clock, noon, from wharf corner of First and Brannan streets, for YOKOHAMA, connecting with the GREAT REPUBLIC for HONGKONG, and COSTA RICA for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Co.'s Office, corner of Sacramento and Leidesdorff Sts.

OLIVER ELDRIDGE, Agent.

ILLUSTRATION OF DIVIDENDS OF PROFITS

—OF—

United States Life Insurance Comp'y,

NEW YORK.

OFFICE, No. 40 WALL STREET.

CASH ASSETS EXCEED $2,700,000.

SIXTH TRIENNIAL DIVIDEND.

The Board of Directors have this day declared a Dividend of FORTY PER CENT. for the three years ending at the 4th March, inst., to holders of all Policies then in force, on the whole sum of the annual participating premiums received during the said three years; and an additional Dividend of TWENTY PER CENT. on the whole sum of all previous Dividends and Additions, to holders of such Policies who have fulfilled their engagements with the Company, both Dividends being payable and available in the various modes explained in the Company's Prospectus.

For example, on a policy paying one hundred dollars a year of participating premium, the profits for each year and the total at each year on this system are:

Year.	Yearly.	Total.	Year.	Yearly.	Total.
1	$40 00	$40 00	28	$206 39	$2702 23

Current Literature.

Frederika Bremer.

The name of this lady, who has contributed so much to the literature of the world, and whose reputation is confined to no country, awakens an interest not always felt respecting those whom we feel obliged to honor. We learn enough of her character from her writings to attract us towards her, with a kind of sympathy mingled with curiosity, and many have desired that more might be made public of her history and private life. This feeling has now been gratified by her sister, who has issued a book called, "The Life, Letters, and Posthumous works of Frederika Bremer," the perusal of which has given us much satisfaction. From it we learn the secret of that shade of melancholy that was cast over almost all the works of this beautiful writer, and are conducted by its revelations into many scenes that were made sacred by the suffering as well as joy, of one most keenly sensible of both. The general effect of the book is pleasing, however, and several of the pieces, and all of the letters, are sparkling with the genius, and affection, and wit, and sentiment of the author.

Here is an extract from a letter to her mother, that unfolds much respecting her history, and, at the same time, is full of the heart that is so prominent in all her writings:

"Ah! what a joy it is to be able to turn in full confidence to the one whom we have to thank for our existence. I say thank; for life seems now to be of value to me. Formerly it was not so. My youth has not been happy; on the contrary, it has been a time of suffering, and its days, to a great extent (this is indeed truth), have passed away in a continual wish to die. But now it is otherwise. As a compensation for that long time of suffering and compulsory inactivity, another has succeeded, which gives me the means of usefulness, and therefore also of new life and gladness. We hope, we desire, my sisters and I, nothing else than to be able to do some little good, whilst we are wandering here on earth, and according to the power that is given to us, to work for the good of others, and live ourselves in peace and harmony; and perhaps our joyless youth, if it has deprived us of some of the enjoyments of life, may in some measure have led our minds to higher aspirations, and to a stronger desire for real usefulness.

At this moment my plan for the future is the following: To spend as little as possible of my own fortune upon myself, so that I may be able as much as possible to devote my life to acquiring all the means that may be of service to me in the development of my mission as an authoress. Never have I felt so much that I have been created for this aim as now; never have I felt my intellectual being, as it were, grow, strengthen, gain stability and clearness, as now; knowing what it is to desire to live and learn, and never to have had the joyful hope (to speak in the language of St. Paul) "to be a vessel formed to honor." The desire and the hope that I become to you and to my sisters a subject of rejoicing, is to me—how shall I express it?—a spur of roses."

"You cannot think how delightful it is, my dear mother, to be so far away from all *acquaintances*, to have no visits to pay and none to receive. This kind of unsociableness is a real disease, but is at present unconquerable. My nervous system has been weakened. I trust that in the course of time, living in retirement, and with prudent care of my health, I may get stronger, and get rid of that most painful feeling; but until then, it is so good for me not to have that feeling tried. When I am alone in my quiet room, the blue sky peeping in, and with my books and papers around me, then I think the whole world is mine, especially if a dear letter lies before me, bringing good news from those who belong to me, and telling me that they love me. Then my heart beats gratefully to the Great Father of all, and full of hope to be able to do some good to my fellow creatures; then I am as happy as any one can be; then I love mankind best and live best for them."

So, also, in a letter of later date, how much of that gentle spirit which is admirable everywhere, but especially in female character, is manifest, as we find her writing:

"Suffering and anguish have long appeared to me as the dark genii of life. Not so now. I have seen that they *can* be life's good genii. They become so to us, if with deep and energetic confidence we cling to the power, to the Father, 'who smites and who heals, and who out of the very wounds creates minds open to receive Him." I shall never forget an expression, which I heard more than fifteen years ago, at a time when, in consequence of my own state of mind, I sympathized, with a painful feeling, with every suffering in the world, even with that of the innocent brute creation. Of the injustice of this latter I said something during a conversation which I had with a man, who used to converse with me on the commonest every-day topics. I cannot describe the expression of his calm blue eye, and the tone of voice in which he answered: 'I should not wish that any created being should be exempt from suffering." He did not say anything more on the subject, for I did not understand him. Since then I have learnt to comprehend the meaning of these words; comprehended it from my own experience, and am now inclined to think that suffering is a prerogative in life. Without penetrating into the depths of suffering, into its bitter 'Gethsemane,' we cannot climb bright and blissful heights. He who cannot suffer cannot enjoy. But all depends upon, that we should let suffering purify and ennoble the soul. This cannot come in question with respect to the suffering of animals, but their suffering is distinctly connected with a final atonement, concerning which I cannot now unfold my ideas. I will merely add, that according to the spirit of Christianity, it is through hope, and not through despair, that suffering works upon man."

"I went through your letter from beginning to end, only stumbling over, or stopping at, a few words, of which some still figure as stones and stumps on my road; but they do not now impede me; for when I walk round them my path lies before me, quite distinctly, with flowers edging its graceful windings. Thanks, my dearest Frances! You come like a good valued friend, who has gathered the best fruits and flowers which she has found on her way, to gladden, the friend whom she goes to see. It is this spirit of kindness and love in a friend, which makes her warnings, and serious advice so pleasant to receive, so pleasant to follow. In that pure mirror one will willingly see the spot in one's own soul; by *that* gentle hand, gratefully kissing it, one willingly allows the 'beam' to be removed from one's eye."

"If all in this world were beautiful, all good, there would be no need of a transformation, an amendment, which we call redemption or atonement. We should in beautiful harmony, develop ourselves "from one brightness to another." If all were evil —yes, then no such improvement would be possible, nor a loving God either. Now there is both good and evil. Nature brings forth thistles and thorns (as it is symbolically said in Genesis iii, 18), but she brings forth also roses and lilies. In man there is sin and disease; but also love, truth, and health. A true contemplation of the world owns both and must; man and his world have an organic coherence, apply to this world Tegnérs beautiful words on Nature:

> "The features of the fallen one transparent
> Shew noble signs of origin celestial,
> And Daphne's heart beneath the bark is throbbing."

The book is published by Hurd & Houghton, New York, and for sale by Bancroft & Co., San Francisco.

"Where is the City?" Roberts Brothers, Boston; Bancroft & Co., San Francisco, is a book of some interest, as a new exhibition of the peculiarities and defects of various Christian denominations. We are not prepared, however, to indorse the apparent inference of the author, that, on the whole, a true disciple may make more progress without connection with any church than he could by union with any. That a church is not perfect, does not prove that it has no value.

Lilliput Levee.—Wynkoop & Sherwood, New York. H. H. Bancroft & Co., San Francisco. This is a collection, and versification of many of the old nursery tales that have so much interest for children.

EDUCATIONAL.

Anger with Children.

"Doest thou well to be angry?" "I do well." This colloquy between the Lord and Jonah is sometimes repeated in the bosoms of parents and teachers. Discussing with themselves the expediency of some of their sterner utterances to children, they sometimes come, with all honesty, to the conclusion that such utterances are expedient, since they alone carry to the child's mind a due conviction of the speaker's seriousness. They conclude in effect that we do well to be angry, because mild words seem weak and irresolute. But a little reminiscence on the part of any one who has moved at all among men, must serve to dissipate this notion. The most resolute men are by no means the most boisterous. Saying little and meaning much, and saying much and meaning little, are pairs of things with which we are all quite familiar. The words which grown people are most likely to respect are not the noisiest words or the most passionate; and why should we expect anything different with children? Moreover, there is another demonstration which we *may* make instead; another feeling which is unobjectionable, and at the same time equally impressive. The proper sentiment to cultivate and to manifest in dealing with our children and pupils, when they commit faults is that of sorrow. The manifestation of this on the part of guardians, as often as possible, at least, should be the rule. There is a sentence upon this point in an article on "Early Education," in the *Psychological Journal* for January, 1868: "Punishment is seldom required, and when it is, it should be rather negative than positive—consisting rather in the expression of grief, which is a feeling akin to love, than of anger, which is naturally construed as evincing a want of affection." C. R. C.

AGRICULTURAL.

A Great Farmer's Maxim.

Mr. Jacob Strawn, who is spoken of as "The Great American Farmer," who died at Jacksonville, Illinois, in August last, in his biography has recorded many excellent characteristics of his life. He met with great success in all his business operations, which is attributable chiefly to the following maxims, which we copy for the benefit of those farmers who are somewhat tardy in performing the operations of the farm:

"When you get up do not roll over, roll out. It will give you time to ditch all your sloughs, break them up, harrow them, and sow with timothy and red clover. One bushel of clover to two of timothy is enough.

"Make your fences high, light and strong, so that it will keep cattle and pigs out; if you have brush, make your lots secure, and keep your hogs from the cattle, for if the corn is clean they will eat it better than if it is not.

"Be sure you get your hands to bed at seven o'clock; they will rise earlier by the force of circumstances.

"Pay a hand, if he is a poor hand, all you promise him; if he is a good hand, pay him a little more; it will encourage him to do still better.

"Always feed your hands as well as you do yourself, for the laboring men are the bone and sinew of the world, and ought to be well treated.

"I am satisfied that getting up early, industry and regular habits are the best medicines ever prescribed for health.

"When it comes rainy, bad weather, so that you cannot work out of doors, cut and split your wood.

"Make your tracks when it rains hard, cleaning your stables, or fixing something which you would stop the plow for and fix in warm weather.

"Make tracks, fixing your fences, or a gate that is off its hinges, or weather-boarding your barn where the wind has blown off the siding, or patching the roof of your house or barn."

The Preservation of Leather.

A contributor of the *Shoe and Leather Reporter* gives some valuable hints in relation to the preservation of leather. The extreme heat to which most men and women expose boots and shoes during the winter deprives leather of its vitality, rendering it liable to break and crack. Patent leather particularly, is often destroyed in this manner. When leather becomes so warm as to give off the smell of leather, it singed. Next to the singing caused by fire is the heat caused by the covering of rubber. Close rubber shoes destroy the life of leather.

The practice of washing harness in warm water and with soap is very damaging. If a coat of oil is put on immediately after washing, the damage is repaired. No harness is ever so soiled that a damp sponge will not remove the dirt; but, even when the sponge is applied, it is always useful to add a slight coat of oil by the use of another sponge.

All varnishes and all blacking containing the properties of varnish should be avoided. Ignorant and indolent hostlers are apt to use such substances on their harness as will give the most immediate effect, and these as a general thing, are most destructive to the leather.

When harness loses its luster and turns brown, which almost any leather will do after exposure to the air, the harness should be given a new coat of grain black; the grain surface should be thoroughly washed with potash water until all the grease is killed, and after the application of the grain black, oil and tallow should be applied to the surface. This will not only "fasten the color," but make the leather flexible. Harness which is grained can be cleaned with kerosene or spirits of turpentine, and no harm will result if the parts affected are washed and oiled immediately afterward.

Shoe-leather is generally abused. Persons know nothing or care less about the kind of material used than they do about the polish produced. Vitriol blacking is used until every particle of the oil in the leather is destroyed. To remedy this abuse, the leather should be washed once a month with warm water, and when about half dry a coat of oil and tallow should be applied, and the boots set aside for a day or two. This will renew the elasticity and life in the leather, and when thus used upper leather will seldom crack or break.

Band leather is not generally properly used. When oil is applied to belting dry it does not spread uniformly, and does not incorporate itself with the fiber as when partly dampened with water. The best way to oil a belt is to take it from the pullies and immerse it in a warm solution of tallow and oil. After allowing it to remain a few moments, the belt should be immersed in water heated to one hundred degrees, and instantly removed. This will drive the oil and tallow all in, and at the same time properly temper the leather.—*Am. Presbyterian.*

KEEPING FOWLS IN ORCHARDS.—The public has yet to learn the full advantages of keeping poultry. Few seem to appreciate the service they may do among trees in an orchard. Let any one try them in an orchard of quarter or half an acre, where they may be kept by a picket fence four or five feet high, put in say 125 fowls, and observe the result. He will avoid the annoyance in the garden of which so many complain, while they will work among the trees, doing just what is needed, keeping the ground well cultivated, and destroying everything that can injure the fruit trees in the shape of bugs, worms or other insects, and lay a large number of eggs, which are a cash article, to say nothing of the chickens, which pay well for raising at the present time.

I have tried it, and I know it is so. I have about 100 fowls, which have worked admirably among my trees, keeping the ground in good condition, keeping off insects and promoting the growth of the orchard. I am satisfied that we have yet to learn the full benefits which may be derived from the proper management of fowls, and it is quite possible that the method I have suggested may offer the best way of getting our apple orchards into bearing condition again. —*Cor. Northern Farmer.*

HINTS TO BUTTER MAKERS.—When cream is to be kept a few days or a week in warm weather, a tea cup of salt to a gallon of cream serves to keep it from spoiling. Put the salt into the first gathering of cream, or into the clean cream pot. Another item quite as important is, to stir the cream frequently and thoroughly—once a day at least, twice or thrice, is better. An ounce of salt to a pound of butter, after the buttermilk is out, is the rule of many good dairy women. This is the minimum. Some put two ounces to the pound. If it be packed, it requires more salt than if put up in rolls for immediate use.—*Intelligencer.*

The American Sunday School Union

Having commenced the Sunday School Missionary work on the Pacific Coast, we are ready to aid in organizing Sunday Schools and aid existing needy Schools.

We have just received a fine and large assortment of the publications of the Society, which we supply to Schools at reasonable rates. We also supply the periodicals of the American Sunday School Union. The

CHILD'S WORLD,

a beautifully Illustrated Paper for Children and Youth. Monthly, at 12½ cents each per year for ten copies and upwards, and 24 cents for the semi-monthly. Also,

THE SUNDAY SCHOOL WORLD,

a Sixteen-Page Quarto Monthly Paper for Sunday School Officers and Teachers, at the low rate of Fifty Cents per Year. No Sunday School Teacher should be without this paper.

Rev. Richard Newton, D.D., the Editor of these papers, is acknowledged to possess unsurpassed abilities as a Sunday School writer. The above rates are in Currency.

Catalogues of the Society's publications, and Sample Copies of its Periodicals furnished gratuitously on application to Wm. F. Peters, care P. O. Box 1007, or at the Depository, 802 Montgomery Street, (Second Floor, Room No. 2,) San Francisco, Cal.

Family Reading.

The Soldier's Vision.

In a tangled thicket a soldier lay,
His life blood was ebbing fast away.

The evening shadows hung cold and chill
Over the brow of the wooded hill,

And the fading gleams of the setting sun,
Stole out of the tree-tops, one by one;

The breeze that swept through the pine trees wild,
Sobbed, like the sob of a weary child.

And weird and sorrowful echoes woke
To the cricket's chirp, and the grey frog's croak.

A low sad moan, and the dying eyes
Are slowly raised to the darkening skies.

"Oh sainted mother! who stands to-night
Where the Jasper sea is one throb of light,

"Break from your raptures of glory and rest,
Fold me once more to your warm loving breast.

"Oh for *one look* from your true mother face,
Oh for *one clasp*, to your eager embrace,

"And my hungry soul would be satisfied,
And I die content on the lone hill side."

Suddenly in the brake was heard
The evening song of a living bird.

It rippled and trilled through the leafy wood,
Breaking the hush of the solitude.

The chirp of the cricket died away
In the joyous gush of that melody,

And the mournful wind forgot to sing
The weary notes of its murmuring.

The soul of the boy arose from its night,
Into a world of gladness and light;

A vision stole into his wondering eyes—
A dream of beauty, and sweet surprise.

His angel mother transfigured there
With lillies of light in her golden hair,

And the same sweet look that used to start
Such thrills of love in his boyish heart,

Glided slowly down to the rythmic time
That runs through the bird's melodious chime.

She lays her hand on his burning face,
With a touch of infinite tenderness;

And he sinks away in a blissful rest,
Folded close to her loving breast.

The bird sings on, as the shadows creep
Into the forest so wild and deep.

The soul of the boy and his mother glide
To realms of light on a musical tide.

Buffalo N. Y., May 6th '68.

The Ruling Passion.

Colonel Isaac Barnes of Boston, Mass., who died a few years ago, was an officer under the United States Government. He was a man of great wit and humor, full of rare and racy stories, which he always told with the most imperturbable gravity, while his listeners were always convulsed with laughter. His stories always received a flavor from his peculiar voice, which was thin and pitched in a high key, and, in his later years, "turned again toward childish treble."

In his last sickness he very forcibly illustrated Pope's well known line of the

"Ruling passion strong in death."

His physician came in an evening or two before he died, and asked him how he was feeling.

"Sha'n't live till morning," said the Colonel, feebly.

"Oh yes, I think you will; you don't seem to be very near your end."

"Yes, I am," piped out the Colonel.

The doctor then felt of his feet, and finding them quite warm, said to him:

"Your feet are quite warm; I think there is no immediate danger."

"Can't help it; sha'n't live till morning," persisted the sick man.

"But," said the doctor, "your extremities are warm, Colonel. Did you ever know any one to be dying whose feet were as warm as yours are?"

"That's nothing to do with it. I sha'n't live till morning," wheezed out the Colonel as if he were determined to die.

"You are quite unreasonable, Colonel," gently interposed the doctor. "I never knew a man to be very near his end whose feet are are as warm as yours."

"Well I have."

"Who, pray?"

Turning toward the doctor with a droll twinkle in his eyes, he laboringly gasped out:

"*John Rogers!*"—*Religious Herald.*

Home Duties.

Only let a woman be sure she is precious to her husband—not useful, not convenient, simply, but lovely and beloved; let her be the recipient of his polite and hearty attention; let her feel that her care and love are noticed, are appreciated and returned; let her opinion be asked, her approval sought, and her judgment respected in matters of which she is cognizant; in short, let her only be loved, honored, and cherished in fulfillment of the marriage vow—and she will be to her husband, children, and society, a well-spring of pleasure. She will bear pain, and toil, and anxiety—for her husband's love is to her a tower and fortress. Shielded and sheltered therein, adversity will have lost its sting. She may suffer, but sympathy will dull the edge of sorrow. A house with love in it—and by love I mean love expressed in words, and looks, and deeds (for I have not one spark of faith in love that never crops out)—is to a house without love as a person to a machine: one is life, the other is mechanism. The unloved woman may have bread just as light, a house just as tidy, as the other; but the latter has a spring of beauty about her, a joyousness, an aggressive, penetrating, pervading brightness, to which the former is a stranger. The deep happiness in her heart shines out in her face. She gleams over it. It is fair and graceful, and warm, and welcoming with her presence; she is full of devices, and plots, and sweet surprises for her husband and family. She has never done with the romance and poetry of life. She herself is a lyric poem, setting herself to all pure and gracious melodies. Humble household ways and duties have for her a golden significance. The prize makes her calling high, and the end sanctifies the means. "Love is Heaven, and Heaven is love."—*The Mother's Journal.*

Genuine Comfort.

While traveling, a few years since, I was detained some days in one of our Western cities. My room overlooked a lane or alley-way, in which were several houses occupied by the better class of artisans, and I became much interested in one of these—so much so that no sooner did I hear a glad shout from a little voice than I knew it was meal-time, and "daddy was coming," and I took my post of harmless and admiring scrutiny of the well-governed house. On the way in, the father raised the rejoicing child in his arms, and gave it two or three resounding smacks; another one had crept to the door-sill, and this was lifted also, and its little cheek laid tenderly upon the shoulder, which was hunched up to bring it closer to that of the father. By this time the wife had brought a bowl of water, and a white, coarse towel; then she took the children down, applying also sundry pats, now on the shoulders of the little ones, and now on the broad, fatherly ones; and while the husband gave a last rub of the hard, rough hands, he stretched out his neck and kissed the pretty girlish wife, who would be hovering near him. They said grace; they dined at the plain, wholesome board, and more than once I found myself wafting them a benediction with the tears in my eyes. It is so brutish to pass without a word of recognition of the Giver of Life. The husband was a grave man, and the wife lively and cheery, neat as a new pin, and very chatty. I thought them wonderfully well matched, for there was no moroseness in the man, nor levity in the woman; and when Sunday came, and the little household dressed in all their finery, baby and all, went out to church, it was a sight to behold.—*Mrs. E. Oakes Smith.*

Profanity.

Why will men "take the name of God in vain?" What possible advantage is to be gained by it? And yet this wanton, vulgar sin of profanity is evidently on the increase. Oaths fall upon the ears in the cars and at the corners of the streets. The *North American Review* says well:

"There are among us not a few who feel that a simple assertion or a plain statement of obvious facts will pass for nothing unless they swear to its truth by all the names of the Deity, and blister their lips with every variety of hot and sulphurous oaths. If we observe such persons closely, we shall generally find that the fierceness of their profanity is in inverse ratio to the affluence of their ideas.

"We venture to affirm that the profanest men within the circle of your knowledge are all afflicted with a chronic weakness of the intellect. The utterance of an oath, though it may prevent a vacuum in sound, is no indication of sense. It requires no genius to swear. The reckless taking of sacred names in vain is as little characteristic of true independence of thought as it is of high moral culture. In this breathing and beautiful world, filled as it were with the Deity, and fragrant with its incense from a thousand altars of praise, it would be no servility should we catch the spirit of reverent worshippers, and illustrate in ourselves the sentiment that the 'Christian is the highest style of man.'"—*Lutheran.*

The Light of Nature.

There lived many years ago in Philadelphia a celebrated Indian chief by the name of Tedguscung. He was sitting one evening by the fireside of a friend, both of them looking silently into the fire, indulging their own reflections. At length the friend said:

"I will tell you what I have been thinking of. I was thinking of a rule given by the Author of the Christian religion, called the '*Golden Rule.*'"

"Stop!" said the Indian. "Don't praise it to me, but tell me what it is, and let me think for myself."

"It is for one man to do to another as he would the other should do to him."

"That's *impossible!* It cannot be done," the Indian replied, and taking his pipe he lighted it and commenced walking about the room. After a while he came to his friend with a smiling face and said:

"Brother, I have been thoughtful on what you told me. If the Great Spirit that made man would give him a *new heart*, he could do as you say, but not else."

"A new heart, also, will I give you, and a new spirit will I put within you, and I will take away the stony heart out of your flesh, and I will give you a heart of flesh."—*Scrap Book.*

He that would pass the latter part of his life with honor and decency must, when he is young, consider that he will one day be old, and not forget to remember when he is old, that he was once young.

The Young Folks.

The Gluttonous Bear;

OR, THE SAD CONSEQUENCES OF INDULGING VICIOUS HABITS.

Once upon a time there was a bear who was very fond of dainties and sweetmeats. In one of his evening rambles, he stole into an apothecary's cellar, where there were a great many pots, basins, and barrels, filled with sweet, and sour, and poisonous articles. "Capital!" said he in a whispering voice. "Here's a plenty of dainties! Now for a feast!"

He put his nose into the first barrel that presented itself, and smelled the liquor which it contained. "B–r–r–r!" he said, shaking his head to and fro. "This smells like soot from the chimney. But yonder's a pot with a fine yellow jelly. I wonder how

it smells?" He put his nose to the pot, and was delighted with the smell. Now that jelly was a very strong and sickening medicine. He snuffed at the pot, inside and outside. "That's it!" he said. "That's the thing for me!" He pushed out his tongue, and began licking—and he kept on lickng till he had swallowed the whole contents. He then sneaked away to the forest, and laid himself down in his den.

It was not long, however, before Mr. Bruin became so sick that he could not lift up his eyelids. The perspiration broke out all over his body. He stretched himself out at full length, with his legs in all directions of the compass, and beat the ground with his tail, as if he were threshing corn.

"B–o–o–o! B–a–a–a!" he groaned. "What ails me! Oh dear I'm choking! I'll vomit my heart out of my body! Woe's me! I'll never touch a pot again; no, never! Never, I say in all my life—never!"

Thus he groaned and roared until the forest resounded. At length he got some relief; and when he felt a little better, he said to himself:

"Dear me, that *was* a job! I thought I had swallowed the whole sea, together with the moon and stars. Whatever I may or may not do, I'll never taste dainties again."

He thereupon laid himself on his side, and fell asleep, snoring as loudly as a bear can snore.

The next morning Mr. Bruin once more went out hunting, and passed by the apothecary's cellar.

"No, no," said he, "I won't go in. I'll take care this time. Never such a thing again! Never in my life!—no, never!" So he passed on. But looking back at the cellar, he said: "I remember there were some very nice looking pots there which I did not examine. I wonder what they contain. Of course, I won't *taste* anything; but I might take a *smell—only* a smell."

So he returned to the cellar and began snuffing at the pots. At length he stopped at one that smelt very nicely. "I'm sure," he said, "that's something very fine. I don't think I ever smelt anything so sweet in my life. Just let me take one drop—only one single drop."

He pushed out his tongue and tasted it. It was a strong poison, but sweet as honey. He tasted again—again—again; and then fell down dead as a doornail!—*The Postman's Bag.*

God is Love.

That awful child! Yes, such she certainly was, a very child of darkness, with a daring, impudent face, a bold manner, a rough voice; a hardened creature, whom it seemed impossible to tame or rule; insolent in speech and full of mischief, and yet she came from her street life of theft to turn into the ragged school in the evening and join a class of girls, for no reason she could give, except that she chose to do so. * * As the teacher went on with the chapter for the evening, she dwelt on the compassion of Jesus, and the invitations of His grace, and the happy results of trusting and loving Him. Silence had been kept for a little while, and the children were gazing earnestly in her face, listening with interest, when the young tyrant of the class burst out angrily and loudly:

"I don't care for what you say. I don't care for God or Jesus or you either. I don't love any of you. I don't care for you I say."

A murmur arose among the other children.

"For shame! for shame!" said several: "she's very kind; we do love her."

And one little creature sidled up close to Ellen and looked in her face with eyes full of tears:

"Yes, teacher," she said softly, "I love you and care for what you say, and if I had bread and you hadn't, I'd give you some."

Ellen's heart bounded with joy and she smiled her thanks to the little pleasure-giver, and, looking toward the wretched girl who had spoken before, she said, "And you dear girl, you would do the same. You don't really mean what you say. You feel kind sometimes, don't you?"

"No, I mean it. I wouldn't give you a bit."

"Well," said Ellen with a sigh, wiping away a tear started by this unexpected expression of feeling, 'well, I am very sorry, for it is not so; I feel for you. I would gladly share my bread with you, and if you don't love me, I love you, for I come a long way to meet you here, and try to teach you about the blessed Savior who loves us all."

The girl was staring her in the face, and while she spoke, the bold eye quailed, and the sturdy frame began to tremble, and the lately insolent lip quivered with strong emotion. Ere the last loving word had fallen from Ellen's lip and her tearful eyes could turn away, the proud struggle was over; the girl threw herself into her teacher's arms, covering her hands with kisses, and striving to implore forgiveness. From that time the ring-leader of evil took the lead in all improvement, and Ellen never needed to be reminded that the master-key to the human heart is love. God has used, is using it himself, in the person of His Son; and God Himself is Love.—*Master-Key.*

For the Boys.

"Sir," said a boy, stopping before a man on his cart, "do you want a boy to work for you?"

"No," said the man, "I have no such want."

The boy looked disappointed; at least, the man thought so, and he asked:

"Don't you succeed in getting a place?"

"I have asked at a good many places," said the boy. "A woman told me you had been after a boy, but it is not so, I find."

"Don't be discouraged," said the man, in a friendly tone.

"Oh, no, sir," said the boy, cheerfully," because this is a very big world, and I feel certain God has something for me to do in it. I am only trying to find it."

"Just so, just so," said a gentleman who overheard the conversation. "Come with me, my boy; I am in want of somebody like you."

It was the doctor, and the doctor thought any boy so anxious to find his work would be likely to do it faithfully when he found it.

If everybody had the spirit of this little lad, there would be no idlers in the world, standing on the corners, sitting in the shops, waiting for the work to come to them. Work does not often come so. Almost everything worth having, like the ore in the mine, must be sought for.—*Arthur's Magazine.*

Faith.

"Mother, does Susan tell me right—are there fourteen bones in my toes?"

Mrs. Moore smiled as she turned around to see Kitty with her little gaiter and stocking off, examining the five little pink and white tips that were perched upon the opposite knee.

"I shouldn't think there was more than one little bone—it seems like most meat," she continued, as she twisted a flexible little toe around, and pulled it first one way and then another.

"Susan is right; you have as many bones in your toes as in your fingers," said the mother, and she took her little girl's hand and showed by the joints how she could count them. Kitty was pleased, and immediately drew on her stocking and gaiter without a further examination of her little pedal. She was going about something else, when her mother asked:

"Why didn't you examine your toes longer?"

"Oh, I knew you told me right. I do not know *why* I feel so satisfied when you tell me things. Oh, yes," she continued, recollecting herself, "I do know; I have faith in you. My Sabbath School teacher says we believe those in whom we have faith."

"And why," asked her mother, "do you have more faith in me than in Susan? She has never deceived you, has she?"

"Oh, no, Susan never deceives; but you are older and know so much more. My teacher says we children have faith in those older and wiser than we, and that old people, like you and father and grandma, have somebody to trust in just as we children do—you have God, and we children have God, and you older folks, too. I guess, mother, you were thinking of my Sunday School lesson, 'Have faith in God,' when you asked me why I believed you."

And Kitty guessed right.—*Southern Churchman.*

EMPTY vessels make the greatest sound, and empty heads the most noise.

A Naughty Hole in the Pocket.

One day a little boy named Georgy came into the room where his father sat alone reading. He seemed very uneasy and restless.

"Do you want anything, Georgy?"

"No," replied the boy, "nothing."

But he kept putting his hand into his pocket and pulling out some pennies which had been given him, looking at them, and then putting them back again. At length he marched up to the table on which the missionary-box was, and dropped in his pennies.

"There you are quite safe, and I am glad of it," said the boy.

"What is it, Georgy?" said his father.

"Oh," said he, "I had some pennies, and a nice orange at the store seems to keep saying: 'Buy me; eat me; I'm a real good one.' Now, I don't really want the orange, do I? But the heathen really need to know about Jesus, don't they?"

"Indeed they do," replied his father.

"Well, I thought so," said Georgy, "and so I put the pennies in the missionary-box to-day, *lest there might be a naughty hole in my pocket before Sunday.*—*Missionary News.*

"I STRIKE 'oo," cried a little boy to his sister.

"I kiss 'oo," said she, putting up her rosy lips.

Tommy looked a look of wonder. Did his ears hear right? They did, for there was a kiss on Susy's lips. A smile broke over his angry face.

"I kiss too," he then said; and brother and sister hugged and kissed each other right heartily. A kiss for a blow is better than tit for tat; isn't it?

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

Also, SCHOOL FURNITURE.

WARREN HOLT,
305 Montgomery Street.

Sabbath School Books.

I have the most complete assortment of Sunday School Books, Cards, Question Books, and Sunday School Music Books, in the city.

Also, a fine assortment of Stationery. Paper and envelopes stamped with purchaser's initials, without charge.

A liberal discount made to Sunday Schools, Teachers, and Clergymen.

Just received, five hundred "SONGS OF THE SANCTUARY."

CHILION BEACH,
Bookseller and Stationer,
34 Montgomery Street, opposite Lick House.

PACIFIC COAST ITEMS.

THE following singular paragraph in relation to the State Teachers' Institute appeared in last week's issue of the *Christian Advocate*:

"Under the old *regime*, the occasion was one of convival hilarity rather than of mental improvement, and generally wound up with a dance. We hope the new officers will inaugurate a different system, and will make the present session intellectually profitable."

It is probable that the *Advocate* is led into this remark by its prejudice against the *old* administration—concerning which its statement is entirely erroneous—rather than by its admiration for the *new*, in respect to which its fond hopes have been cruelly disappointed; for the late institute *did* close with a social gathering, and we cannot learn that the amount of *mental improvement* developed by its exercises was sufficiently great to excite general remark among the teachers of the State.

IT is a prevailing idea in California that San Francisco is to be the New York of the Pacific Coast. Indeed, we are almost sure that we have seen it so stated, or at least strongly intimated, in some of the papers of this city. The idea is not, however, correct. The future metropolis of the coast is to be on Puget Sound, and the rich products of Oregon, Idaho, and the territories is to be poured into her lap. The Corvallis *Gazette* says so.

WE were informed this week, by a gentleman who has facilities of knowing whereof he speaks, that in Germany there is a lively interest being awakened on behalf of emigration to California, and especially to the southern portion of the State. We want such people here, and the large ranches which are now being subdivided and prepared for market, will afford them the homes they are in search of. We cannot have too many of this class of men, who are able-bodied and know how to work, and are not afraid to do it, either.—*Stockton Gazette.*

THE Manufacture of grain sacks is about to be commenced in this city and Oakland. It is supposed that these sacks can be manufactured here much cheaper than they can be imported. The *Mining Press* estimates that the State will gain more than a million dollars annually by the establishment of this manufacture.

THERE is yet a most valuable water power in Santa Cruz County unappropriated; power almost sufficient to make this a second Lowell. For sometime it has been thought that a company was about to secure this power and construct woolen mills of large capacity, but nothing definite has been made known as yet.—*Correspondence of Times.*

THIRTY miles east of here is a gypsum deposit that would supply a dozen such places as San Francisco for a thousand years to come. But that is not in *Lower* California or other distant place, and is therefore a matter of no importance. Distance alone lends enchantment.—*Jackson Ledger.*

A GOOD story is told of the production of the "Lady of Lyons" at Salt Lake City. During the performance, an aged Mormon took his twenty-four wives and left, saying that he would not sit and see a play where a man made such a fuss about *one* woman.—*Stockton Gazette.*

THE new town of Reno is growing with remarkable rapidity. There are now some four hundred houses in the place and all are crowded. The *Trespass* says that three in a bed is lonesome sleeping in that locality.

REAL ESTATE in Alameda County is slowly but steadily increasing in value. The number of sales now being made is not great, but no property is disposed of except at a profit.—*Oakland News.*

THE coal shipments from the Central Mine, made at Antioch, amount to 1,000 tons per month, and are likely to be much augumented.

A COMPANY has been incorporated to supply the city of Petaluma with water, which is to be brought a distance of three miles.

THE Santa Clara County Agricultural Fair is to be held at San Jose, commencing September 28th and continuing five days.

GEN. O. H. LAGRANGE, who is becoming a prominent man in the State, is to deliver the oration at Oakland on the Fourth.

IT is said that the Builders' Insurance Company have insured a field of wheat in Alameda County against fire.

THE Pacific Mail Steamship Company have decided to move their works from Benicia to San Francisco.

THE flood of summer tourists is beginning to pour in upon Yosemite Valley and the Big Trees.

THE Board of State Prison Directors have chosen Folsom as the location of the branch prison.

A NEW corner grocery has been opened in this city.

WEEKLY MARKET REPORT.

Produce Market.

WEDNESDAY, June 24, 1868.

FLOUR—Sales of 300 bbls Superfine, for export, private. Superfine grades are very dull at $5 75@6 26. We quote city mills as follows: Superfine, hf sks, ₱ 196 lbs, $6 25@6 37½; do, qr sks, $6 37½@6 50; Extra, hf sks, $7 12½@7 25; do, qr sks, $7 37½@7 50.

WHEAT—The sales are confined to small lots for local milling, within the range of $2@2 20 ₱ 100 lbs.

BARLEY—Sales include 400 sks, private; 1,022 sks, $1 50; 2,800 sks, in three lots, $1 60. We quote the range for new and old feed and brewing at $1 50@1 75 ₱ 100 lbs.

OATS—500 sks sold in lots at $2 20@2 40; 2,000 sks new crop, reported sold at $1 75 ₱ 100 lbs, seller 60.

POTATOES—Sales of 500 sks new Mission, in lots, at $1 15@1 25 ₱ 100 lbs.

ONIONS—White are jobbing at 2@2½c and Red at 1¾@2c.

CORN—The market is quiet at $2 20@2 37½ ₱ 100 lbs.

RYE—Entirely nominal. The last reported sale was at $2 50 ₱ 100 lbs.

BUCKWHEAT—In light request at $1 75@$1 80 ₱ 100 lbs.

BEANS—Are jobbing as follows: Bayo, 5c; Butter, 6½c; Pea 12½c; small White, 8@7¼c; Pink, 4@4½c; Red, 2¾@3c ₱ lb.

BRAN—The mill price is $30 ₱ ton. Demand fair.

MIDDLINGS—Feed descriptions, $35@37 50; fine, dull, $40@45 ₱ ton.

OIL CAKE MEAL—Is steady at $30 ₱ ton from the mill.

HAY—Sales of three cargoes new within the range of $10@14 ₱ ton.

DAIRY PRODUCTS—The market is well supplied with all kinds. Fresh roll Butter is quoted at 32½@35c; California firkin, 34@35c; Cheese, 13@15c for ordinary to choice California dairies; Eastern dairies, 17@18c ₱ lb. Eggs 37½@40c for Hen and 30c ₱ dozen for Duck.

POULTRY—Live Turkeys are quoted at 18@19c, and dressed 20@21c ₱ lb; Hens $7@7 50; Roosters, $6@7; Spring Chickens, $5@6; Ducks, $5@6 ₱ doz; Geese, $1 75@2 ₱ pair.

PROVISIONS—We quote jobbing prices as follows: California smoked Bacon, 15@16c; Oregon do, 12@13c; California Hams, 16@17c; Oregon do, 15@17c; California Lard, 14@15c, and Eastern do, 12½@13½c ₱ lb.

WOOL—There is a fair shipping demand at 17@18c for clean grades; 15@17c for medium, and 12½@15c for burry, according to condition. The sales are yet considerably ahead of the facilities for grading. The transactions since last Wednesday aggregate about 500,000 lbs within the above range.

HIDES—The market is more active, and prices have advanced to 14@15½c for fair to choice selections of California dry and 12@14c for Mexican. Sales since last Wednesday aggregate 2,600, including a single lot of 1,000 for export.

TALLOW—90,000 lbs (sold last wek) for export, private. We quote good to choice Beef and Mutton at 7¼@7½c ₱ lb.

San Francisco Cattle Market.

There is nothing worthy of remark to report. Quotations are essentially the same as last week.

We quote slaughterers' prices as follows:

BEEF—American, 1st quality, 6@8c ₱ lb.
do 2d do 5@7c ₱ lb.
VEAL—Remains steady at 7@10c ₱ lb.
MUTTON—In light request at 5@5½c ₱ lb.
LAMB—The extremes are 5½ to 7½c ₱ lb.
PORK—Undressed, 4½@7½c; dressed, 7@11c ₱ lb, the outside figure for milk or grain fed.

—*S. F. Bulletin.*

DIED.

In this city, on the 18th inst., after a very long and painful illness, Mrs. Harriet S., wife of Alphonso J. Lovejoy, aged 27 years and 10 months.

CURRENT TOPICS.

The "Free Religious Association" has held its first public meeting in Boston, and if the nature and results of the convocation are given us correctly in the papers, the world is not to be very greatly blessed by the influence from this source. The President of the Association, Rev. O. B. Frothingham, of New York, explained at length the objects they propose, chief among which is opposition to Christianity and the support of *religion*. He said: "We are a religious Association, not political, not social primarily, not philanthropic necessarily, not reformatory in the ordinary sense of the word, nor yet are we Christian." The representatives of all religious creeds, and those who disavow all creeds, were invited to be present and speak, and certainly no one could say that this invitation was not effective in bringing together a remarkable body of men. As might be expected, no two agreed in sentiment, and no more was gained from the meeting than that those who delight in speech-making were gratified with an opportunity to make themselves heard. With such elements as confessedly agree in nothing, and with an aim that none but men of this stamp can favor, it is not probable that this "new Religious Association" will become very destructive of what is good, or very formidable in the support of what is evil. It may be an advantage to all interests that need to be sustained that men of this class have a time and place, once a year, for giving vent to their feelings, and proclaiming their "philosophies." These interests will be the more safe because of such conventions.

The Colonization Society seems to be taking advantage of the condition of things at the South, to prosecute its work with more vigor than it has manifested during late years. A vessel was recently sent out from Savannah with four hundred and fifty emigrants for Liberia, and more are waiting to go as soon as opportunity can be afforded. Of course, no large proportion of the millions of blacks now living on this Continent can be transported to Africa, but we do not wonder that those who are aware of the facts, are desirous to go, and as their intelligence increases the number will increase.

It is computed that about 1,350,000 men, or nearly the whole of the able-bodied male population of the country, are enrolled in the regular army of France. This fact is very significant, as bearing on the prosperity of all commercial and productive interests not merely, but also as related to the question now so anxiously asked in all diplomatic councils: "What is to be the policy of Louis Napoleon?" The Emperor would certainly prevent such stagnation of trade and commerce as must result from the withdrawal of so many from their pursuits, had he not some plans of great importance to be speedily executed by military power. With a tax of more than one hundred dollars on each family in Paris, and accumulating burdens on the population throughout the Empire, the state of affairs will soon become critical, unless he takes some course that will justify the general conscription, and the Emperor is well aware that his power and prestige will be gone when he loses the confidence of the people. Everything on the Continent indicates a complication of difficulties between the prominent Powers within the next twelve months, of which they themselves cannot predict the result, and France will be eager to gain from the commotion when it shall come. Should she lose her present dictating eminence, the whole political aspect of Europe will be changed. Scarcely less marked will be the change if she gains to the extent of the Emperor's ambition. In any event, the immediate future is full of interest.

The success of Russian armies in Turkistan, or Independent Tartary, will open great advantage to the Government of the Czar, whatever may be the effect on other national affairs in Asia. Russia has long been desirous of obtaining the trade of this wide territory, which has, for the most part passed through British India to the European market, and now she can secure exchange of her own products for the silk, leather, jewelry, etc., from Bokhara, while the amount produced will be greatly increased under such stimulus. It is believed by some, that the present conquest is designed only as the beginning of what the Czar's ambition will prompt him to attempt in that part of Asia, until he may at last menace, if not possess, India itself. But, while England has such facilities for maintaining her hold on the vast resources of that country as are furnished by her command of the sea and the prestige of possession, there is little probability that Russia will undertake to take it from her. The grand movements, however, that are likely to be made on the political chess-board, within the next ten years, involving the control of all the old Oriental nations, by one, or another, of the western Governments, must be intensely interesting to all who watch them. Amazing changes are approaching, and unprecedented results will attend them.

A word to Atlantic ministers. Your people are constantly coming to California. They sometimes complain that you delay granting them letters of dismissal. Please give no ground for such a complaint as this. And when you grant them letters you often do no more. The result of this is, that the letters never reach California sessions. They are put away with the marriage certificate, or some other neglected document, and never again see the light. Would it not be well to favor some pastor here with a private note, when your parishioners emigrate? On the strength of it he might look them up, and be the means of securing their continuance in usefulness to the Church. Finally, you sometimes receive California calls. In all candor let us adjure you not to coquet with them. It is a disgraceful business at the best, but when pursued towards us it is simply sacrilegious. For the youthful pastor of North Puddleton to flirt with the people of South Puddleton, in order to alarm his own people and impress East and West Puddleton, is not high-toned, but it is not utterly ruinous to Puddleton South. But trifling with calls from a region like this, at a distance, by letter, of three weeks, and where congregations have the least possible cohesive power, is simply trifling with the very existence of the Church.

The frequent military parades through our streets on the Sabbath, by which religious worship is disturbed, and the quiet is interrupted of all who desire that this day may be free from the excitements that so much abound, suggest the inquiry whether we may not have a larger Christian element in our military companies. It is a necessity that these companies exist, and that many of our young men belong to them, and there are some advantages in a membership in them of which moral and Christian men might avail themselves. Why may not some companies be supported in which there shall be so large an element of this class that they will regard the laws of God, while they are effective in supporting the laws of the State? We are told that there has always been difficulty in maintaining such companies, but we believe they should be maintained, so long as military organizations are a necessity, and we should be glad were the moral sentiment so strong in them all that our sense of propriety and religious convictions need not again be outraged by the music and tramp of soldiers on the Sabbath, who employ that day for recreation and parade. Let those who are inclined to join military companies select such as are controlled by worthy principles, both for their own sake and for the sake of those who are now so often annoyed by the impiety of our citizen soldiery.

A prominent Church in Brooklyn, New York, has set an example respecting care for the poor, worthy to be imitated by others, and beautifully illustrating the spirit of our religion. Having few families of this class among its own members, this Church did not feel content, thanking God for abundance and taking no thought for others, but resolved to aid as many other families as possible, making no inquiry concerning their faith or infidelity if they were really poor. During the last winter they paid the rent of four hundred and eighty such families, bringing upon themselves the blessing of a multitude that were ready to perish. Rent is the heavy burden of those who are supported by day's labor in our

large cities, and being relieved of this, they can be comfortable. With what different eyes will they look upon the churches which they are wont to think are only for the rich, when they find that they are the treasures whence comes the relief they so keenly appreciate. There should be far more of that Christian benevolence which asks only who are in need, and hastens to help them, seeking no reward, yet finding that it "blesses him that gives and him that takes."

Religious Intelligence.

PACIFIC COAST.

Correspondents.—We have endeavored from the beginning, to obtain as much general information as possible, both respecting our own Coast, and the East, through our correspondents. It will not surprise any who have ever attempted to conduct a newspaper, to learn that we have not always succeeded to the extent of our desires, though we have made such arrangements now, that with the kind assistance of our brethren in different parts of our own State, we hope to make this department of the paper more valuable than ever. We are pleased to be able to give a letter in this number from Rev. Dr. Nelson, of Lane Seminary, which will be read with interest.

—

Baptist School.—We learn from the Petaluma *Argus*, that the Trustees of the Baptist College School have purchased suitable lots on Post Street, where they will immediately commence the construction of their school building. The edifice will be two stories in height, and will be in every respect adapted to the purposes for which it is designed The next session of the school will commence on July 30th.

—

Re-fitted.—We are glad to learn that the efforts of the Presbyterian Society of Brooklyn to repair their church building, have at last been successful. The building has been thoroughly renovated, and made comfortable and attractive. Last but not least, this has been accomplished without involving the Society to any considerable extent in debt.

—

Sabbath School.—Rev. Mr. Hamilton, of the First Baptist Church. Brooklyn, and Rev. Mr. Hall, of San Francisco, have been preaching in Paradise Valley, and have succeeded in establishing a Sabbath School in Tuolumne City which is already in a prosperous condition. They have in view the establishment of a Baptist Mission in the valley.

New Church.—A church is to be erected by the Catholics in Paradise Valley. The *News* thinks that the people of that vicinity are no longer liable to the charge of disregard for public worship.

The *Martinez Express* says, that the new Catholic Church at that place is being pushed forward to completion with great rapidity, and promises to be an improvement to the town.

The children of the Suisun and Fairfield Sabbath Schools are expected to participate in the exercises of the Vallejo Fourth of July celebration.

The net receipts of the Fair lately given by the ladies of the First Congregational Church in Benicia, amounted to a little over $800.

Robbed.—The Methodist parsonage at Grass Valley was entered last week by burglars and robbed of watches valued at $150.

Articles of Incorporation have been filed by the Trustees of the First Methodist Church of Maine Prairie.

We publish in another column the basis upon which the two branches of the Presbyterian Church are to be united.

The Festival held by the Baptist Church at Columbia, to raise money to repair their house, yielded $192.

The ladies of the Methodist Church in Marysville, gave a grand festival on the evening of July 3d.

The new bell has been hung in the tower of the Presbyterian Church in Vallejo.

EASTERN.

The Rev. George Junkin, D. D., died suddenly, at his residence in Philadelphia, on the 20th ult., in the 78th year of his age. He was widely known in the religious world, and has been a prominent and most active minister in the Old School branch of the Presbyterian Church. He was the first President of Lafayette College at Easton, Pa., and subsequently President of Washington College at Lexington, Va., which later position he resigned, on account of his Union sentiments, at the breaking out of the late civil war. He was a man of great public spirit, possessing considerable ability as a writer and public speaker, and of great energy and indomitable perseverence.—*Reformed Church Instructor.*

The General Assembly of the Southern Presbyterian Church convened in Dr. Bullock's Church, in Baltimore, May 21st, consisting of one hundred delegates from the Southern and border States. The opening sermon was delivered by Rev. T. V. Moore, of Richmond. A very large congregation was present and a deep interest was manifested. Rev. Drs. J. B. Stratton and J. Waddell, of Mississippi, were nominated for Moderators, and the latter elected. Rev. H. B. Bowde, of Nashville, was elected Secretary.

Two thousand seven hundred and seventy-nine new liquor-shops have been opened in Massachusetts since the anti-prohibitionists carried the last election there. When the new license law goes into full operation, the tide of intemperance will meet but feeble obstruction. Those who said that the prohibitory law tended to increase drinking, and that a license law was needed to check the evil, are already refuted.—*Independent.*

Lay Preaching.—The Fourth Baptist Church of St. Louis, Rev. Dr. Osborn pastor, has wisely passed a vote authorizing the deacons to call upon such of the members of the church as they see fit to fill the pulpit at any time the pastor may be absent. A Congregational church in Lynnfield, Mass., is presided over by Mr. E. Parsons, a young farmer and layman.—*Independent.*

The Rhode Island Baptist State Convention, adopted a resolution in effect disfellowshipping the Second Baptist Church of Newport, the Convention solemnly declaring that in its judgment "a church inviting to the Lord's table those who have not been baptised in accordance with the Lord's commands (meaning by immersion) is not a regular Baptist Church."—*Lutheran.*

The *Springfield Republican* contains a farewell address of over two columns from Dr. Holland on resigning the superintendence of the Memorial Church Sunday School in Springfield last Sabbath. He received a pocket Bible and Lange's commentaries as presents from the school; and he now goes abroad with his family to spend two years, or more, in Europe.

Westminster Church, Brooklyn, N. Y., was the scene of a very interesting communion service on Sunday last. The heads of a family (Gen. Herman and his wife) who for many years have been French Catholics, made a public profession of their faith, and were baptized by the pastor, Rev. H. S. Carpenter.—*Observer.*

The American Missionary Association has sent to the South the past year, 479 missionaries and teachers, at an expense of $375,000. The additional expenditures for their foreign missions, etc., will bring up their outgoes to about $400,000.—*Advance.*

Rev. Dr. S. J. P. Anderson has been compelled by the state of his health to seek a dissolution of the pastoral relation he has so long sustained to the Central Presbyterian Church of St. Louis, Missouri.

Rev. J. M. Anderson, President of Ohio Female College has accepted the appointment to the Professorship of Mathematics at Williams College.

Proposed Terms of Re-union between the two Branches of the Presbyterian Church in the United States of America.

1. The re-union shall be effected on the doctrinal and ecclesiastical basis of our common standards; the Scriptures of the Old and New Testaments shall be acknowledged to be the inspired Word of God, and the only infallible rule of faith and practice; the Confession of Faith shall continue to be sincerely received and adopted, "as containing the system of doctrine taught in the Holy Scriptures;" it being understood, that this confession is received in its proper, historical—that is, the Calvinistic or Reformed—sense; it is also understood, that various methods of viewing, stating, explaining, and illustrating the doctrines of the Confession, which do not impair the integrity of the Reformed or Calvinistic system, are to be freely allowed in the united church, as they have hitherto been allowed in the separate churches; and the government and discipline of the Presbyterian Church in the United States shall be approved as containing the principles and rules of our polity.

2. All the ministers and churches, embraced in the two bodies, shall be admitted to the same standing in the united body, which they may hold in their respective connections up to the consummation of the union; imperfectly organized churches shall be counseled and expected to become thoroughly Presbyterian, as early, within the period of five years, as is permitted by the highest interests to be consulted; and no other such churches shall be hereafter received.

3. The boundaries of the several Presbyteries and Synods shall be adjusted by the General Assembly of the United Church.

4. The official records of the two branches of the church, for the period of separation, shall be preserved and held as making up the one history of the church; and no rule or precedent, which does not stand approved by both the bodies, shall be of any authority, until re-established in the united body, except in so far as such rule or precedent may affect the rights of property founded thereon.

5. The corporative rights, now held by the two General Assemblies, and by their Boards and Committees, shall, as far as practicable, be consolidated, and applied to their several objects, as defined by law.

6. There shall be one set of committees or boards for home and foreign missions; and the other religious enterprises of the church, the churches shall be encouraged to sustain, though free to cast their contributions into other channels, if they desire to do so.

7. As soon as practicable after the union shall be effected, the General Assembly shall reconstruct and consolidate the several permanent committees and boards, which now belong to the two Assemblies, in such a manner as to represent as far as possible, with impartiality, the views and wishes of the two bodies constituting the United church.

8. The publications of the Board of Publication and of the Publication Committee, shall continue to be issued as at present, leaving it to the Board of Publication of the United Church to revise these issues, and perfect a catalogue for the joint church, so as to exclude invidious references to the past controversies.

9. In order to a uniform system of ecclesiastical supervision, those theological seminaries that are now under assembly control may, if their boards of

direction so elect, be transferred to the watch and be left free to decide for itself when it shall exercise the right.

care of one or more of the adjacent Synods; and the other seminaries are advised to introduce, as far as may be, into their constitutions, the principle of synodical or assembly supervision; in which case, they shall be entitled to an official recognition and approbation on the part of the General Assembly.

10. It is agreed that the Presbyteries possess the right to examine ministers applying for admission from other Presbyteries; but each Presbytery shall

11. It shall be regarded as the duty of all our judicatories, ministers and people in the United Church, to study the things which make for peace, and to guard against all needless and offensive references to the causes that have divided us; and, in order to avoid revival of past issues, by the continuance of any usage in either branch of the church that has grown out of our former conflicts, it is earnestly reccommended to the lower judicatories of the church, that they conform their practice in relation to all such usages, as far as is consistent with their convictions of duty, to the general custom of the church prior to the controversies that resulted in the separation.

12. The terms of the reunion, if they are approved by the General Assemblies of 1868, shall be overtured to the several Presbyteries under their care, and shall be of binding force, if they are ratified by three fourths of the Presbyteries connected with each branch of the church, within one year after they shall have been submitted to them for approval.

13. If the two General Assemblies of 1869 shall find that the plan of reunion has been ratified by the requisite number of Presbyteries in each body, they shall, after the conclusion of all their business, be dissolved by their respective Moderators, in the manner and form following, viz: Each Moderator shall address the Assembly over which he presides, saying, "By virtue of the authority delegated to me by the church, and in conformity with the plan of union adopted by the two Presbyterian churches, let this Assembly be dissolved; and I do hereby dissolve it, and require a General Assembly, chosen in the same manner, by all the Presbyteries in connection with this body, and all those in connection with the General Assembly meeting this year in ——, to meet in ———, on the ——— day of May, A.D. 1870; and I do hereby declare and proclaim that the General Assembly thus constituted will be the rightful General Assembly of the Presbyterian Church in the United States of America, now by the Grace of God, happily united."

Signed, by order of the joint committee.

CHARLES C. BEATTY, Chairman.
EDWIN F. HATFIELD, Secretary.
Philadelphia, March 14th, A.D. 1868.

FOREIGN.

THE WALDENSIAN MISSIONS IN ITALY.—At a reception given by the Duke of Sutherland, England, April 29th, to consider the subject of the missions of the Waldensian Church, the Rev. Dr Guthrie gave some interesting statements concerning the present condition of the Vaudois. Twenty-one of their ministers and fifty-eight other agents are dispersed over Italy from Palermo to Courmayeur; their Theological College has been removed from La Tour in the valley to Florence; and the old palace of Cardinal Salviatti, where the students are lodged, contains also the Claudian Press, from which issue Bibles, tracts and religious books by tens of thousands, which are dispersed by colporteurs and book depots throughout Italy. The preachers have to encounter the fierce opposition of the priests, but the civil power affords them protection. The Vaudois, however, are only about twenty-two thousand in number, and are very poor, their ministers being content with £50 a year; and they cannot prosecute the work on which they have entered without foreign support.—*N. Y. Observer.*

RESULTS OF MISSIONARY LABOR.—Since 1813, when the first American Missionary landed in Burmah, sixty missionaries have been sent there, of whom, on account of death or removal, only half have been permanent, effective workers. They have reduced three Karen dialects to writing, have translated the Bible, prepared and printed dictionaries, grammars, and school-books, created a religious literature, raised up and educated native teachers, organized schools, and built churches. According to the minutes of the Burmese Baptist Convention for 1868, there are now 287 churches, 63 ordained, and 309 unordained native preachers, 15,983 communicants, and 4,015 pupils in school.—*Am. Messenger.*

SINCE 1825 the Protestants of France have opened 150 new places of worship to contain the converts they have made from Popery. In Paris, in 1825, there were only two Protestant places of worship; there are now 40, not including eight foreign chapels, so that in fact the whole of the Protestant places of worship are 53. In the south of France, at that period, there were only 50 Protestant churches; but since they have amounted to 300. In 1802 there was not a single Protestant journal in the whole of France to maintain and recommend the cause of true religion; now, there are more than 20 of such religious journals in the country.—*Independent.*

THE Missionary Packet, *Morning Star*, returned from the Marquesas Islands on Monday, June 1st. She had a long passage of thirty-six days to the group, visited all the Mission stations, and supplied the necessities of the Missionaries, who were found to be well and in good spirits. Rev. Dr. Smith, delegate of the Hawaiian Evangelical Board, returned in her. The passage back was made in eleven days and a half, under fresh trade winds. The vessel will leave again about July 1st for a cruise among the Micronesian Islands, and will probably be absent about six months.—*Honolulu Advertiser.*

THE Scottish Presbyterian Establishment is pouring in resolutions and petitions against the disestablishment of the Irish Church from nearly every Presbytery and Synod. The Irish Presbyterians, not so wise in their generation, halt between two opinions. Many of them have no objections to disestablishment, but don't see why they should lose the *Regium Donum.* Others defend the establishment itself for the sake of retaining the latter. A third class—the Young Presbyterian of Ulster—wish to see both done away with.—*Am. Presbyterian.*

PROTESTANTS IN AUSTRIA.—The exact number of Protestants in Austria, is given in the official statistics; it is estimated that there are at present three hundred thousand Protestants inhabiting the German and Slavian provinces of the Austrian Empire. Of that number two hundred thousand belong to the confession of Angsburg, and one hundred thousand belong to the Helvetic confession. There are in all one hundred and eighty-nine pastors.—*American Presbyterian.*

IN some of the Wesleyan churches in Canada, a portion of the wealthier members rent two or three pews for the free use of strangers and visitors. A placard at the church entrance states their number and location, and invites visitors to occupy them. With such inviting provision for them, and the absence of any fear that they are disturbing pew-holders, visitors are found to enter the church much more freely.—*The Advance.*

REV. DR. HILL, who has recently returned on a temporary visit to this country from his missionary field in Greece, reports that the mission work under his care in Athens, in 1828, began in the cellar of a tower, that three years afterward, in 1831, it had 97 members, and that this number has since increased to 750 at the present time.—*Christian Instructor.*

BITTERNESS OF RELIGIOUS HATE.—The Mohammedan ruler of Egypt, under the influence of the Coptic patriarch, a nominal Christian ecclesiastic, still continues his persecution of the American missionaries. He has closed their schools and imprisoned some of their teachers, so that they dare not now print their tracts, teach, or preach as freely as formerly.—*Messenger.*

IN the great progress of civilization, Spain has been left far in the rear, advancing but a few paces at a time, with timid and uncertain steps, oppressed by her double burden, the Church and the Bourbons, which like Sinbad's Old Man of the Sea, cannot easily be shaken off.—*Cleveland Messenger.*

THE necessary capital has been secured in England for a new telegraph line to India. The projected line is from Berlin to Odessa, thence by sea to the Crimea, again by sea to a point south of the Caucasus, and so to Teheran; thence to Bushire, and thence by sea to some point on the coast which will be in communication with Kurrachee.

FRIENDS.—By the annual census of the Society of Friends in and around London, it appears that this denomination, in the metropolitan district, contains about 2,100 members. It has slightly increased in number during the past year. There are 15,000 Friends in the United Kingdom.—*American Presbyterian.*

COLLEAGUE TO DR. CANDLISH.—On the reccommendation of a large committee of their number, appointed to look out for a minister, the congregation of Free St. George's has unanimously and cordially elected the Rev. John Laidlaw, Free West Kirk, Perth, to be colleague pastor to the Rev. Dr. Candlish.

The American Sunday School Union

Having commenced the Sunday School Missionary work on the Pacific Coast, we are ready to aid in organizing Sunday Schools and aid existing needy Schools.

We have just received a fine and large assortment of the publications of the Society, which we supply to Schools at reasonable rates. We also supply the periodicals of the American Sunday School Union. The

CHILD'S WORLD,

a beautifully Illustrated Paper for Children and Youth. Monthly, at 12½ cents each per year for ten copies and upwards, and 24 cents for the semi-monthly. Also,

THE SUNDAY SCHOOL WORLD,

a Sixteen-Page Quarto Monthly Paper for Sunday School Officers and Teachers, at the low rate of Fifty Cents per Year. No Sunday School Teacher should be without this paper.

Rev. Richard Newton, D.D., the Editor of these papers, is acknowledged to possess unsurpassed abilities as a Sunday School writer. The above rates are in Currency.

Catalogues of the Society's publications, and Sample Copies of its Periodicals furnished gratuitously on application to Wm. F. Peters, care P. O. Box 1007, or at the Depository, 802 Montgomery Street, (Second Floor, Room No. 2,) San Francisco, Cal.

Good Work! One Price! Punctuality!

D. Bruce,

PRINTER,

Commercial Street, opposite Miners' Restaurant.

Correspondence.

Letter from Ohio.

Cleveland, June 5, 1868,

Editor Occident:—

Returning from Harrisburgh, I linger, for a few days, in this most beautiful city, being engaged to preach to the people of your former pastoral charge on the next Sabbath. I need this rest, for no labors are more exhausting to me than those of the General Assembly. The close and continuous attention to the series of great and solemn themes, moving so swiftly across the scene; the incessant strain of one's sense of personal and representative ability, the unavoidable anxiety in behalf of precious interests; the deep movement of one's sympathies towards feeble churches, needy classes, and perishing multitudes; the delicious excitement of meeting so many old friends and making personal acquaintance with so many new ones; and the intense enjoyment of Christian fellowship and united prayer; all these together constitute a most exhausting, although a most delightful expenditure of vital energy. Where else could one more rapidly recover from this exhaustion than here in Euclid Avenue?

Several numbers of your Occident, lying in my room, remind me of your kind request that I should make myself at home in its columns. Perhaps a few thoughts on the General Assembly thus held may not be unwelcome.

The Pacific Slope was there represented by five delegates, commissioned by three of its four Presbyteries. Indeed, your Presbytery of Washoe was the only one of all our Presbyteries that had no commissioner enrolled. So full attendance from Presbyteries so distant is truly remarkable. The action of the Assembly on the subject of mileage was generally impartial, and gives assurance of welcome to the remotest constituencies, together with brotherly confidence that they will be conscientiously economical in their arrangements for representation. Each Presbytery—near and remote, great and small—contributing its full quota (eight cents per communicant) to the Commissioners' Fund, and each Presbytery securing its representation with as little traveling expense as possible, it is now probable that the fund will be sufficient for all the expenses.

Presbyterian reunion was of course the great theme. The report of the Joint Committee—the visits of noble delegations from the other Assembly—the consultations and debates on the terms of union, and the united and fervent prayers that God would lead us in His own way, and give us *true, hearty, unsuspecting, and permanent* union—these are the memorable features of this General Assembly. In comparison with these, even the great instrumentalities of our Church's work—education, church erection, missions—were thrown into the shade. Union we are sure to have—union we *must* have. This was evidently the dominant sentiment. In the earnest manifestation of it, perhaps it was inevitable that there should be some impatience toward those, in either body, who were anxious to guard against any sacrifice of either truth or liberty. In the demand for *unquestioning confidence*, as the only needed condition of union, perhaps there was unwittingly betrayed a *lack of confidence* toward the more cautious, not quite consistent with that demand, and not just. Upon the whole, however, I believe the movement is as unexceptionable as great movements of multitudes are apt to be. It is a tidal movement, ordained of God, and impelled by Him. There may, nevertheless, be some very sacred things liable to be submerged by it. So some thoughtful men believe, and try to prevent that incidental damage, as far as possible. Is it not quite possible that the same Holy Spirit prompts them to this effort? Let them bear patiently, (if need be) the mistaken imputation of the folly and madness of resisting the tide.

You will get, from official sources, the reports of our church enterprises, all of which, I believe, are in healthful condition, and making good progress.

Probably you may also have, from other pens, descriptions of our delightful visit to Gettysburg, where we had the pleasure of Gov. Geary's company, and the great advantage of his graphic description of the memorable battle, in which he was one of the several eminent leaders.

I cannot agree with those who object to such excursions of the General Assembly. I do not think that day could have been spent in any other way so profitably. Its general influences and its many personal consultations did more to prepare our minds for action on the great question before us than continued debate could have done—the fraternal mingling of minds and hearts was exceedingly helpful to true union, and the educating and fructifying effect upon our minds will be of incalculable benefit to our hundreds of congregations. The visit to Pilot Knob and the visit to Gettysburg I believe to have been as useful in promoting the real work of the two Assemblies of '66 and '68 as any two days' experiences. I trust that the two Assemblies of '69 will not fail of a joint excursion (by sea or by land), in which they will be most promiscuously "*shaken together*," and when the General Assembly of the Presbyterian Church in the United States, "by the grace of God happily united," shall meet in San Francisco, I hope that your glorious Bay, or some chosen land-scene on your coast, will witness one day of thankful and hallowed mirth, in which all hearts will be glad and exultant together. H. A. N.

P. S.—Why should not the *first* General Assembly of the United Church be held in San Francisco? No; that must of course be in Philadelphia. But the *second*? Surely, your great railroad will be ready for us then—May, 1871.

Letter from New York.

Brooklyn, June 4, 1868.

I propose to drop you a line once in a while from this Orient clime to keep you informed concerning the many changes in the pulpits and the religious community of this City of Churches. To tell you that this is called a goodly city would be no news, nor that we have many excellent, talented, and noted clergymen, beautiful churches, liberal laymen. All this, and more, you have doubtless heard from the several ministers whom your fair promises, together with other circumstances, have called from our Heights to your Golden Gate. Dr. Eells and Dr. Thomas you have taken from us, and there is no telling when you will come for still others, with the rapacity which characterizes churches who will be content with none but the very best material in the pulpit, and the best pastoral talent in the homes of the people. Well, thank Providence, we have a large supply of just such material and talent, with a number of young ministers growing rapidly, working earnestly and successfully, and if you must have pastors from the East, instead of making them yourselves in colleges and seminaries of your own, you will find hardly a better supply to draw from.

Our churches have had a season marked by no unusual interest of a religious character, and yet in several there has been a succession of conversions, so that at nearly every communion service there have been accessions on profession of faith as well as by letter. In some of the Methodist and Baptist churches there have been numerous conversions, and the result is the establishment of new churches and mission stations in many portions of the city.

Rev. Dr. Rockwell remains the pastor of the Central Presbyterian Church, or, as the profane youth will persist in calling it, "the Church of the Holy Wedge," on account of its queerly shaped tower. The Sunday School is flourishing, and there seems to be in the church more life and earnestness than in several years previous.

Rev. Dr. Nathaniel West was removed by Presbytery from the pastorate of the Second Church, so long under Dr. Spencer's care, after a tedious trial. A heavy debt has been incurred by the church, after long years of difficulty and misfortune, and its future does not look very promising. Dr. West has very recently been made President of a seminary in Danville, Ky.

Rev. Mr. Ferguson, formerly of the Wallabout Church, has gone West, and Rev. S. P. Halsey, a young man, is now its acting pastor. Rev. Dr. John D. Wells remains over the South Third St. Church, Williamsburgh; Rev. C. S. Pomeroy with the Ross Street Church, in the same district, and Rev. Dr. H. J. Van Dyke with the First Church in Remsen Street.

In the New School churches there have been several changes. Rev. Dr. C. S. Robinson, of the First Church has gone, as you have doubtless learned by the sharp-eyed correspondents of your secular journals, to Europe, taking charge of the American Chapel in Paris, and attending to some other matters. A unanimous call was tendered Rev. Dr. R. R. Booth, of the Mercer Street Church New York, and everybody supposed it would be accepted; but the Mercer Street folks made such a hue and cry and held their pastor so tight, that he was obliged to decline the call. Now he has gone to Europe.

Rev. Dr. J. T. Duryea has come to take charge of the young but vigorous Classen Avenue Church. He is a valuable acquisition to the list of our pastors, and already the church has grown to such an extent that a new chapel was demanded and has been built, and a church edifice is being constructed which will accommodate a large congregation.

The Memorial Church is progressing finely under the care of Mr. Brown, and Dr. Cuyler's church remains full as usual. I am very sorry to say Dr. C. has lately met with a severe affliction in the loss of little Georgie, one of his twin sons, born on the night that the news of the capture of Vicksburg reached the city. The little fellow was ill but about twelve hours—from six in the morning to seven in the evening. The disease was scarlet fever.

The Westminster Church has been enlarged and made into a very handsome structure. Rev. Hugh Smith Carpenter still remains pastor.

Rev. Dr. Spear, the Nestor of the Brooklyn pulpit, preached his twenty-fifth anniversary discourse a few weeks ago. On the Friday preceding he was presented with a handsome donation, very green on the back, and bearing several figures on the front. The sermon was a review of the history of the church, and the growth of the city and its churches, during the quarter century, and was so interesting that nearly two columns of it were printed in the *Brooklyn Union*, and it has been published for general circulation.

A week or two since the grand annual celebration of the Sunday Schools was held, and a right merry time was had. There were not less than 35,000 scholars and teachers in line, divided into five large divisions, at the close of the exercises in the churches, and marshaled on the streets and in the squares, where they marched and countermarched, bands playing, flags flying, banners fluttering. It was indeed a grand celebration. B. H. B.

Suicides Increasing.

From every section of the country reports are daily reaching us of suicides which, in their number and horrible details, far exceed anything in the national experience. Hitherto we have been, substantially speaking, a happy, even-minded people, of whom a very large proportion have been firm believers in the doctrines of Christianity, contented with simple pleasures, addicted to domestic life, and having little taste for violent "sensations" of any kind. The changes that have come over us are great and significant. The bitter sorrows and anxieties of a long civil war, followed, in the North at least, by an epoch of violent speculative excitement, attended by extravagance of living, and a widely-spread passion for sensual pleasures, have made our country anything but the country of ten years ago. Life now, to be tolerable, must be spiced with condiments of the keenest and most titillating sort. Each fresh gratification quickly palls, and new devices must constantly be brought forward to stimulate the jaded senses. The theatre is radiant with voluptuous images, and thousands swarm nightly to gloat on the female charms their clouds of gauze scarcely affect to conceal. Gross pictures are hawked about the streets, and obscene books are offered to boys and greybeards alike in the exchange and market place. The newspapers strain every nerve to outstrip each other in the astonishing, the preposterous and the extravagant; and those from whose occasional exhibitions of care, thought, and scholarship we have learned to hope better things, seem of late to have plunged bodily into the vortex of sensation. Even the pulpit yields to the vulgar tendencies that mar nearly all less sacred things, and the most influential and successful preachers are men who in a purer and more cultivated age would be simply laughed down as greedy and sensual charlatans. The artificial and highly colored, in contradistinction to the true and the natural, are producing in every direction their legitimate effect. We see false views of life usually ending in bitter disappointment, minds and bodies prematurely broken and withered, a horible lust of money as the whole genuine good of life, a prevalent infidelity—spreading everywhere in sympathy with parallel conditions to those of France at the time of her revolution—and, in a word, every promise of social decay and ruin, unless the baleful progress of things is arrested by powerful reformary agencies, signs of which are unhappily not yet apparent. Suicides are few in the ratio of the number of sound minds in healthy bodies. We cannot wonder that, with a social preparation so mournfully ample as ours has been to encourage them, they should increase apace, or that they should appall us even less by their frequency than by the terrible character of the details that often of late attend them.—*Round Table.*

Sabbath School Books.

I have the most complete assortment of Sunday School Books, Cards, Question Books, and Sunday School Music Books, in the city.

Also, a fine assortment of Stationery. Paper and envelopes stamped with purchaser's initials, without charge.

A liberal discount made to Sunday Schools, Teachers, and Clergymen.

Just received, five hundred "SONGS OF THE SANCTUARY."

Agents Wanted

At once, to canvass for the

MOST POPULAR SUBSCRIPTION BOOKS

Of the Season.

The following works are now being canvassed in several counties of the coast and with the best of success, and good men can do well on any one of them in territory which has not been canvassed.

MACKENZIE'S 10,000 RECEIPTS.—The best book of the kind ever published. SIX HUNDRED COPIES have been sold in a single county in California, and the county not finished.

BEYOND THE MISSISSIPPI.—Containing over 200 illustrations. In several instances the commissions of our canvassers upon this work alone have amounted to over $100 a week.

BANCROFT'S MAP OF THE PACIFIC STATES.—Fifth edition; revised to the present time. Decidedly the best map of the coast in existence.

WELLS' EVERY MAN HIS OWN LAWYER.—As high as sixteen orders in a single day have been taken for this work. It is useful to every one.

PEOPLE'S BOOK OF BIOGRAPHY.—A new work, just ready, by the popular writer, James Parton. A great number of the subjects are self-made men, "Who paved their own way in this world," who were "architects of their own fortunes." Reading like this inspires the young with courage and stimulates them to emulate such examples. A very large sale is expected.

NATURAL WEALTH OF CALIFORNIA.—Comprising Early History, Geography and Scenery, Climate, Agriculture and Commercial Products, Manufactures, Mining, Railroads and Commerce, Population, Educational Institutions, and a detailed description of each County: together with much other valuable information. One large octave vol. The finest work ever gotten up on the Pacific Coast. Published by H. H. BANCROFT & COMPANY, San Francisco.

LOST CAUSE.—The only Southern History of the war published. Very large sales have been made in the territory now already worked. A new revised and enlarged edition is now ready.

THE AMERICAN WHEAT CULTURIST.—Practical details for selecting and producing new varieties and cultivating on different kinds of soil. A new work just ready.

HISTORY OF THE SECRET SERVICE OF THE UNITED STATES.—"The most exciting and interesting book ever published."

In addition to the above list we have many other first-class works which offer good inducements to active men and new works contantly received.

Those desiring an agency on any of these works will please apply at once for terms to agents, etc., etc., and name two or three counties that will be satisfactory, when their first choice will be given if possible.

The Occident.

San Francisco, Saturday, July 4, 1868.

OUR SECOND VOLUME.

The present number begins the second volume of The Occident, and our patrons will be glad, we trust, to find the evidence of our desire to please and profit them in the increase of matter we are able to give them. After an experiment of six months, we are more than ever convinced that such a paper as we wish The Occident to be is not regarded as superfluous, because there are other religious papers asking patronage, and worthy to be well supported, on the Pacific Coast. And we are willing to accept the favor that has been shown us as proof that we may rely on the interest that has bid us welcome. We are not able to say that we have equaled our hopes in the character of the journal, to which we have given some careful thought, and no little time; nor are we more willing than at first to promise great things for the future. Indeed, our experience has made it clear to us that editors need not expect to please everybody, and has pretty nearly satisfied us that it would be an occasion for regret if they did. We, certainly, have been unable to please ourselves, or to produce a paper that can correspond with our ideal of what should go, week after week, into the homes of our people, to have influence upon the character and destiny of young and old. Still, we have tried to furnish something that might be valuable, and to withhold what might be injurious; and having a more definite comprehension than at first of what may be attained in this direction, we hope to be more successful than heretofore.

It has been our aim to publish a *family religious paper*. We have not sought or wished to gratify only those who demand exclusively literary, or exclusively religious articles and selections. We have not expected, or wished, to place ourselves on the ground of those who are hostile to a generous Christian spirit, while we have resolved to rebuke, wherever seen, the evils that spring from religion misrepresented. It has not alarmed us, therefore, nor dispirited us, to receive letters, as we have, from Roman Catholic subscribers, threatening us with discontinuance of support because we find fault with what ought to be condemned in Romish pretensions and practice; and from Presbyterian clergymen, using even more severe and discourteous language, because we do not meet their ideas of violent partizan and denominational championship. We have aimed to be true to Presbyterianism, in faith, and polity, and interest. We have studied the wise and liberal character of our noble Church standards and literature, and have endeavored to attain the spirit of our intelligent and eminently devoted people, resolved that from these sources we would receive the *animus* that should become the life of our paper, and we are none the less satisfied with our effort because those who have extreme views are dissatisfied with it.

The general character of The Occident will not be changed while we have control of it, and it gives us pleasure to receive a multitude of expressions from all classes, chiefly those who are to be reckoned among the wisest and the best, to the effect that they would not have it changed. That it may be *improved*, now that it is enlarged, retaining the same essential features, will be our purpose and effort, and we trust we shall have the hearty coöperation of all in sympathy with our object, not merely that our beloved Church may be properly represented in the paper, and supported by it, but that also a great number of families, not attached to Presbyterian usages and belief in particular, may be benefited by our weekly visits to their homes.

We feel most sensibly the responsibility that has been thrust upon us, rather than assumed by us, in the position we are called for the time to occupy. We feel that we have a claim upon the sympathy and help, especially of those who have long waited for some one to occupy this position. We are very grateful for what we have received, knowing well that it has been more than we have deserved. Still, we will promise, during the rest of our lives, to be more generous in our judgment of editors than we have been wont to be, and we trust others will do unto us, as we would do unto them, were they in our place. Believing that The Occident, as now given to the public, will be worthy of an increased number of subscribers and more general interest, because it can now gather more largely from the wide fields of religious intelligence and thought, we move out upon the future with a step more firm and a confidence more established, than we were able to assume six months ago.

HONOR TO CHRIST.

We should yield it to Him. All the ages before us have done it. That religion which is now the most real and imposing among men, is the one which makes the most of Christ. We cannot honor Him too much. "He that honors the Son honors the Father also." We need never be afraid of taking away from the glory of God by yielding all the love, reverence, and worship which our hearts can ever feel, to Jesus, as our Lord, and King, and Redeemer. This, indeed, is what God points out as the way to Him, and the way to enter into His life and enjoy His love. It is indeed the true solution of the problem of the world's sin and the way to escape its curse. In no way is this fact so clearly and so impressively brought to our view as in the ordinance of the Lord's Supper. Then our highest help to understand its meaning and realize its divine power in our souls, and that, too, which our Lord has Himself commanded is, to remember Him.

THE JOY OF DEVOTION.

Dr. Bushnell thus discriminates between happiness and joy: "Happiness is that which *happens*, or comes to one from an outward befalling, or favorable condition; something that stirs a delight in the soul which is not of the soul, or its quality, but from without. But joy differs from this in that, according to its original meaning, it leaps, or springs forth from the fountains *within*. It is not the bliss of condition, but of character, a well-spring of triumphant, sovereign good, which pours out rivers of delight into the deserts of outward experience. It has a light in its own luminous center, where God is, that gilds the darkest nights of external adversity; a music, charming all the stormy discords of outward injury and pain into beats of rhythm and melodies of peace."

Joy, therefore, must spring from the harmony of the faculties, in obedience to the laws they require. The fall of Satan was only from complete subjection to God's will to the control of his own; and the necessary experience was from that of Heaven to that of hell. The fall of Adam was the same with the same sad results. Self-will is at war with the whole order of the Divine Government, and deranges as far as it has influence. Restoration of God to the throne restores the whole order to its natural working, and the result is peace, harmony, joy. This is the joy of angels—they love God, and serve Him; and it shall be the joy of all who are redeemed by grace from the misery of opposition to Him; increasing, as the work of sanctification progresses within them; perfect when they are perfectly restored to the image and spirit of their Lord.

We may appeal to experience for evidence on this point. When are we most happy? What are the really delightful spots in our journey through life? Are they when, wearing the mask and gay attire with which we seek to hide what is within, we play our part in the great drama that honors selfishness? When we are most successful in avoiding obligations and escaping burdens imposed by our Master? Let any one answer who ever bore a cross in the spirit of genuine devotion, or performed a duty at the instance of love to Christ; are they happiest who shun, or they who carry, these symbols of their self-crucifixion? The testimony of every Christian will be, that joy comes in the path of obedience, and increases as we advance. The most delightful moments of life are those in which we come under the inspiration, transient though it may be, of this heavenly spirit by which we seem to be merged in God—our wishes forgotten, our ends out of view, as under the clear light of the Father's face, that beams upon us, our whole souls go out in the question: "What wilt Thou have me to do?" From the low ground of our ordinary attainments, we look up to where that company of Christians who thus live, walk in the glory of their experience, as though it were designed that only that little number shall be so blessed of God. They seem to have risen above the reach of those temptations with which we struggle; above the mists of doubt and sorrow which settle upon us, and we behold them ever in the light, singing and waving the banners in their hands, in perennial bliss! But if we look closely at those banners, we shall see inscribed on one side, in unfading letters, "We are not our own;" and on the other the natural inference from this, "rejoice in the Lord alway!" It is their consecration, their devotion, that occasions their unclouded sky, and songs, and bliss, and were this less complete, they would rapidly descend to these lower grounds. The difference between the most of us and them—a difference that accounts for all the contrast in our experience—is that we will not admit that in which they glory. We must give *all* to our Savior if we would ever be borne up into His smile. The joy thus gained will not be that of indifference—that is unworthy of the name; but of resignation, which is the purest, and perhaps the keenest, that we ever know. It does not spring from necessity, but from confidence, and calms the spirit while it makes us joyous. It does not destroy the natural feelings, but mingles itself in their currents, purifying, intensifying, yet satisfying them all. It is the product of all the graces, acting together upon the heart, yet the result of complete dedication to our rightful Lord.

The Mode of Baptism.

I have shown that purification was the predominant idea of *baptizo* and its cognates in the Greek of the New Testament at the time when our Savior adopted that term to signify an ordinance of His Church; that is to say, when one used *bapt.zo* or *Baptismos*, the hearer replied as if he had said purify, or make clean, the two terms baptism and purification being synonymous. "The Pharisee marveled that our Lord had not first washed (Gr.—*bap-*

tized) himself before dinner." The Lord answered: "Now do ye Pharisees make clean the outside," etc. I now propose to show that ritual purification is the meaning of *baptizo* in the Greek of the New Testament, *independent of mode.* As, at the present time, we say wash, or purify, or make clean, independent of mode, and without signifying the material process, so our Lord, in His reply to the Pharisee, did not refer to mode, either immersion, effusion, or aspersion, but to purification merely. I am of course aware that the inevitable lexicon now comes in, and I am pointed to the meaning of *baptizo* in classic Greek, and am told that it is invariably immerse. I have before me a long list of lexicographers, standard authorities, among whom is Stephens of the seventeenth century, of whom Hallam says: "No one since has improved on his work," and I find that all add to immerse such additional meanings as wash, cleanse, purify, baptize. When and how did he word get these meanings? Or is the learning and scholarship of the world mistaken, and this term, unlike any other, to be tied down with bands inflexible and unbroken, even if, in so doing, it be necessary to submerge the *triclinium* of the ancients in one of the water pots of the Jews, holding two or three firkins—such as a woman might conveniently carry from the well up to the city?

There are two ideas I wish to suggest in this connection:

1st. That in the customary laws which regulate human speech, words take to themselves secondary and figurative meanings, sometimes entirely diverse from the primary. We have to set a *post*, to *post* a letter, and swift as a *post*, all legitimate children by direct descent from their venerable Latin parent *pono*, to place. So, with scarce an exception, with every word that can be mentioned. Is it not possible, then, after all, that the lexicographers of the world are correct in giving cleanse, purify, baptize, as proper significations of *baptizo*, although dip, immerse be its primary meaning?

"It is generally conceded," says Dr. Conant, in a note on *evangeli-on*, "that where it is used in its original, literal sense—*good news*—it should be so translated, and that Gospel should be retained only where the Greek word has taken a *later tropical sense.*"

I think the concession is about as general, if such lexicographers as Stephens, Parsons, and Robinson can be regarded as authorities, that *baptizo* takes on such tropical meanings as bathe, wash, cleanse, baptize, in addition to the literal immerse? I add to cleanse, wash, baptize, because these scholars evidently thought that the term baptize in English stood for a Christian ordinance, not exactly expressed by any of the other terms, but such a tropical sense for *baptizo* as Gospel for *evangeli-on.*

I remark, 2d, that as *baptizo* stands for an ordinance of the Christian Church, as when our Savior says: "He that believeth and is baptized shall be saved;" or Paul; "One Lord, one faith, one baptism;" its meaning cannot be determined by classical that is to say, teacher's Greek, the word must be expanded and exalted far beyond its ordinary heathen idea to take in the mystery of revelation; else, if these Greek terms convey no ideas beyond what they had in classic or heathen usage, what does Christian revelation, or the Gospel itself, indicate or reveal to us beyond the wisdom of the heathen philosophy. *Charites*, the Christian graces, mean something more than the mere personal elegance and blandishments of the heathen, even illustrated by the trio that danced in Chocis responsive to the modulations of Apollo's lute. *Pneuma* means something more than air, wind, breath, or even spiritedness, which is about as high as the word rises in its classic use. It would be awkward rendering to say, "that which is born of wind is wind," or to read, "when the unclean winds entered into the swine, the whole herd ran violently down a steep place into the sea." "Happy are the poor in *wind*" might be encouraging to consumptives, but would hardly convey the idea of Christian revelation. But, leaving all levity behind, *pneuma*, which is translated spirit, and stands for the Holy Comforter, the third person of the Trinity, in such sentences as these: "Then the Spirit said unto Philip;" "The Spirit and the bride say, come;" takes a meaning utterly incomprehensible from any classic or heathen stand-point, and is only to be received in the conception that the Greek language, in the words of Adam Clarke of the English, was craned up from its classic usage to the level of Mount Sinai before it could be made to reveal and express Christian mysteries.

But, thirdly: Many of the ideas of the New Testament were not originally expressed in the Greek language, and their meaning is to be sought, not in the Greek dress in which they are clothed, but in the power of the original Hebrew term, or in the signification of the ordinance in the Jewish economy, which the Greek term stands to represent, and thus the mind of the spirit, expressed in the original Hebrew, passes into its Greek representation, not to be confined or trammeled by the former classic significance of the word, or to have its divine power eliminated from it by its heathen usage, but to elevate the Greek term so that it shall be capable of receiving and expressing the truths of inspiration. I shall therefore confine myself to a consideration of the meaning of *baptizo* as ascertained and derived from the Holy Scriptures themselves, holding that to compare spiritual things with spiritual, and to ascertain the meaning of the terms which express an ordinance, by the character and facts of the ordinance itself, is in the highest degree reasonable. Especially when a Christian sacrament succeeds to a Mosaic ordinance, will it be proper to study the meaning of the terms by which the sacrament is expressed, by the light which is reflected from the forms and usage of the Mosaic institution.

F. B.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Eighth Term of this Institution will commence on Wednesday, July 8th, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

WM. HOLLIS,

Dealer in

Ward's Shirts,

AND MEN'S FURNISHING GOODS

Corner of Market and Third Sts.

N. B.—Shirts Made to Order.

The following works, published by Mason Brothers, New York and Boston, are supplied in California by

H. H. BANCROFT & COMPANY,

San Francisco.

THE LATEST AND BEST OF SCHOOL READERS.

Edwards & Webb's Analytical Series.

ILLUSTRATED BY THOMAS NAST.

First Reader, 28 Cents. Fourth Reader, 90 Cents.
Second Reader, 50 Cents. Fifth Reader, $1.25.
Third Reader, 75 Cents. Sixth Reader, $1.60.
Edwards & Warren's Analytical Speller 25 Cts.

These Readers are COMPLETE IN GRADE, METHOD, MATTER, AND EXECUTION and contain

1. An admirable presentation of the word-method and object-systems of teaching, with a beautiful arrangement of text and illustration.

2. A clear and correct treatise upon the elements of spoken language.

3. Lessons in Phonic Analysis, and exercises for training the organs of speech to the acquirements of a full and distinct articulation.

4. Rules for reading the various classes of selections, and directions for giving due and appropriate expression to every phase of thought and feeling.

5. A most thorough system of Thought Analysis, by which the student is made to observe and appreciate the full sense and scope of each selection.

6. Selections chiefly new. Engaging lessons and stories for younger pupils, and for those more advanced, the best and worthiest specimens of American and foreign literature.

These books are printed from electrotype plates, made from new fonts of clear cut type; the best paper only is used; they are bound in the most durable manner; are sold at the lowest prices, and introduced upon the most favorable terms. Though published less than a year since, they have already been adopted by the Public Schools of New York, Chicago, and many other cities, and are everywhere giving unqualified satisfaction. Specimen pages and circulars sent on application.

A Method for the Piano-forte,

—BY—

WILLIAM MASON AND E. S. HOADLY.

Large quarto volume; illustrated; 240 pages. Price $4.00.

Two editions are published, one with AMERICAN FINGERING, and one with EUROPEAN FINGERING. Purchasers should always state which is wanted.

This work, first published in November, 1867, of which six editions have been called for in rapid succession, has proved to be the most useful, thorough, systematic, and successful text book for instruction upon the Piano-Forte ever published. It is eminently a new method: modern, original, complete. Retaining all that has proved valuable in older works, it adds much that has heretofore never been published, though often tested in private teaching with the best and most successful results. Among the novelties of the work, the ACCENT EXERCISES, introduced by Mr. Mason, are worthy of the attention of every teacher, as presenting unusual advantages of instruction.

The prominent excellences of this book are:

1. Its DEPARTMENTS, theoretical and practical.

2. EXPLANATIONS & DIRECTIONS, such as best teachers give their pupils, and which for accuracy and clearness, have neve been surpassed.

3. THE ART OF FINGERING—best modes of overcoming difficulties.

4. THOROUGHNESS and PERFECTION of Lessons.

5. RECREATIONS AND PIECES, skillfully adapted to the requirements of the pupil, and embracing the most attractive and meritorious compositions.

Dr. Lowell Mason's Music Charts,

FIRST SERIES, THIRTY CHARTS, Price $7.50.
SECOND SERIES, THIRTY CHARTS, Price $7.50.

This work, which every teacher of Vocal Music will find extremely useful and convenient, consists of Charts or Diagrams, each of which is 30 by 42 inches in size, designed as aids in teaching classes the Elements of Music and its Notation. They embrace Exercises, Illustrations, simple Songs and Pieces, such as teachers are accustomed to write on the Blackboard, progressively arranged and printed from mammoth type, which can be easily seen from all parts of a large hall.

Care should be taken to order DR. LOWELL MASON'S MUSIC CHARTS. These Charts cannot be sent by mail.

Apples of Gold in Pictures of Silver.

BY EDWARD ROBERTS.

Price in paper covers, 30 cents each, or $25 a hundred; in board covers, 35 cents each or $30 per hundred.

The New Sunday-School Song Book. Containing treasures old and new, many beautiful Songs, the words as well as music of which are now first published, with the choicest of the old hymns and tunes.

MASON BROTHERS, Publishers,

596 Broadway, New York; 154 Fremont St., Boston.

CURRENT LITERATURE.

RECENT PUBLICATIONS.

DIKES AND DITCHES. By Oliver Optic. Boston: Lee & Shepherd.

This is one of the series called "Young America Abroad," which has been more deservedly popular than any books for young persons with which we have become familiar. The author has peculiar ability to combine interest and profit in his writings, while he is careful to be true to history in those parts of his books which contain references to facts respecting the countries of which he speaks. In this volume he is especially happy in his narrative of the terrible scenes which have made Holland famous, and the youth who reads it can hardly fail to read more in other more extended histories. Indeed, this is a marked effect of all the series; they stimulate and cultivate a love for further reading, and thus have a healthful influence on the taste, while they contribute to the stores of *real knowledge*. Bancroft & Co., San Francisco, have it for sale.

THE OVERLAND MONTHLY. San Francisco: A. Roman & Co.

We have examined this first number of our Pacific Literary Monthly, with more care, and perhaps more critical curiosity, then we have been wont to manifest respecting the most of the Periodicals that come to us, for we confess to a kind of pride in its publication. The result is, that we like it much. On the whole, we would prefer that it should not quite so closely imitate in general appearance the *Atlantic*, though in this respect it could hardly have a better model. And we would prefer that some of the articles were not in it, and that some which are worthy to be in it were not quite so long. Yet the contents are varied and interesting, and high-toned, and the style compares favorably with that of some of our most popular and valuable Magazines. There is no reason, as this specimen number proves, why we may not have a first-class Monthly on this Coast, so far as relates to the talent that may contribute to its pages. We trust the enterprising publishers will receive the liberal patronage of our people.

GOING TO JERICHO. By John Franklin Swift. San Francisco: A. Roman & Co.

It has occurred to us, as it has no doubt to others, that there is danger of vitiating a taste for really solid and reliable history and accounts of travel by the multiplication of books, the object of which is to set off whatever tourists may meet, with the adornments of satire, or ridicule, or exaggeration. These books are popular, and as compared with many others, they are really useful, but it is not a very satisfactory feeling when reading them, that you must take a large portion of what the author says, with allowance for the license he takes of embellishment as may suit his vein. There is some excellent reading in "Going to Jericho." The author's descriptions of scenes and places in Spain, his pictures of what may be found in Cairo and Egypt, his account of his journey to Jerusalem, and of what is there to be seen by the traveler, are particularly fine, and one feels a desire to accept them all as true. Was there any necessity that a writer who exhibits so much talent for description should ever assume a style, and forms of expression, the tendency of which is to shake confidence in what he writes, in order that his book might have interest. We have a kind of admiration for such men as Swift, and Mark Twain; but we always read the productions of their press with a feeling that such genius could enchant us with true pictures, as easily as with those that, in certain features, are overdrawn: could command our gratitude for actual contributions to our profit, as easily as they oblige us to smile at their odd conceits and extravagent statements. Nevertheless, there is less of what must be so characterized in this book, than in others of recent date, and though we wish it was faultless, we can commend it as able sometimes to instruct, sometimes to amuse, sometimes to delight its readers.

LIFE OF GUSTAVUS ADOLPHUS. By Rev. L. W. Heydenreich. Philadelphia: Lutheran Board of Publication. San Francisco: Bancroft & Co.

The object of the author in adding this attractive little volume to all that has been written respecting the great man whose name it bears, is rather to excite the admiration of the young for so noble a Christian character, than to supply a new contribution to history. Hence, he does not dwell on the military career of Gustavus Adolphus, save as he was connected with the thirty years' war in Germany, for the cause of religious liberty. As thus seen, we find enough in him to admire, and the book will be read with profit by Sunday School scholars and others for whom it is especially designed.

LITERARY ITEMS.

NEW STYLE OF PRINTING.—Messrs. Leighton Brothers' new patent process for printing is a very remarkable one, soft type on hard surfaces, *not* hard type on soft surfaces. It can be applied to inner as well as outer surfaces. They can also print on marble, stone, iron, leather, sailcloth; in short what can they not print on, for the types are made out of vulcanized India-rubber, and never wear out.

THERE are in Paris 537 "literary" (*i. e.*, non-political) newspapers, viz: Moral and Religious, 65; Literature, 64; Medical, Surgical, etc., 48; Trade, 59; Fashions, 43; Sciences; 41; Law, 33; Art, 32; Illustrated, 27; Public Offices, 25; Education, 24; Theatres, 15; Agriculture, 13; Finances, 6; Travels, etc., 5; Sundry, 29.

SOMEBODY has counted the number of I's in a late number of M. Alex. Dumas' new paper: there were ninety-two of them. He is accused of asking correspondents to return his letters, and he sells them to dealers in autographs, making $100 or $150 a year by the trade.

THE *Proof Sheet* thus classifies the names of newspapers in the United States: 116 Journals, 95 Gazettes, 79 Republicans, 67 Democrats, 67 Heralds, 56 Times, 48 Sentinels; 48 Unions, 47 Presses, 42 News, 37 Registers, and 34 Couriers.

RECENTLY, the Court circle played "Les Petits Papiers." The question was asked: "Which are your favorite authors?" The French Emperor replied: Tacitus. The French Empress answered: Calderon, Byron, and Shakspeare.

THERE are now being published on the British Islands, six hundred and twenty-one magazines, of which two hundred and nineteen are of a religious character.

THE edition of Frederika Bremer's "Life and Letters," published in England, came from America, having been printed by the Riverside Press.

ROBERT BROWNING has nearly completed an epic poem on an Italian subject, which will be the longest in the English language.

AS many copies of Blackstone's Commentaries have been sold in America as in England.

MISS BRADDON protests in her magazine against the sensational school of prose fiction.

LAURA PRESTON'S new novel, published by Roman & Co., is called "Aldeane."

A NEW Democratic paper is to be published at Virginia City, Nev.

A NEW NOVEL, by Mrs. H. B. Stowe, is announced in London.

Educational.

Critical Attention.

The attention which you learn to pay to others should be critical. One reason is, that your friend may be quizzing you. A foreigner once propounded the question at a dinner party, whether, in that country it was lawful for a man to marry his widow's sister. Legal gentlemen present replied, yes. He then stated that in his own country it was not, because it was considered that, if a man had a *widow*, then he must be dead himself! Another reason for critical attention is, that your friend, in speaking, may be making a slip of the tongue. Thus, if a man should say he was born in 1704 (meaning 1804), and you should not express surprise, he would write you down for only half a listener, when he came to correct himself. A third reason for criticism in listening is, that you may detect whether your friend is indeed using the exact words which you seem to understand. It may easily happen that he is not. Macgregor met a man in Europe who heard with perfect placidity that the tourist and his friend were carrying over the Continent, all for pleasure, two pieces of artillery; which, moreover, were fifteen feet long, but weighed only eighty pounds! The man had mistaken the French for *canoes* for the French for *cannon*. Had we carried two camelopards he probably would not have been astonished." (*Rob Roy Canoe on the Rivers.*) Finally, your friend may be repeating something which he has not duly considered, and which is essentially incredible. By listening closely, you may discover his mistake, and, by your reception of it, prevent his repeating nonsense. C. R. C.

Parental Fault-finding.

Do not be continually finding fault.—It is at times necessary to censure and to punish. But very much may be done by encouraging children when they do well. Be ever more careful to express your *approbation of good conduct than disapprobation of bad.* Nothing can more discourage a child than a spirit of *incessant fault-finding* on the part of its parents. And hardly anything can exert a more injurious influence upon the disposition both of the parent and the child. There are two great motives influencing human action, hope and fear. But who would not prefer to have her child influenced to good conduct by the desire of pleasing, rather than by the fear of offending? If a mother never express her gratification when her children do well, and is always censuring when she sees anything amiss, they are discouraged and unhappy. They feel there is no use in trying to please. Their disposition becomes hardened and soured by this ceaseless fretting. At last, finding that, whether they do well or ill, they are equally found fault with, they relinquish all effort to please, and become heedless of reproaches.

But let a mother approve of a child's conduct whenever she can. Let her show that his behavior makes her sincerely happy. Let her reward him for his efforts to please, by smiles and affection. In this way she will cherish in her child's heart, some of the noblest and most desirable feelings of our nature. She will cultivate in him an amiable disposition under a cheerful spirit. Your child has been during the day very pleasant and obedient. Just before putting him asleep for the night, you take his hand and say, "My son, you have been a very good boy to-day. It makes me very happy to see you so kind and obedient. God loves little children who are dutiful to their parents, and he promises to make them happy." This approbation from his mother is to him a great reward. And when with more than ordinary affectionate tone, you say, "Good night my dear son," he leaves the room with a heart full of feeling. And when he closes his eyes for sleep, he is happy, and resolves that he will always try to do his duty. —*J. S. C. Abbott.*

Personal.

ORATIONS are to be delivered on the Fourth by the following gentlemen: Rev. Dr. McKaig, at Marysville; Rev. Dr. Cox, at Nevada; Judge A. W. Baldwin, at Sacramento; Gen. O. H. Lagrange, at Oakland; Hon. J. W. Dwinelle, at Vallejo; Hon. W. W. Pendegrast, at Santa Rosa; Col. B. C. Whitman, at Gold Hill; J. C. Eastman, Esq., at Downieville; J. W. Coffroth, in Placerville; Rev. E. S. Lippett, at Petaluma.

H. C. BENSON, D.D., is to be editor of the California *Christian Advocate*; Rev. I. Dillon editor of the Oregon *Christian Advocate*; and E. Thomas, D.D., late editor of the former paper, will have charge of the Methodist Depository in San Francisco.

REV. DR. THOMAS, of the First Baptist Church, being prevented, by a trouble of the throat, from attending to his pastoral duties, has been making a trip in the interior, visiting Yosemite and other places of Summer resort.

REV. A. N. FISHER, of the Methodist Church, has been preaching to the Mormons at Salt Lake City. The Apostles and Bishops are said to have been very attentive.

A. S. GOULD ESQ., sailed for the East on June 30th. He goes to the Atlantic States for the purpose of presenting the advantages our State offers to farmers.

REV. JESSE WOOD is coming to California from Alabama. If any community is in want of a preacher of his style, the *Spectator* will reccommend him.

REV. A. L. STONE, D.D., will preach a series of sermons on the Lord's Prayer. The sermon of last Sabbath morning was a preface to the series.

MR. STONE, Principal of the Grammar School at Marysville, will resign his place in that city and accept a position in the Oakland Seminary.

MME. PAREPA ROSA has lately arrived in California, and is giving concerts in this city to large and appreciative audiences.

COL. THOMAS HAYES, a delegate from California to the Democratic Convention, died on June 24th, on shipboard.

GEO. S. EVANS, late Adjutant-General of the State Militia, is engaged in the liquor business in Stockton.

REV. W. I. NICHOLS, of the Central Methodist Church, has returned from a trip in the lower country.

GEN. CROOK has been assigned to the command of the Columbia in the place of Gen. Rosseau.

REV. D. D. CHAPIN is preaching a series of sermons on the Common Prayer in Nevada City.

REV. J. G. FACKLER has returned, much improved in health, from his trip in the country.

MR. LUCKY, Principal of the State Normal School, receives a salary of $275 per month.

NED BUNTLINE is meeting with good success in his efforts in behalf of temperance.

ELDER KNAPP, according to the Tuolumne *News*, will *settle in the valley of Paradise.*

PROF. SIMONTON has been re-engaged as Principal of the high school in Vallejo.

DR. MCCULLOUGH, of Haywood, died very suddenly at his residence last week.

GEN. FRAZER, late of the Southern Army, recently arrived in this city.

GEO. H. ROGERS has been appointed State Guager by Gov. Haight.

J. W. BROWN will enter the field as a temperance lecturer.

PROF. MIEL is about to establish a school in Oakland.

Oxford Bibles.

The superior excellence of the Bibles printed at the Oxford University Press is proverbial among all who prize correctness of the text, and clearness and beauty of typography and binding. The Oxford editions are the standard from which other editions are copied, and are therefore acknowledged as superior.

The Subscribers, who act as

SOLE AGENTS IN THE UNITED STATES

or these Bibles, keep all varieties and sizes, from the 48-mo. to the Folio. They select the following, which they strongly recommend.

THE SUNDAY SCHOOL BIBLE. Printed in clear type and well bound in arabesque - - - - - - - - - 50 cents.

THE PEW BIBLE. Printed in large type and bound in morocco, $2 00; Turkey morocco, $3 00.

THE STUDENT'S BIBLE. Printed on fine paper, in beautiful type, with References and Maps, and an Index to the persons, places, and subjects occurring in the Scriptures. Turkey morocco, - - - - - - - - - - - - $4 00

THE CLERGYMAN'S BIBLE. Printed in large, clear type, with References and Maps, and an Index to the persons, places, and incidents occurring in the Scriptures. Bound in Turkey morocco, - - - - - - - - - - - - $5 00

THE PULPIT BIBLE. Beautifully printed in very large, clear type, demy, 4to. Bound in Turkey morocco, - - - $20 00

THE FAMILY BIBLE. Beautifully printed in large type, containing Family Record, with or without References, Plates, and Maps, in every style of binding, from $17 00 upwards.

THOS. NELSON & SONS,
187 Grand Street, New York.

The prices quoted above are in U. S. Currency, and any of the books will be mailed free on receipt of price.

TERMS—$6, $8, and $10 per month. French, $2.

Pacific Mail Steam Co's Steamships

—FOR—

NEW YORK, JAPAN AND CHINA

Will be Dispatched as follows:

LEAVE WHARF CORNER OF FIRST AND BRANNAN STREETS, at 11 o'clock A.M. of the following dates, for PANAMA connecting via Panama Railroad with one of the Company's splendid Steamers from ASPINWALL for NEW YORK.

On the 6th, 14th, 22d, and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Transatlantic Company's Steamer for St. Nazaire, and English Steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English Steamer for Southampton, South America, and P. R. R. Co.'s Steamer for Central America. Through tickets can be obtained.

Departure of the 6th connects with English Steamer for Australia.

The following Steamships will be dispatched on dates as given below.

STEAMERS FOR JULY, 1868.

July 6th—MONTANA, Captain Cavarly, connecting with HENRY CHAUNCEY, Capt. Grey.
July 14th—CONSTITUTION, Captain Comstock, connecting with OCEAN QUEEN, Capt. King.
June 22d—GOLDEN CITY, Captain Lapidge, connecting with RISING STAR, Capt. Conner.
June 30th—GOLDEN AGE, Capt. Farnsworth, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock.

Through tickets to Liverpool by the "Cunard," "Inman," and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired, an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship NEW YORK, Capt. C. M. Fauntleroy, will be dispatched July 3d, at 12 o'clock, noon, from wharf corner of First and Brannan streets, for YOKOHAMA, connecting with the GREAT REPUBLIC for HONGKONG, and COSTA RICA for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Co.'s Office, corner of Sacramento and Leidesdorff Sts.

OLIVER ELDRIDGE, Agent.

ILLUSTRATION OF DIVIDENDS OF PROFITS

—OF—

United States Life Insurance Comp'y,

NEW YORK.

OFFICE, NO. 40 WALL STREET.

CASH ASSETS EXCEED $2,700,000.

SIXTH TRIENNIAL DIVIDEND.

The Board of Directors have this day declared a Dividend of FORTY PER CENT. for the three years ending at the 4th March, inst., to holders of all Policies then in force, on the whole sum of the annual participating premiums received during the said three years; and an additional Dividend of TWENTY PER CENT. on the whole sum of all previous Dividends and Additions, to holders of such Policies who have fulfilled their engagements with the Company, both Dividends being payable and available in the various modes explained in the Company's Prospectus.

For example, on a policy paying one hundred dollars a year of participating premium, the profits for each year and the total at each year on this system are:

Year.	Yearly.	Total.	Year.	Yearly.	Total.
1	$40 00	$40 00	28	$206 39	$2702 23
2	40 00	80 00	29	206 39	2908 63

PRACTICAL AND SCIENTIFIC.

AGRICULTURAL.

Don't Leave the Farm.

Come, boys, I have something to tell you,
Come near, I would whisper it low—
You are thinking of leaving the homestead,
Don't be in a hurry to go.
The city has many attractions,
But think of the vices and sins,
When once in the vortex of fashion,
How soon the course downward begins.

You talk of the mines of Australia,
They're wealthy in gold without doubt,
But ah! there is gold on the farm, boys,
If only you'll shovel it out.
The mercantile life is a hazard,
The goods are first high and then low,
Better risk the old farm awhile longer,
Don't be in a hurry to go!

The great busy West has inducements,
And so has the busiest mart,
But wealth is not made in a day, boys,
Don't be in a hurry to start!
The bankers and brokers are wealthy,
They take in their thousands or so,
Ah! think of the frauds and deceptions,
Don't be in a hurry to go!

The farm is the safest and surest,
The orchards are loaded to-day,
You're free as the air of the mountains,
And monarch of all you survey.
Better stay on the farm a while longer;
Though profits come in rather slow,
Remember you've nothing to risk, boys,
Don't be in a hurry to go!

Massachusetts Ploughman.

Feeding Fowls Boiled Grain.

In France it is the custom to cook grain given fowls when fattening, boiled in water till it is soft enough to be easily bruised between the thumb and the fingers, and the boiling causes it to swell till the farina splits the enveloping membrane, and this they term bursting. Although it is the general opinion that bursting grain is better than when it is dry for fattening poultry, this opinion has not probably been established on accurate experiments. Be this as it may, it is of no less importance to ascertain whether there is any difference of expense of feeding poultry on raw or boiled grain; that is under similiar circumstances, if fowls eat more or less of one or the other.

In ordea to ascertain this, we had two quarts of corn boiled till well burst, and found that the increase in bulk was over four quarts. Buckwheat is increased in bulk by boiling more than any other grain as two quarts, when well boiled; increased to seven quarts yet it is no benefit to boil buckwheat, for the fowls consumed the seven quarts of the boiled grain nearly in the same time which two quarts of the raw grain would have sufficed them. Many have the impression that it is rather unsubstantial food.

Corn on the other hand, is more profitable when boiled than when given raw, for the fowls, which would have consumed two quarts of the uncooked or raw grain, consumed only three quarts of the boiled grain, which are not equivalent to three pints of raw. Even calculating that they were to consume three quarts a day of the boiled grain, there would be a saving of one-fourth. In very cold weather, it should be fed to the fowls hot, and the water in which it is boiled may be given them to drink.

Barley is also much more economical when boiled than raw, for fowls which would have eaten two quarts of raw a day, ate three quarts of boiled grain. Therefore, as five quarts of boiled barley are produced from two quarts of raw, three pints are equivalent to no more than six-fifths of a pint of the raw; consequently the expense in raw barley is to that of boiled as ten-fifths to six-fifths—that is ten to six—showing a saving of two-fifths by giving boiled instead of raw barley.

Oats, though increased in bulk, by boiling, nearly one-half more than rye, are not rendered more sufficing; for the fowls which in two days would have eaten two quarts of raw oats, consumed in the same time three and a half quarts of the boiled grain; consequently it is no saving to boil the oats.

Fowls prefer raw millet to that which has been boiled, though it would evidently be a saving in other respects to boil it, as boiling increases its bulk one half.

The experiments proved most clearly that in every case where the price of corn and barley render it eligable to feed fowls therewith, there is considerable economy in never giving them grain raw, but well boiled, and there is no saving by boiling oats or buckwheat.—*C. N. Bement.*

Cattle Stalls.

As to stalls, we have seen lately in one neighborhood in the mountain farm regions of Pensylvania, three instances of what appear to be comfortable, common-sense stalls for cattle. The stalls are wide enough to admit of the animals turning in them, the sides closely boarded up, the floor a dais raised seven or eight inches above the passage-way in the rear, with an outward pitch of about three inches in the length of the stall, the entrance of each closed with two leaved folding-doors, opening inwards. There are no rings, stanchions, or any tying or fastening by the head. No animal not absolutely a fool will ever stand head down hill; and always, in every instance, we found the cattle in these stalls standing "right end up," well up to the rack, and as clean and comfortable as animals ever need be.

As all bovine animals have their little itches and inconveniences to attend to as well as ourselves, and would be better for the use of their tongue, with which they can reach nearly every part of their bodies, this freedom of the stall seems to be a very good common-sense arrangement, besides providing comfortable quarters in all cold, stormy weather. The stalls need not be expensive, being all of rough materials, and suffcient opening above the folding doors to afford free ventilation.—*Saturday Evening Post.*

THE ART OF GRINDING TOOLS.—More than one-half of all the wear and tear and breakage and bother of dull tools comes from a lack of proper knowledge and practice in grinding. All steel, however refined, is composed of individual fibers, laid lengthways in the bar, held firmly together by cohesion; and in almost all farm implements of the cutting kind, the steel portion which forms the edge, if from a section of a bar, is laid in and welded to the iron longitudinally, so that it is the side of the bundle of fibres hammered and ground down that forms the edge. Hence by holding on the grind-stone all edge tools as axes, drwing-knives, knives of reapers, scythes, knives of straw-cutters, and so forth, in such a manner that the action of the stone is at right angles with the plain of the edge; or in plainer words, by holding the edge of the tools square across the stone, the direction of the fibers will be changed so to present the ends instead of the side as a cutting edge. By grinding in this manner a finer smoother edge is set, the tool is ground in less time, holds an edge a great deal longer, and is far less liable to "hick out" and break.—*Germantown Telegraph.*

SWELLINGS IN HORSES' FEET.—If the swelling is accompanied with great heat and tension of the parts, and more particularly by cracked heels, then mild aperients and fomentation are a good beginning; but where any flaccidity exists, stimulants and tonics we have found the sovereign remedy. Take of powdered sulphate of iron, one ounce and a half; powdered gentian root two ounces; nitrate of potassa, one ounce; mix and divide into twelve powders, and give one night and morning, mixed with cut or soft feed, with no more water in the feed than will keep the particles together. Feed the animal generously and well, and give a little exercise daily.—*Prairie Farmer.*

A WORD TO FARMERS.—We have already spoken on several occasions of the excessive rain fall of the last two seasons, and particularly of the remarkable season just ended. We have shown by the meteorological tables compiled for this coast, that an excess of rain, in two successive seasons has been invariably followed by one or more of drought. The experience of the past eighteen years warns farmers and ranchmen generally to look ahead and prepare for one if not two dry seasons. Remembering the terrible cost to the State, and the overwhelming loss to many stock proprietors of the last drouth, it would be reckless foolhardiness in those who have live stock, to make no provision against a recurrence of the disasters of 1563 '64–'65. A straw stack will cost little, and may be worth much before eighteen months pass over our heads.—*Bulletin.*

WAGON TIRES.—A newspaper writer says his wagon tires "wear out before they get loose," and the reason is, he saturates the felloes thoroughly with linseed oil before the tires are set, The feloes are placed in hot oil for about one hour, and are thus rendered water-proof, so that the shrinking and swelling that loosen the tire are prevented.

A CORRESPONDENT sends us a receipt for an *adhesive* wash for fences and out-houses, viz: put half a pound of tallow or lard into one gallon of slacked lime, and apply it while warm. The utility of adding tallow must be obvious to all minds, viz: to *penetrate* the wood, and to *shed* the rain without destroying the wash.

THE HOOF OF A GOOD COW.—A correspondent of the *Rural American* says; "For a good cow choose one with a striped hoof; she will never fail. A cow with dark hoofs may be good for a large quantity of milk, but it will not be rich. For a medium cow choose one with a part of the hoof striped or any other except dark."

SMALL FARMS.—In England there are many farmers who more than support themselves and large families on the product of six acres, besides paying heavy rents. Agriculturists in Germany, who are proprietors of five acres, support themselves on two, and lay up money on the remainder.—*Independent.*

MINING.

Quartz-Mining as a Business.

Failures in quartz-mining are so frequent, that many intelligent men who have travelled through the State have left us with an impression that no prudent business man should engage in it. Occasional success, no matter how brilliant, is not enough to make the occupation a proper one for men generally. Those who command large capital, and can afford to lose the expense of opening a mine and building a mill, are comparatively rare; and, if the quartz-mining of the future should be no better than that of the past, and if all should manage the business hereafter as the majority have managed it heretofore, then none save very wealthy men should engage in it. We presume that there would be no exaggeration in saying that three-fourths of the quartz-mills have been unprofitable, and fully half have caused serious losses to their owners.

But after admitting all that can be truly said against quartz-mining, we still claim that it is one of the best occupations in the world, and that it is capable of immense development. It needs, however, to be conducted on the proper principles; otherwise it is extremely dangerous. More than any other business it needs a well-educated and able manager, who understands everything about a lode and a mill. It is not enough to have a diploma as Mining Engineer; in addition to the training of the school, he needs experience in the neighborhood, and, if possible, in the very mine where he is to work. General knowledge of geology is of very little use; and proficiency in Latin and Greek of none at all. If the miners come to a fault, and the quartz to a sudden end, the Superintendent should know in which way the vein has been thrown, and how to find it. He must know at a glance whether the proper quantities of water and quicksilver are used in the mortar. He must keep himself thoroughly familiar with everything about

the work below-ground as well as above. Such a Superintendent, who should himself be interested in the mine, is the first requirement for safe quartz-mining. Many mines have succeeded without it, but twice as many might have succeeded with it.

The capable Superintendent having been found, he will be very careful about spending the money entrusted to him. He will not presume that every quartz vein contains gold; nor that a vein which is suriferous in another claim is rich in his; nor that the occurrence of a rich specimen is a proof of a large deposit of day rock. He will satisfy himself that he has found a pay chute before incurring much expense, and if he finds no gold at the surface he will be skeptical about finding it farther down; until he finds it he will tell his associates that the safe method of procedure is not to build a mill till there is enough good quartz in sight to leave a net profit sufficient to pay for it. There are, we doubt not, thousands of quartz claims in California that will pay on these principles, but they have not been properly examined because the multitude of failures have discouraged their owners. It is almost as dangerous to engage in quartz mining as in the higher branches of chemical manufactures without proper knowledge, but with that, the prizes offered are splendid in both occupations.—*Alta.*

OUR ARGENTIFEROUS MINES.—Rev. A. F. White, State Geologist, who is accompanying Clarence Kings's U. S. surveying party up the Humboldt River, gives the following very interesting sketch of the Montezuma Smelting Works at Oreana, to the Carson *Appeal*. The argentiferous mines of this State, will, in a very few years, be a source of vast wealth to the lucky owners:

UNIONVILLE, June 10th, 1868.

EDITOR APPEAL: After mailing my letter on the 25th of May, I had an opportunity of ascertaining more accurately the character and capacity of the "Montezuma Smelting Works" in Oreana. This establishment was built and is owned by a New York Company. From twelve to thirteen tons of ore are smelted daily, which yields about seventy-two dollars in silver per ton, in addition to thirty per cent. of lead, and twenty-five per cent. of antimony, making in the aggregate about eleven hundred pounds of metal per ton. The calcining process separates the antimony. The silver and lead are separated by cupelling; the lead is in the form of litherage, and is pure, less ten per cent. The silver is from 9.97 to 9.98. The engine for calcining pans consumes about $80 worth of sage brush per day. The smelting and blast furnaces consume about three hundred bushels of charcoal in the same length of time. About one cord of nut pine is required for refining purposes. The average daily cost of fuel is about $287. The charcoal is made from the nut pine, obtained from the first range of mountains east of Unionville, about thirty or thirty-five miles from Oreana. There is a battery and five stamps connected with the works for crushing ore when it may be necessary. Twenty-five men are employed in the mill, and from two to ten in the mine, as occasion may demand. The cost of mining and delivering the ore at the works, is about four dollars per ton; the cost of smelting, twenty dollars; of calcining, nineteen, and of refining, twenty-eight dollars per ton. Mr. A. W. Mason is the Superintendent. I have given these particulars in this instance to show under what disadvantages the mines in this region are worked. The necessity of a railroad connection with the wooded parts of the Sierras is apparent. The supply of the nut pine is limited, and in a few years must be entirely exhausted. Even the sage, so universally prevalent, must sooner or later disappear before the consuming fires necessary to work the large number of mines which are already known to exist in these mountains. For engine and calcining purposes it is invaluable. It is gathered green, and thrown into the furnaces with a pitchfork, and makes a quick, hot fire, hotter than that produced by almost any other fuel to be had here. A. F. WHITE.

NEW placer diggings have been struck at the head-waters of Burnt River.—*Owyhee Avalanche.*

A VALUABLE INVENTION.—Mr. Frank Thayer, engineer at the Savage works, a gentleman from whose fertile brain have emanated more useful and practical mining inventions than all others put together have ever imagined, has just added to the list of his ingenious contrivances a self-acting gate, which closes the approach to such compartments of a mining shaft as it may be fixed upon. The gate is made of wood, and is strengthened with light straps of iron. At either side it fits into groves, in which it moves up and down. Every year a number of men have been killed in our mines by pushing cars into shafts when no cage was up to receive them, hence the necessity for the self-acting guard gate. When it is used a car cannot be pushed into a shaft. When the cage is in place ready to receive the car, the gate is always open and always shut when the cage is down. The gate is lifted up by the top of the cage frame as it passes up, and let down and left across the track leading to the compartment as the cage descends. Workmen may be absent-minded, but the gate never forgets its place. The new gates are now in operation at the Savage works. They cost but a trifle, and should be used in all the levels as well as upon the surface. They are extremel simple and not liable to get out of order.—*Virginia Enterprise.*

OCCIDENTAL MINE.—The Occidental Company have let a contract for the running of a tunnel 1,000 feet in length, starting at a point in a ravine several hundred feet below the dump at the mouth of their present tunnel. Six stout, practical miners have taken the contract, and will push it ahead day and night. The level of this tunnel, when completed to a point under the highest croppings, will be 1,300 feet below the surface and 400 feet below the present lowest level in the mine. A first-class mill will be built at the mouth of the tunnel, and the ore will be brought on cars from the mine to the batteries, thus saving much handling and all the usual expense of hoisting. An abundance of water for use in and about the reduction works will flow from the new tunnel—by cutting through the clay of the east wall nearly enough water can at any time be obtained to run a water-mill. The Occidental is one of the most promising outside mines in the State.—*Gold Hill News.*

THE news from the mines of Jackson County is of the most encouraging character, and, on the whole, entirely eclipses any other mining section in Oregon. New quartz ledges are being opened and the results from the crushing are of the most encouraging character, while the old ledges are paying handsomely. New placer diggings are also being daily opened with the most satisfactory results, while the old placer claims along the creek, and benches are yielding almost fabulous wealth. Many of the old miners are returning from the North bringing with them accessions from the upper country, and the prospects are that the gold yield of Southern Oregon will be greater this year than was ever realized before.—*Columbia Press.*

STRUCK IT AT LAST.—A miner named Samuel Strong, who has resided in Clarkesville off and on for fifteen years, and has been to the mines of Peru, Fraser River, Washoe and Arizona, but always found his way back to Clarkesville, struck a rich quartz ledge not long since, and in a short time took out of decayed quartz $8,000. Concluding he had got enough he gave away his claim, which is situated in Marble Valley, to two men named Taylor and McCarthy, and then left for his home in the East.—*Folsom Telegraph.*

A SPECULATION.—The Elmonton claims, located near the North Star Company's mine, were lately sold to the latter company for the sum of $30,000. These claims were one thousand feet in extent, and very little work has ever been done on them. The whole cost of the Edmonton claims to those who recently sold them, would not foot up to over eight hundred dollars.—*Grass Valley Union.*

A CHISPA valued at $800 was picked up by a Mr. Moore, near the town of Hornitos, last week.

CARR, MINER & HARRIMAN cleaned up at their claim at Gold Run, after a run of ten days and nights, $2,365. The Company uses three hundred and twenty-five inches of water and three pipes, and work three men on each shift, and have a pressure of of one hundred and fifty feet.—*Dutch Flat Enquirer.*

THE miners about Iowa Hill are reported to be taking out more money than for several seasons past. The great drawback now, as it always has been, is the want of water; with a good supply of water, Iowa Hill would be one of the most flourishing mining camps in the country.—*Dutch Flat Enquirer.*

UNUSUAL activity prevails along the Frazer River this year among the miners, and reports speak favorably so far of the results. One of the most rediculous ideas that could prevail, is that of the Frazer and its immediate banks, bars, and benches being worked out.—*Victoria Colonist.*

WE learn that the claim of Mr. O. Harkness, situated in Cañon Creek, cleaned up a short time since after a run of seventeen days and nights, $1,700. The claim employs ten men, five on a shift, and uses five hundred and fifty inches of water.—*Dutch Flat Enquirer.*

IT is rumored that a new strike has been made on Leech River. A number of large pieces of gold has been brought to Victoria.—*Victoria Colonist.*

THE proceeds of 26 working days' labor of six men in the El Dorado South mine, near Silver Bend, during May, was $24,513.

ROCK CREEK is paying eight to twelve dollars per day to the hand, and the claims are hardly opened.—*Sweetwater Mines.*

THE Nehalem coal mines in Benton County, Oregon, are said to be prospecting very rich and flattering.—*Columbia Press.*

A VERY valuable vein of anthracite coal has been found on Queen Charlotte's Island, British Columbia.—*Victoria Colonist.*

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

Also, SCHOOL FURNITURE.

WARREN HOLT,
305 Montgomery Street.

GENERAL SELECTIONS.

God's Anvil.

Pain's furnace-heat within me quivers,
God's breath upon the flame doth blow,
And all my heart in anguish shivers,
And trembles at the fiery glow;
And yet I whisper—as God will!
And in His hottest fire hold still.

He comes and lays my heart, all heated,
On the hard anvil, minded so
Into His own fair shape to beat it
With His great hammer, blow on blow;
And yet I whisper—as God will!
And at his heaviest blows, hold still.

He takes my softened heart and beats it;
The sparks fly off at every blow;
He turns it o'er and o'er and heats it,
And lets it cool, and makes it glow;
And yet I whisper—as God will!
And, in His mighty hand, hold still.

Why should I murmur! for the sorrow
Thus only longer lived would be;
Its end may come and will to-morrow,
When God has done his work in me;
So I say, trusting—as God will!
And, trusting to the end, hold still.

He kindles for my profit purely,
Affliction's glowing, fiery brand,
And all His heaviest blows are surely
Inflicted by a Master hand;
So I say praying—as God will!
And hope in him, and suffer still.

Julius Sturm.

Cæsar and Christ.

He who appeared as the poor peasant of Galilee, destitute of worldly goods, the meek and lowly man, who resisted no violence, who, on the only occasion when a sword was drawn in his defense, ordered it to be put up, proves to have been the only man, who in respect to the authority established by him, is worthy to be mentioned on an equality with Cæsar. Such a fact is itself enough to enlist admiring attention. But it is far from being all that a view merely historical of the kingdom of Christ presents. That kingdom has transcended the boundaries of Cæsar's empire on every side, and established its conquests to greater extent than his, in continents to him unknown; and is now in still increasing strength and activity, when his exists only in fragments. Taking its rise near the beginning of the imperial history, the kingdom of Christ immediately employed all the facilities then existing, and turned the great civil power to its greater purposes. Under obloquy and persecution it made its way through the hearts and convictions of individual men and women to preponderating weight in society, and ere three hundred years had elapsed from the ignominious death of its founder, had conquered the imperial force of Cæsar and set up its own candidate on his throne. In succeeding times it clothed itself with the authority of empire, and when the civil government fell apart, maintained its own organization, which it threw around the nations who invaded its jurisdiction, proving to be more powerful and more enduring than the greatest civil and military structure ever erected by man. What the Mediterranean sea was to the empire of Cæsar the ocean has now become to that of Christ. Cæsar's empire exercised its power *over* men, that of Christ *in* men. The one was a coarse and violent movement, operating upon human motives from the outward; the other, a delicate pressure upon a spring of human action affecting the whole purpose of man's life for time and eternity. One secures allegiance by compelling the subject; the other makes him willing, and leads him in bonds of rejoicing, whole-hearted obedience.

Comparing them only in view of external effects, and estimating them both as men, the founder of the empire must yield to the reputed son of the carpenter; victorious arms and iron legislation to the rule of love and faith, resting upon the person of Jesus of Nazareth. This cannot be set aside as a disputable dogma. It is history, simple fact, living before our eyes. Neither can its peculiar character be explained away by any analogies attempted to be set up between it and Buddhism, Brahminism, or any other heathenism; for reasons already mentioned, as well as for the higher reason, that heathen religions evince an inability to keep pace with the human mind where it enjoys facilities for development, and always become obsolete as intelligence increases; while the religion of Christ has not only unfolded greater power, as it has been more thoroughly studied, but has lifted up society, and science, and arts, and letters, and government along with it, to a higher standard in a style of culture proper to itself. In all departments of intellectual effort, it is not merely that Christianity is the religion of the superior notions, but that the great moral feature of their superiority is Christian. And where the teaching of Christ is observed the most purely, the style of culture is the most beautiful and elevated. Often as brute force has been obtruded upon it as an ally, its only real progress has been made by the force of reasonable conviction, taking hold of the gentler affections. For no heathen religion can this be plead. Nor is the case of Mohammedanism parallel. For its religious strength, as far as it goes, is due to the teaching of Christ. And in propagating his system, Mohammed constituted himself a Cæsar, on a narrower scale, and used the imperial argument of the sword. There is positively, in history, no case parallel to that of the kingdom of Christ; and nothing brings out its singularity, in this respect, more distinctly and forcibly than a comparison of its history with that of the greatest temporal power that the world has ever known. The progress of Christianity cannot be called miraculous, because it has proceeded by a regularly organized system of means, but is a wonderful and unparalleled work on the earth, more broadly and overwhelmingly expressive of supernatural power than was any miracle wrought by Jesus when on earth.

Nor, viewed from this standpoint, is the success of Christianity in moulding or restraining the opinions of the civilized world the most extraordinary thing about it. To denounce all men as by nature vile sinners seems a very unlikely way of winning favor with them; to assure them that unless they give up all their most cherished likings, and become changed in the very spirit of their lives, they cannot be disciples of Christ. It is a kingdom which has not made progress by courting popular wishes. Its mystery of might is a superhuman manifestation of holiness, justice, and love to the world, and impressed upon the individual heart.

Cæsar showed no concern for the well-being of mankind. Men received his favor or vengeance as they subserved or resisted his designs. To harass the people of Gaul, and to pamper the licentious tastes of the Roman populace were equally prompted by motives regardless of the welfare of others, and terminating in himself. Christ was tender of the interests and affections of men, and for them freely sacrificed his own. His purpose in establishing his kingdom was not to make himself greater, but to make men purer and happier. As compared with that of Cæsar, his motive was godlike. Cæsar operated on the principle of self-aggrandizement, Christ on that of self-denial. Cæsar employed force; Christ, love. The one compelled, the other attracts. And yet when Cæsar attempted to attract, he appealed, without scruple, to all desires, even the basest. He was ready to court all kinds of people in the way that pleased them; and in so doing was not worse than other ambitious worldly men. Christ was most discriminating as to the way in which people were attracted to him. He required his followers to deny themselves and to love him supremely He never countenanced a mere admiration of his character and works; a hollow popularity he expressly rejected; and none who indulged in any vice could be retained as his disciple.

To outside observation there is something strangely contradictory in the inverse ratio of the results. Why is it that the finely discriminating Christ has had more and more devoted followers than the broadly popular Cæsar? Why is it that, in a grossly sinful world, Christ's principle of heart-holiness has prevailed over Cæsar's easy promiscuous indulgence; that Christ by self-denial has established a wider and more durable kingdom than Cæsar succeeded in erecting by the most successful ambition; and that Christ's kingdom, which is not of this world, has taken a stronger hold upon the world than that of Cæsar, which was altogether worldly? The dominion of Cæsar wrought a great change upon the relations of government, but only slightly and superficially affected the character of the individual; Christ's power begins with a radical change in the individual, and works outwardly to a corresponding change upon government and the face of society. Cæsar's work was external and mechanical; Christ's internal and vital. The one is like the builder of a masterly machine; the other like the operation of nature. There is a singular impression of Godhead made upon us, when we contemplate the historical Christ, from the human side, and in comparison with the greatest of men, unenlightened by His teaching.—*Old Roman World, in the Biblical Repertory.*

The Red Sea.

The camels and supplies having been inspected and sent on in advance, to go around the head of the Red Sea, we left Cairo by rail on the first day of March, to join the animals and make up our little caravan. From the centre of the great belt of verdure bordering the Nile, the railroad first takes a northeasterly direction obliquely out of the green, and then an easterly course to the Isthmus of Suez. We passed the gardens through which we had previously rode to Heliopolis, the *On* of the Scripture, and that place itself, so interestingly associated with the history of Joseph, who, as a young man, is so justly regarded the Adonis of the East. We passed also the traditional place where Mary, the mother of Jesus, and Joseph are said to have stopped, when with the Holy Child they fled to Egypt from the wrath of King Herod. For a time in our course all was green and beautiful, but, as we proceeded, the foliage gradually became less luxuriant. Soon there appeared what seemed to be peninsulas of verdure with bays of sand making up behind them. Then, on the right side and on the left, we beheld a vast ocean of sand; the desert extended everywhere to the horizon. A range of black and purplish mountains in a short time rose to view on the south, till at length, passing them on the north, we came down on the Gulf of Suez. On this route of a hundred and twenty miles there are two railroad stations, decorated with green, and furnishing a few material supplies for travelers, but all besides is an expanse of sand and gravel, not loose and shifting, but hard, compacted, and apparently boundless.

Suez, chiefly an Arab village of twelve or fifteen hundred people, is insignificant and uninteresting in itself, but it has a mighty reminiscence, and is important as located at a main point of transit for the products of the Eastern and Western worlds. English and French enterprise has imparted the life it possesses. Whether the great Lesseps Canal, proposing to unite the Red Sea with the Mediteranean, for the purposes of ship commerce, will prove a success is not yet decided. The work is in vigorous progress. Suez has undying celebrity for the emancipation of the Israelites from slavery, and their national independence achieved here. Here the military power of Egypt was vanquished, its king destroyed, and a nation of two millions and a half advanced to liberty. We crossed the arm of the sea in a boat with good Arab rowers, passed up the eastern bank and stood on the shore of deliverance.

In regard to the exact place of Israel's crossing, the decisions of critical investigators are divided between the locality at Suez, now considerably changed by the drifting in of sand for ages, and another, a few miles further down the Gulf, at the opening of Wady Tawarik, through the hills where a wider reach of sea must have been crossed. The main objection urged against the latter place is the difficulty of so large a company passing over the space of eight or ten miles in a night. Doubtless the difficulty of crossing at either place must have been great, and at the latter, greater than at the former. But Jehovah's power was also great, and was exerted and limited only by the dictates of His wisdom and love. His plan was declared to be to make Himself known; to assert His power, truth, and love to Israel, Egypt, and the rest of the world; and if crossing eight miles of sea in twelve hours would, in His view, accomplish this end more effectually than to cross four, or two miles in that time, He could find ways and means to achieve it. If the Lord

could trouble the Egyptian hosts and take off their chariot wheels, so that they drove them heavily, He could also encourage the escaping crowd in their flight, and to their speed lend wings. Here would seem to be the true Horatian "*dignus vindici nodus*," an exigency demanding the conspicuous interposition of the Almighty. And it is difficult to see why a capable miracle in manifestation of the grandeur and power of Jehovah would not be as rational as the least possible energy He could exert and get the frightened fugitives up the eastern slope of the Gulf.

Standing on the Arabian shore, at the sites above and below, and considering the various forces, Israelitish, Egyptian, and Supernal, in action there, I saw no reason why the people should not have crossed below, at the point nearest the wells of Moses. Still, doubtless, they may have crossed above; and whether it were above or below, *there*, substantially, the grand event transpired. Forth from these waters they came in triumph. Upon this broad, hard plain the panting hosts stood, and breathed freely again after the hot pursuit. Here, with the bodies of the cruel foe floating in the waves before them, and strewed dead along the shore, they lifted up the song of triumph, the voices of men, women, and children joining in choral and responsive strains: "I will sing unto the Lord, for He hath triumphed gloriously. The horse and his rider He hath cast into the sea."

It was elevating to stand at such a point and take in the spirit of the scene. I read again the narrative, and recalled the entire series of events that culminated here, and could not fail to recognize it as one of the grand historic places of the world. The details as given were of peculiar interest—the fright of the fugitive host when the Egyptian army came upon them; the complete *cul de sac*, into which they were driven; the regretful looking-back of the people towards Egypt; Moses standing in God's great power and calling on His name; the pillar of cloud changing from front to rear as a separating guard, and the order to go forward; the sea miraculously opening, and the waters standing on either side as a wall; the immense train moving onward—the foe in pursuit—entering the wonderful pathway; an order from Moses' lips, and the return of the sea in its strength; the utter destruction of the enemy, and the song of triumph from the enfranchised millions on the desolate, but friendly shore. This very sea before me was God's instrument in the grand act of national justice; those heavens and that range of purple hills beheld the transaction, and on this strand the singers struck the cymbal and shouted forth the song of victory.—*From the Arabian Desert, in Congregationalist Review.*

Our facilities as Real Estate Agents will enable us to furnish reliable information to our customers, and they may depend upon receiving from us thorough and careful attention to their business.

FAMILY READING.

Evening Meditations.

The twilight falls, the night is near,
I fold my work away,
And kneel to One who bends to hear
The story of the day.

The old, old story! yet I kneel
To tell it at Thy call,
And cares grow lighter as I feel
That Jesus knows them all.

Yes, all! The morning and the night,
The joy, the grief, the loss,
The roughened path, the sunbeam bright,
The hourly thorn and cross.

Thou knowest all—I lean my head;
My weary eyelids close;
Content and glad awhile to tread
This path, since Jesus knows!

And he has loved me! All my heart
With answering love is stirred.
And every anguished pain and smart
Finds healing in the word.

So here I lay me down to rest,
As nightly shadows fall,
And lean, confiding, on His breast
Who knows and pities all.

An Incident in the West.

"Music hath charms to soothe the savage breast."

Some years since, a temperance man moved with his family from South Carolina to the West. The sparseness of the population and the continual travel past the place, rendered it a necessary act of humanity in him frequently to entertain travelers who could get no further. Owing to the frequency of these calls, he resolved to enlarge his house and put up the usual sign.

Soon after this an election came on; the triumphant party felt that it was a wonderful victory, and some "young bloods" of the majority determined, in honor of it, to have a regular "blow-out." Accordingly, mounted on their fine prairie horses, they started on a long ride.

Every tavern was visited on their route, and the variety of liquor thus drank produced a mixture which added greatly to the noise and boisterousness of the company. In this condition they came—a dozen in number—to our quiet temperance tavern. The landlord and lady were absent—the oldest daughter, fourteen years of age, and five younger children were alone in the house.

These gentlemen (for they called themselves such) called for liquor.

"We keep none," was the modest reply of the young girl.

"What do you keep tavern for, then?"

"For the accommodation of travelers."

"Well, then, accommodate us with something to drink."

"You will see, sir, by the sign, that we keep a temperance tavern."

"A temperance tavern! (Here the children clustered around their sister.) Give me an axe, and I'll cut down the sign."

"You'll find an axe at the wood-pile, sir."

Here the party, each with an oath, made a rush to the wood-pile, exclaiming:

"Down with the sign! Down with the sign!"

But the leader in going out discovered an elegant piano in an adjoining room.

"Who makes this thing speak?" said he.

"I play sometimes," said she, in a quiet, modest manner.

"You do? Give us a tune."

"Certainly, sir."

And seating herself at the instrument, while the children formed a circle close to her, she sang and played "The Old Arm Chair."

Some of them had never heard a piano before; others had not heard one for years. The tumult soon hushed; the whip and spur gentlemen were drawn back from the wood-pile and formed a circle outside the children.

The leader again spoke.

"Will you be so kind as to favor us with another song?"

Another was played, and the children becoming reassured, some of them joined their sweet voices with their sister's.

One would touch the sympathies of the strangers, another melt them in grief; one would arouse their patriotism, another their chivalry and benevolence; until at length, ashamed to ask for more, they each made a low bow, thanked her, wished her good afternoon, and left as quietly as if they had been to a funeral.

Months after this occurrence, the father, in traveling, stopped at a village where a gentleman accosted him:

"Are you Col. P——, of S——."

"I am."

"Well, sir, I was spokesman of the party who so grossly insulted your innocent family, threatened to cut down your sign, and spoke so rudely to your children. You have just cause to be proud of your daughter, sir. Her noble bearing and fearless courage were remarkable in one so young and unprotected. Can you pardon me, sir? I feel that I can never forgive myself."—*Religious Herald.*

The Rejected Pills.

In a certain town, the board of select men who governed its local affairs was composed of Universalists (or men who contended for the final happiness of all mankind, whether Christians or not) and a pious physician. They acted through the year in great harmony as to the business of the town, but at their last meeting it was determined to attack the religious doctor. After they had finished their transactions, one of them said:

"Doctor, we have been very happy in being associated with you the year past, and that the business of the town has been conducted in perfect harmony, and to the satisfaction of our constituents. We have found you to be a man of good sense, extensive information, unbending integrity, and of the purest benevolence. It is astonishing to us that a man of your amiable character should believe in the doctrine of future punishment."

The doctor replied:

"Gentlemen, I should regret very much the forfeiture of the good opinion which your partiality has led you to entertain of me. Will you have the goodness to answer a few questions? Do *you* believe in a future state?"

They replied:

"We do."

"You believe that death will introduce all men to a state of perfect happiness?"

"Of this we have no doubt."

"Are you *now* happy?"

"We are not; we are far from it."

"How do men act when they are unhappy, and know that happiness is within their reach?"

"They endeavor to attain that happiness."

"Do you believe that I understand the nature and operation of medicine?"

"We have no doubt, doctor, of your skill in your profession; but what has that to do with the subject?"

"In this box," said the doctor, taking a tin box in his hand, "are pills, which, if you swallow each of you one, will, without pain, carry you, within one hour, out of this world of trouble, and, if your doctrine be true, place you in a world of perfect felicity. Will you accept one of them?"

"No, sir."

"Will *you*?"

"No, sir?"

When they all refused, the doctor said:

"You must excuse me, gentlemen, from believing your doctrine until I have better evidence that you *believe it yourselves.*"

This closed the debate.—*Congregationalist.*

Lost Time.

Let any man pass an evening in vacant idleness, or even in reading some silly tale, and compare the state of his mind when he goes to sleep, or gets up next morning, with its state some other day, when he has spent a few hours going through the proofs, by facts and reasoning, of some of the great doctrines in natural science, learning truths wholly new to him, and satisfying himself by careful examination of the grounds on which known truths rest, so as to be not only acquainted with the doctrines themselves, but able to show why he believes them, and to prove before others that they are true, and he will find great difference between looking back upon time unprofitably wasted, and time spent in self-improvement. He will feel in one case listless and dissatisfied; in the other, comfortable and happy. In the one case, if he did not appear to himself humble, at least he will not have earned any claims to his own respect; in the other case, he will enjoy a proud consciousness of having by his own exertions become a wiser, and, therefore, a more exalted nature.—*Brougham.*

Young Folks.

True Courage.

"Yes, and if it had not been for Charlie's bravery, the child must certainly have been run over," said a young fellow, as he finished an exciting description of the saving of a little child by a schoolmate, Charley Reed.

"Ha, ha!" tauntingly replied Will Richards, "Ha, ha! to say that Charley Reed had any courage in him. Why, the smallest boy in the school is a match for him in bravery. In fact I don't believe it. I'm afraid some friend of Charley's has manufactured this story, Graham, for I doubt very much if the young gentleman would have imperilled his precious body for any amount of children."

"What! do you doubt my word when I tell you I saw it myself?"

Will Richards was the acknowledged chief of Ivansville school, and as such often bullied over many of the smaller scholars who dared to contend with him; but he had never before slighted Tom Graham, and he inwardly dreaded and feared him.

"Well," he replied, "the amount of bravery said to have been displayed by Charley, and your undoubted preference for him lately as a scholar—"

"No," cried Tom, "it is your mean prejudice and petty hatred against Charley, and against every boy in the school who is unable to cope with your strength, that makes you distrust anything said in their favor. But if I was Charley Reed—"

"What would you do?" interrupted Richards, in a style of braggadocio that Tom could not stand, and which greatly excited him.

"Do?—I would teach you a lesson that you would remember," he replied, stepping forward towards Richards, who involuntarily retreated a few steps.

"Don't, Graham; don't raise a disturbance, Tom," pleaded a voice by his side, and as Graham looked around, he beheld little Charley. "Don't create a row, Tom, especially for my sake, for I know it's all about me."

"I will not Charley, but he shall not repeat such a falsehood in my presence again," said Tom, as he reluctantly turned away, at the solicitation of Charley.

When the boys reached the school, and were seated at their studies, Graham lifted the lid of his desk and beheld an unsealed note lying on the top of his books. He picked it up carelessly and read:

"MR. GRAHAM:—As you have appointed yourself the champion of the wrongs of Mr. Reed, and the other younger scholars of the school, and as I deny you that distinction, you cannot refuse asserting your superiority over myself on Wardon's field tomorrow afternoon at three. W. R."

"So, indeed, Richards intends this as a challenge to fight him," mused Tom, as he folded the little note up; for, although signed with initials, the writing was evidently Richards'. "Well, he will repent it," he coolly added, placing the note in the corner of his little desk.

School went on as usual, and immediately after dismissal, Tom sought Charley, and with him strolled towards Ivansville; while Richards and his companions laughed and joked at their expense around the school-house till nearly dark. Richards, who had kept up his courage by repeated braggings, and loud denunciations of Graham, was informing every one

of the challenge he had sent him, questioning them all as to whether they thought Tom would accept it or not. The majority seemed to think Graham would not disgrace himself by such a proceeding. But Tom, himself, thought differently.

"Charley," he said, as they walked along the bank of the little river, "I have a wish that you would accompany me to-morrow afternoon."

"Where?" asked Charley, in astonishment, for it was very seldom that the boys of the upper divisions of the school condescended to go with any of the lower class boys; and especially Tom Graham, whom the boys of Charley's form (which was the lowest) thought the grandest fellow in the school, though they dared not say so on account of the rivalry of Richards. Not that Tom thought it belittling himself to walk with the younger scholars, but rather because of his natural reticence and preference for being alone.

Tom hesitated when asked the question, but almost immediately answered:

"Well, Charley, as you are the only scholar who does not know by this time, I will tell you that I wish you to see me thrash Richards."

"Why, Tom, he did not mention fighting, and he is so strong."

"Never mind his strength, Charley; I am confident I can whip him, and intend doing so to-morrow. He sent me a challenge, requesting my presence on Wardon's field, and I have accepted it."

"I hope it will not come to fighting, Tom, are you determined to go there to-morrow?"

"I am; except that he makes an apology to both you and me before that time."

"Oh, I don't want any, if he would only let me alone, and not encourage the other boys to annoy me. They were even to-day mimicking me about that poor child I was so fortunate as to save yesterday."

"Indeed!"

Tom Graham was seldom angry, and he now struggled to keep down his rage. He was the only one who had mentioned the story of the saving of the child, and he felt this as a direct insult to his veracity.

They had now reached a road where they parted, Tom going on a little way, and Charley running along the lane to his home. He was very sorry Graham had become complicated in a quarrel with Richards, and hoped that something would occur to prevent it. He determined, as the next day was the weekly holiday, to endeavor to have some boys interfere and stop it, and for this purpose resolved to accompany them during the morning.

The day following was beautiful, and the boys gathered at their accustomed place, among them Charley Reed, who had been almost the first on the play-ground. Many propositions were made for hunts, and scrapes, and mischief of all kinds. But they required a degree of bravery and daring which few or none of the boys possessed.

"Suppose we have a swim, then," suggested one of the lads at last, and they all started for the river, determined on having a glorious bath. Richards had not been on the play-ground during the morning, and some joked that he was "in training," but they had not walked far ere they met him strolling along the road.

"What's up?" he asked.

"A swim," said one of the boys. "Come along, Richards, we'll have a good time down at the river.'

Richards had not noticed the presence of Charley Reed, and he boasted in his usual way of the affair, and of the "settlement," as he chose to term the fight he had forced upon Graham.

The boys selected, though against the protest of Charley, who was an able little swimmer, and knew the banks of the stream well, one of the most dangerous places in the river, and determined to swim there.

They were ducking and jumping and splashing each other for a long time, and each seemed to have forgotten the danger of the place. Charley was on the shore with an old rough towel, drying himself, and had just slipped on his little shirt, when a sudden cry broke out among the boys. One of them had lost his footing, and it was evident that he could not swim from the manner in which he splashed and worked in the water.

Without waiting a moment, dressed as he was, Charley plunged into the river and swam to the relief of the drowning boy, while the rest of the scholars, struck with horror, seemed bound to the shore. Scarcely a murmur escaped them for almost a minute, when some of those who could swim jumped into the water and struck out for the relief of the struggling boy.

Charley was by the side of him ere the others were half way, and bravely seized him by the hair and endeavored to drag him to the shore.

"Hurry, Wilson, hurry!" he cried, and still held on, though feeling his feeble strength rapidly failing. Nearer and nearer came the boys, and Wilson, who was a strong fellow, grasped the now apparently lifeless body of the boy and swam with it to the land, while his companions helped in poor Charley, who, almost unable to move his arms, was endeavoring to reach the shore.

Fortunately one of the boys had run across the fields and informed every one of the accident, and in a little time a number of the farmers and their hands had gathered at the place. They came not a minute too soon, for the boy was almost lifeless. But rolling him and careful handling by the men soon relieved him of a great part of the water he had swallowed and he began to breathe regularly again.

It was not till then that any one thought of asking who he was, and when they looked they found it was Will Richards.

"Where's poor little Reed?" inquired Sam Lee, one of the larger scholars, who had helped to rescue Will.

"Here he is; though he looks rather pale. You had better go straight home, Charley," said one of the men, as he noticed how ill he evidently was. "Come along with me, for I am going by your house."

The boys would not allow Charley to go with the man, but resolved to accompany him themselves, and they determined to tell every one about the affair, though Charley requested them not to mention it. Of course no one among them could now doubt the truth of Graham's story, and they all thought that Charley was indeed a brave little fellow.

Poor Charley tried to walk, but found himself unable, and the boys gladly assisted him across the fields to his home, where they told his father and mother, and every one they met, how bravely he had saved the life of Will Richards.

* * * * * * * *

Tom Graham had sat in the house during the entire day, and as his home was in rather a retired place, he did not happen to hear of the accident. Two o'clock came, and he left the house, determined not to speak to any one till he reached Reed's, a half a mile or so distant, and although a boy who chanced to see him, cried, "Hallo, Graham!" he only hurried on faster, till he came to the door of Mr. Reed's house.

"Is Charley in?" he asked, as Mrs. Reed opened the door.

"Yes, Tom, come in."

"No, thank you. Please tell Charley it is me."

"But, Charley's sick; you might know he is not able to come out already."

"Sick," exclaimed Tom; "why I left him perfectly well last night."

Mr. Reed found that Tom had not heard of the accident, and resolved to let Charley tell him all about it.

Tom entered and found Charlie lying on the sofa, with his head bandaged up, and thought it was only a bad headache, for Charley was accustomed to them. Mrs. Reed left the room, and the boys were alone.

"I'm sorry, Charley, you can't come, for I had hoped you could have been there to-day."

"No, Tom, I didn't want to go, and there could be no fight now."

"Why not? I am determined to fight Richards to-day."

"But, haven't you heard? Richards was almost drowned to-day."

"Almost drowned? How, where, Charley?" eagerly asked Tom, all his harsh feelings leaving him in a moment.

Charley told him all, adding, "and Wilson and I were fortunate enough to save him."

Tom soon learned the whole story, and hastily ran to Mr. Richards' to see poor Will, for his enmity had left him entirely; but they would not let him see the sufferer.

In a week or so Will Richards was almost well, and one morning Tom received a little note, similar to the one he found in his desk, and read it with a happy heart;

"Dear Graham:—Although I have been unable in the past to distinguish true bravery from mere bragging, I trust I may in the future be free from so serious a fault. I am almost recovered, and hope that you and *our* dear friend Charley will visit me as soon as possible.

From your loving friend, W. R."

Tom jumped with delight, and in an hour he and Charley were on their way to Will Richards', and the three boys were ever after true and loving friends and pleasant schoolmates.—*Methodist Home Journal.*

"That's How!"

After a great snow-storm, a little fellow began to shovel a path through a large snow-bank before his grandmother's door. He had nothing but a small shovel to work with.

"How do you expect to get through that drift?" asked a man who happened to be passing along.

"By keeping at it," said the boy cheerfully; "that's how!"

That is the secret of mastering almost every difficulty under the sun. If a hard task is before you, stick to it. Do not keep thinking how large or hard it is; but go at it, and little by little it will grow smaller until it is done.

If a hard lesson is to be learned, do not spend a moment in fretting; do not lose a breath in saying, "I can't," or "I do not see how;" but go at it, and keep at it. That is the only way to conquer it.

If a fault is cured, or a bad habit broken up, it cannot be done by merely becoming sorry, or only trying a little. You must keep fighting away until it is got rid of.

If you have entered your master's service, and are trying to be good and do good, you will sometimes find hills of difficulties in the way. Things will often look discouraging, and you will not seem to make any progress at all; but keep at it, and never forget "that's how!"—*Mountain Democrat.*

News Summary.

PACIFIC COAST ITEMS.

The Oakland *News* gives some interesting facts concerning the early history of that city. The first white man who passed through Alameda Valley, was Mr. R. Birney, who, in 1841, found the ground covered with snow. In 1840, three men went over from San Francisco and built a small schooner on the border of San Antonio Creek. One of their number died and was buried there. The greatest earthquake ever experienced in the place, was in 1850, when men and animals were thrown prostrate to the earth. Little did Oakland dream in those days of the *terminal* glories that awaited her.

The Cost of Harvesting.—The Farmers' Club, of this county, lately discussed various matters pertaining to harvesting. Among other things, a question came up as to the cost of harvesting, and it was concluded that ten cents per hundred pounds, sacks not included, would cover everything—counting rent at five dollars per acre. It was estimated by others, that the cost of harvesting was $4 75 per acre on the flat, and $6 on the hills, and that barley cost by general average after planting, gathering, sacking, etc., ninety-five cents per hundred pounds; for wheat, $1 15 per hundred pounds.—*Oakland News.*

We are glad to notice that a general effort is being made by inhabitants of the larger towns, for the prevention of cruelty to animals by the formation of societies, and prosecution of those who are guilty of such cruelty. The movement is a good one, and we regret that it does not meet with greater encouragement from the Courts, which in most cases refuse to convict the prosecuted parties, much to the indignation of the better class of people.

Another Branch Pacific Railroad.—Ground was broken at Nebraska City recently for the building of a railroad by the Midland Pacific Railroad Company, to connect with the Union Pacific, one hundred and fifty miles due West of Nebraska City, to pass through Lincoln, the capital. The road is to be built in two years, saving a distance from New York to San Francisco of one hundred and forty-eight miles.

Arrests have been recently made of parties engaged in raffling and throwing dice for small sums of money in public places in this city. We are glad to see an effort made to stop this form of gambling, which is doubtless productive of greater evil than the games of Faro and other games which are conducted with so much secrecy and caution.

Woollen Mills at Folsom.—There is now being organized a woolen company, whose works are to be located at Folsom. The capital stock is to be $250,000. A site is to be presented to the company, containing upon it a large bulk for building material. All the facilities requisite to make this a profitabble investment is insured. We believe the parties engaged in the enterprise are San Franciscans.—*Sacramento Record.*

An item in the Alameda *Democrat*, concerning the rain in June, rarely seen in California, closes as follows: "It turned quite cool on the following day, with occasional showers of rain, which did some harm to the new-mown hay, and injured the standing grain."

The new woolen mill at Ashland, in Jackson County, Oregon, is almost completed, and will be formally opened on the eve of the Fourth by a grand ball, and the factory will commence active operations the following week.—*Press.*

The Vallejo and Sacramento Railroad has been completed to Suisun. The first excursion train passed over the road on the 24th of June. On and after June 20th, regular trains will run to Suisun, Bridgeport, and intermediate stations.

The measles are raging violently in some parts of the State, especially in Alameda and Santa Clara counties. Several schools have been broken up temporarily by the ravages of the disease among the children.

Long lines of teams, from eleven to sixteen animals to a wagon, with two or three smaller ones attached, pass through our town every day heavily loaded for Nevada.—*Placerville Democrat.*

The Los Angeles *News* favors a division of California, and seems to think that Los Angeles might be induced with a proper amount of solicitation, to become the Capital of the new State.

The Mendocino *Democrat* reports the sawing of 215,500 feet of lumber, at the Noye mill, near Albion River, and claims that it is the largest week's work ever done on this coast.

The Western Pacific and Southern Pacific Railroad Companies, have claimed and selected the thirty acres of Tide Lands granted by the Legislature at the last session.

A complete mile in eight hours is the fastest time yet made by the tracklayer at Vallejo.

The fare from San Francisco to Reno by steamer and railroad, *via* Sacramento, is $21; to Virginia City, $23. The fare in second-class cars to Reno, is $16.

Thirty-one citizens of Oregon went out on the last steamer, to seek homes in the Argentine Republic in South America.—*Lafayette Courier.*

There are now 16,000 members of Temperance Societies in California, besides some who are not members.

The *Examiner* says that ninety-nine per cent. of the teachers of the State are Republicans.

The town of Princeton, Mariposa County, was partly destroyed by fire on the 20th ult.

They have had another very destructive fire at Idaho City—the work of an incendiary.

The number of cases of small pox in this City is reported to be decreasing.

The steamer from China, which arrived last week, brought 5,000 letters.

New wheat is arriving at Paradise City at the rate of fifty tons a day.

Over 2,000 immigrants arrived in this city in three days last week.

The Los Angeles papers report the grape crop in good condition.

Work is progressing steadily on the sea-wall at the city-front.

TELEGRAPHIC.

Eastern.—The Erie War has broken out anew....Gen. Gillem is ordered to California....J. C. Breckenridge has arrived from Paris....The Plasterers' Union of Brooklyn has voted $5,000 per month to the striking bricklayers....Judge Chase and Henry A. Wise are in New York....Gen. Howard of Maine, has been elected President of Union College, Schenectady N. Y....The President has signed the Eight-hour law.

Southern.—The Louisiana Legislature met on June 30th. After a long dispute, it was decided by the Lieut-Governor, that members must take the old test oath. Nineteen members took the oath. The Democrats entered a protest, and after R. H. Pabel, a negro, had been chosen temporary Chairman, left the meeting....The election in Mississippi is going on with a prospect that the Democrats will win....The Reconstruction Convention of Texas, sent a resolution to Congress, stating that murder and disorder are still prevalent in that State.

Congressional.—The Military Committtee report favorably on the Bill to discontinue the Freedman's Bureau....An amendment to the Civil Appropriation Bill was adopted, granting $150,000 for a Branch Mint at Carson, Nev....A resolution was passed, directing a Bill to be reported levying a tax of 10 per cent. on U. S. Bonds....Osborne, Senator from Florida, was sworn in....Mr. Boutwell offered in the House a Bill, authorizing the issue of $800,000,000 in bonds....The Senate confirmed Dalgren to be Chief of Ordnance....The Tax Bill passed the House on the 26th....The House resolved to adjourn to July 15th....The Senate passed the Omnibus Reconstruction Bill over the veto.

Political.—It is believed that the President will soon issue another Amnesty Proclamation including everybody....Stevens has his new Impeachment articles nearly ready....The latest Democratic ticket has Senator Hendricks of Indiana for President, and Mayor Hoffman of New York for Vice President....The California delegation are working for Haight and Field....Smythe of New York has been nominated as Minister to Austria.

Crimes.—John Cole murdered two step-sons at Warrenville, Ohio, with a butcher-knife, and assaulted others in the neighborhood....The celebrated Indian Chief Hole-in-day was assassinated by three Indians at St. Pauls Mo....The Surratt case is postponed to Sept. 21st....A clerk in the Second Auditor's office is charged with illegally paying out more than $1,000,000 to owners of negroes mustered into U. S. service.

Foreign.—Seward is negotiating for the purchase of Greenland and Iceland....The Irish Church Suspension Bill is defeated....The Pope declares the liberal laws of the Austrian Parliament to be in violation of the sacred rights of the Church....News from Japan is still war like....The rebels still hold out in China....The statue of Luther was unveiled at Worms on the 25th, in the presence of the King and Crown Prince of Prussia....The Irish Reform Bill passed the House of Commons the 25th of June....The cordial feeling between the Mexican Government and the United States has ceased....Minister Adams sailed for America in the *China*....The murderers of Prince Michel have been convicted.

WEEKLY MARKET REPORT.

Produce Market.

Wednesday, July 1, 1868.

Flour—100 bbls Marysville Extra, private; 500 bbls Extra, local mills, in lots, current rates. We quote city mills as follows: Superfine, in sks, ₱ 196 lbs, $5 75@6 25. Extra, in sks, $7 25@7 50.

Wheat—Market firm at $2 10@2 30 for good to extra choice milling. Sale of 500 sks Santa Clara.

Barley—Sales include 400 sks new, $1 70; 1,000 sks choice old brewing, private; 400 sks new, $1 70. The range for old feed and brewing is $1 80@1 95 ₱ 100 lbs.

Oats—600 sks Oregon, ex steamer, in two lots, private. We quote jobbing rates for California at $2 20@2 40 ₱ 100 lbs.

Potatoes—The market this morning was quite active at $1 25@1 37½ for new Mission; some choice lots realized $1 50; 100 sks Bay sold at $1 20 ₱ 100 lbs.

Onions—Red are jobbing at 1¾@2c and White at 2@2¼c ₱ lb.

Corn—The different varieties range from $2 20@2 37½ ₱ 100 lbs.

Rye—No transactions to report; quotable at $2 50 ₱ 100 lbs.

Buckwheat—Entirely nominal at $1 62½@$1 75 ₱ 100 lbs.

Beans—400 sks Bayo, private, jobbing at 5c; Butter, 6½c; Pea (very scarce), 12½c; small White, 8@8½c; Pink (not over 200 sks in market), 5c; and Red, 3c ₱ lb.

Bran—Is in light supply, and quotable at $30 ₱ ton from the mills.

Middlings—Fine, $40@45; feed descriptions, $32 50@37 50 ₱ ton.

Oil Cake Meal—Continue in fair request at $30 ₱ ton.

Hay—Market steady at $10@14 ₱ ton.

Dairy Products—Prices are essentially the same as last week. Fresh roll Butter is quoted at 32½@35c; California firkin, 33@35c; sale of 100 firkins within the range. Cheese is held at 13@15c for ordinary to choice California dairies; Eastern dairies, 16@17c ₱ lb. Eggs are steady at 37½@40c for Hen and 28@30c ₱ dozen for Duck.

Poultry—Live Turkeys, 18@19c, and dressed 20@21c ₱ lb; Hens $8; Roosters, $6@7 for large size; Spring Chickens, $4 50@5; Ducks, $5@5 50 ₱ doz; Geese, $1 75@2 ₱ pair.

Provisions—We quote jobbing prices as follows: California smoked Bacon, 15@16c; Oregon do, 11½@12½c; California Hams, 16½@17c; Oregon do, 15@16½c; California Lard, 14@15c, and Eastern do, 12½@13½c ₱ lb.

Wool—Demand fair and prices steady. We quote clean grades 17@18c; medium, 15@17c, and burry, 12½@15c ₱ lb, according to condition. The sales since last Wednesday aggregate 450,000 lbs. Several lots sold some time ago have not yet been graded, for want of adequate facilities. Freight is taken to New York by the steamers at 1½c, and by sailing vessels at 1c ₱ lb, currency.

Hides—Sales for the week aggregate 1,200 California dry at 14½@15½c ₱ lb, according to selection. Shipments to New York are made by steamer at 1½c gold, and by sailing vessels at 1½c ₱ lb, currency.

Tallow—Is wanted at 7¼@7½c for good to choice Beef. Sales of 20,000 lbs Beef for local use at 7½c ₱ lb.

San Francisco Cattle Market.

The supply and demand are quite evenly balanced; and hence quotations are essentially the same as last week.

We quote slaughterers prices as follows:

Beef—American, 1st quality, 6@8c ₱ lb.
do 2d do 5@7c ₱ lb.

Veal—Steady at 7@10c ₱ lb.

Mutton—In fair demand at 5@5½c ₱ lb.

Lamb—Ranges from 5½ to 7½c ₱ lb.

Pork—Undressed, 4½@7½c; dressed, 7@10½c ₱ lb, outside figure for milk or grain fed.

—*S. F. Bulletin.*

DIED.

Correction.—In this city, on the 18th inst., after a very long and painful illness, Mrs. Harriet S., wife of Alphonso J. Lovejoy, aged 37 years and 10 months.

Congregational Singing.

CURRENT TOPICS.

The statement in *The Pacific* that the Congregationalists of this coast are expecting soon to establish a Theological Seminary has interest for all who feel the need of ministers for our churches who have been educated among us. Our two Synods appointed a committee at their last meetings who might consider the propriety of taking some steps in the same direction, but, so far as we have learned, nothing definite has been done by them, and we are not likely to have a Seminary, for the present. We trust, therefore, that our Congregational brethren will not delay, but prepare themselves to take advantage of the University, when it shall begin to send out graduates, so that those who wish to study theology may not be obliged to go East if they would find Calvinistic instruction. The time ought not to be far distant when young men may be thoroughly trained for every department of practical or professional life without leaving this coast, and the demands of the Church will render it specially important that her ministry shall be educated in full view of the peculiarities of the field and what will be necessary to success in it.

The Steam Navigation Company and Pacific Railroad Directors deserve not only the thanks of the teachers in the public schools of San Francisco, but also of our citizens generally, for their kindness to those who are really doing public service, because of their liberality in granting to them a free excursion to Donner Lake. Many of these teachers are too poor to make any extended visits into the country, during their vacation, unless through some such benefaction, and all of them are well fitted, by their tastes and pursuits, to enjoy and appreciate the opportunity thus afforded. Nor will they alone derive profit from this excursion. From it they will gather knowledge of the State, and its resources and beauties, that will be communicated to their pupils, and the illustrations gained from what they see will add much to the interest and vivacity with which they will teach. It is always economical, as well as pleasing, to treat faithful public servants generously; nor do our companies who furnish facilities for travel lose anything by the manifestation of the liberal spirit that so many will gratefully enjoy.

The fact is often noticed by residents in China, and by masters of vessels in which Chinese are transported back and forth to this country, that those who return after spending some months, or years, among us, are very different in many respects, from those who come here. They may not have learned to speak our language much, or to read, or to live as we do. They may not have expected to imbibe any of our customs, to be modified by contact with our people. Yet, even against their purposes, they do become changed, and, in a sense, *absorb* certain notions and sentiments which are expressed so constantly by the habits and lives of those whom they meet. Even on religious points they are not the same, for a more excellent religion than theirs, in its effect on the general elevation of those who accept it, has been commended by the very civilization they are forced to acknowledge. They think more, and their thoughts have a wider range, after they have been in America for a time. They talk of what they have seen, and almost insensibly become more or less like those with whom they have been living. In short, a species of education is going on among the Chinese who are here, and its effect cannot be prevented. Sometimes, of course, they learn more of evil than of good, and they are then sad commentators on our habits and manner of living. But the *general* effect is elevating, and in the course of years the intercommunication between the two nations must have a marked influence on those who are borne out of the routine to which they have been bound for ages. If only the Christian people who have opportunity to affect these heathen during their stay with us would bear these things in mind, they might accomplish much for their welfare. Good influences will be like good seed, sown without much cost, but certain to spring up in a harvest of blessing years hence, and on the other side of the globe. Healthful example will be a lever that hands, of which we know nothing, will use to aid in the overthrow of the hoary and rooted systems of superstition to which millions are under bondage.

The Roman Catholic Church furnishes many valuable lessons that Protestants would do well to learn and practice, not the least important of which, is that suggested by the amount of money the members contribute for the support and propagation of their faith. The receipts for 1866, of the great Missionary Society of the Catholic Church, were nearly a million dollars in gold. May it not be, notwithstanding all we know of the ignorance that prevails among them, that this large sum is collected chiefly because of the fact, that 233,200 copies of their Missionary journal are circulated and read by the people? Almost half the amount given is expended in Europe and America, clearly indicating where those who manage it believe their great strength is to be in years to come.

It was doubtful, before the vote, whether the liberal party could carry the Irish Church question in the British House of Lords, and the despatch that declares their defeat was not, therefore, wholly unexpected. It should not be inferred, however, that those who have been so active and resolute upon this question, and who came so near to success, will now be ready to give up hope. The popular agitation that has attended the discussion has been a mighty power in their favor, and the possibility of carrying their cause through the Parliament has greatly strengthened the party. What other issues may arise by which the liberal spirit in England shall be nourished, and which shall afford it a theatre for exhibition, we need not care to surmise. We know that such a spirit never dies, when so fully developed, as is now apparent, and the progress of events will supply issues in which its influence will be felt throughout the realm. Indeed, the end of the Irish Church question is not reached by this vote. In some other form it will reappear, and the voice of the people will finally prevail over the opposition of those who sit in high places.

The fearful accident at the Oakland wharf, by which so many lives were lost on the fourth of the month, furnishes lessons that will be pondered by our citizens; but we desire to call attention to one especially, that relates to the greater safety of those who give themselves into the charge of men who undertake to be public carriers. Whatever may be said respecting the unnecessary haste of those, who in their rush for the boat were precipitated into the Bay by this accident; and whatever may be said respecting the ordinary caution and care of the Ferry Company, the simple fact is, that the machinery by which the bridge was supported, was not strong enough to bear all the weight that might be crowded upon it. There ought to have been no doubt on this point. The questions of cost, of appearance, of convenience even, should have no importance compared with this, and the chains and wheels by which the bridge was to be prevented from being a trap-door into the Bay, should have been able, beyond all contingency, to bear up tons of weight, beyond that of any possible crowd that could stand upon it. The lesson is learned at terrible cost; but it ought now to be heeded. Let us have *more care, in every respect*, for the safety of those who trust their lives in the hands of public carriers.

The news that George H. Stuart, a household name that is spoken with affection and respect in all parts of our land, and by multitudes abroad, because of his Christian character and his prominence as President of the Christian Commission, has been suspended from membership in the Church by the General Synod of the Reformed Presbyterian Church, is received with amazement wherever it is announced. What unsuspected iniquity has compelled the body, of which he has been an ornament and honor, to such extreme action? What phase of depravity has found illustration in so distinguished an instance, over which charity and the interests of religion found it impossible to throw a cloak? We are not left in doubt on this point. The Synod learned that Mr. Stuart had worshipped God in company with those who felt at liberty to praise

Him in some other measures than those furnished by Rouse's version of the Psalms! Nay, more, he had actually attempted this kind of praise himself, with those who were thus moved, and would not feel that this is a heinous sin! Guilt of such enormity would not admit of such forms of long-suffering as might be exhibited were he to be regularly tried, and, therefore, though too unwell to be present, and without process of trial, he was summarily excluded from the Synod and suspended from the Church, and his pastor, Rev. Dr. Wylie, of Philadelphia, was treated in like manner, because he was supposed to give aid and comfort to the criminal in his blasphemy! And this is in America, and among Protestants! There can be no objection, if any one chooses to use the version of Psalms, and such Christian liberty should always be granted; but verily, it is worthy of record that a reverend ecclesiastical court has declared that the verses with which Rouse has been pleased to convey the sublime sentiments of our religion shall be the *only* vehicle of praise to Almighty God! That bigotry can be so extreme, even among us, that excommunication shall be the price of an attempt to pour forth a full heart in any other strains! George H. Stuart is not harmed by such a decree, but we pity the members of the Reformed Presbyterian Church who are subjected to such "lords over God's heritage," and we mourn that our common Curistianity has been so misrepresented and dishonored.

Religious Intelligence.

PACIFIC COAST.

Santa Rosa.—Topstones are the pleasantest to chronicle, but foundations are not far behind. We chronicle the laying of the latter at Santa Rosa. The First Presbyterian Church is beginning an edifice, to cost about $4,000. The Rev. Mr. Frazer is ably seconded by Elders Morgan and Morton, as well as by his people. A recent festival has yielded about $300. The same sum will be given towards the work by Calvary Church in this city. The good, old First will also aid. It would be well if more of our people understood, like those in Sonoma County, the inspiriting, centralizing, and uniting power of an edifice upon a congregation.

Chinese Mission.—We learn from the *Advocate*, that the authorities of the Methodist Church will establish a mission among the Chinese of this city, having already appointed Rev. Mr. Gibson to take charge of the mission. Mr. Gibson has had some experience in the missionary work in China. All Christians will unite in wishing that this enterprise may be successful.

Episcopal Church.—We learn from the Vallejo *Recorder*, that the greater part of the material for the new Episcopal Church, has been hauled to the site of the building, and the work of erection will be commenced without delay.

Presbyterian Fair.—The ladies of the Presbyterian Church in Vallejo, will hold a Fair and Festival, commencing on August 11th. No pains will be spared to make the Festival an attractive one in every respect.

Presbyterian Church, Ione City.—At the last communion service of this Church, held June 14th, 1868, four members were received. Two on profession of their faith, and two on certificates from other churches.

Methodist Church.—A subscription paper is being circulated at Jackson for the purpose of building a new church edifice for the Methodists in that town. There is a prospect that the effort will be successful.

Oakland.—We learn from the *News*, that the frame-work of the edifice of the Second Congregational Society is already completed, and that the building will be ready for use in two months.

Dedication.—The Congregational Chapel at Los Angeles, was dedicated on Sunday, June 28th. Clergymen from different parts of the State, participated in the exercises.

Infidels.—The *Cumberland Presbyterian*, thinks that a very large proportion of our Public School Teachers are infidels. Some of them play billiards and go to balls.

For Sale.—The lot recently purchased by the First Baptist Society for the erection of a new church, is offered for sale.

Conference.—The Oregon Annual Conference of the Church of United Brethren met at Forest Grove on July 2d.

Prosperous.—The congregation of the Baptist Church at Nevada City, has been more than doubled the past year.

Donation.—The friends of Rev. Mr. Chivers at Chico, made him a generous donation last week.

EASTERN.

Destruction of Churches in South Carolina.—A Committee of the Protestant Episcopal Convention of South Carolina, close an extended report of losses by the war as follows: To sum up the losses of the diocese, it appears that the churches have been burnt, that three have disappeared; that twenty-two parishes are suspended; that two parsonages have been burnt; that every church between the Savannah river and Charleston, has been injured, some stripped even of weather boarding and flooring; that almost every minister in that region of the State has lost home and library; that along the entire seaboard, from North Carolina to Georgia, where our church had flourished for more than a century, there are but four parishes which maintain religious services; that not one outside the city of Charleston can be called a living, self-sustaining parish, able to support a minister; that their clergy live by fishing, by farming, and by mechanic arts; that almost every church, whose history appears on this record, has lost its communion plate, often a massive and venerable set, the donation of an English or colonial ancestor. The pecuniary losses might be repaired if the diocese were as in days gone by. But in its present and impoverished condition, no hope remains of speedy restoration. This generation can scarcely behold it. —*Observer.*

Religion and Politics.—When will religion shake of its affiliation with politics? The Michigan Congregational Association, at its late meeting, not only recorded on its minutes the reception of a dispatch announcing the nomination of Grant; but, when some fossil objected to it as undignified, amended the record by adding that of Colfax. And now we learn that that purely religious body, the General Assembly of the New School branch of the Presbyterian Church, attended on last Friday evening a grand entertainment given by Governor Geary, the political chief of the State; and worse than this, in their enthusiasm, so far forgot themselves as to sing "John Brown" with a right rousing good will!—*Independent.*

The Lutheran Synod.—The Synod, at its late meeting in Harrisburg, Penn., exhibited a true Christian liberality. Deeming it unwise to renew old controversies, it refused to take action on the report of the Committee, which declared that the recent secession of the ritualistic wing, had only taken from the church a source of weakness. It rebuked the extreme separatist spirit of such pseudo-Lutheranism, which refuses to interchange pulpits, or admit to the communion, those belonging to other denominations, and not only continued its correspondence with the German Reformed, Presbyterians (N. S.), Moravians, and Evangelical Church Union of the West, but took the initiatory step toward the establishment of ecclesiastical relations with the Dutch Reformed Church, the Congregational, and the Presbyterian (O. S.). It thus perpetuates the catholicity of Christianity manifested by Luther and the other Reformers at the Marburg Conference, and acts consistently with its mission as expressed in its own constitution. —*Independent.*

Reconciliation.—After an interval of twenty years, official relations have been resumed between the Northern and Southern Baptists. Delegates sent by the Baptist Home Missionary, to the Southern Baptist Convention at Baltimore, week before last, were cordially received, and the latter in turn appointed delegates to the meetings of the Northern Baptists in New York last week. Dr. Jeter, of Richmond, who came on this mission, frankly declared that the South had no wish to restore slavery, and expressed the hope that the relations between Northern and Southern Christians may hereafter be harmonious.—*Congregationalist.*

American Tract Society.—The Fifty-fourth Annual Meeting was held in the Old South Chapel. The treasurer, Mr. Henry Hill, made his annual statement, which showed that the total receipts for the year, were $145,568.10; expenditures, $163,063.25—an excess of $17,495.15 over the receipts. The assets of the Society are valued at $181,608.58—subject to mortgages that will reduce its availability to $151,221.58. The report was audited and accepted.—*Zion's Herald.*

Don't Want to Go.—The Methodist discipline requires the bishop to inquire of the candidates for ordination, whether they are willing to go as foreign missionaries. The corresponding secretary of the Methodist Missionary Society says, that not a name of one willing candidate has been sent to his office during the past two years, and the bishops have nearly ceased to put the question.—*Independent.*

Gen. Stephen Van Rensselær, the sixth in the line of Patroons, died at the family mansion at Albany, on Monday, the 25th ult., in his 80th year. The original estate, known as Rensselærwyck, which dates from 1630, extends twenty-four miles along the Hudson, and twenty-four miles each way from the river, embracing the chief part of Albany and Rensselær counties.

The late Samuel Gorgas, of Philadelphia, bequeathed an extensive farm at Roxborough, valued at $50,000 in cash, to found an asylum for indigent women. He gives the life-use to a relative, of the sum of $60,000, the principal to be added to the $50,000 above-named after the usufruct terminates. —*Presbyterian Witness.*

The Next Assemblies.—Both the Assemblies of the Old and New Churches will meet next year in the city of New York. The former in the "Brick Church,"—Rev. Dr. Spring's. The latter in the "Church of the Covenant,"—Rev. Dr. Prenliss' The two Churches are located within a short distance of each other.

Princeton College.—The acceptance of the Presidency of Princeton College, New Jersey, by Dr. McCosh, of Queen's College, Belfast, was announced on Wednesday, and was greeted with great enthusiasm by the faculty and students.

Another Noble Benefaction.—A large-hearted friend of the Boston Theological Seminary, who had recently given the institution $50,000, quietly called upon the treasurer last week, and increased it to $100,000.

Lay Delegates.—The Methodist General Conference has adopted a plan for the reception of Lay delegates—to be elected by the meetings of Lay stewarts—into the Annual and General Conferences.

THE REV. SAMUEL SEABURY, D.D., has resigned the rectorship of the Church of the Annunciation, New York. The Rev. William J. Seabury, assistant minister of the same, has been appointed rector.

YALE SEMINARY graduated a Senior class of ten, last month. From $30,000 to $40,000 have been raised toward the new seminary building, which is to cost from $75,000 to $100,000.

WALTER LOWRIE, Secretary of the Board of Foreign Missions of the Presbyterian Church, has withdrawn finally and wholly from the duties of this office.—*N. W. Presbyterian.*

REV. A. M. STEWART, has accepted a temporary appointment under the Assembly's Committee of Home Missions, to visit the Pacific portion of the field.—*Commonwealth.*

CONFERENCE.—The Methodist General Conference adjourned Tuesday, June 2d, *sine die* at 12 M. The next session will be held in Brooklyn, New York.

BAPTIST SEMINARY.—Nearly $20,000 has been pledged toward a Freewill Baptist Theological Seminary, to be located at Haverhill.—*Congregationalist.*

PROF. E. N. PACKARD, is to resign his position in Bowdoin College to complete his studies for the ministry.—*Congregationalist.*

FOREIGN.

THE ABYSSINIAN CHURCH.—In the fourth century, two Christians, the only survivors of an expedition sent out from Tyre, which landed on the Abyssinian coast, were the means of establishing a church. The first bishop was ordained at Alexandria, and the type of Christianity introduced, was that which prevailed in Egypt. From that day to this its religious history has been very much like that of Egypt, though its political history has been very different. What the Copts are in Egypt, the Christians are in Abyssinia, — formal, superstitious, and immoral. More than half the year is devoted to fast-days. Some of their customs are strictly Jewish. They circumcise their children before baptism; observe the Mosaic laws respecting clean and unclean food; keep the seventh day as the Sabbath; and have in their churches apartments styled "Holy of Holies," with their altars in the form of the ark of the covenant. In theology, though one dislikes to use the term in regard to the belief of such Christians, they have always held that there is in Christ but *one nature*,—Monophysites. The Abyssinians claim that their country is the Sheba of Scripture, and that their Emperors have descended from the Queen of Sheba who visited Solomon.—*Reformed Church Messenger.*

PERSECUTION.—The Bulgarian mission of the American Board at Eski Zagra, has been suffering from violence and persecution. The oldest assistant teacher was forcibly abducted from the school, was not allowed to see the mission family; and, when she at last made her escape, and through by-paths and streets which she had never before traversed, entered the house by the back door, her mother was at the street-door of the yard trying to get in. Having succeeded in getting inside, she rushed for the house, placed herself upon the door-step, and commenced howling, as the people of the East howl for the dead. A crowd soon gathered, broke open the outer door, and broke the windows with stones, and did much damage. The missionaries appealed to Mr. Morris, our ambassador at Constantinople, and to the English Consul at Adrianople; and, through their influence, several persons were sentenced to three months' imprisonment and to pay the damages, and others to one month's imprisonment. Many of these were pardoned on the solicitation of the missionaries, and are now their warmest friends. The general results are favorable, and the school is in a much better condition.—*Presbyterian.*

JOHN HEALEY, said to be the oldest clergyman in England, died last month. For sixty-nine years he was vicar of Holy Trinity Church, Hull.—*London Times.*

THE JEWS ARE COMING.—A City Missionary, engaged in the east end of London, says that among a great many Jews, there is a gradual admission of the truth of the New Testament history, while many now look upon Jesus of Nazareth, as the person in whom they can alone find rest. When the veil is taken away, and the Man of Calvary is accepted by the sons of Abraham, who are scattered among all the nations, they will wield an influence for the good of Christianity which we cannot now estimate. The finger of prophesy points to that day, and Christians who pray for the prosperity of Zion, should make their conversion a special object of prayer and effort. —*Zion's Herald.*

THE Nestorian Churches received one hundred additions in 1867, a larger number than during any previous year. An entire Armenian family in one of the villages, who was known to be interested in religion, was poisoned by a native Papist, and would have died, if the arsenic had not been put in lumps into their soup. The French priests made desperate and successful efforts to shield the culprit. Their policy is to promise protection to all who will join them, and then to persecute Protestants to the utmost of their power.—*Independent.*

PERSIA.—Two Mohammedans have lately embraced Christianity in Ispahan, the old capital of Persia. The law, making the apostasy of Moslems a capital offense, is still in force in Persia; and one of these men, who was seized by the authorities, was rescued by a party of English engineers, who happened to be in Ispahan.—*Independent.*

List of Presbyterian Clergymen,

ON THE PACIFIC COAST, ALPHABETICALLY ARRANGED.

Rev. Jas. M. Alexander, N. S. San Leandro, Cal.
Rev. H. R. Avery, O. S., Walnut Creek, Cal.
Rev. B. B. Bonham, O. S. Sebastopol, Cal.
Rev. I. H. Brayton, N. S., Principal College School, Oakland, Cal.
Rev. W. W. Brier, N. S., Alvarado, Cal.
Rev. Fred. Buel, O. S., agent California Bible Society, 757 Market Street, San Francisco.
Rev. W. H. Cain, O. S., San Francisco.
Rev. Charles Russell Clarke, O. S., Principal City Female Seminary, corner Mason and O'Farrell streets, San Francisco.
Rev. A. J. Compton, O. S., Watsonville, Cal.
Rev. Eli Corwin, N. S., Honolulu, H. I.
Rev. H. H. Dobbins, O. S., Jackson, Oregon.
Rev. Henry Durant, N. S., Professor College of California, Oakland, Cal.
Rev. John Edwards, O. S., Visalia, Cal.
Rev. James Eells, D.D., O. S., pastor First Church, Stockton Street; residence, corner Stockton and Clay Sts., San Francisco.
Rev. Ben. E. S. Ely, O. S., Healdsburg, Cal.
Rev. J. G. Fackler, pastor Central Church, Mission Street, residence, 151 Eighth Street, San Francisco.
Rev. A. Fairbairn. O. S., Bloomfield, Cal.
Rev. Frederick Fox, N. S., pastor Emanuel Church, corner Folsom and Seventeenth streets, San Francisco, Cal.
Rev. Thomas Frazer, O. S., Santa Rosa, Cal.
Rev. Ed. R. Geary, O. S., Calapooya, Oregon.
Rev. M. M. Gibson, U. P., residence, 608 Pine Street, San Francisco.
Rev. L. Hamilton, N. S., Oakland, Cal.
Rev. J. R. Hammond, O. S., Placerville, Cal.
Rev. Joseph A. Hanna, O. S., Eugene City, Oregon.
Rev. Silas S. Harmon, N. S., Oakland, Cal.
Rev. Oliver Hemstreet, O. S., Ione City, Cal.
Rev. I. N. Hurd, N. S., Pastor Westminster Church, Hayes Street, San Francisco, Cal.
Rev. N. B. Klink, O. S., Vallejo, Cal.
Rev. A. K. Lindsey, O. S., Portland, Oregon.
Rev. A. W. Loomis, O. S., Missionary among the Chinese, chapel and residence, cor. Sacramento and Stockton sts., San Francisco.
Rev. B. Lowe, O. S., 10 Martin's Block, San Francisco.
Rev. W. F. B. Lynch, N. S., Alvarado, Cal.
Rev. James H. Marr, Calvary Mission, San Francisco.
Rev. David McClure, N. S., Principal Oakland Academy, Oakland, Cal.
Rev. Robert McCullough, O. S., Yreka, Cal.
Rev. J. S. McDonald, O. S., Sacramento, Cal.
Rev. W. C. McKaig, N. S., Marysville, Cal.
Rev. James McLaughlin, N. S., Rio Vista, Cal.
Rev. J. H. McMonagle, O. S., pastor Larkin st. Church, residence 1312 Jackson st. San Francisco.
Rev. W. J. Monteith, O. S., Albany, Oregon.
Rev. Joshua Phelps, 38 Stanley Place, San Francisco.
Rev. James Pierpont, N. S., San Francisco.
Rev. F. L. Nash, N. S., Alameda, Cal.
Rev. George Pierson, N. S., Brooklyn, Cal.
Rev. John S. Reasoner, O. S., Brownsville, Oregon.
Rev. Robert Robe, O. S., Brownsville, Oregon.
Rev. Henry M. Scudder, D.D., N. S., Pastor Howard Church, Mission street. Residence, 1 Vernon Place, San Francisco.
Rev. John Sessions, D.D., N. S., Oakland, Cal.
Rev. Anthony Simpson, O. S., Corvallis, Oregon.
Rev. W. R. Sloan, Steilacoom, W. T.
Rev. T. E. Taylor, N. S., Virginia, Nev.
Rev. James S. Todd, O. S., Arcata, Cal.
Rev. Lewis Thompson, O. S., Astoria, Oregon.
Rev. P. V. Veeder, O. S., Principal City College, corner Geary and Stockton streets, San Francisco.
Rev. Charles Wadsworth, D.D., O. S., Pastor Calvary Church, Bush street, residence, 920 Pine street, S. F.
Rev. E. B. Walsworth, N. S., President of the Female College of the Pacific, Oakland, Cal.
Rev. L. P. Webber, N. S., Santa Clara, Cal.
Rev. S. T. Wells, O. S., agent Presb. Board of Publication. Depot at Bancroft's Bookstore, 609 Montgomery street.
Rev. Samuel Whiting, N. S., Mendocino, Cal.
Rev. A. F. White, N. S., Carson, Nev.
Rev. Geo. F. Whitworth, O. S., Seattle, W. T.
Rev. Ed. P. Willard, N. S., Columbia, Cal.
Rev. S. H. Willey, N. S., Vice President College of California, Oakland, Cal.
Rev. M. A. Williams, O. S., Jacksonville, Oregon.
Rev. S. Woodbridge, D.D., O. S., Benicia, Cal.
Rev. James Woods, O. S., Healdsburg, Cal.
Rev. James S. Wylie, N. S., San Jose, Cal.

Correspondence.

A Ride by Railroad to Reno.

San Jose, July 5th, 1868.

I think you will agree with me that it is very pleasant to get away occasionally from exhaustive labors and spend a few days in admiring the beauties of nature, and breathing the pure air of the mountains. I have just returned from such an excursion. Our route lay along the Central Pacific Railroad, and no journey could be more replete with grandeur or diversified attractions. You behold the triumphs of engineering skill; the mighty mountains towering towards Heaven; the snow-drifts glittering in the sunlight; the mining towns nestled among the hills; while streams, and trees, and alpine flowers give attractiveness to the picture.

The novelty, wildness, and sublimity of the scene combine to furnish the keenest enjoyment. Added to all this, genial and appreciative companions each contributed their part to the occasion, nor did anything occur to mar the flow of quiet mirth, or disturb the pleasant sympathy of kindred spirits. My mind goes back with peculiarly agreeable recollections to to our evening devotions, when our little company united around the family altar, and made sweet melody together in the songs of Zion, rendering gratitude to God in the midst of His wonderful works, where possibly He had rarely, if ever, been publicly acknowledged in a similar manner.

The steamer from San Francisco to Sacramento was crowded, so that most of our party had to "camp" on the floor of the saloon. Two clerical gentlemen were more fortunate, however, being taken in and cared for by a large-hearted stranger, on the ground of their "good looks," as they insisted, and certainly greatly to their accommodation, as the writer can affirm.

It would be folly to attempt the description of scenery which has baffled the ablest pens, and which must be seen to be appreciated. Like a vast panorama each view unfolded its peculiar beauties, keeping the mind in a continual ecstacy.

I felt, as the ponderous locomotive dragged us with steady tread up the giant steeps, as if each shriek of the engine was a shout of triumph, proclaiming to the world and the stars what man can do when arrayed against the forces of nature, even in their most obstinate and obdurate forms, and the thought thrilled through my soul, if a few thousand human beings using the brains and muscle God gave them, could accomplish all this, what should Christians not be able to achieve for a cause infinitely more important.

The mountain lakes were the most beautiful scenes in our excursion—their waters exceedingly clear and pellucid, fringed to their very brinks with lordly pines, and the snow-capped mountain peaks mirrored on their motionless bosoms. We first tarried at Donner Lake, enjoying a sail on its waters, and a ride along its shores; then we passed over to Lake Tahoe, up the banks of the Truckee, which is its outlet.

Tahoe presents an expansion of surface which appears not unlike an inland sea. Its waters abound in delicious trout, and are exceedingly pure and cool. We witnessed a sunset upon the lake, which was surpassingly beautiful; the lingering rays of the declining orb painted the eastern mountains and tinged the placid waters with golden hues, and tarried for an hour in the variegated colors of a summer twilight.

Returning whence we came, and continuing our journey along the Pacific Railroad to the limit of our excursion eastward, and seeking rest after the labors of a busy day, we arose in the night and started homeward, reviewing each point of interest, swallowed and disgorged by fifteen different tunnels, and dashing through snow-drifts piled to the height of twenty feet on either side of the track.

From the summit our descent was rapid, until we regained the valley and entered once more the City of the Plains.

The intense heat made us eager to seek a cooler atmosphere as we were borne toward the Bay by the noble *Capital*, but before we entered the Straits of Carquinez, we were glad enough for the protection of extra clothing and the shelter of the saloon.

Reaching the metropolis, we each sought repose after the fatigue and excitement incident to such a journey, not without many expressions of the pleasure we had experienced, and the earnest hope that at some future day we might meet again, to unite in equally delightful recreation. San Jose.

Letter from the (N. S.) General Assembly.

Harrisburg, Pa., June 2, 1868.

It was near midnight when the Assembly closed its sessions and was dissolved, and this morning the members are hurrying away to their various homes. I linger for an hour in order to send you some brief sketch of our body, and its transactions.

It is quite remarkable, that every Presbytery connected with the New School Church, with but two exceptions, should have been represented in the Assembly. Even distant California had sent Commissioners from three of her four Presbyteries, to share in our deliberations, and to unite in action upon the important questions providentially presented to us for decision. The importance of these questions doubtless accounts for this large attendance, and likewise for the unusual number of representative and influential men present from the various sections of the Church. The Presbyteries had wisely departed, to a considerable extent, from the ordinary rule of rotation, and had chosen those who were best prepared to consider, and to act, for the rest, in this great crisis. A glance at the enclosed Roll of Delegates, will sufficiently justify this much.

The general spirit of the body has been admirable. Although there was considerable diversity of opinion and of feeling, on several important matters, and though we were, in several instances, embarrassed and delayed by parliamentary questions, yet the temper and conduct of the brethren were every way worthy of their high calling. All seemed to realize the solemnity of our position; the consciousness of being invested with high responsibilities was universal; and the desire to be harmonious, if not in the deliberations, still in the results, was supreme in all hearts. It seemed as if the Holy Ghost, in answer to our prayers, was really taking possession of our thoughts, our sentiments, our will, and was leading us, day by day, toward such conclusions as would honor Christ, and bless His Church.

It sometimes happens, that the religious meetings of our General Assemblies, in the presence of business and for other causes, are suffered to become incidental, and even to fall into neglect. The Assembly of 1868 is not exposed to this charge. While there was less of fervor than I have occasionally witnessed, and less of exciting address, there was an unusual degree of prayerfulness, of brotherly communion, of quiet and solemn surrender to the divine will. The good people of Harrisburg were also well supplied with excellent preaching on the Sabbath, and the Communion Service, on the second Friday afternoon, was an occasion of very tender interest.

I ought to say for these same good people of H., that they have established the Assembly in such a way, as fully to justify the reputation which Central Pennsylvania has long had for genial, old-fashioned hospitality. The reception given by the ladies of the First Church, at the mansion of Geo. Geary, was especially pleasant; and our excursion to Gettysburg, and exploration of that famous battlefield, under the guidance of the Governor, who himself bore no ignoble part in that decisive conflict, was a privilege for which many of us will be grateful while life lasts.

The general condition of the denomination, as indicated in the reports of our various Permanent Committees, and also in the narratives from the several Presbyteries, is, in the highest degree, encouraging. The year just ended has been one of numerous revivals, of well-sustained interest, even when no special revivals have been enjoyed; of increase in congregations; of diligence and enlargement in the Sabbath Schools, etc., etc. The number of sanctuaries erected or enlarged; of congregational debts paid; of parsonages and libraries purchased; is unusually large. Our Home and Foreign Mission enterprises; our church erections; publication; theological education; and other kindred agencies, exhibit a very gratifying advance. As a branch of the Presbyterian Church we have great occasion to rejoice in the past year, as being one of the best—perhaps one of the most decisive and fruitful—in our history, and also to feel, that whether union does or does not occur, we have the promise of a glorious and blessed future.

On the engrossing subject of *Union*, what shall I say? There was in the Assembly, a very strong and almost universal sentiment in favor of Union, on any terms at all consistent with our denominational position. When the basis was presented, many earnest objections were felt and argued against the first, second, and tenth articles, especially the latter. The explanations of the joint committee, accompanying the basis, and the further explanations of the special committee, to whom the whole matter was first referred, were such as to silence, for the most part, the objections to the first and second articles, though many, even among the warmest friends of Union, would have preferred some modification of both. The tenth article was so much at variance, both with the universal usage, and with the general theory of our denomination, that it could neither be explained away, nor rendered acceptable, and thirty-seven of the members were compelled to record their dissent from this as one of the terms of reunion. Yet the desire to see these two separate denominations again made one, and the overpowering conviction that the cause of Christ demanded such union, even at great personal sacrifice, finally led to the adoption of the basis, subject to the decision of the Presbyteries, by a vote almost unanimous; four only, being excused from voting.

This result was secured only with the understanding that the explanatory statements of the joint committee were to be regarded as a species of commentary on the basis itself, and that the doubtful, or objectionable clauses, were to be received on both sides in the generous and trustful temper indicated by the committee. The fact that the Assembly at Albany has, after a severe struggle, adopted the basis, but laid aside the commentary by simply accepting the report of the committee, is one which

has disturbed many, who fear that the O. S. interpretation of the basis is one which they cannot accept. The further proposition to strike out the Smith and Gurley clauses in the first article, originating, as it is known to have done, with those opposed to Union, is calculated to increase rather than allay suspicion, and was rejected by our Assembly, partly in that view, though the proper constitutional majority could not, at the late hour at which the propositions were submitted to us, have been obtained. But the most serious obstacle to Union, now existing, is the explanatory resolutions, passed by the Albany Assembly, and submitted to us by telegram just as we were closing our sessions. That resolution seems to undo all that has been done, and to defer the Union for a year, if not indefinitely.

It is too early to speculate, and too hazardous just now to prophecy, but it is neither prophecy nor speculation to say, that this resolution must be repudiated by the ministry and membership of the Old School body, or negotiations for reunion must cease. As one who loves the New School type of theology, and who intends to preach it and "propagate" it, not in contrast with any other, but as a precious phase of Christian Doctrine, and as a solid, symmetrical, complete system of sacred truth, I can never stand within the lines of a denomination where all teaching and preaching are to be tested, not simply by the confession of faith, but also by the interpretations of that confession, to be found in the Digest of the O. S. body since 1835. If this be the price of Union, then there are many of us who will never pay it. E. D. M.

Pacific Mail Steam Co's Steamships

— FOR —

NEW YORK, JAPAN AND CHINA

Will be Dispatched as follows:

LEAVE WHARF CORNER OF FIRST AND BRANNAN STREETS, at 11 o'clock A.M. of the following dates, for PANAMA connecting via Panama Railroad with one of the Company's splendid Steamers from ASPINWALL for NEW YORK.

On the 6th, 14th, 22d, and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Transatlantic Company's Steamer for St. Nazaire, and English Steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English Steamer for Southampton, South America, and P. R. R. Co.'s Steamer for Central America. Through tickets can be obtained.

Departure of the 6th connects with English Steamer for Australia.

The following Steamships will be dispatched on dates as given below.

STEAMERS FOR JULY, 1868.

July 6th—MONTANA, Captain Cavarly, connecting with HENRY CHAUNCEY. Capt. Grey.

July 14th—CONSTITUTION, Captain Comstock, connecting with OCEAN QUEEN, Capt. King.

June 22d—GOLDEN CITY, Captain Lapidge, connecting with RISING STAR, Capt. Conner.

June 30th—GOLDEN AGE, Capt. Farnsworth, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock.

Through tickets to Liverpool by the "Cunard," "Inman," and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired, an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

The Steamship JAPAN, Captain George E. Lane, will be dispatched on Monday, August 3d, at 12 o'clock, noon, from wharf, corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the COSTA RICA for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Co.'s Office, corner of Sacramento and Leidesdorff Sts.

OLIVER ELDRIDGE, Agent.

ILLUSTRATION OF DIVIDENDS OF PROFITS

—OF—

United States Life Insurance Comp'y,

NEW YORK.

OFFICE, No. 40 WALL STREET.

CASH ASSETS EXCEED $2,700,000.

SIXTH TRIENNIAL DIVIDEND.

The Board of Directors have this day declared a Dividend of FORTY PER CENT. for the three years ending at the 4th March, inst., to holders of all Policies then in force, on the whole sum of the annual participating premiums received during the said three years; and an additional Dividend of TWENTY PER CENT. on the whole sum of all previous Dividends and Additions, to holders of such Policies who have fulfilled their engagements with the Company, both Dividends being payable and available in the various modes explained in the Company's Prospectus.

For example, on a policy paying one hundred dollars a year of participating premium, the profits for each year and the total at each year on this system are:

Year.	Yearly.	Total.	Year.	Yearly.	Total.
1	$40 00	$40 00	28	$206 39	$2702 23
2	40 00	80 00	29	206 39	2908 63

San Francisco, Saturday, July 11, 1868.

THE GENERAL ASSEMBLIES.

The mails have now brought us sufficient intelligence respecting the character and action of the two Assemblies to enable us to contemplate them with some justice. They were very unlike in the elements which composed them, though for the most part resembling each other in the spirit by which they were animated. The Old School Assembly was more than usually distinguished for the presence of the acknowledged leaders and old men of the Church. That of the New School for the presence of the active, working, progressive men within its bounds. Even a few years ago, the hope that two bodies thus composed would have and express any harmony of sentiment and feeling, would have been regarded as wholly visionary. Yet, from the beginning, it was manifest that a real spirit of fraternal interest, and a marked desire for union, prevailed in both, and none were disposed to trifle with what all were willing to recognize as the evidence that the Great Head of the Church was present in their deliberations.

The question most prominent, and that to which attention was given at the beginning, was that of reunion, and this was thoroughly discussed, in connection with the report of the Joint Committee, the most ample opportunity being given to all to express their views. Upon some of the articles there was much diversity of sentiment, but the explanations of members of the Committee, who were present, removed the difficulties that most presented, and much more harmony of judgment was manifest in the vote than was anticipated during the progress of the debate. With the exception of five who were excused from voting, the basis was unanimously adopted in the N. S. Assembly, and it was adopted in the O. S. by a vote of 185 in favor to 77 opposed. Those who were opposed insisted that they were in favor of union, but could not accept the terms of the basis, and all were agreed in the opinion that the two bodies could not be long separated, even should they fail to see reasons why their union should be hastened.

We can but regard the resolution passed by the O. S. Assembly near the close of its session, and designed to be supplementary to and explanatory of the vote that had been telegraphed to the other branch, as a serious misfortune, and wholly unnecessary in the circumstances. It tended to shake the confidence of N. S. men in the real desire for union of those who could pass such a paper at that stage of proceedings. It was construed as a reaffirmation of the old issues. Had it been sent on to the N. S. Assembly in the early part of the session, when there would have been time for thorough consideration, it would have been almost fatal to all hope of union that is worth the cost. But coming when many had left, and all were ready to leave—the business having been completed—the members present only expressed the hope that it might not prevent what had been so fervently desired, and then adjourned. The following is the resolution:

Resolved, That this Assembly hereby desire it to be distinctly understood that the first article of the report of the Joint Reunion Committee, which is the doctrinal basis of our union, adopted on Friday evening last by this Assembly, is not to be interpreted as giving license to the propagation of doctrines which have been condemned by either Assembly, nor to permit any Presbytery in the United States to license or ordain to the work of the ministry a candidate who maintains any form of doctrine condemned by either Assembly."

The annual reports made in both Assemblies revealed very cheering prospects and furnished proof that, as a Church, we are doing a great work, both in our own land and among the heathen. And the general exhibition of Presbyterianism, as thus represented, was such as to cause all who are interested in this branch of Zion to be thankful that we have so goodly a heritage, while they pray that it may extend more and more.

THE POWER OF EARNESTNESS.

There is a wide difference among men as to their power to affect each other. One may attract your notice—perhaps awaken some admiration by his adoption of a sentiment or a cause. Another will thrill you with the spirit he manifests respecting it, and seems to get his whole soul under you, as a lever, moving you out of your position of indifference, whether you will or not. There is all the contrast that we find between those whom the judgment of charity allows to be Christians and those whom no judgment can render anything else, and the testimony of these last in support of what they accept, their enthusiastic advocacy of what they desire shall prevail, is always telling and sublime. They are "burning and shining lights," commending themselves to the reason, burning their way through prejudice, routing opposition, and proving by what they do, that religion has wonderful power for good.

It is a noble triumph, when argument silences skepticism, and exhibits Christianity as a necessity of man's nature and condition. The long line of men who, through the ages, have maintained the cause of truth, and are called the "Defenders of the Faith," will challenge comparison at any period with those who have opposed them. They are confessedly among the most eminent in history, and their work bears powerful testimony to the worth of the Gospel. Yet Paul himself, at the head of this line, accomplished more for the Gospel among the mass of men, by his zealous devotion, by the soul-felt earnestness with which he preached it, and lived in accordance with its spirit, than by the mere logic with which he defended its doctrines. And a more important line of witnesses for the truth appears in those who, in succession, reared their altars and placed *themselves* thereon, with all they had, to illustrate its supreme control. These men do not argue, yet they *convince*. They present what may be called the logic of the *heart*, more difficult to resist than any other, and wielded often by the feeble as well as the strong. The child has it when he rejects the reasoning of the infidel, and then makes him *feel* that he is wrong. The ignorant man employs it when he arrays his experience and his whole-souled devotion to his Lord against the forces that philosophy brings upon him, till the philosopher anxiously inquires whence this strange power is derived.

It is sublime, when the weak thus confound the mighty, when the unwise bow the wise before them, through the spirit that conquers without, as it has first conquered within. In nothing is the wisdom of God more manifest than in this overcoming influence of complete consecration to Him, and when what men have regarded as the strong towers of the Christian faith have been beaten down, and it seemed that the Gospel must be overborne, the grandest triumphs it has ever known have been achieved as in the *hearts* of unknown men and women, this spirit has burned undimmed by persecution, and from those hearts went forth the proof of its immortal nature. Such testimony may be rendered by us all, and herein is the wisdom of Him who has given us the privilege. For in every case, success, when rightly measured, does not consist so much in what we do as in what we *become*. Success is devotion to whatever is noble and good. It is manifested interest in others and in their welfare. It is obedience to obligation; cheerful, continued consecration to duty, and it gathers nobility around any life, that can come from no other source; it gives a power to any spirit that can no where else be gained. The world is to be converted by earnest men, rather than by great men. Greatness is of advantage, but earnestness is a necessity, and often itself becomes greatness, so that every man may become a mighty power, because of the spirit that rules in him. Let no one undervalue himself, and let no one mistake the elements of his strength, as ever dependent upon God and upon himself.

Mode of Baptism.

In endeavoring to learn the meaning of *baptizo* and *baptisma*, terms used, in Greek, to express an ordinance of Christ's Church, I hold it to be both reasonable and scriptural, to ascertain the significance of these terms, both from the nature of the ordinance itself, which we have already done; and from the mode of its administration, which we now propose to do. In the latter case, we look to the ceremonial ablutions of the Hebrew economy—the type of the spiritual cleansing of Christ's blood, as the sacrifices were the type of that great sacrifice on Mount Calvary. In passing, we will look, also, at the usages of the Jews in the time of our Savior, when baptism was appointed by him as an ordinance; and finally, to the figures by which the Holy Ghost is pleased to manifest his presence to the Church, in his great spiritual baptisms, of which the appointed baptisms by water are but the type and symbol.

In illustration of our position, that these Hebrew ablutions were types of the christian ordinance of baptism, I quote from one of the Fathers of the Church, as follows:—"For to Abraham, and his posterity, circumcision was commanded, to which the Law of Moses added, ablutions, sacrifices, and other rites. These were the sacraments of the Jews till the coming of Christ, which was followed by the abrogation of these, and the institution of two others, which are now used in the Christian Church, namely: Baptism, and the Supper of the Lord. Baptism testifies to us purgation and absolution; the Eucharistic Supper testifies our redemption. Water is a figure of ablution, and blood, of satisfaction."

We think it but reasonable, that a positive prescribed institution should control the terms by which it is expressed, and not the terms the institution, especially when the nature of the institution is unknown to the Greek tongue, and comes into it from the Hebrew economy, through as a well known and established ceremonial ordinance. No person would think of gaining the meaning of a legal instrument from the barbarous French or Latin in which it might be couched, but rather from a study of the facts and usage of the Courts. The meaning of *habeas corpus* will hardly be learned by curious investigations of the power of the Latin phrase. The nature and effects of *vaccination* will not be learned by careful examination of the *meaning of vacca*. The lawyer and the physician would smile at such ratiocination. I propose, therefore, to go beyond

the mere terms of the ordinance of baptism, and having already established the internal meaning as *ritual purification*, I propose now to show, that this essential idea of baptism exists in it, independent of the literal or primitive signification of the Greek term. As in the Lutheran and German Reformed Churches, in Germany and Holland, at the present time, while the term employed to signify baptism comes from a root which originally meant to dip or immerse, the essential idea of Christian baptism overides all considerations of mode, and the ordinance is administered by *effusion, or aspersion*, though the term which still designates it originally signified *immersion*.

Whoever should insist now, that the Churches in Germany performed baptism by *immersion*, because *taufen* and *doopen*, the terms used to signify the ordinance, in the German and Dutch languages originally meant *to dip*, although we might make out a very strong case from the etymology of the words, and show, by various learned authorities, that *doopen* was Dutch for *dip*, and *taufen* German for *immerse;* yet, after all, he would have to succumb before the facts of the case, and the palpable, undeniable truth, that though the Dutch and Germans say *doopen* and *taufen* to describe the ordinance, yet when they come to its administration, it is done by *pouring* and *sprinkling*, and not by *immersion*. I do not say whether these Germans are right in using the mode of administering this ordinance, I only wish to show that the nature and mode of an ordinance cannot be always determined, with positive accuracy, by the *etymology* of the word which represents it. Permit me another illustration. It is reputed that a band of Sioux Indians saw a company of women baptised by immersion through the ice in the Missouri River, and having learned that it was done to make them better, tried the experiment next day on their own squaws. Whether this were a fact, I know not, but at any rate, it will show, that no heathen would get the slightest idea of the intent of Christian baptism either from the term itself, or from seeing an actual immersion. He must hear the gospel preached first, and knowledge must precede the ordinance, or else the mere term is utterly empty of any Christian signification.

F. B.

In my article in No. 27, read *Heathen Greek*, for *Teachers' Greek*, and *choirs*, for *chocis*. F. B.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Eighth Term of this Institution will commence on Wednesday, July 8th, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

Catalogues of the various Departments of the business are published, as follows:

I. Miscellaneous Books,	VI. Religious Books,
II. Scientific Books,	VII. Subscription Works,
III. School Books,	VIII. Blanks,
IV. Law Books,	IX. Stationery,
V. Medical Books,	X. Publishing.

Country Orders will receive prompt attention. Books and packages sent, by Express or Mail, to any of the Pacific States or Territories.

BANCROFT & COMPANY,
San Francisco, Cal.

The following works, published by Mason Brothers, New York and Boston, are supplied in California by

H. H. BANCROFT & COMPANY,
San Francisco.

THE LATEST AND BEST OF SCHOOL READERS.

Edwards & Webb's Analytical Series.

ILLUSTRATED BY THOMAS NAST.

First Reader, 28 Cents. Fourth Reader, 90 Cents.
Second Reader, 50 Cents. Fifth Reader, $1.25.
Third Reader, 75 Cents. Sixth Reader, $1.60.
Edwards & Warren's Analytical Speller 25 Cts.

These Readers are COMPLETE IN GRADE, METHOD, MATTER, AND EXECUTION and contain

1. An admirable presentation of the word-method and object-systems of teaching, with a beautiful arrangement of text and illustration.

2. A clear and correct treatise upon the elements of spoken language.

3. Lessons in Phonic Analysis, and exercises for training the organs of speech to the acquirements of a full and distinct articulation.

4. Rules for reading the various classes of selections, and directions for giving due and appropriate expression to every phase of thought and feeling.

5. A most thorough system of Thought Analysis, by which the student is made to observe and appreciate the full sense and scope of each selection.

6. Selections chiefly new. Engaging lessons and stories for younger pupils, and for those more advanced, the best and worthiest specimens of American and foreign literature.

These books are printed from electrotype plates, made from new fonts of clear cut type; the best paper only is used; they are bound in the most durable manner; are sold at the lowest prices, and introduced upon the most favorable terms. Though published less than a year since, they have already been adopted by the Public Schools of New York, Chicago, and many other cities, and are everywhere giving unqualified satisfaction. Specimen pages and circulars sent on application.

A Method for the Piano-forte,

—BY—

WILLIAM MASON AND E. S. HOADLY.

Large quarto volume; illustrated; 240 pages. Price $4.00.

Two editions are published, one with AMERICAN FINGERING, and one with EUROPEAN FINGERING. Purchasers should always state which is wanted.

This work, first published in November, 1867, of which six editions have been called for in rapid succession, has proved to be the most useful, thorough, systematic, and successful text book for instruction upon the Piano-Forte ever published. It is eminently a new method: modern, original, complete. Retaining all that has proved valuable in older works, it adds much that has heretofore never been published, though often tested in private teaching with the best and most successful results. Among the novelties of the work, the ACCENT EXERCISES, introduced by Mr. Mason, are worthy of the attention of every teacher, as presenting unusual advantages of instruction.

The prominent excellences of this book are:

1. Its DEPARTMENTS, theoretical and practical.

2. EXPLANATIONS & DIRECTIONS, such as best teachers give their pupils, and which for accuracy and clearness, have neve been surpassed.

3. THE ART OF FINGERING—best modes of overcoming difficulties.

4. THOROUGHNESS and PERFECTION of Lessons.

5. RECREATIONS AND PIECES, skillfully adapted to the requirements of the pupil, and embracing the most attractive and meritorious compositions.

Dr. Lowell Mason's Music Charts,

FIRST SERIES, THIRTY CHARTS, Price $7.50.
SECOND SERIES, THIRTY CHARTS, Price $7.50.

This work, which every teacher of Vocal Music will find extremely useful and convenient, consists of Charts or Diagrams, each of which is 30 by 42 inches in size, designed as aids in teaching classes the Elements of Music and its Notation. They embrace Exercises, Illustrations, simple Songs and Pieces, such as teachers are accustomed to write on the Blackboard, progressively arranged and printed from mammoth type, which can be easily seen from all parts of a large hall.

Care should be taken to order DR. LOWELL MASON'S MUSIC CHARTS. These Charts cannot be sent by mail.

Apples of Gold in Pictures of Silver.

BY EDWARD ROBERTS.

Price in paper covers, 30 cents each, or $25 a hundred; in board covers, 35 cents each or $30 per hundred.

The New Sunday-School Song Book. Containing treasures old and new, many beautiful Songs, the words as well as music of which are now first published, with the choicest of the old hymns and tunes.

MASON BROTHERS, Publishers,
596 Broadway, New York; 154 Fremont St., Boston.

CURRENT LITERATURE.

THE MYTHS OF THE NEW WORLD.

No study is more interesting than that of man's attempt to solve the great questions propounded by his religious nature, and no result of such study is more suggestive than the evidence that in many essential particulars, in every age and nation, he reaches the same conclusions. The Mythology of the ancients was the same in all lands, except as it was modified by the peculiarities of the people who accepted it. The Paganism of modern times has the same general features, whether found in China, India, or America. It has not been so clearly observed, however, that the modern and the ancient really resemble each other, and the discovery of this resemblance requires such careful investigation, and such skill in analysis that few have found much satisfaction in the attempt. Mr. Brinton, in the work of which we have given the title above (published by Leypoldt & Holt, New York), has given us the result of this investigation and analysis, respecting the religious sentiments and practices of the Red Race of America, and any one who will read it with thought, will be greatly interested in its design and in the ability with which this is executed. The book is not written for a heedless reader, but for one who takes real pleasure in the study of the points it presents. These relate to man's earliest ideas of the soul and of God; the myths respecting the creation, the flood, the future state; the symbols and numbers which have been associated by every race with these ideas, and the general laws and influence of natural religion, as everywhere developed. In treating these questions the author exhibits a mythology which was universal on this continent, essentially like that which prevailed in the East, and while avoiding mere speculation, for the most part, he has displayed an ingenuity and skill in his work which enchain the attention from the beginning to the end. The book can be bought of Bancroft & Company, San Francisco.

HOME BOOK OF WONDERS.

R. J. Trumbull has published, and sells by subscription, a large work with this title, which deserves a place in every family. It is not a mere collection of curiosities, nor a compilation of useless yet strange stories or facts; but a very extensive, and reliable, and instructive, as well as pleasing and surprising, series of wonders in nature, in science, in art, in every field of discovery and achievement. The author, or rather the editor, John Loraine Abbott, has sought, in a manner that shall be welcomed at the fireside, acceptable to men of science and research, and full of interest for all intelligent readers, to give real facts, and his book is full of interest. We have so many exaggerated and foolish stories, so many fables which are the outgrowth of mere superstition, so much positive nonsense put forth in a marvelous style, and intended to gratify the love for strange things that is well nigh universal, that a sensible work that assumes that "truth is stranger than fiction," and is content with truth in its wonderful statements, is a marked exception in this class of literature. Had we space, and could we make a selection from such a mass of interesting matter, it would be pleasing to give some specimens of articles with which the book abounds. This is not necessary, however, and we commend it, not as resembling in any respect the Munchausen stories and fairy tales which have become so frequent in our homes, and which are read with such eagerness by our children, but as a valuable work of information given in a manner that will please while it profits, convincing all that there are wonders the knowledge of which will make us wiser and better.

A SISTER'S BYE-HOURS. BY JEAN INGELOW.

This is the first prose work we have seen of this gifted and charming writer. It is a collection of short stories, each illustrating some sentiment or feeling, and all making the reader glad that one who writes such beautiful poetry has been willing also to publish the products of her bye-hours in prose. There is an ease and freshness in the style, and an ability to satisfy in the book generally, which reveal the genius of the author, and all will be glad she is occasionally to furnish us with what will be welcomed as long as her name shall be the pledge to the reader of the worth of that which bears it. Published by Roberts Brothers, Boston. Sold by Bancroft & Company, San Francisco.

SKETCH OF GOV. ANDREW.

Without the pretension of a full biography, this book supplies a very good portrait of the late lamented Governor of Massachusetts, in his official position. It was published first, in its principal outlines, as an article in the *North American Review*, but was desired for wider circulation by many friends of Gov Andrew, and therefore has been placed in this form, in connection with his valedictory address on retiring from office, upon reconstruction.

Few men were more prominent, or more respected, for their efficiency, and wisdom, and patriotism, during the war, than was Gov. Andrew, and while the citizens of his own State feel a special pride in him, there are many others who will take pleasure in reading this account of his official career. New York: Hurd & Houghton. San Francisco: Bancroft & Co.

Bancroft & Co., have published a little gem of a book entitled, "Yosemite," which is designed as a Guide-book for those who may visit that great marvel of our coast, and a substitute in some sense for a visit, for those who are unable to make the journey. It has twenty finely executed photographs of the points and objects of most interest in the valley, with a map of the whole, containing a kind of summary of what may be seen in it, with a scale of miles, and the correct topographical relation to each other of the several parts. The description is written by John S. Hittell, and is said to be reliable; that it is interesting, is a necessity, since nothing can be written respecting this amazing exhibition of nature which will not have interest. All the information one may need in regard to routes of approach, places of special grandeur or beauty, hotels, will be found in the book; and the views may be studied with pleasure, whether one has visited the region they represent, or not, since they are the simple attempt to transfer nature to the paper.

PUTNAM'S MAGAZINE for July is quite equal in interest to the preceding numbers. In variety and real worth, the articles are equal to the promises of the publishers, and while thus sustained, there is no doubt that the magazine will be widely patronized. Bancroft & Company publishers, San Francisco.

LITERARY ITEMS.

It would be a great misfortune if the future historians of the present age should adopt the literary weeklies as the best exponents of the character of the times. A sorry picture would they make of us from such material. We should all appear as Pharisees in religion, and Publicans in wickedness; as the most defectively clothed of human beings; as having our brains stocked with little else than vanity, and love of ease, and the getting of gain. Cynicism is becoming almost the universal characteristic of the articles in these first-class weeklies. They never tire in telling in antithetic and sparkling phrase, the degeneracy of the times, and this sad theme has proved productive of an immense amount of fine writing. The author of these articles are, we venture to say, for the most part, gentlemen of easy and obliging manners, who only wear the sneer when it pertains to their business to do so, and who are worried about the follies of the age only to the extent of an article in the *Round Table* or the *Saturday Review*. They love to say a smart thing rather than a true one, and are allured to this field by the fine opportunity it affords for a display of their pyrotechnics. There is no moral purpose apparent in what they write. The trick of it is simply to shut your eyes to goodness and eagerly watch for its opposite; to scout at sincerity, and use hard words with the most serene assurance. If any good is done by this we fail to discover it. The generalizations are crude, and of little credit to the comprehensiveness of mind of the writers; the fine points exist in words and tricks of rhetoric instead of in facts; and the effect of the whole is anything but healthy. It is about time this style gave place to something higher in ability and nobler in aim and sentiment.—*Chicago Presbyterian.*

THERE is but one daily religious paper on the continent—the Montreal *Daily Witness*. It was published for fifteen years by Mr. John McDougall as a weekly religious paper, before he made it a daily. Although it labors under the disadvantages of being published in a city three-fourths of whose population is Catholic, it has by far the largest circulation of any local paper, and, while it is the organ of no sect, its thoroughly evangelical character, and its support of temperance and public morals, have given it a deep hold on its constituency.

THE number of new books published in Germany in 1867 was 9,855, being 1,156 more than in 1866. Of these, 1,365 are theological and devotional, 932 belong to the department of school instruction, 852 to belles lettres, 648 to history, 575 to natural science, 493 to medicine, and 397 to the fine arts. The whole number of books issued is much greater than in France, or than in England, where 4,144 new books were published last year.

TRIAL is being made of a new machine at the London *Times* office which is expected to transcend anything yet extant. The paper is made in an immense length, and delivered out from a roller. The machine is intended to print 46,000 sheets, or 23,000 perfect copies, per hour, which is a greater number than has ever yet been accomplished; and it also cuts the paper into sheets, folds them, and records the number printed.

THERE has been lately published in St. Petersburg a pamphlet bearing the significant motto, "O, Russia, one step more and the whole world is yours!" It asserts that a Bulgarian revolutionary committee, completely devoted to Russia, has been in existence for two years, and that it is powerful enough to raise all Bulgaria in insurrection at twenty-four hours' notice.

ARIED.—This is the title of a pamphlet published at the South, the object of which is to prove that "the negro is a brute." Although the silly infidel proposition is sustained by no arguments other than flimsy and no assumptions but those which are false, the circulation of the book is large.

GRACE GREENWOOD will reside in Washington for the next year or two. She will continue her contributions to *The Independent.*

"SPIRITUAL WIVES" is already in its fourth edition.

Ninety-five thousand copies of Wayland's Moral Philosophy have been sold by Gould & Lincoln since these works were first published.

Nineteen-twentieths of the books published by the Massachusetts Sabbath School Society, are written by women.

The Springfield *Republican*, "guesses" that the book, "Where is the City?" was written by Oliver Wendell Holmes.

The life of Grant, by J. S. C. Abbott, is having a fine run, 9,000 copies having been sold in three weeks.

Educational.

An Educational Toy.

It is pleasant to invent educational toys. Here is one. It is a box illustrating ornamental woods. The four sides are made of the four peculiar to the Pacific States. They are the Madrone, the Laurel, the Oregon Maple, and the Manzanita. The top is formed of three pieces—each a foreign wood. There are mahogany, rosewood, and satinwood. The bottom is also of three pieces. They are American woods, to wit: black walnut, birch, and curling maple. Inside is pasted the following descriptive paragraph: "Mahogany, the richest of woods, when solid and old, has, with the influx of sudden moneys, been retired from the fashions of a world that needs young splendor, and cannot afford to wait for the sound beauty of maturity. Its place is usurped by the ready excellences of rosewood, and the natural respectability of black walnut. But even these are getting to be in high demand and very expensive, and the brilliant satinwood, prized for interior cabinet decoration, is also exceedingly costly.

"In this emergency, California looks into her realm—a very purse of Fortunatus—and offers to replace the foreign woods with her own productions of equal beauty, and even to furnish, besides the American *black walnut*, *birch*, and *curling maple*, so largely in use, other native woods of greater variety and richness. The *Madrone tree*, named piously by the Spaniards, is of a reddish tint, lighter than mahogany, but close-grained, and taking a more perfect polish. The heart of the tree gives wood of dark, oblique bands, that are peculiarly beautiful. The *laurel* is like our eastern maple in general appearance, but more compact, and much more varied in the peculiar convolutions of its fibre. The *Oregon maple* is like the same tree from the Atlantic Coast, only on a larger scale, giving fine sweeps and curves of veined color, that may be wrought into splendid effect. The *Manzanita* is a very common tree in California, growing nearly always in dwarfish shapes and sizes, but, although not often high, is sturdy, fine-grained, and of a mellow, reddish tint, resembling the Madrone and the mahogany; it is adaptable to turnings, carvings, and delicate ornamentations. C. R. C.

Be a Manufacturer.

"Those 'Commercial Colleges' which abound in all the western cities, useful as they are in many respects, appear to be luring young men from their proper vocation of producers and makers into the overcrowded business of distributing; so that, even in busy Chicago, where every able man is doing two men's work, the merchants are pestered with applications for clerkships, and the salaries of clerks are generally low." ("Chicago"—*Atlantic Monthly*, March, 1867.) This paragraph is suggestive. It claims the attention of young men and their parents. The modern highway to wealth is Art. Manufacturers are kings. Book-keeping is, of course, a necessary adjunct to all business. But it is not a profitable business of itself. To manufacture even axle grease takes a head, and brings in wealth. Book-keeping for the axle grease man is only counting for him his wealth; not sharing it. Let the young man set about learning some useful art. If he has graduated at some good school, all the better. He can then perhaps invent some improvement in the processes of the manufacture. Here is where the gold comes in—and, with the gold, the social standing and the means of usefulness. Go into some manufacturing establishment. Go through it by actual service. Study it from the furnace to the counting-room. Improve upon it. Follow it. Be rich. Be useful. C. R. C.

Personal.

Correction.—In our issue of last week, we said that Mr. D. C. Stone, so long in charge of the Public Schools of Marysville, was to be connected with the Oakland Seminary. It should have been, the Female College of the Pacific. Mr. Stone takes the place of Mr. Harmon in the latter Institution. Mr. Harmon we learn is soon to leave for the East—to be absent about a year.

Mrs. R. S. Maclay, wife of the Chinese missionary, arrived on the last steamer from China, accompanied by her six children, all of whom speak the Chinese language fluently.

H. E. Highton, of this city, recently lost himself while hunting in the mountains near the Geysers. After having passed two days without food, he was found by two miners.

Arrivals.—Among the arrivals in this city last week, we notice the names of Ross Browne and family from New York, and Gen. Placido Vega from Mexico.

Dr. John B. Gray, one of the most eminent physicians of Marysville, was shot and fatally wounded on the evening of the 4th, by a man named Rufus Swett.

Rev. Mr. Ames lectured on the evening of July 3d at San Jose on "Good Society," for the benefit of the Ladies' Benevolent Association.

Jas. H. Carleton has been promoted to be Brigadier General by brevet, for meritorious services during the late war for the Union.

Chas. Westmoreland writes to the Humboldt *Register*, saying that he will be a candidate for Congress from the third District.

Dr. Newcomb has retired from the practice of his profession at Oakland, and will sail immediately for the Sandwich Islands.

Rev. J. M. Woodman is delivering a very interesting and useful series of Sunday evening lectures to the people of Chico.

Judge Shaffer, formerly of Stockton, is the Democratic candidate for Representative to Congress from Idaho.

A. C. Russell, according to a notice in the Mariposa *Mail*, will not hereafter be connected with that paper.

Madame Parepa Rosa has been sick with the measles, and has been obliged to postpone her concerts.

C. B. McDonald of the Oregon *Unionist* will become editor of the Oakland *Transcript*.

Rev. W. T. Lynch and wife were lately immersed at the Union Square Baptist Church in this city.

Rev. C. E. Rich is trying to raise funds for a Methodist Church at Oakland Point.

Dr. Thomas preached in the First Baptist Church of Stockton last Sabbath.

A. Morse, has been editor of the Grass Valley *National* since July 1st.

Rev. Dr. Atkinson has been dangerously ill at Forest Grove, Oregon.

Rev. A. L. Stone, D.D., has gone to Yosemite to spend a few weeks.

R. T. Montgomery resumes the editorial charge of the Napa *Register*.

Gov. Haight was not nominated by the New York Convention.

J. S. Slauson, of Austin, Nev., will be a candidate for Congress.

D. A. Sackett has been appointed Post Master at Petaluma.

Gen. Halleck has been making a visit at Monterey.

AGRICULTURAL.

The Agricultural Prospect.

There are many weighty suggestions in the following article from the Springfield *Republican*, which our farmers will do well to consider:

"It is established historically that nothing goes so far to steady the finances of a country as a good agricultural crop. The same gain in values cannot be made in manufactures or commerce, with half the immediate effect upon the economical condition of the people as when it is made by the 'bounty of nature, through a liberal harvest. And at no time, were we to trace back the industry of the country for twenty years, has the promise of agricultural prosperity been so bright as at present. For two considerations unite to secure an increase in values such as has not been known since 1848, that year of plenty with us and of universal scarcity abroad. Reliable advices from nearly all the Western, Middle, and Southern States assure us that the season is opening most auspiciously, and that an unusual breadth of land is being put under cultivation. Estimates of figures at this time would, of course, be wholly uncertain; but from the concurrent testimony of so many sections of the country there seems to be no exaggeration in saying that, with merely average good fortune during the summer, the yield of grain the present year must be at least twenty-five per cent. above that of last. The breadth sown in Wisconsin and Iowa is reported to be something astonishing. On the other hand, if we look abroad, we find an unusual scarcity prevailing, from the general failure of last year's crops. The entire supply has already been drawn close down; nearly everything has been eaten up, and in some parts of Europe famine has already set in, caused not in any sense by financial disturbances, or the cessation of manufactures, but from actual scarcity of breadstuffs. The deficiency in the French crops alone is estimated at 34,000,000 bushels.

That of England, also, was deficient both in quality and in bulk. All the north of Europe fell off greatly in its production; and in Stockholm, where oatmeal forms the most common and the cheapest article of diet, oats are now as high as in London. In Galicia and the eastern provinces of Prussia, extreme distress prevails, and even in New York, subscriptions have been called for to feed the famishing people of Sweden. In such a condition of things nothing but an abominably inflated currency could have checked a steady flow of grain from our ports; and indeed, as it is, the exports of the last six months show a most gratifying increase both in quality and price. Already New York reports a quickened demand from abroad. To be sure, the grain that is now in the ground cannot be well relied on for immediate export, but it will serve to justify the old supply being drawn down to the lowest point. Moreover, the amount available for export is never a fixed quantity, but of the most elastic proportions. Let the price of wheat but advance a few cents per bushel, and a far less amount will be consumed at home. Our own consumers will subsist more—as they can easily do—upon articles not available for export, and will thereby release a greater quantity for foreign consumption. So completely must all the existing supply be exhausted through Europe before the new yield, that under the most favorable condition of their own crops they could not begin to make good the deficiency. It is inevitable, therefore, that unless a further premium shall be put upon Russian and Polish wheat (gold) by the crazy expansion of our currency, the United States will be called upon, during the present year, to make the grandest contribution it has ever done to the grain markets of the world. There is no reason, except in our own ruinous finance, why our exports of agricultural products for 1867 should not be doubled in 1878, and thus a river of wealth be poured into the country, not to be squandered in the heartless and corrupting luxury of the city, but to encourage and enrich the tillers of the soil, and to promote every good and wholesome industry in turn."

Culture of Orchards.

The subject of the cultivation of orchards, in order to keep them in a healthy and vigorous state, so as to furnish the best fruit that shall sell at the highest prices,—is so important as to require line upon line, until a thorough improvement is made in the practice of most owners. This is thought to be less necessary at the West; yet a late member of the *Northwestern Farmer* has a valuable statement from P. Sutton:

"In the first place, never sow any kind of grain, or plant corn in an orchard; if you do you will rue it, for it is death to the thrifty and healthy growth of young trees. Plant potatoes, or some other *root* crops among your trees, and you will be surprised at their growth when compared with those among which grain crops are grown.

"In the fall of 1865, a man in Luzerne County, Pa., set out an orchard of several acres of apple trees, among which rye was grown the following season, and the result was just as might have been expected,—nearly one-fourth of the trees died the following summer, and those that lived made a feeble growth. In the fall of 1857, I set out an orchard containing fifty apple, twelve pear, and six cherry trees. It was cropped for seven or eight years with potatoes, and the result was, the trees made about two feet growth each year, except in 1863. This year they bore many apples, and did not make but about eighteen inches growth. Some of the Baldwins had from two and a half to three bushels of apples each, windfalls not included. The pear and cherry trees did equally as well as the apple.

"A distant neighbor bought one hundred apple trees of the same lot as mine, and set them in a sod, and the consequence was, his trees did not make two feet growth up to the above-mentioned time, and what is worse, a large number of them died, and the largest tree among them was not large enough to bear a peck of apples.

"I could cite many more instances, in some of which the difference between cultivated and uncultivated, is more prominent than the above."

Clover.

Clover differs entirely from the cereal plants in this respect, that it sends its main roots perpendicularly downward, when no obstacles stand in the way, to a depth which the fine fibrous roots of wheat and barley fail to reach; the principal roots of clover branch off into creeping shoots, which again send forth fresh roots downward. Thus clover, like the pea-plant, derives its principal food from layers below the arable surface of the soil, and the difference between the two consists mainly in this—that the clover, from its larger and more extensive root surface, can still find a sufficiency of food in fields where peas will no longer thrive. The natural consequence is, that the subsoil is left proportionably much poorer by clover than by the pea. Clover seed, on account of its small size, can furnish from its own mass but few formative elements for the young plant, and requires a rich arable surface for its development; but the plant takes comparatively but little food from the surface soil. When the roots have pierced through this, the upper parts are soon covered with a corky coating, and only the fine root fibers, ramifying through the subsoil, convey food to the plant.—*Liebig.*

How to Stop a Donkey from Braying.—Father Huc, that famous Catholic explorer of the interior of China, relates that on one of his long journeys among that strange people, his caravan embraced an unusual large number of jacks among the donkeys employed as carriers of the exhibition; that these jacks at every resting-place kept up such an intolerable braying, especially towards morning, as to render sleep impossible to the Abbé; that at last he complained of this to the master of the donkeys, who instantly replied that his gracious highness should be no more disturbed by this braying; that, sure enough, a quiet night with its refreshing sleep followed, and that on inquiring into the cause the next morning, he was pointed to the noisy jacks each with a heavy stone tied to his tail.

"That," said the driver, "is the way we settle them. The jackass stands upon his dignity, and will not bray unless he can straighten out his tail, and with a heavy stone attached he can't straighten it out, don't you see? Every time he tries it the weight on his tail pulls him down and shuts his jaw."

Manure for Potatoes.—I will give you a receipt for raising potatoes, that is worth the price of your paper for one year, to any farmer that is short of manure. It is as good as the best superphosphate of lime, and it will not cost half as much. I have tried it two years, and I am satisfied it is good on dry land. Take one cask of lime and slack it with water, and then stir in one bushel of fine salt, and then mix in loam enough so that it will not become mortar; it will make about five barrels. Put in half a pint in a hill, at planting.—*Ploughman.*

Southern Crops.—The New Orleans *Picayune* says:

"We are glad to record that the news from every quarter continues to betoken the reaping of large crops during the year 1868. Cotton is always so precarious and beset with so many dangers, from the seed to the collection of the cash balances, that it is hard to predict anything respecting it; but corn and such fruits as we have planted and in bearing, will, this year, yield bountifully—beyond anything we have enjoyed for years."

Smut in Wheat.—The Napa *Reporter* says: We hear of the appearance of smut in some wheat fields in our valley. So far, however, little fear prevails among farmers of any considerable damage resulting. Harvesting will soon commence. The yield promises to be up to the average per acre. More acres are under cultivation this year than any previous season, and the yield in bulk in consequence will be larger.

A correspondent sends the following for housekeepers:

"To keep away red ants, cover the shelf where they are troublesome with salt; then set on it butter, preserves, anything, with impunity. Did you ever see ants about a salt barrel?"

A practical culturist in Clackamas is about to introduce the culture of the cranberry in that county, from plants imported from the best stock in the Eastern States.—*Oregonian.*

MINING.

New Truckee District.—Our readers will remember that some three years since there was a good deal of excitement here in regard to the mines of New Truckee District, situated some miles north of Truckee River, and well down toward Pyramid Lake. The ores of this region are all of the kind known as argentiferous galena, and many of them are very rich, but heretofore the country has been almost inaccessible on account of its desert character and roughness. Now, however, the Central Pacific Railroad makes transportation easy, and the mines are again attracting attention. The railroad passes within six or seven miles of some of the principal leads, and the ores may now be brought to the railroad at a trifling expense, and shipped to San Francisco for smelting. These mines were deserted at the time the Meadow Lake excitement broke out, and little has been done with them since. An assay, which was made day before yesterday at E. Ruhling & Company's Gold Hill Assay Office, of an average specimen of argentiferous galena from the Imperial Consolidated Mine, yielded in silver at the rate of $169 80 per ton. Much larger yields were obtained when the mines were first prospected; doubtless, however, from choice specimens.—*Territorial Enterprise.*

Encouraging.—The San Bernardino *Guardian* of June 20th says:

"The news from Arizona in relation to the dis-

covery of new mines, of which we made mention in our last, continues to be of a very encouraging character. By a gentleman just from the river we are informed that these mines are immensely rich; the lodes are broad, and everything indicates that they will yet eclipse anything ever discovered in Washoe. Prospecting in these mines seems to develop the fact of the existence of numberless well defined and rich veins of silver ore. Indeed, Arizona seems to have a future before her, in regard to mining, which bids fair to eclipse the interests which in former years pertained alone to Nevada and the northern part of California. The prediction of Von Humboldt, after his mineral explorations in that country, that it would in future be known as the richest mineral locality in the known world, is surely beginning to be verified."

PLEASANT VIEW is the name of a newly discovered lode, in Colorado, which is making its owners rich. It is located on the Gunnell Hill, and crosses that lode nearly at right angles. It was discovered by John Kinnell, Esq., and is owned by him in company with E. C. Beach. The crevice of surface ore is ten feet wide, and the lowest average yield thus far in stamp mill has been two hundred and twenty dollars per cord in currency. The cost of mining is very small and the profits accordingly very large. The mine is to be worked extensively this summer. As the ore is very much decomposed, it is easily and readily worked. The owners are certainly among the fortunate ones. The gold is of fine quality, and assays show it to be purer than most. Thus far four men have been able to take out a cord a day. —*Miner's Register.*

GEN. GRANT CO.—This ledge, located on Rattlesnake creek, is now looking very well. Three tunnels have been run in on the ledge at different points, from all of which good rock has been taken. The lower tunnel is about 60 feet in length, from which, two weeks ago, 90 tons of rock were taken out and crushed at the Forest Springs mill, yielding $61 per ton. In the second tunnel very good ore has also been taken out, which, we are informed, paid about $46 per ton, while rock from the upper tunnel has paid on an average about $40—the last crushing consisting of about 200 tons. A short time ago 275 feet in the Grant sold for about $5 per foot, so we are informed.—*Grass Valley National.*

THE KENNEDY MILL.—The new twenty-stamp mill that is being erected at the Kennedy mine, near this place, by Fleming, Langford & Co., is progressing finely, and will be ready to commence crushing rock in about six weeks. Several tons of the rock from this lead was tested at the Coney mill some time since, and the result was found to be sufficiently encouraging to warrant the erection of the mill above mentioned, and it is confidently expected that it will soon be one of the best paying leads in this vicinity. —*Amador Despatch.*

FIRST SHIPMENT.—The first shipment of sixteen flasks of quicksilver was received in this city last week from the newly opened Phœnix Mine in Pope Valley, Napa County. There is said to be ore enough out to supply the works for three months. This, we believe, is the first shipment of quicksilver from any of the Napa County mines.—*Mining Press.*

HYDRAULIC.—Vast excavations are being made by the hydraulic miners, this season, at Eureka, Craig's Flat, La Porte, and other diggings were large streams are playing on the banks. This has necessitated the removal of several buildings, and it seems probable that the profits of the season's work will be double that of ordinary seasons.—*Downieville Messenger.*

DRIFTING.—The American Mining Co., at Morristown, having found the pipe clay in their diggings too expensive to work by the hydraulic process, have set in drifting with several gangs of men, and are confident of making it pay much greater dividends. They will pipe no more except near the surface.—*Downieville Messenger.*

COAL MINES.—Improvements are progressing at the Bellingham Bay coal mines. A new shaft is just started, believed to be the largest on the coast west of the Sierra Nevada, being twenty-one feet, with three apartments. Work upon this is progressing very rapidly. *Columbia Press.*

WEHE LEDGE.—The Wehe Co., have got their tunnel into the ledge, and find the rock as rich as it was above. The prospects are excellent for a paying mine. Further particulars after a time.—*Downieville Messenger.*

THE Puget Sound Milling Company have decided to build a large mill on the Chehalis.

A FORTY ounce lump of gold has been found in the Daley claim, Main Gulch, Columbia.

USEFUL AND CURIOUS.

Three Years Under Water.

The Cairo *Democrat* gathers some interesting items relative to work and life under water, from a gentleman who has been a professional diver for eighteen years. It says:

"The use of a bell in diving is now discarded. The diver wears a water-tight armor over his entire person, except the head, which is covered by an inverted metallic pot, in which the head can turn and move at ease. Thick, transparent glass is fixed in front to serve as windows; and to prevent accidents this glass is protected by steel guards or fenders. Equipped in this armor, the gnide puts on a pair of lead-soled shoes, weighing each twenty pounds, lashes to his back and breast a piece of lead weighing forty pounds, attaches the tube, through which he receives air, to the back of his head-pot, and then is ready for his submarine explorations. He generally descends to the bottom of a river by the use of a ladder, but can, without incurring any risk, jump from the boat and sink to the bottom. He informs us that he has remained under water five hours at a time. The great weight of lead fastened upon his feet and body is necessary to counteract the buoyancy of the air furnished him by the pump. While on the boat the armor and weights form a load for a strong man. Under water they impose no realizable weight, and in no way impede motion. He has, while under water, often clambered up stanchions, jumped down hatchways, a distance of twelve and fifteen feet, with much greater ease and less risk than he might have performed the same feats out of the water. Taking with him his tools, he has frequently worked for hours at a time, patching up the bottoms of snagged steamers, sawing boards, boring holes, driving nails, etc., with perfect ease and accuracy. When the water is clear, he can recognize shapes at a distance of two or three feet, and at a distance of six inches he can determine the different kinds of timber. When the rivers are high and the water is muddy, everything is impenetrably black, rendering it immaterial whether his eyes are open or shut. But, with him, the character of the water is immaterial. He has been at the business so long, that, by the mere sense of touch, he can instantly determine what portion of the wreck he is exploring, can cork up cracks, or patch up holes; can determine the character of the sunken cargo; pass from hatch to hatch through the hold, and do everything else under water that an expert blind man might do on the land. He says that he breathes fully and satisfactorily; that there is no stifling sensation, however long he remains under. He is of opinion that about three years of his life have been spent under water."

New Theory.

A few months since a theory was broached respecting the movements of the poles of the earth which has some interest, though we know not whether it has any scientific value. It affirms that the north pole is describing an orbit in the heavens, which orbit it will complete in about 25,000 years. Now the pole points to the north star, but in time it will change its direction, and make a circle, returning at last to its present position. The effect of this revolution is to give seasons or periods of long duration. Corresponding to them we have each year a spring, summer, autumn and winter—each period say six thousand years long. The present period is that corresponding to our summer, but it is passing its middle portion, and the great autumn is approaching. Nor is it winter at the south pole, but is gradually changing into spring. Hence it is that we explain the excessive cold that is felt in the southern regions, and the existence there of immense icebergs and glaciers. Formerly all the north was covered with glaciers, ice extending down nearly to the equator, and this will again be the case when the north pole moves around to the position it had some twelve thousand years ago.

According to this theory, all the northern regions of the earth will in a few thousand years be uninhabitable, and the civilization of the world must be found south of the equator. What say our men of science to these prognostications?—*Hartford Churchman.*

AN EXTINCT RACE.—One of the most remarkable races that ever inhabited the the earth is now extinct. They were known as the Guanches, and were the aborigines of the Canary Islands. In the sixteenth century, pestilence, slavery, and the cruelty of the Spaniards totally exterminated them. They are described as having been of large stature, but of a singularly mild and gentle nature. Their food consisted of barley, wheat, and goats' milk, and their agriculture was of the rudest kind. They had a religion which taught them of a future state of rewards and punishments after death, and of good and evil spirits. They regarded the volcano of Teneriffe as a place of punishment for the bad. The bodies of the dead were carefully embalmed and deposited in catacombs, which still continue to be an object of curiosity to those who visit the islands. Their marriage rites were very solemn, and before engaging in them the brides were fattened on milk.—*Annual of Scientific Discovery.*

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

Also, SCHOOL FURNITURE.

WARREN HOLT,
305 Montgomery Street.

GENERAL SELECTIONS.

Midsummer.

Past many a shady nook,
The babbling meadow's brook,
'Twixt grass-grown banks, with feathery fern abounding,
Glides on its devious way,
Through all the livelong day,
While fields and woods with summer songs are sounding.

Far off across the vale,
Where the light vapors sail,
Veiled with thin mist the purple hills are sleeping;
And in the ripest field,
Amid the summer's yield,
The farmers now the golden grain are reaping.

Beside the cottage porch,
The sunflower's shining torch,
That marked with rings of flame the summers coming,
Stands with proud splendor there,
Where all the noontide air
Is drowsy with the sweet bees' idle humming.

Within the garden blows
The fragrant summer rose,
Whose blushing leaves with sweet perfume are laden;
And swaying gently there,
The lily passing fair,
Hangs her meek head, like some retiring maiden.

O! glorious summer, stay,
Nor hasten yet away
From the sweet fields with thy warm beauty glowing;
My life has reached its prime,
Its radiant summer time,
And all my blood with added warmth is flowing;

The day at last declines,
The west with splendor shines,
As slantwise now the sun's last beams are falling;
And all the dazzling air,
Bright with the sunset's glare,
Is filled with myriad voices blithely calling.

—*Atlantic.*

Hawaiian Religion.

It may be to some minds almost a palliation of the somewhat unpleasant and continuous barbarity to know that they were a religious people. Throughout the land were seen the *heiaus* (temples) which they had erected to the gods, consecrated with many ceremonies and frequented for religious offerings, and whose ruins are to-day visible in various localities. The priestly office was hereditary, and they who filled it numerous, and of very powerful influence. The gods they worshipped were as numerous as the sources of danger to the barbaric mind. Every high chief had his family priest, who went always with him into battle, carrying the image of the chieftain's god. The essence of their religion was only the fear they entertained lest some calamity should come upon them. Their gods were in all things that could bring them misfortune; in nothing that brought them any favor or benefit. To them was a special god in every volcano, in every earthquake, in every singular and unusual appearance of nature. There were gods of war, of the sea, of the winds; in every dangerous cavern lurked a divinity, and over every precipitous cliff, and for their protection they placed in those localities images of the presiding deities.

But to call any belief which could prevail among such a people religion, is to give dignity and character to the common expression of a gigantic selfishness and slavish fear, with which was never allied anything noble or elevating, nor with whose existence was ever any sentiment or feeling of duty or obligation, of love or gratitude. They appealed to the gods that their enemies might be destroyed; they prayed that the tempest and the earthquake might be averted; they offered sacrifices of animals in the building of a temple, and whenever a house had been built, before entering to dwell in it, they performed mysterious ceremonies to exorcise the evil spirits that might lurk about. They prayed in sickness to the little gods of the mountains, the hills, the streams, to turn away misfortune and disease. Sacrifices of some living thing accompanied every religious rite of importance. Held in a state of degraded serfdom, and bearing the burdens imposed by cruel and exacting chiefs whom they knew to be their superiors, what else could a god be but a great chief of temper and character like theirs, only vastly superior in size and strength, and a disposition more savage and more exacting? Their religious idea could be nothing more than a scheme of appeasing this over-wrathful spirit, that was ever waiting for an opportunity of inflicting misery—a system of bribery, in which it was not always certain what nor how great offerings to bring. But the priests were the teachers, and in them was put implicit faith. By them, under the direction of the gods, were the sacrifices designated, and by them often for months, and sometimes years beforehand, were the human beings marked out for immolation—and the chroniclers intimate that they were chosen among those most hateful and offensive to the priests. The sacrifice which seemed to best propitiate the gods was the human. It came before battle accompanying the prayer for victory, and came after it, not in grateful remembrance, but because the gods demanded it. It came at the consecration of heathen temples, when a chief had died, and in celebration of any great public event. If it were not so appalling, it would be ludicrous to remember how Umi, a celebrated king of Hawaii, after a victory, offered human sacrifices to his god, who, after several were slain, being insatiate, called for more, "which were granted," says the chronicler, "until none were left, except Umi and the priest."

Even among them there was some pretense to science. The art of the sorcerer was prevalent and feared, and as among the ancient Greeks there were those who could read the entrails of dead animals, who could divine the future from the flight of birds, and could read auguries in the heavens, the clouds, the rainbow and the storm. There were physicians among them who were as mysterious in their manner and as mysterious in their prescriptions as any modern Æsculapius, and, if the chronicles tell truly their remedies, new terrors were added to disease by their presence. They had some knowledge of herbs which had been first received from the gods by *Koleamoku*, and by him taught to two disciples. The profession was hereditary, and being exceedingly lucrative it was kept always in the same family. They feigned great knowledge of diseases, and it was believed that by prayer and ceremonies of a wonderful nature they could even inflict such diseases upon one as could not be cured. Various herbs were cooked or mashed with a stone, mixtures of which were given in allopathic doses. "Their knowledge of the medicinal properties of herbs," writes one historian, "was considerable," but there is a touch of scepticism as he concludes, "though fatal results often followed their application." Nature taught them that friction would mitigate many minor pains, but it is hard to believe that the same kind mother ever hinted to them those more singular prescriptions according to which "stones of twelve pounds weight and upwards were rolled over the afflicted parts," and "patients were steamed over ovens of hot stones, or held over the smoke of fires prepared from green succulent herbs." It is less difficult to believe, that, if moved by anger or hatred in the treatment of sick persons, they could even cause death.

They knew there was a future state for some, for the priests brought messages to the living from the dead, which at times seemed to redound mysteriously to the priestly benefit, and they were accepted as divine revelations. The souls of some of the people "went to Po (the place of night) where they were annihilated or eaten up by the gods;" others went to the dwelling places of *Akea* and *Milu*, former kings of Hawaii, where darkness prevailed, and where "lizards and butterflies were the only articles of diet." The chiefs, the priests had kindly provided, were conducted, by "*Kaonohiokala*, the eyeball of the sun," to some unnamed place in the heavens, whence they occasionally returned to watch over their people. What happy abode was prepared for themselves, the cunning priests never revealed; but for the common people who lived here in servitude, "no hope enlightened their souls for the future."—*Hawaiian Civilization, in the Overland Monthly.*

The Pulpit a Popular Instrument.

The real nature and distinctive purpose of the pulpit is in large measure forgotten. Essentially it is, and ever has been, a popular, not a scientific instrument. It belongs to the "congregation" rather than to the "schools," addresses itself to the indiscriminate many rather than to the select few. Its sphere is life, not speculation; religion, not theology. Its business is not to solve problems, but to stir and quicken souls; and it does so not by the development of a philosophy, but by the delivery of a message. What it was in the days of Paul, such it is essentially still, the proclaiming of certain great facts concerning human sin, and the divine remedy, which require not so much to be proved as to be manifested; and which, when so manifested, are themselves their own witnesses; and so its speech and its preaching are not with excellency of speech of man's wisdom, but by manifestation of the truth commending itself to every man's conscience in the sight of God. In one way indeed it deals, and often effectually deals, with speculative problems too; but it deals with them not speculatively, but practically. It relieves the pressure of intellectual difficulties not so much by solving them, as by superseding them; by placing the soul on such a vantage ground of tried and experienced truth, that it can quietly and patiently wait the solution of still outstanding questions, imparting to it such an assured sense of the reality of the Divine, as that it may well meanwhile endure its mystery. More than this it were surely unreasonable to ask of the great body of Christian preachers. They are, we cannot but think, wise to remember that the church is a church, and not a lecture-room or scientific institute; and to confine themselves in the main to such work as can alone be fitly and effectually accomplished there. There will doubtless ever be, and it is unspeakably important that there should be, special and exceptionable men who are called to special and exceptional work; men who, like the Alexandrian Clement of old, and others of like spirit who might be named in our day, whose mission is not to the many but the few, and whose business and life-work is to wrestle with the problem of thought, rather than with the immediate and urgent interests of life. But in ordinary and mixed congregations, such a style and line of teaching were alike an impertinance and an abortion, inevitably raising difficulties in minds that were before untroubled, and failing to solve the doubts of those whose faith is already shaken. One thing only beyond the simple and earnest declaration of the gospel message may the class now in our view fairly ask of the ordinary Christian pastor. If he cannot help them in their difficulties he ought at least to respect them. If he pretends not to grapple with those deep and awful questions, with which other souls are as in agony wrestling, he should at least show that he recognizes and feels their presence, and approach with trembling steps the ground where they lie. Let him stand as in the shadow of a great mystery, and speak as one who knows but little, and who tenderly feels for those who know still less. In a word, if he cannot speak to souls who are groping for the light with the voice of an oracle, let him speak at least with the voice of a brother; and if he cannot heal, let him gently touch their wounds.—*Presbyterian Monthly.*

The Mural Paintings of Pompeii.

How sunny, and cheerful, and alive with the spirit of imperishable beauty, are those halls in the basement-story of the Museum, contrasted with the haggard, suffering saints and tormented martyrs of later Neapolitan art, in the halls above them! Even in the houses of Pompeii, where the glaring sun looks down into the roofless chambers and illuminates every incomplete feature meant to be unobserved in the twilight of the day, or the lamp-light of the banquets, and every crack and scale of time and ruin, the pictures exercise an undiminished charm. They suggest wealth and luxury, it is true, yet at the same time they speak of an artistic culture, so general and of so high a stamp, that one knows not wither to turn, to match it at this day. Yet the golden era of Grecian painting was already long past, and these pictures were to the then still-existing masterpieces, as the figures of—(let the reader here insert the name of an inferior artist!) to those of Titian or Tintoretto. The Pompeiian pictures have, it is true, limited perspective (partly because depth is purposely omitted from the backgrounds), little foreshortening,

little *chiar' oscuro;* yet they show enough of each to justify us in supposing that the great masters achieved as much, in this respect, as the nature of the vehicle in which they painted would allow. The Pompeiian artists seem to have been fully conscious of what was lacking to them, in the astonishing skill with which they generally avoid the necessity of foreshortening and perspective.

One fact, evident to any one who sees the collection, is worthy of notice. In hundreds of pictures, a single example of disagreeable, inharmonious color can scarcely be found. The instincts of the ancients, never equalled since their time, in regard to form, appears to have been as true and delicate in regard to color. The common workmen dealt in ruder effects, and was generally ignorant of the management of half-tints, which is so charming in the best pictures; but if he never triumphed, at least he never offended.

Our modern life is very barren of grace and beauty, when contrasted with that of Pompeii, where the vulgarest wine-shop, and the poorest abode of the mechanic, had its ornamental frescoes. Here, too, is another remarkable evidence of the skill of the cheapest workman. Where the paintings are simple patterns or arabesque borders, they were never executed by means of cut-out models laid upon the plaster and painted through, but with the "free hand." The workman had a ruler and compass, but no more; and the slight differences in the repetition of the same forms in a border attest his dexterity even more than his want of it.

Painting and sculpture were necessities of all domestic or public life in Pompeii. Diomed, Marcus Lucretius, and Cornelius Rufus, had their mosaic pavements, their marble and bronze statues, their grottoes of shells, and their illustrations of Homer; but the fuller and soap boiler had also their terracotta heroes and deities, and the pictures of their profession, on their walls. In the wine-shop and the eating-house, the guests sat under panels of still-life which no doubt made their mouths water. It is as difficult to find an undecorated wall in Pompeii, as to find one tastefully decorated in New York. The town must have been a grand panorama of Art and every street, or arch, or atrium, or peristyle an harmonious picture. What, then, must have been Baiæ, and Capua, and the one supreme Rome!

We are loth to believe that any talent or faculty once possessed by Man, can have perished. We cannot even admit, without a sense of mortification, that any people were more generally developed in any particular direction, than ourselves. Yet, when we learn how universal was the instinct of proportion among the ancients—how taste and the love of symmetry came as natural to them as hunger or gambling, and then consider how slowly and painfully we moderns must be educated, in order to appreciate correctly their commonest works — what monstrosities we bow down before, and worship—how inert is the love of harmonious form and color among the masses of the people; when all this is clear, we realize that mankind has lost that much of its grace and the Earth that much of her glory.—*Putnam's Magazine.*

Nationalism.

As the City-State was the normal type of free communities in antiquity, and as the Feudal system was one of the normal types of government in the middle ages, so is the National Polity the normal type of our own epoch; not indeed Centralism.

Large nations have been formed out of the fragmentary peoples on the continent of Europe, England alone dating the blessing of a national polity over a thousand years back; others are in the act of forming; others, already existing, are carrying out more distinctly or establishing more firmly the national element of their polities. For this reason, and because the existence of many nations deeply influences our civilization, the present period will be called the National Period. It began plainly when so many other great things began—in the middle of the 15th century, but the process of Nationalization concerning the languages and the literature of the different countries commenced at an earlier time.

The three main characteristics of the political development which mark the modern epoch, are:

The National Polity;

The general endeavor to define more clearly, and to extend more widely, Human Rights and Civil Liberty;

And the decree which has gone forth that many Leading Nations shall flourish at one and the same time, plainly distinguished from one another, yet striving together, with one Public Opinion, under the protection of one Law of Nations and in the bonds of one common moving Civilization.

The Universal Monarchy, whether purely political or coupled with the Papacy; a single Leading Nation; Confederacies of petty sovereigns: a Civilization confined to one spot, or one portion of the globe—all these are obsolete, insufficient for the demands of advanced civilization; and attempts at their renewal are ruinous.

In ancient times one people always swayed and led. Hence the simplicity of chronological tables presenting the events of that time; and all ancient states were short-lived. Once declining they never recovered. Their course was that of the projectile —a rise—a maximum—a precipitate descent. Modern nations are long-lived and possess recuperative energy, wholly unknown to antiquity. They could neither be the one, nor possess the other without national existence and comprehensive politics, and without the Law of Nations, as we know it now, which is the manly idea of Self-Government applied to a number of independent nations in close relations with one another.

The civilized nations have come to form a community of nations under the restraint and protection of the Law of Nations which rules *vigore divino*— they draw the chariot of civilization abreast as the ancient steeds drew the car of victory.—*Francis Lieber, in the Presbyterian Quarterly.*

THE COLLEGE SCHOOL.

SENIOR ENGLISH AND CLASSICAL DEPARTMENT.

Rev. Thomas Kirkland, A.M., Master, with three Assistants.

JUNIOR ENGLISH AND CLASSICAL DEPARTMENT.

L. W. Reed, Master, with three Assistants.

PRIMARY DEPARTMENT.

Miss M. G. Clark and Miss. L. Wells.

☞ Book-keeping carefully taught in the Junior and Senior Departments.

☞ Instruction in French, Spanish, German, and Drawing, given in all departments of the School.

The Chemical Laboratory, on Stockton Street, has been fitted up with costly furnaces and the best appliances for the practical study of Chemistry, in all its branches. Courses of Lectures on Chemistry, Metallurgy, and Mining are given by Prof. Price, during the first four months of the year. The Institution is provided with ample Buildings, valuable Philosophical and Chemical Apparatus, spacious Play-grounds, and an open-air Gymnasium.

For Terms and further particulars, address

REV. P. V. VEEDER.

Publisher's Notice.

Buy, Sell, and Lease City and Ranch Property; Negotiate Loans; Collect Rents; Draw Legal Instruments, etc.

We invite special attention to our Agency from persons in the country, who are desirous of securing homes or investing in the flourishing city of Oakland; also of those who are offering Ranch Property for sale, or in quest of the same.

Our facilities as Real Estate Agents will enable us to furnish reliable information to our customers, and they may depend upon receiving from us thorough and careful attention to their business.

FAMILY READING.

Grandfather's Pet.

This is the room where she slept,
  Only a year ago—
Quiet, and carefully swept,
  Blinds and curtains like snow.
There, by the bed in the dusky gloom,
  She would kneel with her tiny clasped hands and pray!
Here is the little white rose of a room,
  With the fragrance fled away.

Nelly, grandfather's pet,
  With her wise little face—
I seem to hear her yet
  Singing about the place;
But the crowds roll on, and the streets are drear,
  And the world seems hard with a bitter doom,
And Nelly is singing elsewhere—and here
  Is the little white rose of a room.

Why, if she stood just there,
  As she used to do,
With her long light yellow hair,
  And her eyes of blue—
If she stood, I say, at the edge of the bed,
  And ran to my side with a living touch,
Though I know she is quiet, and, buried, and dead,
  I should not wonder much;

For she was so young you know—
  Only seven years old,
And she loved me, loved me so,
  Though I was gray and old;
And her face was wise and sweet to see,
  And it still looked living when she lay dead,
And she used to plead for mother and me
  By the side of that very bed!

I wonder, now, if she
  Knows I am standing here,
Feeling wherever she be,
  We hold the place so dear?
It cannot be that she sleeps too sound,
  Still in her little night-gown drest,
Not to hear my footsteps sound
  In the room she used to rest.

I have felt hard fortune's stings,
  And battled in doubt and strife,
And never thought much of things
  Beyond this human life;
But I cannot think that my darling died
  Like great strong men, with their prayers untrue—
Nay! rather she sits at God's own side,
  And sings as she used to do!

—*Chamber's Magazine.*

Hidden Lives.

"A vain, frivolous character; I never knew any good of him."

"Or any harm, you might add. If Will Parsons is a nonentity, he is certainly a harmless one."

"But don't you suppose," continued Mr. White, the first speaker, "that each individual has a mission to perform, a character to sustain before the world, and an account to render of his time, instead of frittering it away in such vanities as Will Parsons does? Why, I don't believe that man has a thought beyond the style of his coat and the cut of his whiskers."

"He attends church regularly, does he not?" queried Mr. Banks, who seemed disposed to make the most of the young man in question.

"Yes; but what has that to do in the forming of a Christian character, if the heart is not right? The heart must be right, sir, before God, if he would lead a perfect life," answered Mr. White.

"Few of us do that," was the reply, "and God must be the judge of the heart."

"'By their fruits shall ye know them.' Will Parsons may have many good qualities, but he is frivolous and shallow, and I should think twice before going into business with him. Diamonds and perfumery are not sins in themselves, but we know what a love of such things leads to."

Mr. Banks looked at the gray business suit of his friend, and his hard, matter-of-fact face, and smiled at the conceit ot diamonds and perfumery on him. Will Parsons was fair, with brown curling hair, and frank blue eyes, and hands white and shapely as a woman's, and his form was slender and graceful; while Mr. White was rather Aldermanic. But he said no more then, and after making up his mind to conclude the business in prospect between them, went over to Mr. Parsons' store.

He was a druggist, and had the neat, spruce, appearance habitual to the profession. He was very well and carefully dressed, and on his little finger wore a large cluster diamond ring. Foppish and even vain in appearance, his face yet wore a frank, innocent look, as if there was nothing in his whole life to conceal.

He was talking to a poorly-dressed woman, to whom he had just given a roll of bills, and was evidently unwilling to hear her thanks.

"It is all right," he said, "I hope he will succeed."

Mr. Banks knew the woman; she had applied to Mr. White in his presence, for the loan of a small sum of money, enough to pay her son's expenses to a neighboring town, where he was promised work. Mr. Banks had not advanced the money when Mr. White had refused it, and he expressed his surprise that Mr. Parsons should have helped her.

"It was just such help as that which turned my fortune for me, and made me independent." said Will, carelessly, and he dismissed the subject.

Mr. Banks became his partner, and they did a flourishing business. Will Parsons was shallow, as Mr. White had predicted; he never talked politics, nor books, nor seemed to take any interest in current events, nor ever questioned the great problem of humanity, nor found fault with the universe. If a beggar applied to him for help, he gave it, nor waited for the shivering recipient of his charity to run the gauntlet of the moral law. He would drop a prescription to caress a child or a dog, and flirted innocently with any young lady who bent over his counter, but without ever causing a blush or a heartache. He paid his minister and his pew rent without being asked, and subscribed to an amusement fund for young people. But when the deacon asked him to take a class in the Sabbath School, he refused, and was pounced upon in consequence.

And every Sabbath afternoon he walked off jauntily, swinging a dainty cane on his little finger, his perfumed handkerchief just visible from his coat-pocket, his lavender kids of the nicest fit, and a gay, happy expression on his countenance.

"Going to walk," people said; "he ought to be ashamed of himself for strolling out so on Sunday."

He never contradicted them, or seemed to care what they said. Just beyond the town lived an old rheumatic woman, who on Sunday watched for "her boy." She had been Will Parsons' nurse in childhood, and was now a pensioner on his gratitude. Every Sabbath afternoon he walked out to see her, read to her, and drink tea with her, and it repaid all her week of aches and pains to see his handsome smiling face across the table, as he ate her bread and butter and drank her "Young Hyson" with a relish. The book out of which he read was the Bible, and it was a pleasant sight to see the two—she so old, and withered, and bent; he so young, and straight, and ruddy—the attention of both riveted on the sacred pages, and the light of the setting sun flooding the room with a golden glory, as if the presence of an angel were near.

"You're a brave boy," the old woman would say, "to comfort me in my loneliness and ignorance, and God will bless you for it when I am gone, and your old age will be a happy one."

But old age, with its cares and trials, and its weakness and infirmity, was never to be for Will Parsons. They had not missed his graceful form from the street, or lost the sound of his gay, ringing tread, before the word ran through the community with a fearful thrill; "He is dying!" A sudden cold had produced diptheria, and Will Parsons was beyond the reach of doctor's aid.

"Oh!" cried Mr. White, when he heard it, "his poor soul!" and he hastened to his bedside.

Mr. Banks was supporting the head of the dying man, friends knelt around him in anguish at this sudden blow, but he was calm and peaceful—"just going home," he said, with a serene smile, as Mr. White bent over him in great distress.

"Have you—have you experienced a change?" he asked, solemnly. "Do you feel willing to die? is your peace made with God?"

The young man looked at him, and smiled with whitening lips, as he feebly said:

"God so loved the world—that He gave His only Son that whoever believed on Him should not perish—but—have—everlasting life."

"But you—you—are you sure that He has accepted you?"

"Through the merits of his blood, yes! There is a ransom, oh, how rich a ransom, in the blood of Christ. I have always felt and believed it, but it never seemed so strong as now. Dying grace! Dying grace!"

He failed after that rapidly; but just before he died he drew the ring from his finger and gave it to his sister, and then folding his hands fell peacefully asleep.

A few days after the funeral Mr. White called in to see Mr. Banks, who was engaged in settling his late partner's business.

"I was never so astonished in my life," he said, "as when I heard that last conversation from Will Parsons' lips. To think how mistaken I had been in his character. I felt rebuked to see him die with such perfect reliance on the goodness of God, while I am distracted with doctrines, and evidences, and doubts. It's a mystery to me."

"His life is the clearest record I ever saw," said Mr. Banks. "There is not a debt against him, and I believe no man in the place has as large a list of charities. I am not sure that he has an enemy. If he did wear broadcloth, he paid for it with his own money, and I know that with all his dressing no man spent less thought about it. He had felt the stings of poverty, and he lived to enjoy his wealth in his own way. I wish I was as sure of Heaven to-day as he is."

"But why did he not become a member of the church and let his light be seen?" asked Mr. White.

"He intended to, but I believe had some doubts about his being prepared. He regretted on his death bed that he had not given this final testimony for his Lord and Master, and would have immediately done so on recovering."

"We ought not to make paths of our own when God's way is clear. 'Nearer to Thee' should be the expression of every Christian heart," said Mr. White.

"It was his intention to join she church here," replied Mr. Banks. "He is now a member of the church triumphant. God judges the heart, and in many and many a life which we suspect, he sees the hidden good. Oh! Brother White, how thankful we should be that it is God, and not man, who will judge us that day. Who can see with divine sight the indwelling love, and charity, and Christianity that circumstances may have failed to develope. We doubted poor Will Parsons, and many despised him for his worldliness: yet, in his short life, I believe he did more good than we with our bigoted ideas ever can do, for he had no malice toward any one, and was ever ready to help the weak and the poor and afflicted, and had a kind word and a smile for all. If his soul held no depths of greatness, it held no depths of sin, and he was not afraid to go out into the great beyond when the Father called him."

"But I am very much surprised," said Mr. White; "very much surprised."

And so we all will be some day, when we see how many dim lives will come out of their earthly eclipse into the full brightness of Heaven, there to lead all the rest, to see how many silent charities will go up to form a bright and shining ladder, whereon are angels ascending and descending; to remember that faith, hope, and charity are embraced in the code of Christianity, "and the greatest of these three is charity."

"In essentials unity;
In non-essentials purity;
In *all things* charity."

—*Chicago Presbyterian.*

IF you would live to purpose, and live long, live industriously, temperately, regularly, all the while maintaining a conscience void of offense towards all.

THE perpetuation of virtue and intelligence is cheaper than the perpetuation of crime and ignorance.

HE who saves when he is young may spend when he is old.

A MAN of words and not of deeds
Is like a garden full of weeds.

Young Folks.

Three wishes.

Three children once, on a bright summer day,
Having fairly tired themselves out at play,
Lay down on the banks of a ripling stream,
To dream of the future, as young hearts dream;
And tell over each to the other again,
The deeds they would do when they were men.

The first one carelessly lifted his head,
And his dark eye flash'd as he proudly said:
"A few short years, and the sound of my name
Shall ring through the earth as the voice of fame!
I will lead men on the field afar!
I will come from thence with the spoils of war!
A mighty power will I hold in my hand,—
Thousands shall wait on my least command;
The fairest and bravest for me shall live,
And the laurel wreath, and the sounding lay,
And the rush of music, shall greet my way!"

The second look'd up with his eye of blue
Flash'd prouder than his of the darker hue;
"Boast of your slaves with their suppliant knee!
You and your peers bend your souls to me;
My life shall be like a beautiful dream,
Toilless and careless, by thine, will it seem;
I will send my fancy on gossamer wings,
Roaming the earth for beautiful things:
But the pen that I wield with my own right hand
Shall mightier be than your strongest band;
It shall master the heart with its exquisite skill;
You shall laugh, you shall weep, hope, or fear, as I will!"

But the third had silently stolen away,
While his playfellows talk'd of the future day;
For he fear'd, if he told of his choice on earth,
It would only awaken their mocking mirth.
But a vision flitted across his thought
Of happiness only by labor wrought:
Care and toil he would willingly prove,
Might it only be a "labor of love."
For well he knew that the joys that spring
From the power to remedy suffering,
Come back to the heart in its hour of sorrow,
With sweeter voice than fame can borrow.

Little one, cease from thy laughing glee,
Listen a moment, and answer me;
Now, as I show these pictures three,
Which of them seemeth the best to thee?

—*Ella R. Wolcott.*

Didn't Think.

Opening the door of a friend's house one day, I made my way through the entry to the small back court, where Ned, the only son, was crying bitterly.

"Well, Ned, what is the matter?"

"Mother won't let me go fishing. Harry and Tom are going to the harbor, and I want to go."

Here Ned kicked his toes angrily against the post to the great danger of his new boots.

"Whose little dog is this?" I asked, as a brown spaniel came bounding up the garden walk.

"It is mine," cried Ned, in an altered tone; "didn't you know I had one?"

"No, indeed. What a fine little fellow. Where did you get him, Ned?"

"Father bought him for me. He is so knowing; and I teach him many things. See him find my knife," and Ned, wiping away his tears, threw his knife into the clover. "There, Wag," said he, "go and find my knife."

Wag plunged into the grass, and after a great deal of smelling and wagging, he came triumphantly forth, and brought the knife to his young master.

"Give it to him," said Ned, pointing to me, and Wag laid it at my feet.

"This is a knife worth having," said I; "four blades."

"'Tis a real good one," said Ned; "father gave it to me on my birth-day; and he gave me a splendid box of tools, too."

Ned now looked up brightly, and quite forgot his crying.

"Let me think," said I. "Was it this knife that you hurt your foot so with?"

"Oh, no," cried Ned; "that was done with the axe; but I've got well now."

"I was afraid that you would be laid up all the Spring."

"Well, it was mother's nursing, the doctor said. Mother and father took very great care of me. It was lonely staying in the house so; but mother used to leave her work and read to me, and father often stayed with me."

"I should think you had very kind parents, Ned." The boy looked down on the floor, and a slight pout puckered his lips. "I suppose there are none who have your interest and happiness so much at heart."

"But I want to go fishing," muttered Ned.

"And can't you trust them, Ned, and willingly agree to their wishes? You may not know the reason why they object to your going; but, from all your experience of their kindness and wisdom, are you not sure that they would not cross your wishes without good reason for doing so? And surrounded as you are, by so many proofs of their love, will you sit there and murmur and cry, and fill your heart with angry and stubborn thoughts, because of one little denial of your wants? Is not this a poor and ungrateful return for their kindness? It is little enough that a child can do for a parent, and that little he ought to do most cheerfully. I suppose the best return a child can make to parents is a cheerful obedience. How small that seems. And will you grudge giving that, Ned?"

Ned looked very sober, and tears started into his eyes. "Oh, sir," said he, humbly, "I didn't think of all this—I didn't think of it."

"Didn't think" is at the bottom of a great deal of our ingratitude and murmuring against both our earthly parents and our Father who is in Heaven. —*Children's Friend.*

The Brave Dog "Bobby."

Some years ago, a ship bound for China, had on board, among other passengers, an officer, his wife, their only child, a little boy five years old, and a large Newfoundland dog called "Bobby."

Everybody in the ship liked "Bobby," he was so good-tempered and frolicsome; but the little boy was the dog's constant play-mate. He was as fond of Bobby as Bobby was of him. One evening, while they were romping together, the ship gave a roll, and splash went the child into the sea!

The little boy's father, half frantic, leaped with others into a boat; but it was too dark to see far before them. All gave the child up for lost.

At last they heard a noise on the left side of the ship. "Pull on! quick!" cried the father. The boat was turned, the men pulled with greater force, and "Bobby," holding up the child with his mouth, was soon alongside! The half-drowned boy was recovered; the parents were delighted; and the noble dog was patted and caressed by all.

At the Cape of Good Hope the passengers were to be landed. The officer got into the boat with his wife and child; but he told the sailors to hold the Newfoundland dog tight by the collar till the boat was some distance from the ship. "You will then see," said he, "what a strong swimmer he is." "Bobby" pulled and tugged to get loose; but all in vain: they held him till the boat was near the shore. But no sooner did the officer give the signal than he sprang into the sea.

Suddenly the poor animal set up a shrill howl, and threw himself almost out of the water. At first it was thought he had been seized with cramp; but it was worse than that,—a shark was pursuing him! "A shark! a shark!" sounded from the boat to the ship. "Bobby" swam right and left, dived and turned, showed his teeth, and never allowed the shark time to turn on his back, without doing which the monster could not bite him.

The officer in the boat soon saw that there was little chance of reaching the spot in time to save the dog. Poor "Bobby" swam as fast as he could, and was almost tired out. "Stop rowing," cried the officer to the men, "and turn the boat around." Just at that moment the shark, which had got very close to his expected prey, turned on his back and opened his terrible mouth. "Bobby," was all but gone! His master rose, leveled his gun, and fired. In a moment the water was tinged with blood: the shark disappeared.

The men than rowed to the spot where "Bobby" was swimming about. The officer pulled the dog into the boat; the child threw his little arms around him; and the men in the boat, and the sailors in the ship, cried out with joy, "Hurrah! hurrah; 'Bobby' is safe; the shark is killed! Hurrah."—*Early Days.*

Irving and the Thieving Boys.

Mr. Irving was full of the milk of human kindness, but even he, couldn't submit composedly to the robbery of his orchards. The following incident will show how he stopped it:

When he first moved into this region, he was much annoyed by thefts, which some boys perpetrated upon his fruit. He determined to stop their visitations by a method peculiar to himself. Learning from the gardener that they were on the premises, after placing him in a certain spot, with instructions how to act, he, from the opposite side, came upon the boys unexpectedly, but having recently settled in the neighborhood, they were not familiar with his appearance, and kept pocketing the apples with the utmost nonchalance. He singled out the lad who apparently assumed the post of leader, and thus addressed him:

"Boy, those are very poor apples. I know of a tree on which there are far better ones."

"Where is it?' asked the wary marauder.

"Over yonder," pointing to the cottage.

"We're afraid of the old gentleman."

"He is not there now. You will be perfectly safe; but make no noise lest we be overheard."

In a few moments the party were on the march for the new foraging-ground, Mr. Irving leading. They advanced in single file, and sought the shelter afforded by the east side of a pricky hedge. Ere long the voice of the gardener was heard near them.

"Be quiet," said the leader, or we shall be discovered. Keep near the hedge, every one of you."

Fear made them hug closely to the covert, which they imagined only concealed them from the dreaded proprietor. The thorns pricked them sorely; but the greater danger which was imminent made them indifferent to the pain inflicted by the thorns.

Soon they approached the desired apple tree, and as they gathered around it, saw the gardener approaching from a direction which made escape impossible.

"Boys," said Mr. Irving, "this is the tree I spoke of, and I am the owner—Mr. Irving. Do not be afraid," he continued. "I shall not punish you; the prickly hedge has done that sufficiently already. I only ask that when you want to eat my fruit you will come and ask for it. I do not like to have my property taken without my permission."

The ringleader in this affair gave the writer, in after years, the details of it himself, and added that the rebuke was so thorough, that he never robbed Mr. Irving's or any other apple orchard again.—*Intelligencer.*

The American Sunday School Union

Having commenced the Sunday School Missionary work on the Pacific Coast, we are ready to aid in organizing Sunday Schools and aid existing needy Schools.

We have just received a fine and large assortment of the publications of the Society, which we supply to Schools at reasonable rates. We also supply the periodicals of the American Sunday School Union. The

CHILD'S WORLD,

a beautifully Illustrated Paper for Children and Youth. Monthly, at 12½ cents each per year for ten copies and upwards, and 24 cents for the semi-monthly. Also,

THE SUNDAY SCHOOL WORLD,

a Sixteen-Page Quarto Monthly Paper for Sunday School Officers and Teachers, at the low rate of Fifty Cents per Year. No Sunday School Teacher should be without this paper.

Rev. Richard Newton, D.D., the Editor of these papers, is acknowledged to possess unsurpassed abilities as a Sunday School writer. The above rates are in Currency.

Catalogues of the Society's publications, and Sample Copies of its Periodicals furnished gratuitously on application to Wm. P. Peters, care P. O. Box 1007, or at the Depository, 302 Montgomery Street, (Second Floor, Room No. 2,) San Francisco, Cal.

Sabbath School Books.

I have the most complete assortment of Sunday School Books, Cards, Question Books, and Sunday School Music Books, in the city.

Also, a fine assortment of Stationery. Paper and envelopes stamped with purchaser's initials, without charge.

A liberal discount made to Sunday Schools, Teachers, and Clergymen.

Just received, five hundred "SONGS OF THE SANCTUARY."

CHILION BEACH,
Bookseller and Stationer,
84 Montgomery Street, opposite Lick House.

NEWS SUMMARY.

PACIFIC COAST ITEMS.

ON the afternoon of the Fourth, the landing at the Oakland Ferry slip gave way, and precipitated a crowd of people standing upon it, into the Bay. By the exertions of a company of Italian fishermen, aided by the crew of the ferry-boat, a large number were saved from drowning. Exactly how many lives were lost is not known. Ten bodies have been recovered. At first, much blame was attributed to the Ferry Company; but now the stereotyped phrase, *no body to blame*, begins to be heard. The matter is being investigated.

THE *Territorial Enterprise*, learns that the Meadow Lake region still rests under a coating of snow from four to six feet deep, the season being fully six weeks later than ever before. The winter has been "lingering in the lap of Spring," and now seems disposed to try the lingering dodge on the summer. The *Enterprise* enlarges on the novelty of a Fourth of July procession, in which "dignitaries in sleighs," and "citizens on snow-shoes" take part.

SAN FRANCISCO enjoyed on Tuesday, the unusual luxury of a thunder shower. Bright flashes of lightning, accompanied by loud peals of thunder, occurred at intervals during the day and evening. The same phenomena were experienced in all the Bay counties; but we hear of no damage done, except the smashing of a few telegragph poles near the Warm Springs, Alameda County.

THE most interesting of the exercises connected with the celebration of the Fourth at Petaluma, was the breaking ground for the railroad between that city and Santa Rosa. Speeches were made by prominent citizens and orators from abroad, and the greatest enthusiasm prevailed. That section of the road is expected to be completed within less than one year.

AN interesting trial of the old steamer *Sonora* upon the U. S. Fire Extinguisher, took place at Saucelito on the 7th inst., in the presence of many spectators. The trial was perfectly successful. The steamer discounted the Extinguisher with the greatest ease, and burned to the water's edge.

FROM the Salt Lake *Reporter* we learn that an engineering party of the Union Pacific Railroad Company is now engaged in locating the line of that road on Promontory Point. This settles the question of the route around the lake—it goes to the north.

THE foreman of the Oakland *Transcript* has a composing rule made of the blade of John Brown's knife. The editors hope that the possession of such a relic in the office will give a degree of *sharpness* to their articles, hitherto unknown.

IN the Bodega redwoods, trees two hundred feet high are quite common, and boards are being sawed at some of the mills fourteen feet long and twelve inches wide. There is an inexhaustible supply of this lumber.

THE YOSEMITE TRAVEL.—The Mariposa *Mail* says, that travel has rapidly increased to the Yosemite Falls since the incoming of fine weather. Some 300 persons passed through Mariposa last week.

WE learn from the Oregon papers, that the Klamath Indians have fenced several thousand acres of land, and sown a large amount of grain. That part of the country is being rapidly settled.

No honorary degrees were conferred at the late commencements of the College of California, or University of the Pacific. The Vacaville school made Rev. W. T. Lucky a D.D.

A FIRE, kindled probably by a spark from a pipe, destroyed a large amount of hay and grain last week on the plains of the upper San Joaquin.

EIGHT persons in Siskiyou County, during the past three months, have been rendered insane by their connection with Spiritualistic circles.

THE Western Pacific Railroad Company is preparing stout and capacious ferry boats to run between this city and Oakland.

DURING the month of June, one hundred and eighty-nine marriage licenses were issued by the County Clerk in this city.

A PIANO made of California Laurel wood, will be on exhibition at the Mechanics' Fair, which will open on August 8th.

SAN JOSE has the finest Public school-house out of San Francisco in California. It cost $30,000.

AMOUNT of taxable property in California, $250,000,000.

WADSWORTH is the name of the latest metropolis on the line of the Central Pacific Railroad.

THE celebration of the Fourth in this city was attended with comparatively few accidents.

TWO hours from San Francisco to San Jose, is the quickest time yet made on the railroad.

AMOUNT of real estate sales in San Francisco for the past six months, $13,830,436.

THE fire-works in this city on the evening of the Fourth, were a complete failure.

THEY are to have a new Court House in Deer Lodge City, Montana, this summer.

THE hay crop of Santa Cruz County is estimated at fifteen thousand tons.

THERE are now four prisoners confined in the Sonoma County Jail.

THEY had destructive fires at San Jose and Santa Rosa on the 7th inst.

TELEGRAPHIC.

EASTERN.—The last steamer which left New York for Panama took 35 tons of railroad iron....A. Jacobs and E. F. Beck, of San Francisco, won prizes at the Schutzenfest in New York....John Coole, the man who murdered his two step-sons in Ohio, committed suicide in prison....Peter Cagger, a delegate to the Convention, was thrown from a carriage and killed in New York on the 7th.

SOUTHERN.—Military interference with the civil administration of Florida has ceased....Florida and Arkansas are at last sovereign States in regular standing....Mississippi gave a large majority against the new Constitution....The North Carolina Legislature is in session and has ratified the Constitutional Amendments....The Georgia and South Carolina Legislatures have met and organized....Gov. Brownlow has called an extra session of the Tennessee Legislature.

CONGRESSIONAL.—The House Committee reports in favor of Government aid for the Sutro Tunnel....The Senate passed the bill allowing the Western Pacific Railroad to occupy Goat Island....Stevens and Williams have submitted additional articles of impeachment, which are to be printed in the *Globe*....The nominations of Moulder for Surveyor-General of California, and of Beckwith for Superintendent of the San Francisco Branch Mint, were rejected by the Senate.

POLITICAL.—The Republicans of Michigan have nominated H. P. Baldwin for Governor....The President has issued his amnesty proclamation....The National Democratic Convention and the Soldiers' and Sailors' Convention met at New York on the 4th. Horatio Seymour is Chairman of the former, and Gen. Franklin of the latter. The principal points in the platform adopted are as follows: Immediate restoration of Southern States; regulation of elective franchise by citizens of each State; taxation of Government bonds; opposition to Freedmen's Bureau, negro supremacy and Radical tyranny. In the first fifteen ballots for candidates Pendleton was ahead, but no choice. From the fifteenth to the eighteenth ballots Hancock had the lead. Chase had half a vote on the twelfth ballot....J. A. Griswold is the Republican candidate for Governor of New York. ....After the eighteenth ballot the Convention adjourned in confusion....Confederate General Buckner was received with cheers by the Soldiers' and Sailors' Convention....Seymour of New York was nominated on the twenty-second ballot.

FOREIGN.—In a sharp debate in the *Corps Legislatif*, M. Rouher insisted that the Government means peace....The British Parliament gives Gen. Napier a vote of thanks....The Sultan gave Prince Napoleon a public entertainment....Our Minister to Greece has arrived at Athens....The cholera has appeared at Havana....The rebels have met with reverses at Carracas....The people of Nova Scotia, petition the British Parliament for permission to withdraw from the new Dominion of Canada.

WEEKLY MARKET REPORT.

WEDNESDAY, July 9, 1868.

FLOUR—Sales of 500 bbls Extra, current rates. We quote jobbing prices for city mills as follows: Superfine, in sks, ℔ 196 lbs, $5 75@6 25. Extra, in sks, $7 25@7 50.

WHEAT—Good new is quoted at $1 90@1 95. Sale of 700 sks Sonora at $1 95 ℔ 100 lbs.

BARLEY—Sales include 1,400 sks old, private; 800 sks do, $1 87½. The range for old feed and brewing is $1 85@2. For new, $1 87 is offered and $1 90 asked.

OATS—Sales 400 sks, $2 25@2 37½; jobbing rates $2 20 @$2 40 ℔ 100 lbs.

POTATOES—Sales include 500 sks new Mission, $1 25@ $1 37½ ℔ 100 lbs.

ONIONS—The jobbing rates are $2@2 25 for White, and $1 75@2 ℔ 100 lbs for Red.

CORN—Receipts are nominal and market firm at $2 20@ 2 37½ ℔ 100 lbs.

RYE—Nominal at $2 50 ℔ 100 lbs.

BUCKWHEAT—Small sales are reported at $1 62½@$1 75 ℔ 100 lbs.

BEANS—Are jobbing as follows: Bayo, 5c; Butter, 6½c; Pea 12½c; small White, 8@8¼c; Pink, 2c; and Red, 3c ℔ lb.

BRAN—Is in fair demand at $30 ℔ ton.

MIDDLINGS—Fine, $40@45; feed descriptions, $32 50@ 37 50 ℔ ton.

OIL CAKE MEAL—The jobbing price is $30 ℔ ton.

HAY—Receipts light. The nominal range of the market is $11@15 ℔ ton.

DAIRY PRODUCTS—Fresh roll Butter is nominal at 32½@ 35c, latter an extreme figure for choice; medium quality, 30c; California firkin, 33@35c as extremes, though 34c is considered a full figure; Cheese, 13@15c for ordinary to choice California dairies; Eastern dairies, 16@18c ℔ lb; Eggs firm at 37½c ℔ dozen.

POULTRY—Live Turkeys, 18@19c, and dressed 19@20c ℔ lb; Hens $7 50@8; Roosters, $6@7 50 for large size; Spring Chickens, $5@6; Ducks, $4 50@5 50 ℔ doz; Geese, $1 75 @@2 ℔ pair.

PROVISIONS—We quote jobbing prices as follows: California smoked Bacon, 15@16c; Oregon do, 11½@12½c; California Hams, 16@17c; Oregon do, 14@16c; California Lard, 13½@14½c, and Eastern Lard is in limited supply at 12½@ 13½c ℔ lb.

WOOL—The spring clip thus far aggregates 7,500,000 lbs, with but little more to arrive. The stock now on hand is considerably smaller than for weeks. Prices are essentially the same as last Wednesday, namely: Clean shipping grades, 17@18c; medium, 15@17c, and burry, 12½@15c. Sales during the week aggregate 230,000 lbs, part low grade.

HIDES—Are now coming in quite freely. Since last Wednesday, sales reach nearly 3,000 at current rates. We quote California dry, usual selection, 14½@15½c, and Mexican, 13c ℔ lb.

TALLOW—Is in demand at steady figures, say 7¼@7½c Sales for the week aggregate 30,000 lbs good Beef at the latter figure.

San Francisco Cattle Market.

The supply continues to equal the demand, which at this season is of course moderate. The outside figures for Beef and Mutton have been advanced ½c ℔ lb by some dealers; others quote same as last week. Pork is ½c lower. Veal and Mutton unchanged.

We quote slaughterers prices as follows:

BEEF—American, 1st quality, 6@9c ℔ lb.
do 2d do 5@7½c ℔ lb.
VEAL—Steady at 7@10c ℔ lb.
MUTTON—In fair demand at 5@6c ℔ lb.
LAMB—Ranges from 5½ to 7½c ℔ lb.
PORK—Undressed, 4½@7½c; dressed, 7@10c ℔ lb, outside figure for milk or grain fed.

CURRENT TOPICS.

THE reopening of the different colleges and semiaries, and the gathering of the young for their easant labors, is deserving more than passing noe. It is to be feared that practically far too little terest is taken in the subject of education beyond certain routine. Parents are disposed to feel that ving selected the school where their children shall end, paying the half-term's tuition in advance, aking needful provision for clothing, books, and cket-money, they have done all good parents are und to do. Yet is not something more needed? dmitting that due consideration has been given to character of the school, the healthfulness of its ation, the religious influence likely to be exerted, here not still a duty parents owe to their children themselves as truly—to visit the school during term, note what progress has been made, see the pupils fare, and learn as much as possible the every-day working of the institution? No tly conducted seminary, or academy, or college, ld object to such visits. On the other hand, ncipals and professors would gladly welcome at time the parents or guardians of pupils entrusto their teaching. By such visits scholars would ncouraged, teachers stimulated, and parents ena to judge whether promises made at the comcement of the term were fulfilled in its progress. ill be a hopeful sign of advance in the right diion when every parent having sons or daughters ny institution of learning shall feel interest gh to pay them a visit during the time allotted heir work. Good schools will not suffer by so g, whatever injury may be experienced by the

---

QUESTION of no little interest, both in a politand commercial, as truly as in a religious, point of , is that of the annexation of the Sandwich Isl- to the United States. It seems to be settled those islands must, sooner or later, fall as a into the hands of some foreign power. Their imity to this country; their adaptation to the s of a commerce rapidly augmenting; their na- resources; their need of energetic men and al to develop those resources; the danger that the domination of another government they be inimical to this, are potent arguments for their annexation. Then it is well known that the best informed and most loyal Americans residing there all favor this plan. Leaving entirely out of the discussion the religious interests these islands must have in the eyes of Americans, resulting from the long continued labors of missionaries, it may well awaken concern in the mind of every true lover of free institutions as here enjoyed, to know that systematic efforts are constantly being put forth by designing men to advance monarchial views, and create distrust and dislike of the United States in the minds not only of the king and nobles, but also of the common people of the Islands. Political and commercial necessities make it imperative that our Government take decided action to secure such advantages there as our position demands and justice clearly warrants.

THE fact that a portion of the new Mercantile Library building has been specially devoted to the exhibition of different works of art is deserving of commendation. And worthier still of praise will those merchants be, who, following a beginning so auspicious, will rival in the cultivation of a refined taste among all classes, such munificent provision for free access to works of master artists as Peter Cooper made for the residents of New York. A free public gallery of paintings and statuary in San Francisco is not impossible for men who devised and perfected such a structure as the new Library. The educating and elevating influence of such a gallery cannot be overestimated, and whoever will now lay the foundation of such an enterprise will deserve and receive ample reward. It must be remembered that the *young* in California have not the advantages in this regard which those in the older States enjoy, and which adults enjoyed before making this State their home. For the sake not only of those now being educated, who will soon be actors in the great events of the near future, but also of those now acting their parts, let us have, as speedily as possible, a free public gallery devoted to works of art, which shall be a credit to the city and State, and a lasting honor to those who establish it.

THE Ladies' Seamen's Friend Society of this city is engaged in a work deserving more notice and far better support than has been accorded hitherto by the public. Aiming at practical results, this society provides for the safety and comfort of the sailor while in port, withdraws him as much as possible from temptation, and endeavors to teach him of One who bringeth them that seek Him "to their desired haven." This work is done in no sectarian spirit. Christian women of every denomination here find community of interest, and gladly welcome whosoever will to labor with them. And in a work of this nature there ought to be a deeper general interest, and a more cordial and generous support. Every ship-owner and every merchant knows that a sober, moral, industrious crew is worth far more than a set of drunken, shiftless men, shipped for the sake of gain by those more worthless still. This Society, however it may be regarded in its religious aspects, is certainly deserving of all encouragement in its economic and moral. The sailors under its care certainly are not likely to go to sea drunk—very seldom do they go without money; often with books, not forgetting the Bible, and, thanks to Him who put it into the hearts of the founders of this Society to labor for that result, not unfrequently do sailors go to their toil upon the deep as earnest, faithful Christian men. It is time a society like this received at the hands of those most interested in commercial pursuits the *practical* acknowledgment its merits deserve.

A GENTLEMAN doing business in Chicago has just come to this State with his family and purchased for them, in one of our valleys opening out from the coast, what will hereafter be their home. His intention is to be himself in Chicago for seven months of the year, and the balance of the time with his family here. By the overland railway he will be but five or six days from his business at any time. By this arrangement he escapes the hard winters of the East, and has his family all of the time in our healthy, bracing climate. What this person has done others will do. Who can tell what the future will open to us in this regard! Our climate will be sought by all who can reach it, when they understand its superiority to all others of which we have any knowledge.

SATANIC strategy often adopts the plan of boldly closing nations against the truth. All, of course, of the counter-strokes of Providence in such cases are not within human ken. But some of them are. One is, the temporary transportation of multitudes of the interdicted nation elsewhere. There they imbibe the truth, and return to influence their country. Obvious illustrations of this principle are China and Africa. A fresh example occurs in connection with Spain. The doors of this country being closed, the people have been drawn of Providence in large numbers to Paris, by the Great Exposition. Here they have received Bibles and heard Bible sermons. With these they have gone back, and their benighted land already feels the movings of a spirit of religious reformation. Another counter-stroke of Providence in the case of sealed nations, may be observed. It is, to reach the colonies of such nations, where the home restrictions do not exist. Such colonies are usually in close intercourse with the mother country, and afford a good vantage-ground for reaching the latter. Thus missionaries are laboring among the Spaniards who form a colony at Oran, in Algeria. Nothing seems wanting but the prayers and offerings of God's people, to secure the giving to Christ of that land to which Columbus gave the New World.

WE learn that the Regents of the University have resolved to organize none of its departments during the present year, but to perfect all that may be necessary as preparatory work, and commence several of the colleges together, a year hence. The

wisdom of this action should not be questioned, perhaps, by those who are not aware of the reasons by which the Regents are governed, yet we cannot but regret that some course has not been adopted by them that would retain for the University those young men now ready to pursue their collegiate education. In the College of California, which, by its generous offer to the State, has, in a great measure, lost its ability to continue its classes for another year, there are a number of students who will not wait in idleness for the University to furnish them facilities for progress. In the schools and academies are a larger number of those who are prepared to enter college, and would like to have opportunity to do so here. And many, now engaged in the several departments of practical life, would be glad to avail themselves of the privileges offered to such by the provisions of the University, but they will not delay a year before seeking some other means of knowledge. Some of these young men will enter colleges already in operation on this coast, but the larger portion of them will go East, and being once connected with institutions there, they will remain. We would not have the permanent interest of the University prejudiced by any hasty action, but cannot see why some course cannot be taken that would open its doors, at least for those who wish to enter them. What it will lack most, for years to come, will not be money, but *patronage*, and every means should be employed to identify those with its interests who may be students in its various departments; for we believe the great work of those who have these interests in charge will be the cultivation of a *general desire* for advanced education among our youth, not the gathering of vast funds by which such education may be made possible, however important this may be. This work cannot be commenced too soon.

Religious Intelligence.

PACIFIC COAST.

Camp-meetings.—As civilization progresses, camp-meetings become more and more rare. We have heard of but very few this season. The Methodist Church South, will hold a camp-meeting near Chico, commencing September 11th. In Oregon, where the institution still flourishes, and where such meetings, owing to the newness of the country and sparsity of population, are productive of less evil than in older communities, we learn that considerable religious interest has been aroused, and much real good accomplished during the past year.

Liberal.—Mr. Cyrus Alexander, of Russian River, has donated the Academy at Healdsburg, formerly the "Sotyome Institute," to the Presbytery of Benicia. It has been a flourishing school for several years. It is to be under the management and control of the Presbytery, henceforth. Its name will be the Alexander Academy; or if it shall be developed into a College, as is hoped, it will be called the Alexander College. The cost of the Institute to Mr. Alexander, was in the neighborhood of four thousand dollars. This is truly liberal.

We learn that Rev. Alex. Parker, late pastor of the Congregationol church in Los Angeles, preached his farewell sermon before his congregation on Sunday, July 5th. Mr. Parker has accomplished much for the cause of religion in the vicinity of Los Angeles, and the people of that place will regret to lose his services. It is probable that Mr. P. will take charge of the South Park Congregational Church in this city.

Lectures.—We are glad to notice the growing prevalence among clergymen throughout the State, of the custom of delivering lectures on a variety of subjects to the people in their vicinity. They thus reach many who could not be reached by sermons, and great good, both moral and social must result from their efforts.

Successful.—We learn from the *Gazette*, that the Good Templars, organized in Pacheco only a short time since, have not only recruited into their ranks quite a number of the strong drinkers, but have succeeded in capturing a drinking saloon, and establishing in it their head-quarters.

The First Presbyterian Church of Stockton, has given a unanimous call to the Rev. Mr. Hamilton of Oakland. We are not informed whether Mr. Hamilton will be induced to accept the invitation tendered him.

Union Meeting.—A union meeting of all the churches of Stockton was held at the Presbyterian church last Sabbath evening.

A Young Ladies' Seminary is to be established at Martinez, under the auspices of the Episcopal Church.

The Young Mens' Christian Association of Stockton, now numbers one hundred and twenty-five members.

Mite Society.—They have a Presbyterian Mite Society in Watsonville which is doing good service.

Calvary Church.—The foundations of the new church on Union Square, are nearly completed.

The Catholic church at Vallejo will cost $60,000.

EASTERN.

Statistics of our Church's Growth.

The *Presbyterian Banner* gives the following statistics in regard to the growth of the Presbyterian Church for the last twenty years:

"It will be remembered that in 1861 we lost, by the Southern secession, 800 ministers, 1,300 churches, and 80,000 members. Yet, notwithstanding this loss, our progress in the last twenty years has been remarkable. In 1847 there were 28 synods; in 1867, 35; increase, 13; rate per cent. 59. In 1847 there were 118 Presbyteries; in 1867, 176; increase, 58; rate per cent. 49. In 1847, 2,376 churches; 1867, 2,622; increase, 246; rate per cent., 19. In 1847, 1,713 ministers; in 1867, 2,302; increase, 589; rate per cent., 34. In 1847, 192,022 members; in 1867, 246,350; increase, 54,328; rate per cent., 28.

"Still a better idea of the increase will be obtained if we add to the churches, ministers, and members in 1867 the churches, ministers, and members which left us in 1861, without taking into account the additions to these that might have been expected had peace continued. This would make the number of churches in 1867, 3,922; increase, 1,546; rate per cent., 65. Ministers, 3,102; increase, 1,389; rate per cent., 81. Members, 326,350; increase, 134,328; rate per cent., 69.

"But our progress in the matter of Christian benevolence, which is, after all, the best visible indication of growth in the strength and activity of the Church, is still more marked. The total amount contributed in 1847, by our churches in the North and South, independent of pastoral support and congregational expenses, to the Boards of our Church and miscellaneous objects, was $310,164 91; while the entire amount contributed in 1867, by our churches in the North alone, to the Boards and miscellaneous objects, independent of pastoral support and congregational expenses, was $1,017,883; increase, $707,719; rate per cent., $328. We doubt whether any other Church in this country can show greater progress in the last twenty years. If any one can, no one will rejoice more heartily than ourselves. The Lord has been good to us; let us evince our gratitude by a more thorough consecration to His service.

Sabbath Schools.—The Rev. Dr. Hornblower, of Paterson, N. J., recently stated, in a Sunday School celebration in that city, that the Sunday School enterprise was started in Paterson, *some seventy-five years ago*, by Sarah Colt, a little girl *eleven years of age*. She collected the children of the factories, and taught them, from Sunday to Sunday, until she had as many as sixty under her personal care. This she continued for a series of years, until she left the city for a season. When she returned she resumed her Sunday labors, and for forty years was a teacher of youth. She is now in her eighty-fifth year.

The Bethel Sunday School of Cincinnati, claims to be the largest in the United States, both in the full enrollment and the average attendance. The Superintendent says: "Our average attendance during the hot summer weather, the period of smallest numbers, reached a fraction over 1,100; for the like period in winter, 1,800; with an average for the year exceeding 1,600 scholars. One attendance on a single Sabbath has reached 2,250. We are entirely within bounds in stating that 4,000 different scholars have, during the year, attended our school for periods of longer or shorter durations."

The famous Benton Street Mission Sunday School in St. Louis, of which Mr. E. D. Jones is Superintendent, makes it an invariable rule publicly to discharge any teacher who fails to be present or provide a substitute or valid cause for absence. They think that it is as much the duty of a teacher as of a preacher to see that his post is filled. It holds a childrens' prayer and inquiry meeting after every session.

Dr. M'Cosh.—The following from a leading Presbyterian paper in England, shows what is thought in that country of the new President of Princeton College:

"It is stated that Dr. M'Cosh, of Belfast, has been elected President of Princeton College, in the U. S. This high appointment has been bestowed on a man who is well worthy of it, or any similar honor. Dr. M'Cosh, is undoubtedly one of the most distinguished of living Scottish philosophers. His admirable works, known and studied both in this country and in America, mark him out as one of the first metaphyeicians of the day. Under the old system of patronage, he would, in all probability, have been elected by this time, to the vacant moral philosophy chair in Edinburgh. At least, that famous chair of Stewart and Brown, Wilson and MacDougal, would have been offered him; though whether he would have resigned his present office to accept it, may be a matter of doubt. Here is a new instance of a prophet having no honor in his own country. The best man is virtually rejected; and the chair hitherto so brilliantly filled, is likely enough to suffer an eclipse. If Dr. M'Cosh leaves this country for America, we shall not envy the Americans the due reward of their generosity; but we shall not the less lament the evil spirit connected with the University of Edinburgh that denies such a man the honor that is properly due to him in his native land."

We have received a circular, signed by thirteen Ministers and Elders who were present at the meeting of the Synod which suspended Geo. H. Stuart, protesting in the strongest terms against the action of the Synod, and making public the names of those who voted against it. They say:

"They feel it to be due to their own characters to announce that they do most indignantly and decidedly condemn and repudiate the said action of said Synod, as unjust in principle, unconstitutional in form, unkind in circumstances, unworthy of the ecclesiastical body by which it was passed, and undeserving of regard by the Christian World."

We take from the Chicago *Presbyterian* the following Presbyterian Statistics:

Synods	58
Presbyteries	285
Ministers	4,172
Churches	4,182
Communicants	407,889
Sabbath School Attendants	358,265

Of the communicants, the Old School has 246,350, and the New School the balance. The other branches of the Presbyterian Church without the pale of this union, are as follows:

Denominations.	Churches.	Ministers.	Communicants.
United Presbyterians	717	343	63,489
Presbyt'n Church (the Southern Church)	829	1,290	66,528
Cumberland Presbyterian		1,160	123,000
Associate Reformed Presbyterian	260		
Reformed		121	18,354
Total	1,896	3,104	271,371

The figures opposite the Southern Presbyterian Church are incomplete, as many churches make no returns to the last Synod. The same remarks applies to the incomplete returns of the Associate Reformed, Cumberland, and Reformed branches.

The funds raised by the Northern branch of the Old School denomination for the year preceding the Conference of 1867 were as follows:

For Foreign Missions	$141,483
Domestic Missions	
Education	118,929
Publications	211,312
Church Extension	29,278
Congregational Purposes	124,507
Miscellaneous Purposes	2,673,606
	392,372

The fund contributed for various objects by the New School were apportioned as follows:

Domestic Missions	$141,485
Foreign Missions	
Education	110,349
Publications	43,681
Congregational Purposes	15,996
Miscellaneous	2,342,760
	454,714

STILL ANOTHER UNION.—Dr. Nathans, a Jewish Rabbi, writes to the *Christian Register*, proposing a union between the Jews and Unitarians. He says: "We are living in a United States; may we not live all, too, in a united religion? As in union there is strength, I therefore say, a combination of Jews and liberal Unitarians would enable us to disseminate throughout the world these truths in religion which are advocated by all rational men and welcome to all the children of God. These should be in the form of tracts, pamplets, and such like; which we find written by Spinoza, Mendelsohn, Channing, Norton, Clarke, and others. Judaism has always been a true vindicator of pure, clear Unitarianism; and will, under a scientific and rational reform, join to fulfill the closing of the prayer, "On this day may the Lord be one, and His name (which exists in His people) be one."

SOUTHERN METHODIST CHURCH.—The following account is given of the Southern Conferences, organized by means of the missionary efforts of the Methodist Church, North. At the close of 1867 they had the following membership: Alabama, 9,341; Georgia, 10,235; Houston, 23,720; Mississippi, 7,899; South Carolina, 9,668; Tennessee, 6,100; Texas, 1,584; Virginia and North Carolina, 671; total membership, about 70,000. So rapid has been the growth of all these conferences, that the latest statistics of three of them, which have held an annual session since 1868, swell the total membership to 90,000. Two colored conferences have been organized, which have a membership of 26,687.—*N. W. Presbyterian.*

LANE SEMINARY.—The Board of Trustees of Lane Theological Seminary, at their late meeting, determined that $100,000 should be added to the permanent funds of the Seminary, and they showed their earnestness in this determination by promptly giving $40,000 of it. The Board will pay half of what the Seminary needs for its complete endowment if all its other friends will pay the remaining half.—*N. W. Presbyterian.*

SUDDEN DEATH.—Mathew Vassar, founder of the Vassar Female College at Poughkeepsie, died recently while delivering the usual address before the Trustees. His closing remarks were as follows:

"And now gentlemen, in closing these remarks, I would humbly and solemnly implore the Divine Goodness to continue his smiles and favors in your institution, and bestow upon all hearts connected therewith, His love and blessing, having peculiarly protected us by His Providence through all our College trials, for three consecutive years without a single death in our Board, or serious illness or death of one of our pupils within its walls. Wishing you gentlemen, a continuance of health and happiness, I bid you a cordial and final farewell, thanking you for your official attention and services, not expecting from my advanced years and increasing infirmities, to meet you officially again, and imploring the Divine Goodness to guide and direct you aright, in all your counsels and social business deliberations."

UNION OF THE EPISCOPALIANS AND METHODISTS.—Seven Episcopal clergymen of Newark. N. J., presented a memorial to the Methodist Conference of Chicago, requesting that body to appoint a commission which should meet a similar commission appointed by the Episcopal General Convention, to consider the feasibility of an organic union between the two bodies. This is in the line of a similar though abortive attempt, which has been made in England; but which, if carried out, would result differently between the two countries. There the Church of England would swallow up Wesleyanism; here Methodism would be the controlling element of the united churches.—*Independent.*

A CORRESPONDENT, writing from Huntington, Long Island, N. Y., June 29th, says: "Yesterday twenty-two persons were admitted to the First Presbyterian Church in this place, to which Rev. Mr. Carter, son of Robert Carter, Publisher, has been recently called, Rev. Mr. Davidson, the former pastor having resigned on account of ill-health."

REVIVALS.—It is said that between two and three thousand souls have been led to profess Christ the past year by the labors of Mr. Potter, the evangelist, in Connecticut. The Congregational Church in New Haven, Vt., received last month, seventy-seven new members on profession of faith, of whom forty-six were heads of families.—*Independent.*

REV. D. P. GURLEY, of Washington, has been lying very ill at the house of a friend in Brooklyn for some days past, and at times his life has been despaired of. His many friends are earnestly praying that he may be restored to health.—*Observer.*

REV. DR. IMBRIE, of Jersey city, has been quite ill lately, and his people have very wisely decided that he had better make a voyage to Europe. He has been a successful pastor, and is greatly beloved by his congregation.—*Observer.*

SOUTHERN CHURCH.—The Minutes of the Presbyterian Church South, show 1309 churches, 853 ministers, 80,530 members, 400 Sunday Schools, with 31,451 scholars.—*N. W. Presbyterian.*

TRIAL.—Rev. Dr. Hubbard, of Westerly, R. I., was presented last week for trial, for violating the canons and discipline of the Protestant Episcopal Church.

FOREIGN.

PRUSSIA.—The great revolution which has taken place in Germany, through the triumph of the policy of Bismark and of the armies of Prussia over the armies of Austria, is tending as its final end to the great ruling idea of the Prussian Premier, the unification of the whole German nation — the re-establishment, in a better way than of old, of the German Empire. This, however, is not all. Another one of the great changes in the revolution is, that Protestant North-Germany, and not as heretofore, Catholic South-Germany, will bear sway in this new, free empire; The Prussian King will be Emperor of Germany. The work of uniting Germany will go on till it is all one. Now, it may be well imagined how the Papal power looks upon this wonderful change in the order of events. Heretofore in the past, it was the "Holy Roman Empire," and the Austrian was the dominant power.

The spirit and life-law of Romanism are, to get all it can of advantages out of Protestants, but *never* yield anything to them. Its demands are supreme and absolute; and its spirit and life-law are unchangeable.

In Prussia proper there are several millions of Catholics in the North-German Confederacy, and a goodly number more. A continual pressure is kept up, purely political and politico-religious, by the Catholics of Prussia and the Pope, to extort all possible from the Prussian Government. The King, thinking to conciliate the hearts of his Catholic subjects, and of the Catholics of Germany generally, as well as the Pope of Rome, has lately, in several forms, especially in his throne-speech, given warm expressions of sympathy with the Pope. The Pope could not but thank King William for this. Besides, the Catholics have been forced to acknowledge that large special favors have been granted their Church in Prussia. Yet, in view of the prospects of growing power of Protestant Prussia, in spite of all the above, every effort is made by the Catholic magnates of all Germany, in the press, and otherwise, to light up and fan the flames of hatred against Prussia. The Catholic press is fierce in this way against the leading power of the Confederation. It will do well to get all that can be got out of King William and his government: it is his duty to yield to, and the Pope's right to claim for, *the only true Church*, all possible advantages; but to feel any corresponding duties in return towards Prussia, or any Protestant power, is not in the spirit or duty of Rome. The base treatment that King William has received, and is constantly receiving from the Catholics of Germany, must show him how utterly vain his acts of favor towards Popery and the Pope are. So must Protestants anywhere else learn. *Demand all and give nothing*, is the law of Romanism towards Protestanism always and everywhere.—*Evangelical Messenger.*

SABBATH SCHOOLS.—There is a Methodist Sabbath School in Copenhagen, Denmark, having 300 scholars. It publishes a little Sunday School paper, of a single quarto leaf, for its own scholars, and a few other Methodist schools in Norway and Denmark.

There are in connection with the United Presbyterian Church of Scotland, 923 Sabbath Schools, 9,536 teachers, 75,062 scholars, 542 senior Bible-classes, taught by elders, with an attendance of 3,194, giving a total of 94,668 children and young persons under religious instruction. During the last seven years 630 teachers and 5,259 scholars had been added to the rolls.

It is pleasant to hear from the antipodes. The Sunday Schools of Hobart Town, Tasmania—how many Sunday School children can tell where that is?—held a late annual gathering, at which the Wesleyans mustered six schools and 696 children; the Congregationalists five, with 660 children; the Presbyterians three, with 212 children; the Baptist two, with 132 scholars; and a ragged school had 85 children; amounting in all to 1,785. The next day the Episcopalians held a separate celebration, with their five schools and 650 children.—*Independent.*

Correspondence.

Letter from Alameda County.

San Leandro, June 25, 1868.

At your invitation, I cheerfully give a brief description of the region of San Leandro and San Lorenzo, and as I do so, I would suggest that such descriptions of other fields, to which attention is often called by the list of churches in your paper, would be interesting.

The region of which I write is deserving of attention because of its situation. A delightful sail on the Alameda ferry-boat, and a ride on the cars, brings a person in a little more than an hour, a distance of over fourteen miles from San Francisco to San Leandro. This town is also situated eight miles south of Oakland, a fact that just now, with the pretensions of that city, may seem worth mentioning. San Lorenzo lies four miles south of San Leandro.

Besides being important for situation, this region is important for its natural advantages. It seems to have been appropriately called Eden Township. It consists of a strip of land from three to four miles in breadth, lying along the Bay, which is as fertile as any in the State, being the hill and cañon land of the Contra Costa range, stretching many miles eastward, which yields excellent crops of grain, and is good for grazing. Along the brow of these hills, and at the distance of a mile from the railroad, are fine situations with springs of water, and with an outlook over the whole valley and Bay, for residences or select institutions of learning, or other such purposes.

As marvelous accounts are given here of great crops of grain, of large vegetables—beets, for instance, weighing one hundred and fifty pounds each—and of heavy yields of fruit, as are given in any part of the State. A tree is still pointed out, under which an Irishman lodged for some time, who became rich by the productiveness of land he rented, and during the year of the drouth cleared $30,000 from his crop.

To pass from the din and turmoil of the city during the spring, to the quiet beauty of this region, with its grain fields and orchards, and hills crimsoned with flowers, seems indeed like passing to what might be called Eden Township.

With regard to population, this region is in what might be called a transition state. Ten years ago there was hardly a house or fence within it. Now it has a population of over a thousand, and land sells at from one hundred to five hundred dollars an acre. Many Portuguese and Irish own small tracts; but they do not seem likely to inherit the land forever.

The public school of San Leandro has increased within three years from seventy-five pupils to one hundred and sixty, with four teachers. It may perhaps be said that there is a good time coming, when this younger class shall have grown a few years older and formed an attractive society.

There are three churches in San Leandro—a Roman Catholic, a Methodist, and a Presbyterian. The latter was organized two years ago, and last year dedicated a neat and tasteful house of worship. In connection with this church, one of the social and literary associations so popular in other places has been formed, and has contributed much to the enjoyment and good of the community.

It may perhaps be said that the advantages of location, near the terminus of the Pacific Railroad, and near the cities, and of soil as good as any in the State, and of a climate as delightful as any in the world, which this region possesses, make it to need only good educational and religious influences that it may become one of the most delightful and prosperous in the country, and that with these advantages the schools and churches now begun are to be regarded as the germs of much future growth.

A.

Letter from China.

Canton, June 1, 1868.

Steam has brought the Occident and the Orient so near together that your readers must have some interest in what transpires on this side the great Pacific.

You have had with you the Envoy who is to inaugurate China in her new position among the nations, and you will have noticed that the choice of an American to fulfill this high and delicate duty is an index of the feeling of friendship which the Chinese Government and people have for our country. If we can rightly appreciate the situation, this friendship involves an obligation to show ourselves worthy of it in all our relations with the Empire. And especially does it point out to Christians the solemn responsibility of fostering and cementing the friendship by giving to the millions of people, the Gospel and all the benevolent and educational institutions which are essential parts of our western civilization. Some charitable institutions have been founded in connection with some of the missions, and they have stamped upon them the impress of Christianity. Christian education has been commenced, but the institutions of learning which, within a century or two, will flourish all over the Empire, remain to be founded. It is of the utmost importance that these schools and colleges should be established and built up under the guidance and control of earnest Christian men.

Great changes are taking place here. The demand for scientific knowledge is beginning to be exhibited, and the desire for it must necessarily increase to an extent that few anticipate. Who can estimate the calamity it would be for the nation if this education should be introduced under the auspices of infidel or unchristian men.

COLLEGE AT PEKIN.

There has been much talk of establishing a grand college at Pekin. This would be a good thing if it were practicable. But it is very difficult to get qualified teachers, who know the language, or if the sciences are to be taught in English, it is difficult to get pupils who understand that language. Several experiments have been made in the department of education. One was the Anglo-Chinese College, established at Malaaca in 1818, by the Rev. Dr. Morrison. It flourished for some time, but did not fulfill the expectations of its friends. It was transferred to Hongkong by Rev. Dr. Legge, after the cession of that island to Great Britain, and was finally suspended about the year 1856.

Another experiment was the school of the "Morrison Education Society." This was a school of less ambitious aims than the former, and flourished for some time under the care of the Rev. S. R. Brown (now of Japan) and Rev. W. A. Macey. It however failed, partly from the difficulty of securing teachers, and partly from the want of interest in it in the community at Hongkong.

St. Paul's College, under the patronage of the Bishop of Hongkong, has been in operation for a number of years, and there is also a new school under Government patronage. These schools have been mostly devoted to the teaching of the English language.

DUTIES OF THE CHURCH.

It will not be denied that Christianity and education must go together, and if the higher education of youth is not under Christian influences, then secular education must greatly hinder the progress of Christianity.

To avoid this calamity, the churches and their agents—the missionary societies—must be awake to the demands of the times. The missions, as now established, are gathering around them many scholars in primary schools. Out of these some may be selected for more advanced studies, and teachers should be on the ground whose duty it should be to give instruction in the higher branches. In places where several societies are represented, united effort would save time and labor, and greatly promote the object aimed at. In this way there might soon be prepared a number of native teachers, who would be qualified under the supervision of foreigners, to give instruction in all the higher branches of education, whenever there should be a demand for such education.

A plan of this kind is being now discussed by the Missionary Conference of Canton, and it is hoped that some result may be attained which will secure the united action of the different missions in giving a higher education—first to those who are to be native preachers, and second to all others who may wish to obtain the advantages of such an education.

Two young men are now being educated by the Presbyterian Mission of this city, who were taught Christianity and baptized by the Rev. A. W. Loomis, of your city. A residence of some years in California has given these young men a superiority over their fellows which is very marked, and we hope they may become men of eminent usefulness.

The importance of supporting, by your prayers and sympathies, the missionary to the Chinese in California in his arduous labors cannot be overestimated. Let all the churches unite in his support.

K.

Religious People in Novels.

Religious people, if we may believe what our best modern writers tell us of them, are very poor creatures indeed. If Mr. Anthony Trollope draws two sisters, the religious one is sure to be sour, unaccommodating and meddlesome, the other, who does not trouble her head or heart much with the things beyond time and sense, is equally certain to be pretty, obliging and amiable. It is *she* who, while the other is domineering over a Dorcas meeting, or lecturing some unhappy parish children, is ever at hand to smile upon her mother, and run for cream for that otherwise neglected old lady's tea, it being the known tendency of a religious person to think every old woman interesting *except* her mother. Nor is it only in external graces or in moral attributes that "serious people" are found to fall short of even a very limited standard. Want of sense and common discretion in the daily affairs of life seems an essential part of the character. The author of the much-admired *Chronicles of Carlingford* (we believe a lady), has given the world a series of sketches, drawn from the leading phases of modern religious thought, and has contrived with beautiful impartiality, to show us in each one of these, the dissenting minister, the evangelical old maid, the young Anglican clergyman and his Romanizing brother, mental weakness in every varying shade, as changeful in its play of doubt, hesitation, and irresolution, as are the colors on a dove's breast, or as is the light shut within the glancing opal, *yet always weakness*. However they may differ in dogmatic opinions, they are alike in this, that they are all foolish, contemptable, unworthy of an ideal so lofty that it can never be fully realized, yet so lowly, that it seldom fails in its condescension

to men of low estate, to raise them at least a little nearer to its own enduring greatness.

Writers who take this tone ought to be made aware that they place themselves, logically, within the horns of a very grave dilemma.

If all persons, more than commonly zealous for the doctrines of Christianity, or more than usually devoted to carrying out its practical requirements, are proved inferior in mental gifts and moral consistency, to those who are content to aim at a less exalted standard of life, we cannot escape one of these conclusions: either that Christianity is only attractive to weak intellects and wavering characters, or that it has some inherent tendency to *make* people absurb, inconsistent and insincere.

And this alternative is a very serious one; serious at least to all who look upon Christianity as a Divinely constituted system, and who have not forgotten that there is one sin alone amid the multitude of transgressions, "which shall never be forgiven,"—the sin of denying, of ignoring, of disparaging the work of that thrice Holy Spirit to whom the dispensation of His own work has been committed, and to whose agency our fallen nature owes all that it can receive of present and future blessedness, even to a partaking in the Divine nature itself. —*Dora Greenwell.*

Congregational Singing.

Pacific Mail Steam Co's Steamships

—FOR—

NEW YORK, JAPAN AND CHINA

Will be Dispatched as follows:

LEAVE WHARF CORNER OF FIRST AND BRANNAN STREETS, at 11 o'clock A.M. of the following dates, for PANAMA connecting via Panama Railroad with one of the Company's splendid Steamers from ASPINWALL for NEW YORK.

On the 6th, 14th, 22d, and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Transatlantic Company's Steamer for St. Nazaire, and English Steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English Steamer for Southampton, South America, and P. R. R. Co.'s Steamer for Central America. Through tickets can be obtained.

Departure of the 6th connects with English Steamer for Australia.

The following Steamships will be dispatched on dates as given below.

STEAMERS FOR JULY, 1868.

July 6th—MONTANA, Captain Cavarly, connecting with HENRY CHAUNCEY, Capt. Grey.
July 14th—CONSTITUTION, Captain Comstock, connecting with OCEAN QUEEN, Capt. King.
June 22d—GOLDEN CITY, Captain Lapidge, connecting with RISING STAR, Capt. Conner.
June 30th—GOLDEN AGE, Capt. Farnsworth, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock.

Through tickets to Liverpool by the "Cunard," "Inman," and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired, an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

The Steamship JAPAN, Captain George F. Lane, will be dispatched on Monday, August 3d, at 12 o'clock, noon, from wharf, corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the COSTA RICA for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Co.'s Office, corner of Sacramento and Leidesdorff Sts.

OLIVER ELDRIDGE, Agent.

ILLUSTRATION OF DIVIDENDS OF PROFITS

—OF—

United States Life Insurance Comp'y,

NEW YORK.

OFFICE, No. 40 WALL STREET.

CASH ASSETS EXCEED $2,700,000.

SIXTH TRIENNIAL DIVIDEND.

The Board of Directors have this day declared a Dividend of FORTY PER CENT. for the three years ending at the 4th March, inst., to holders of all Policies then in force, on the whole sum of the annual participating premiums received during the said three years; and an additional Dividend of TWENTY PER CENT. on the whole sum of all previous Dividends and Additions, to holders of such Policies who have fulfilled their engagements with the Company, both Dividends being payable and available in the various modes explained in the Company's Prospectus.

For example, on a policy paying one hundred dollars a year of participating premium, the profits for each year and the total at each year on this system are:

Year.	Yearly.	Total.	Year.	Yearly.	Total.
1	$40 00	$40 00	28	$206 39	$2702 23

SAN FRANCISCO, SATURDAY, JULY 18, 1868.

REUNION.

The prospect that the two great bodies of Presbyterians in the United States may soon be united, while in every way pleasing, suggests, also, grave responsibilities. The Presbyterian Church, at home and abroad, has been characterized in all its history by high purpose, noble endeavor, and successful achievement. Its present condition is one of power and growth. Its future depends upon what, by the blessing of God, we determine to make it. If disregarding past teaching; if ignoring present advantage; if careless of future prosperity, old animosities are cherished, old issues magnified, old dissensions perpetuated, then not only will immediate results be lost, but the grand prospect opening before an united Church, will be obscured, if not altogether cut off.

No argument is needed to prove that the responsibility of defeating the present plan of union is one that no man, or set of men, covets. Admitting what its opponents demand, there is, after all, a necessity deeper, broader, stronger still for concentration of forces in the Christian world. Enemies of the Truth are vigilant, active, resolute, united. It is no time for Christians to stand aloof from each other. The interests are too precious to be hazarded by continued division. The Lord's host should be compact, moved by one impulse, fighting for one cause. He who would now continue denominational shibboleths deserves the sharpest rebuke and the severest censure. What the Church needs, what the world needs, is practical, cordial, heartfelt union among Christ's disciples. The coming together of Old and New School Presbyterians will foster and encourage that work. It is a step forward. It raises the Church in the estimation of the wise and good. It exalts the Cross, when Christians sacrifice personal feeling and prejudice for Christ's sake. Other branches of the Church will find it easier to join forces if these coalesce; and soon Christians will wonder they ever were so widely sundered.

But the prospect of union suggests another responsibility resulting therefrom—the increased work of the Presbyterian Church in evangelizing the world. From carefully prepared tables in Dr. Lowrie's Manual of Missions, it is found that the Presbyterian Church in its different branches, has sent almost one-third of the whole number of missionaries who are now laboring in foreign fields. This is in itself encouraging even now, and something for which the Church may well be thankful; but will not union augment missionary zeal and increase the number of missionaries? Certainly it ought, and the year that witnesses the consummation of this plan of union should be signalized by the outpouring of treasure for this cause and inaugurate a new era of activity in the work of missions by the Church. It is in this view of the future that the union of the two branches seems most desirable. A great work is before us. The world is to be brought to the knowledge of Christ. The millions now sunken in ignorance and sin are to be raised from their miseries and taught the glad tidings of a Savior's love. To engage with heart and hands firmly joined in such a work as this is nobler, ten thousand times over, than to waste energies and means in continuing in one sense rival organizations, which, from the very nature of the case, must weaken, not strengthen, the Church. One Board of Foreign Missions is better than two in all that pertains to efficient work. So of the Publication, Education, Domestic Missions, and every other interest. Set aside supernumeraries, do away with duplicate officers, remove the rubbish, let the whole force of the Church be felt in well sustained, united, harmonious agencies, and their operations will prove beyond all cavil that the union of the Old and New School Presbyterians was divinely ordered, and a means of good to the world. "Union is strength," and those who labor and pray most earnestly will find that combined efforts, so far as human instrumentalities are concerned, will do far more to win the fulfillment of the prayer, "Thy Kingdom come," than divided labors, however zealous, where the spirit of Christian union is wanting.

THE MISSION OF THE CHURCH.

Our Lord Jesus Christ founded His Church in this world for one specific object. It was not simply to create a fine system of human society and crystalize about it order and progress. It was not alone to give culture, knowledge, and activity of body and mind. These things follow, as a train of cars follows a locomotive, wherever the Church of Christ fulfills its mission. Christ had something in view higher than all of these things. In building His Church in the world His aim was to bring men to a personal knowledge of Himself; to found in their hearts and minds His own Kingdom and give to them its peace and blessings. This is the mission of the Church. This is the mission of each one of its friends. They have been called into this Kingdom to help Christ to carry out this work. They are not then only to have their feet placed on a rock and a new song put into their mouths. They are not merely to be secured against temptation, but they are to lead all around them to a knowledge and recognition of the claims of Jesus.

Probably there was never a time when the friends of Christ were so much in earnest, so laborious, so wise, as now. There are those all over the globe who are doing as the disciples did in former days. These men are making upon the great empires of darkness just such an impression as those disciples. Good tidings from afar are constantly reaching us. Thousands are added each year to mission churches, and of those who give good evidences of conversion.

But this work is not confined to those who are working for Christ in heathen lands. There never was a time when so much Christian truth was uttered as now. The pulpit teems—not with essays on virtue and denunciations of vice—not with philosophical disquisitions and sensational topics alone; but Christ is preached, faithfully, with tenderness and power. And the press is not behind the pulpit. It is not all for politics, or partisanship, or commerce. As a whole, it favors what is good—what brings honor to our Lord. It multiplies copies of the Word of God, and prints the best of books. A deep current flows from the press into social and domestic life, and amid the quietude and reflection of home, is sending the choicest influences of Gospel truth into all the deeper wells of character and life. This choice influence from the press is going forth in a thousand unseen ways, and is doing for Jesus Christ and His cause a work which should fill every Christian heart with hope. On every breeze, almost, the leaves of the Tree of Life are borne, scattered at the door of almost every house.

But, after all, how little is accomplished proportioned to the means employed and the interests at stake. Neither the power of the press nor that of the pulpit is felt as it should be. The number of the earnest and aggressive ones upon the realm of darkness is few and out of all proportion with the number of those who are named by the name of Christ. How few ministers, how few churches, can say with the exultant Apostle, in view of what he saw coming from his labors: "Thanks be unto God who maketh us to triumph in Jesus Christ." Why is it that the state of the Church gives pain to those who see it with opened eyes, rather than a song of gladness and triumph? Why do we take up the sad refrain of the captive Jews, when we remember Zion, rather than the rejoicing one of the prophet, with a similar remembrance in his mind? Why the disproportion between the number of those who believe and those who do not believe? Why does the number on the latter side seem so to increase that the odds now are against us—increasingly so in almost every community? Has a crisis come, to which the resources of the Gospel are inadequate? Has that Gospel become effete and worn out? Have new and more rugged elements gone into human characters and hearts? Do men now find in Jesus Christ that which makes His salvation unnecessary to them? Have they no need of Him in trial, adversity, disappointment, sickness, and death? Can the Church do no more to make an impression upon this thronging mass, so absorbed with this world that they live, and think, and toil for it alone—with no commanding aspirations—with no prayer, no faith, no hopes for a Heaven where God is seen and known? Is a revival to be looked upon now as a special miracle, and not the normal state of the Church, which should be as natural to it as the glow and vigor of health to the body?

Let those of us who think these thoughts remember that Jesus Christ is the same now that He has ever been. That as face answereth to face in a glass, so does the soul and heart and character of men now, answer to the soul, and heart, and character of those of the ages past; that the same results can be produced by the Gospel now as then. It is not a dead but a living power. What a testimony to this end is this fact, which we met only a few days ago in a report made by an English clergyman: "I am enabled to state that during the year over 1,000 sinners in this parish have found salvation. When I came here, a little over a year ago, my charge was in a deeply depressed state. The congregation, of old and young, did not number fifty, and but twenty were in fellowship with the Church. Seldom now is our audience less than seven hundred—generally, at each service the house is filled to its utmost capacity." But what was the secret of this success, which any minister would regard as wonderful indeed? It was simply a fulfillment, on the part of the Church, of its mission—*i. e.*, prayer and labor—earnest, continued, and diligent, and the baptism of the Spirit. The earnest pastor was seconded in his efforts by an earnest Church, and God crowned that effort with the blessing he is ever ready to give.

Symbol of Baptism.

Having seen in the ablutions of the Hebrew service the type of Christian baptism, I turn now to an examination of their nature and mode. That there may be no possibility of mistake or error in this matter, I consult the word of God, (Hebrews, 9 : 10,) and read there, "which stood only in meats and drinks, and *divers washings*, (Greek, *baptismois*, *baptisms*,) and carnal ordinances imposed on them until the time of reformation."

By consulting this verse, we find that meats and drinks, and divers washings were ordinances *per-*

taining to the flesh, or connected with *bodily purification*, for such is the scope of the Apostle's argument. We shall look, therefore, more particularly to the personal ablutions of the Hebrews, and the manner of their performance, to ascertain the mode by which these divers washings (Greek: *baptismoi*) were performed.

We trust no candid man will fear to follow when God's truth leads the way, for we do not now consult the leaves of any dictionary or lexicon of man's compilation, but betake ourselves to the very Hebrew ordinances themselves, which by the mouth of the inspired Apostle, are called baptisms, and viewing these ordinances as they are performed, we learn by the very light of God's truth, what a baptism was in fact among the Hebrews, by a consideration of the mode in which it was administered, according to divine appointment.

After having made this investigation, we may gather assuredly that what the Holy Ghost, the author of inspiration, calls baptism we are safe in holding and regarding as such, whatever may be the preconceived opinions and prejudices of men.

These baptisms of the Hebrews being divers, we may take them up in order, and note them particularly as we pass. Eminent among them all is "the water of purification," referred to in Heb. 9: 13, and more fully described in the nineteenth chapter of Numbers, especially in the nineteenth verse: "And the clean person shall *sprinkle* upon the unclean, on the third day, and on the seventh day, and on the seventh day he shall purify himself, and wash his clothes, and bathe himself in water, and shall be clean at even. But the man who shall be unclean and shall not purify himself, that soul shall be cut off from among the congregation, because he hath defiled the sanctuary of the Lord; the water of separation hath not been sprinkled upon him—he is unclean."

Let us note first that this "water of separation sprinkling the unclean" was one of the *baptismoi* of which the Apostle speaks, for it was an ordinance pertaining to the flesh, *i. e.*, to the purification of the flesh, belonging to the class of external ordinances which the Apostle had in mind and included in the scope of his argument, for he refers to it particularly in the thirteenth verse: "For if the blood of bulls and of goats, and the ashes of a heifer *sprinkling* the unclean (the ashes of a heifer being included in the water of separation), sanctifyeth to the purifying of the flesh, how much more shall the blood of Christ, who, through the Eternal Spirit, offered Himself without spot to God, purge your conscience from dead works to serve the living God."

2d. That this *baptismos* was performed by *sprinkling*, and by this particular mode the purification was secured by the divine appointment, see the thirteenth verse just quoted, and the nineteenth verse of the nineteenth chapter of Numbers: "Sprinkling the unclean," "and the clean person shall sprinkle," etc.

3d. That this particular *baptismos* was selected by the Apostle as preëminently illustrating the purifying efficacy of the blood of Jesus Christ, of which we have held all along that baptism was the symbol.

If I had consulted that thesaurus of Greek learning, the lexicon of Stephens, compiled in the sixteenth century, and found purification as one of the definitions of *baptismos*, I think I should be justified in asserting that *baptizo* meant to *cleanse*, by the highest classical authority, much more if when I consult the Word of God—the infallible treasury of truth—I find that an ordinance of the Hebrews, which an inspired Apostle calls *baptismos*, was performed by *sprinkling*, am I authorized in the affirmation that by the use of the sacred writers, *baptismos* is lifted above its primary signification of immersion, and becomes a generic term, including divers and particular modes of administering the emblem, one of which, as we have seen, from the incontestible evidence of the Sacred Record, was by *sprinkling*.

The distinguishing characteristic of this ordinance of baptism was *sprinkling*, because this is particularly noted by the Apostle when he connects it with the efficacious purification of the blood of Jesus, the *sprinkling* of the water of purification cleansing the flesh, the blood of Jesus purging the conscience—the one the symbol of the other, and though, to complete the ordinance, washing of clothes and washing of the person was enjoined, yet, in the mind of the Apostle, the sprinkling was what gave to the ordinance its peculiar significance as a *baptismos*. By this the Apostle shows most conclusively, not only that ablution by sprinkling was one of the *baptismoi* to which he referred in the scope of his argument, but more than that, to wit: that of all the divers *baptismoi*, the *water of purification applied to the person by sprinkling* was the most fit and pertinent illustration of the sanctifying efficacy of the cleansing blood of Jesus—that is, that the *sprinkling* of the water of purification was not only a Hebrew baptism, but among them all the most complete and perfect emblem of the blood of sprinkling, of which Christian baptism is the symbol and seal. F. B.

Oxford Bibles.

The superior excellence of the Bibles printed at the Oxford University Press is proverbial among all who prize correctness of the text, and clearness and beauty of typography and binding. The Oxford editions are the standard from which other editions are copied, and are therefore acknowledged as superior.

The Subscribers, who act as

SOLE AGENTS IN THE UNITED STATES

or these Bibles, keep all varieties and sizes, from the 48-mo. to the Folio. They select the following, which they strongly recommend.

THE SUNDAY SCHOOL BIBLE. Printed in clear type and well bound in arabesque - - - - - - - - - 50 cents.

THE PEW BIBLE. Printed in large type and bound in morocco, $2 00; Turkey morocco, $3 00.

THE STUDENT'S BIBLE. Printed on fine paper, in beautiful type, with References and Maps, and an Index to the persons, places, and subjects occurring in the Scriptures. Turkey morocco, - - - - - - - - - - - - - $4 00

THE CLERGYMAN'S BIBLE. Printed in large, clear type, with References and Maps, and an Index to the persons, places, and incidents occurring in the Scriptures. Bound in Turkey morocco, - - - - - - - - - - - - $5 00

THE PULPIT BIBLE. Beautifully printed in very large, clear type, demy, 4to. Bound in Turkey morocco, - - - - $20 00

THE FAMILY BIBLE. Beautifully printed in large type containing Family Record, with or without References, Plates, and Maps, in every style of binding, from $17 00 upwards.

THOS. NELSON & SONS,
137 Grand Street, New York.

The prices quoted above are in U. S. Currency, and any of the books will be mailed free on receipt of price.

WM. HOLLIS,
Dealer in
Ward's Shirts,
AND MEN'S FURNISHING GOODS
Corner of Market and Third Sts.
N. B.—Shirts Made to Order.

The following works, published by Mason Brothers, New York and Boston, are supplied in California by

H. H. BANCROFT & COMPANY,
San Francisco.

THE LATEST AND BEST OF SCHOOL READERS.

Edwards & Webb's Analytical Series.

ILLUSTRATED BY THOMAS NAST.

First Reader, 28 Cents. Fourth Reader, 90 Cents.
Second Reader, 50 Cents. Fifth Reader, $1.25.
Third Reader, 75 Cents. Sixth Reader, $1.60.
Edwards & Warren's Analytical Speller 25 Cts.

These Readers are COMPLETE IN GRADE, METHOD, MATTER, AND EXECUTION and contain

1. An admirable presentation of the word-method and object-systems of teaching, with a beautiful arrangement of text and illustration.
2. A clear and correct treatise upon the elements of spoken language.
3. Lessons in Phonic Analysis, and exercises for training the organs of speech to the acquirements of a full and distinct articulation.
4. Rules for reading the various classes of selections, and directions for giving due and appropriate expression to every phase of thought and feeling.
5. A most thorough system of Thought Analysis, by which the student is made to observe and appreciate the full sense and scope of each selection.
6. Selections chiefly new. Engaging lessons and stories for younger pupils, and for those more advanced, the best and worthiest specimens of American and foreign literature.

These books are printed from electrotype plates, made from new fonts of clear cut type; the best paper only is used; they are bound in the most durable manner; are sold at the lowest prices, and introduced upon the most favorable terms. Though published less than a year since, they have already been adopted by the Public Schools of New York, Chicago, and many other cities, and are everywhere giving unqualified satisfaction. Specimen pages and circulars sent on application.

A Method for the Piano-forte,

—BY—

WILLIAM MASON AND E. S. HOADLY.

Large quarto volume; illustrated; 240 pages. Price $4.00.

Two editions are published, one with AMERICAN FINGERING, and one with EUROPEAN FINGERING. Purchasers should always state which is wanted.

This work, first published in November, 1867, of which six editions have been called for in rapid succession, has proved to be the most useful, thorough, systematic, and successful text book for instruction upon the Piano-Forte ever published. It is eminently a new method: modern, original, complete. Retaining all that has proved valuable in older works, it adds much that has heretofore never been published, though often tested in private teaching with the best and most successful results. Among the novelties of the work, the ACCENT EXERCISES, introduced by Mr. Mason, are worthy of the attention of every teacher, as presenting unusual advantages of instruction.

The prominent excellences of this book are:

1. Its DEPARTMENTS, theoretical and practical.
2. EXPLANATIONS & DIRECTIONS, such as best teachers give their pupils, and which for accuracy and clearness, have neve been surpassed.
3. THE ART OF FINGERING—best modes of overcoming difficulties.
4. THOROUGHNESS and PERFECTION of Lessons.
5. RECREATIONS AND PIECES, skillfully adapted to the requirements of the pupil, and embracing the most attractive and meritorious compositions.

Dr. Lowell Mason's Music Charts,

FIRST SERIES, THIRTY CHARTS, Price $7.50.
SECOND SERIES, THIRTY CHARTS, Price $7.50.

This work, which every teacher of Vocal Music will find extremely useful and convenient, consists of Charts or Diagrams, each of which is 30 by 42 inches in size, designed as aids in teaching classes the Elements of Music and its Notation. They embrace Exercises, Illustrations, simple Songs and Pieces, such as teachers are accustomed to write on the Blackboard, progressively arranged and printed from mammoth type, which can be easily seen from all parts of a large hall.

Care should be taken to order DR. LOWELL MASON'S MUSIC CHARTS. These Charts cannot be sent by mail.

Apples of Gold in Pictures of Silver.

BY EDWARD ROBERTS.

Price in paper covers, 30 cents each, or $25 a hundred; in board covers, 35 cents each or $30 per hundred.

The New Sunday-School Song Book. Containing treasures old and new, many beautiful Songs, the words as well as music of which are now first published, with the choicest of the old hymns and tunes.

MASON BROTHERS, Publishers,
596 Broadway, New York; 154 Fremont St., Boston.

Current Literature.

MINERAL RESOURCES OF THE PACIFIC STATES—J. ROSS BROWNE'S REPORT,

The publication of this report is a benefit to the public which coming years will only make more plain. To every one seeking information on the topics naturally embraced by such a work, this volume of nearly seven hundred pages, octavo, is invaluable. It is filled with material gathered at great expense of time, and means, and labor, and so arranged, with its copious index, as to be immediately available for practical use. The Commission entrusted by Congress to Mr. Brown was an extremely difficult one. A territory sweeping from Alaska to Lower California, washed by the Pacific, and stretching over the Sierras to the Rocky Mountains, is not easily explored, nor can its resources be told without much patient, honest work. The following extract from a letter to Secretary McCulloch, accompanying the report, will suffice to show the need of the Commission:

"No country in the world can show such wasteful systems of mining as ours. At a moderate calculation, there has been an unnecessary loss of precious metals since the discovery of our mines of more than $500,000,000, scarcely a fraction of which can ever be recovered. This is a serious consideration. The question arises whether it is not the duty of Government to prevent, as far as may be consistent with individual rights, this waste of a common heritage, in which not only ourselves but our posterity are interested.

"The miner has a right to the product of his labor, but has he a right to deprive others of the benefits to be derived from the treasures of the earth, placed there for the common good? The precious metals are of an imperishable nature, evidently designed to pass beyond the reach of the discoverer and to subserve purposes of human convenience for generations. Our children have an interest in them which we cannot with propriety disregard."

Mr. Browne advocates with earnestness and force the establishment of a National School of Mines, which the facts above stated prove to be a necessity. Senator Stewart's bill for the establishment of such a school is printed in the Appendix to the Report. The general observations on the Pacific slope, discussing the progress of settlement, immigration, and labor, and general considerations on the precious metals, are exceedingly interesting, while well digested articles on "Foreign Gold and Silver Bearing States," give valuable matter in very little space. We are glad to learn that Mr. Commissioner Browne proposes soon to issue a new book, to be called "The Pacific Slope," which will embody the Report, together with much additional information of general interest and value. In another department of the paper will be found a selection from the work, which will well repay perusal. Published by H. H. Bancroft & Company, San Francisco.

FOREIGN MISSIONS OF THE PRESBYTERIAN CHURCH.

A complete manual of the Foreign Missions supported by our Church in America, edited by John C. Lowrie, D.D., is a book of peculiar interest to every true Presbyterian. That it has reached its third edition, newly revised and improved, proves its need by the Church and its adaptation for that need. It is edited with conscientious fidelity, is accurate in detail, convenient for reference, and reliable in statement. The introduction is short and to the point. In it the author states, "the book has been prepared chiefly for the use of those who have not had an opportunity of becoming acquainted with the fields of labor occupied by the Presbyterian Church. It is not a history of these missions, but its aim is simply to give such information as will be likely to prove useful and convenient for reference." The first chapter, giving an account of "The Board of Foreign Missions of the Presbyterian Church," makes the reader acquainted with the organization and practical working of a great plan of Christian benevolence. This is followed by eight chapters devoted to a resumé of the missions among the Indian tribes, in Western Africa, North India, Siam, China, Japan, Roman Catholic countries, and the Mission to the Jews. The condensation of matter in these chapters increases both their value and interest.

One chapter in the volume must ever possess a special and hallowed interest. It is made of very brief memoirs of missionaries who have been "called home." To have such a necrology is an honor to any Church; nay, more, it is a blessing for the Church to know that so many have witnessed a good confession, and, without a single exception, have gone from their scenes of toil for the Master below, with thankful expressions for His having permitted them thus to labor for Him. "It is sweet to die for one's fatherland," but every reader of these memoirs must feel that "to die for Jesus" is sweeter still.

The book has valuable tables and statistical matter, which make it of permanent utility. It deserves a place in every Presbyterian family. Published by Wm. Runkin, Jr., New York. For sale by H. H. Bancroft & Co., San Francisco.

COMMENTARY ON GENESIS AND EXODUS.

Doctor Murphy, appointed by the General Assembly, in 1847, to the Chair of Hebrew and other Oriental Languages, in the Assembly's College at Belfast, has done a noble service to his College and Church in the publication of this work, and it is not too much to say that many will gladly avail themselves of these handsomely printed volumes, and will find in their study valuable helps to the right understanding of the Sacred Word.

Dr. J. R. Thompson, in his preface to the American edition, says:

"The merits of Dr. Murphy's work are, a nice, critical analysis of the text, a candid consideration of all alleged difficulties, a common-sense view of the principles of interpretation, and a philosophical clearness and comprehensiveness in the statement of inference or of doctrine. It consists of an exact literal translation of such passages as contain either verbal or grammatical difficulties, and of a critical and exegetical commentary, based upon the grammatical construction of the text, and framed in view of the best lights of modern criticism and science."

This is certainly high praise, but the Commentary deserves it. The author does not shrink from vexed questions and pass them by. He has his own opinion, and states it manfully. His introduction to the volume on Genesis epitomizes his views on the Bible, The Pentateuch, and the book of Genesis. His critical notes on the text are compact, suggestive, and have a true scholarly finish. His exegisis is sound and reliable, while oftentimes the style becomes truly eloquent. There is no display of learning, but every page bears witness to careful research and discriminating judgment.

The volume on Exodus is marked by the same characteristics, and the two will find place on the shelves of every student who relishes with his zeal for advance in critical scholarship, a devout spirit and an honest reverence for the Bible as the inspired Word of the living God. The volumes may be found at A. Roman & Co.'s. Published by W. F. Draper, Andover.

ROBERT LINTON. BY AUTHOR OF WIN AND WEAR SERIES.

Any book with the imprint of Carter & Brothers has *prima facie* evidence of being true and sound. This is especially true of Carter's list of juvenile libraries; They are not only interesting; they are also safe and profitable. "Robert Linton" is more than a pleasant story. It instructs the reader of any class—the boys and girls, as well as those older. All who have it can but learn valuable lessons from its pages. It is a capital work for the Sunday School library. For sale by A. Roman & Co.

LITERARY ITEMS.

American Literature.—The following is an estimate of the books, pamplets, etc., published in this country during the year 1867: Fiction, 741; Religion and Theology, 257; History, 107; Poetry, 120; Law, 121; Medicine, 70; Travels and Geography, 74; Belles Lettres, 80; Fine Arts, 31; Arts, Trades, Occupations, 142; Education, 75; Sociology and Households, 32; Amusements, 17; Philosophy, Morals and Temperance, 25; Science, 21; Government, 38; Biography and Genealogy, 103; Learned Literature, etc., 25; New Periodicals, 11; Other Books, 34. Total, 2124.

Religious Papers of Boston.—The circulation of the Boston *Pilot*, Catholic organ, is 35,000; *Zion's Herald*, organ of the Methodists, 12,000; *Watchman and Reflector*, organ of the Baptists, 22,000; *Congregational and Puritan Reader*, organ of the Congregationalists, 27,000.

Life of Christ.—Henry Ward Beecher is engaged in writing a Life of Christ. The book will be published by J. B. Ford & Co. The frontispiece will be an engraving, by W. E. Marshall, of Leonardo de Vinci's head of Christ, from the Last Supper.

Cronise's Natural Wealth of California, published by Bancroft & Co., and sold by subscription agents only, is meeting with extraordinary success. The sales have been large, and the demand for the book is rapidly increasing.

German Papers.—One hundred and seventy-two German newspapers are published in the United States, of which forty-six are dailies, two of which are published in this city.

Queen Victoria.—Harper & Bros. have published popular editions of both of Queen Victoria's books which have had such an enormous sale, at twenty-five cents each.

Anna Dickinson has lately written a novel, which, it is said, one of the prominent publishers has declined publishing, as he did not like the plot.

Long Romance.—A Japanese author has just completed a romance in 106 volumes, the printing of which, it is said, will take thirty years.

Dante.—A translation of Dante has just appeared at Dresden, signed Philaléthe, of which the real author is King John of Saxony.

Pilgrim's Progress.—Dr. Colenso is translating "Pilgrim's Progress" into Zulu, and has already printed the first part of it.

Red Men.—The only organ of the Society of Red Men in the world, is the *Calumet*, published in San Francisco.

The *Marysville Appeal* has entered upon its eighteenth volume.

The *Pacific Gospel Herald* has suspended for the want of support.

Educational.

Less Study at Home.

"Five hours' school a day, with two hours' intermission, and no lessons learned at home—these are our colors, and we nail them to the mast." (*Chicago, Atlantic Monthly, March*, 1867.) There is food for thought in this sentence. The writer is a practical man. Parents too often judge schools by the amount of work required at home. The child, anxious and busy in the corner, means for them the good school. It often means just the reverse. It means a long lesson required merely to be memorized. It means no time for mutual questioning between pupil and teacher. Indeed, it often means that the teacher would be afraid of any questioning that would be *mutual!* It means memory, tyranny, and final hatred of books and knowledge. At the same time, what does a scholar disengaged at home often mean? It means the school hours spent in inquiry and varied mental effort. It means the parrot turned out and the thinking human being brought in. It means a regard for the pupil's health. It means a space left for the pupil's domestic culture. It means a vision before the teacher's mind of a family hearth, and lamps, and table. Father is reading a book of travels. Mother is helping the children follow the traveler on a map. Or, Father is reading the papers, and the children are developing affection and imagination over well chosen tales and poetry. It often means sense in teaching, instead of wicked nonsense.

C. R. C.

Personal.

Rev. Eli Corwin, for ten years the able and successful pastor of the First Street Congregational church, Honolulu, S. I., is now on a visit to his many friends in this State. We are glad to learn that it is his purpose to make his future home in California.

Rev. B. B. Bonham, of Healdsburg, is travelling in the southern part of the State. The readers of The Occident will hear from him soon.

Prof. Gilliard is lecturing in the northern part of the State on "The Civilization of the African race, as viewed in the light of History."

Rev. Dr's Scudder and Thomas, having returned from their trip to Yosemite, preached in their respective pulpits last Sabbath morning.

John Bigler is the California member of the Democratic National Committee. J. W. McCorkle is the member from Nevada.

Rev. Mr. Allen, who is to be rector of the Episcopal church in Carson City, Nev., sailed from New York, June 16th.

Prof. Warren has resigned his position in Albany College, Oregon, and has accepted a position in the public schools.

Brigham Young will engage in silk raising, having already planted a large number of mulberry trees.

James E. Perley, Senator from San Joaquin, recently died at Woodstock, New Brunswick.

Detective Officer Blitz, died at Warm Springs, Alameda County, on the 14th inst.

A. G. Drake succeeds D. C. Stone, as Principal of the Marysville Grammar School.

Judge Still, of Los Angeles, died at his residence in that city, on the 6th inst.

City College.

CITY DEPARTMENT OF UNIVERSITY COLLEGE,

Corner of Stockton and Geary Streets,

SAN FRANCISCO.

CHEMICAL LABORATORY AND SCHOOL OF PRACTICAL CHEMISTRY AND ASSAYING.

Thomas Price, M.D., Professor of Chemistry; assisted by W. B. Johnston and A. C. Gunter, in the Laboratory.

COLLEGE.

Rev. P. V. Veeder, A.M., Acting President, and Professor of Mental and Moral Philosophy.
Rev. Thomas Kirkland, A.M., Professor of Ancient Languages.
T. A. Robinson, Professor of Mathematics.
G. C. Arnold, Ph.D., Professor of Physics and Modern Languages.
A. Conlon, Professor of French and Drawing.

THE COLLEGE SCHOOL.

SENIOR ENGLISH AND CLASSICAL DEPARTMENT.

Rev. Thomas Kirkland, A.M., Master, with three Assistants.

JUNIOR ENGLISH AND CLASSICAL DEPARTMENT.

L. W. Reed, Master, with three Assistants.

PRIMARY DEPARTMENT.

Miss M. G. Clark and Miss. L. Wells.

☞ Book-keeping carefully taught in the Junior and Senior Departments.

☞ Instruction in French, Spanish, German, and Drawing, given in all departments of the School.

The Chemical Laboratory, on Stockton Street, has been fitted up with costly furnaces and the best appliances for the practical study of Chemistry, in all its branches. Courses of Lectures on Chemistry, Metallurgy, and Mining are given by Prof. Price, during the first four months of the year. The Institution is provided with ample Buildings, valuable Philosophical and Chemical Apparatus, spacious Play-grounds, and an open-air Gymnasium.

For Terms and further particulars, address

REV. P. V. VEEDER.

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, Principal.

The Eighth Term of this Institution will commence on Wednesday, July 8th, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

Publisher's Notice.

All persons are forbid publishing or manufacturing any imitation of a work entitled "SHERWOOD'S WRITING SPELLER," a copyright of which is secured, according to law. Any infringement upon the copyright of this work will render the offending parties liable to prosecution. Parties in California who have infringed upon the copyright of this work, by manufacturing and selling a similar book, are requested to render a statement of the number disposed of to H. H. Bancroft & Company, San Francisco, with whom we have arranged for the publication and sale of the work upon the Pacific Coast.

AGRICULTURAL.

California Wool.

Boston presents, beyond all comparison, the best market for our wool. Of 1,541 woolen mills in the United States, in 1865, Massachusetts had 260 and New York 278; but the consumption of scoured wool in the Massachusetts mills in that year was 857,496 pounds weekly, and in those of New York only 236,510, being a difference of 620,986 pounds each week. New England manufactures seventy-three and three-fourths per cent. and Massachusetts thirty-eight per cent. of all the wool used in the United States. The sets of machinery run in the mills of Massachusetts numbered 1,467 in 1865, while those of New York were only 576. The total clip of the United States in 1866 was 137,000,000 pounds, and the foreign wool imported the same year was 56,862,284 pounds. Of 931 mills 767 used domestic wool, and only 46 mills in the whole Union used imported wool alone. It is estimated that there are now 1,600 woolen mills in the United States, containing about 5,000 sets of carding machines, and capable of consuming 50,000,000 pounds of wool each year.

Of shodd and mungo, 65,000,000 pounds are consumed annually in England. This is more than our whole clip in 1860. The manufacture of those articles employs 25,000 hands, and the value of their product is represented as being about $30,000,000.

The wool clip of California for 1868 undoubtedly will be much heavier than any of its predecessors. It is estimated that the upper Sacramento Valley counties alone will produce about $500,000 worth. All our warehouses are packed full, and the yield of the State has been estimated as high as 12,000,000 pounds. It must be evident to producers that the nearer they can get their wool to the manufacturers the greater will be their profits. Mr. Buckley, an extensive sheep-raiser in Merced County, has imported a flock of twelve Cotswold sheep from New York. This has been erroneously thought to be the first introduction of the Cotswold into California. Several years ago a number of gentlemen engaged extensively in wool-growing, purchased a number of these sheep and landed them here in excellent condition, whence they were taken to the southern part of the State. It was soon found that they required to be fed on grain nine months of the year, for in this State the pasture does not last green and vigorous but a little more than three months, when it dries up and becomes cured hay, a substitute not well suited to the thriftiness of the Cotswold. When "severely" crossed with merinos the wool of the produce was of a singularly anomalous character. In some individuals it was coarse, moderately long, and in no wise partaking of the character of the merino. In others it was short, curly, and exhibiting no trace of the cotswold breed; and in others, again, it was very mixed and indefinite. The importers sold their Cotswold, which soon after ceased to be heard from, and passed out of memory; yet it is not improbable that they would do well in some portions of Oregon, where the climate is more like that of New York.—*San Bernardino Guardian.*

Farmers' Mistakes.

One who has evidently seen some poor practices, as well as those which are good, not only in the world at large, but especially among farmers, says:

It is a mistake to attempt to fatten three hogs into 1,200 pounds of pork, on just as much food as would serve to keep two growing.

To estimate agricultural fairs as arrant humbugs, and spend three days every month saving the country at a political meeting.

To depend upon borrowing your neighbors' rakes, mowers, and all sorts of implements in haying and harvesting time.

To house up a thousand bushels of grain waiting for a rise, till one-tenth has gone to feed rats and mice, and the remainder smells like the essence of rat, and the price is down forty or fifty cents.

To plant out a big orchard of fruit trees with the first thought of money-making, and then leave them to do or die.

To keep two fancy five hundred dollar carriage-horses, and pay six dollars a day for a team to plough.

To call "book farming" all bosh, to ignore news and agricultural papers, and attempt to keep an even yoke with your progressive neighbors by main strength and stupidness.

Bran for Milch Cows.—Plain bran or shipstuff is one of the very best kinds of food to increase milk. Why, we do not know. It is not fattening. A steer could not be fattened on bran alone, and a cow, if fed on the best of hay and bran alone, might fall off in her yield, unless her strength and condition were kept up by Indian meal, or other strong food. If there is anything in which there would seem to be no strength, it is bran—the mere hull of wheat. It is not stimulating, like brewers' grains, and can certainly do no harm if it does no good; and yet any farmer who will make the experiment will find—or, at least, we have found—that a cow being otherwise kept in proper condition, her yield of milk will be very materially increased by giving her, twice a day, a feed of pure bran. The fact is patent, although we are not able to explain it.

If there is any one article which, while keeping up the strength of the cow, will also increase the supply of rich, healthy milk, in our experience it is cotton-seed-cake meal. We have found this to have a great effect on the milk-secreting organs. The cows at first do not seem to relish it, and it should be mixed with some other feed, but they soon come to like it, and we have never seen any bad effects from it in any way.—*American Stock Journal.*

Poudrette.—Very severe prohibitions have been issued in France, England, and Germany, against the use of *poudrette* imperfectly prepared, it having been proven by careful experiments, that the fœcal matter of sinks cannot be converted with safety into garden manure under five years' careful preparation. Pestilential and other diseases are propagated by vegetables grown in soil thus manured. Yet it is stated that these death-dispensing deposits are absolutely used in the market-gardens around our large American cities, in their natural state, and many of the fruits and vegetables so grown can be told by the nostrils or the taste before they are cooked, or in the process of cooking. It is the opinion of skillful medical observers, that nearly all the novel diseases which now afflict many American cities, owe their origin to the organic diseased matter taken up by the vegetables and fruits grown in soil dressed by the fœcal matter of the sinks, and transferred to the stomach. Galloping consumption in persons whose families have never been subject to this terrible disease, has been traced to the use of vegetables grown by *poudrette*. This is only one instance out of a thousand.—*Scientific American.*

Potato Starch.

California grows quantities of potatoes of the largest varieties, and has a capacity for increasing her production of this edible tuber to an enormous extent. The limit of the crop is not what the soil can produce, but what the inhabitants, biped and quadruped, can consume. California imports large quantities of starch of Eastern and British manufacture, and pays many thousands of dollars for this great desideratum of the laundry. If we could manufacture the starch we need on this coast from the supplies of potatoes raised by our farmers, it would be another step in the direction of self-sustenance. We are told that about 500,000 bushels of potatoes are annually manufactured into starch in Grafton and Coos counties, New Hampshire, making 2,000 tons of starch, which is sold for $300,000. California ought to profit by the example. The establishment within her limits of starch manufactories is not a question of such importance as the beet root sugar business, but it is only of smaller import because families consume more sugar per head in the preparation of their food than they do of starch in the getting up of their linen.—*S. F. Bulletin.*

Sawdust.—This is easy for cattle to rest upon, absorbs a large portion of the liquids, and serves to keep the cattle clean, and, therefore, in a healthy and thrifty condition; and this is of no small consideration. All animals thrive according to the degree of health and comfort which they enjoy, as well as according to the amount and quality of the food given them. An ox well fed, but exposed to severe cold and storms, would be likely to gain only half as much as he would if properly sheltered. So, if he were situated so as to be obliged to stand all the time, he would soon become so uncomfortable as not to gain more than half as fast as he would if he could lie down, when inclined to do so, upon a bed of dry sawdust or litter.

Laying Eggs.—An exchange says that a hen has the capacity for laying six hundred eggs and no more. Usually they lay a few eggs the first year; from three hundred and twenty to three hundred and seventy in the next three years; and the rest from the fifth to the ninth year, inclusive. The true economy, then, is not to keep hens after their fourth year.

The Santa Barbara *Post* says that the wool crop of that county, this spring, will be over 500,000 pounds.

HINTS FOR HOUSEKEEPERS.

Cooking Meat.

We might imitate our neighbors across the water in rechauffés. We roast six to ten pounds of beef or mutton, and if our families are small, live for a day or two more on the cold remnants, then give or throw away the bone. Few of us care for cold meat for any length of time, but we can make a delicious dish out of those despised slices of beef or mutton. Take a deep, yellow nappy; cut off your slices of meat as thin as possible, and cut off the grizzled edges; put a layer in the dish, dust over pepper, salt and sift sweet marjoram or sage, or, if liked, a chopped onion. Fill your dish half full in this manner; then add the cold gravy left from the roast, taking off every particle of fat. Turn in half a teacup of catsup, or if canned or ripe tomatoes can be had, a quantity of those. Fill the dish nearly full of boiling water, and put a plate over it right side down. This keeps all the flavor in the dish. Bake two hours in the oven; mash your potatoes with butter or cream and salt; make a high wall around the edge of a heated platter; if appearances are to be consulted, beat up an egg, and with a brush or feather, egg over the wall and brown in the oven. At any rate, turn your meat and gravy inside the wall, and you have a dish for a patriot, if not for a king. Indeed, it is often preferred to the freshly roasted meat of the previous day. Uncooked beef or mutton can be cooked in the same manner, but must remain in the oven one hour longer. The toughest morsels of beef or mutton are made as tender as turkey, cooked in this manner. The raw meat must be cut as thinly as possible.

Veal may be cooked in dozens of ways. It is not as nutritious as beef or mutton, but in many places is much cheaper. Cooked with ham or bacon, it has a finer flavor. One method of cooking the two combined is to line a large bowl, which is well buttered, with slices of hard-boiled eggs. Then alternate thin slices of veal and ham, sprinkling pepper, salt, and grated lemon rind on the veal—pepper and lemon on the ham. Fill the bowl nearly to the brim; make a thick paste of flour and water, cover over the top and press tight to the outside edges of the bowl. Put in water—not enough to boil over the paste—and boil three hours. Leave the paste on till nearly cold; do not turn out of the bowl till the next morning, then, if the bowl was well buttered, you will find an appetizing-looking dish. Cut in very thin slices, and it is excellent as a supper, breakfast, or side-dish at dinner. It is styled Melton veal, as it was much used in years past at the Melton races.—*Springfield Republican.*

Cooking Beets.—When they are washed, the little fibers and ragged excrescences should not be broken off, as the juices of the root will thus be lost. Young beets boil in an hour; but in the winter they

require from two to three hours. When tender, put them for a minute or two in a basin of cold water, then take them in your hands and slip the skin off. This is a much easier and better way than to remove the skin with a knife. Lay them into a dish, cut them several times through, sprinkle them with salt and pepper, add a little butter, and, if you choose, vinegar also. It is a very good way to cut up all that remain after dinner, put on salt and vinegar, and set them aside to be used another day.—*Lutheran.*

ELASTIC and sweet glue, which does not spoil, is obtained as follows: Good common glue is dissolved in water, on the water bath, and the water evaporated down to a mass of thick consistency, to which a quantity of glycerine, equal in weight with the glue, is added, after which the heating is continued until all the water has been driven off, when the mass should be poured out into moulds, or on a marble slab. This mixture answers for stamps, printers' rolls, galvanoplastic copies, etc. The sweet glue, for ready use by moistening with the tongue, is made in the same way, substituting, however, the same quantity of powdered sugar for the glycerine.—*Druggists' Circular.*

WASHING COLORED FABRICS.—Before washing almost any colored fabrics, it is recommended to soak them for some time in water, to every gallon of which is added a spoonful of ox-gall. A teacup of ley in a pail of water is said to improve the color of black goods, when it is necessary to wash them. A strong, clean tea of common hay will preserve the color of French linens. Vinegar in the rinsing-water for pink or green will brighten those colors, and soda answers the same end for both purple and blue. —*Scientific American.*

FUEL.—Economy in fuel might be greatly promoted if the consumer would imitate the practice of good firemen in sprinkling over the surface of the fire a thin layer of coal as often as required. By this method the gases from the fresh coal are not wasted, as they are when coal is put on in great quantities at a time, when nearly all the gas goes off unconsumed.

TO MAKE GOOD BREAD FROM POOR FLOUR. —To eight pounds of flour add two and one-quarter pints of lime-water. Mix in the usual way, as if no lime-water were used. To make the lime-water add four ounces of lime to one gallon of soft water. Stir well; let it settle, and keep in glass bottles.

NICE GRIDDLE-CAKES.—Soak stale bread crusts in hot water, enough to moisten them, over night. In the morning add sour milk, a little saleratus, flour sufficient to make them thick enough, and bake on a hot griddle.

FRIED CAKES.—Two cups of sugar, two cups of sweet milk, half a cup of butter, two eggs, two teaspoonfuls of cream of tartar, one teaspoonful of soda, a pinch of all-spice. Add flour in sufficient quantity to roll and fry in hot lard.

MINING.

Our Mining Interests.

Refined gold is the best commodity for export. It is more nearly at its maximum value than any other commodity except food or manufactured articles. Unlike cotton, it does not come back to us in large quantities with its value many times multiplied by the appliance of labor, to bring us in debt for the labor of other countries, while our own people seek in vain for employment. But gold has another advantage as an export over any other product; it remains permanently in the commercial world, stimulating industry and enhancing values.

Take from the present supply the amount of precious metals in existence previous to the commencement of the nineteenth century and general bankruptcy and ruin would follow, while cotton produced a few years ago has now no existence. In developing our own mineral resources we are laboring not only for our own benefit, but for posterity, of whom we require the payment of the debt; while in producing cotton for export we are struggling for a temporary existence for ourselves and for the accumulation of wealth in Europe. There is another important argument in favor of the development of our mines. The region of country in which they are situated is far removed from market, and the agricultural resources of themselves are insufficient to induce settlements and the development of the fertile valleys and arable lands which we find interspersed among the mountains and deserts. The mines furnish a ready market, enhance the value of the lands, build up agricultural communities, induce the construction of railroads and other internal improvements, cause the erection of manufactories, school-houses, and churches, and attract all the advantages of civilized society. It is highly important that these mountain valleys should be inhabited. They are now more healthful and invigorating for the habitations of men than than any other portions of the United States. There civilization and free institutions will prosper. We want the Pacific and Atlantic united by a continuous line of population as well as by railroads and other artificial channels of communication.

It is unsafe for the Pacific slope, with its genial climate, unbounded resources, and vast commercial advantages, soon to be inhabited by many millions of men, to be separated from the Atlantic by hundreds of miles of uninhabited country. The prosperity of the mining interests is the only means that will induce settlement of the intervening space and secure its development. Here we have a country that may be divided into small farms, requiring no monopoly of land excluding population and free schools to favor the production of a single commodity, which, after it has desolated the country, we are called upon to crown king. No part of the United States is more admirably adapted to the physical and intellectual development of man, the advancement of science and civilization, and the accumulation of that kind of wealth which will benefit the whole people and relieve the whole nation from pecuniary embarrassment than this vast region of mountain, valley, and desert, which a few years since was supposed to be valueless. The people of the United States have capital, energy, enterprise, and increasing numbers, sufficient to realize in a short time all the advantages to be derived from the settlement of this part of the country. But it is necessary that the capital, energy, and enterprise of our people should be properly directed. Reason and example indicate that a school of mines is an essential agency for the promotion of these objects.—*Speech of Senator Stewart on Bill to establish a National School of Mines.*

Mining not Inimical to the Interests of the People.

It is a common error to suppose that mining is inimical to the welfare of the people. No branch of industry requiring mechanical skill and the acquisition of scientific knowledge can justly be said to contain in itself elements injurious to public morals or to the prosperity of the State.

The tendency of this pursuit is, at first, to attract a reckless and adventurous population, whose disregard of conventional restraint leads to the assumption of risks and to bold and hazardous undertakings, by which new countries are most rapidly opened up to settlement and civilization. Providence so ordains it that the superficial treasures of the earth designed to attract this enterprising class soon disappear, and a higher order of intelligence is required and a more permanent condition of things is established. It is only necessary to look back over the past eighteen years to find in the advancement of the vast region known as the Pacific slope the strongest possible refutation of the assertion that mining is inimical to the welfare of the people. Looking forward to the future, who can predict the high condition of prosperity likely to be attained by these new States and Territories eighteen years hence?—with trans-continental railroads and telegraph lines binding the Atlantic to the Pacific; with branch roads and lines traversing the country north and south; with the commerce of Asia pouring its treasures into our seaports; with an export trade commanding the whole eastern world; with a probable coast line stretching from Behring Straits to Cape St. Lucas; with innumerable flourishing cities and seaport towns; with an agricultural population numbering thousands where they now number hundreds; with busy manufactories scattered over the land; with churches, schools and colleges everywhere throughout the mountains and valleys—all these many of us may live to see, but few can now realize the magnificent future that lies before us. In this favored land the laborer, the artisan, the mechanic, the man of science can each find profitable employment and a congenial home. As we want population to develop the dormant wealth of our new States and Territories, it is the interest of our government to disseminate a correct knowledge of their material resources.—*J. Ross Browne, in Report on Mineral Resources of Western States and Territories.*

National Mining School.

We take the following from a pamphlet published in Washington, entitled "Considerations in reference to the Establishment of a National School of Mines as a means of increasing the Product of Gold and Silver Bullion."

The New York *Times* attaches great value to a School of Mines, but does not see why the Government might not as well establish a School of Agriculture, or a School of Commerce, or a School of Commercial Navigation. There is a Bureau in the Treasury Department specially designed to promote the interests of Commerce and Navigation. The Coast Survey, the Light House Board, the Consular System, the Board of Steam Boiler Inspectors, are all carried on at Government expense, for the benefit of Commerce and Navigation. The Bureau of Statistics is an important aid to commerce and navigation. Surely these great interests have no cause to complain. What has Government done, on any scale commensurate with these great expensive branches of the public service, to promote the interests of mining? Congress has already established a Bureau of Agriculture, and provided by donations of land for "Schools of Agriculture and the Mechanic Arts." But no Mining School has been established by any of the States or Territories under the act of 1862. California is about to establish a State University, in which there will probably be a department for theoretical instruction in mining, as in some of the colleges of the East, with which this donation has been consolidated. Something, of course, will be gained by such elementary instruction, but these miscellaneous institutions can never prove a substitute for a great central Mining School, devoted exclusively to mining. If the *Times* can devise some means by which we can get along without the precious metals, its argument will be conclusive. But with six or seven hundred millions of gold bonds to pay in Europe, two hundred and forty or fifty millions of gold and silver in the country to pay it with, and the product of bullion rapidly diminishing, how is it to be done? Mr. Garnett, whose experience in financial matters entitles his opinions to great weight, contends that such a drain must culminate in general financial disaster. "As gold becomes scarcer, the greater the premium; the greater the premium on gold, the lower the value of currency; the lower the value of currency, the higher prices become," etc. Neither agriculture nor commerce is to be stimulated by financial depression, and it is only by diminishing the balance of trade against us that we can hope to get over the difficulty. The agriculture, commerce, and navigation of the Pacific Coast would now be carried on chiefly by Digger Indians, if it were not for the adventurous spirit of the American people and the allurements inherent in the business of mining."

Good Work! One Price! Punctuality!

D. Bruce,

PRINTER,

Commercial Street, opposite Miners' Restaurant.

General Selections.

Prayer.

Lord! what a change within us one short hour
Spent in thy presence will avail to make!
What heavy burdens from our bosoms take!
What parched grounds refresh, as with a shower!
We kneel, and all around us seems to lower;
We rise, and all, the distant and the near,
Stands forth in sunny outline, brave and clear.
We kneel, how weak! we rise, how full of power!
Why, therefore, should we do ourselves this wrong,
Or others—that we are not always strong—
That we are ever overborne with care—
That we should ever weak or heartless be,
Anxious or troubled—when with us is prayer,
And joy, and strength, and courage are with Thee!

R. C. French, D.D.

Fletcher, Vicar of Madeley.

The position of a parish clergyman in the Church of England who does his duty is one of peculiar difficulties and discouragements. He has not to deal with a voluntary congregation, whose members have no connection with him beyond that of free choice and inclination. He has the nominal charge of all who reside within certain territorial boundaries, and, whether they like him or not, in the eye of the law he is bound to do what he can for their souls.

The larger the population of an English parish, the greater are the English clergyman's difficulties. Many a clergyman finds himself placed in the midst of dense masses of people whose spiritual necessities he is utterly unable to overtake. He sees around him hundreds of immortal souls, continually passing out of time into eternity—ignorant, immoral, without God, without Christ, and without hope—and yet has neither time nor strength to get at half of them! A position like this is dreadfully trying and crushing to the spirit of a conscientious man. Yet this is the position in which Fletcher found himself at Madeley. Who can wonder that at first he felt sorely cast down, and half inclined to think, with Wesley, that he had mistaken his calling?

These first feelings of discouragement, however, gradually passed away. Little by little he became fitted to his post, and saw clearly that he was where God would have him be. Once settled down in his work at Madeley, he never gave it up, and for twenty-five years did the work of an evangelist among his semi-heathen parishioners in a way that few have ever equalled, and none probably have surpassed. No other cure ever tempted him away. Where he began his ministry, there he ended it. Madeley was his first charge, and Madely was his last.

The machinery which Fletcher used in doing his work at Madeley was very simple and apostolic. He was instant in season and out of season, always "preaching the Word." Publicly in church, privately from house to house, by the road-side, in the fields, at the coal-pit mouth, he was continually lifting up his voice, and "teaching and preaching Jesus Christ." He counted the day lost in which he was not actually employed in doing his Master's business. A warfare of holy aggression on sin and Satan's kingdom was constantly kept up throughout the district, and no one was let alone. So great indeed was his zeal, that people who were determined to have their sins, agreed to lock their doors, and refuse him admission. Like Ahab, they hated him because he did not speak good of their condition, but evil. Even John Wesley, who thought him wrong in going to Madeley, bore this testimony to his work: "From the beginning of his settling there, he was a laborious workman in the Lord's vineyard, endeavoring to spread the truth of the gospel and to suppress vice in every possible way. Those sinners who tried to hide themselves from him, he pursued to every corner of his parish, by all sorts of means, public and private, early and late, in season and out of season, entreating and warning them to flee from the wrath to come. Some made it an excuse for not attending the church service on a Sunday morning, that they could not awake early enough to get their families ready. He provided for this also. Taking a bell in his hand, he set out every Sunday for some months at five in the morning, and went round the most distant parts of the parish, inviting all the inhabitants to the house of God."

As a *preacher*, I am disposed to assign Fletcher a very high rank. Even in the last century, when there were "giants of pulpit power on earth," I suspect there were not half-a-dozen men superior to the Vicar of Madeley. He was naturally an eloquent man. He had a mind well trained and stored with scriptural matter. He was eminently direct, bold, and conscience-stirring, in his way of putting things. Not least, he had a very fine voice, and a singularly fervent and attractive manner. It is recorded that many English people used to go to hear him preach in French to the French congregations in London, though they could not understand a word that he said. "We go," they used to say, "to look at him, for heaven seems to beam from his countenance." A minister possessing such qualifications as these must have been a man of no common power in the pulpit. John Wesley who was no mean judge, used to say, that if Fletcher had had more physical strength, he would have been the first preacher in England. This is probably saying far too much. Nothing, I suspect, would ever have made Fletcher equal Whitfield or Rowland. But we need not hesitate to place him in the first class among the Christian orators of England a hundred years ago.

As *a writer*, Fletcher's reputation will never perhaps stand so high as it deserves. Unfortunately a very large portion of his literary remains consists of controversial treatises against Calvinism, and in defense of Arminianism. In these treatises I must plainly say the worthy Vicar of Madeley says many things with which I cannot agree, because I cannot reconcile them with the statements of Scripture. Yet, even when I do not agree with him, I feel bound as an honest man to admit that Fletcher is a very able adversary, and makes the best that can be made of a bad cause, and writes with courtesy. Indeed, I can never help suspecting that he was not nearly so much an Arminian in his heart as he thought he was, and that he was pushed into saying things, in the heat of controversy, which he afterwards regretted.

But it really is not fair to judge Fletcher, as a writer, by his controversial treatises alone. Out of the eight volumes of his works, at least four contain many admirable things, which are far less known than they ought to be. His admirable "Letter to Mr. Prothero in Defence of Experimental Religion;" his "Critical Vindication of the Catholic Faith, in reply to Priestly;" his "Portrait of St. Paul;" his pastoral epistles to his flock at Madeley—are, generally speaking, all worthy of high praise. Last, but not least, his letters to friends, like most of the letters of the spiritual heroes of last century, are often most excellent. If a volume of letters by Whitefield, Venn and their cotemporaries could be compiled and published—and I have long regretted that the thing has not been done—I am bold to say that Fletcher's letters would occupy a very prominent place among them.

As *a man*, Fletcher's character stands above all praise. I can find very few men of a hundred years ago about whom there is so striking an agreement on all sides that he was preëminently and peculiarly a most holy man, a saint indeed, a living epistle of Christ. His deep humility, his extraordinary self-denial, his unwearied diligence, his courage in Christ's cause, his constant spirituality of tone, his fervent love to God and man, his singleness of eye, are features in his character so strongly marked and developed, that even his adversaries never pretended to deny them. Wrong as he was in some of his views of doctrine, his worst foes never ventured to doubt his singular holiness of life. In this respect, at any rate, the Vicar of Madeley ranked high among his cotemporaries. Like every earthen vessel, he had his cracks and flaws, no doubt, and no one knew it better than himself; but they were cracks and flaws which were far less visible than, unhappily, they are in many of God's saints.

Let us hear what John Wesley thought of Fletcher. No doubt he was an Arminian, like Fletcher, and likely to think well of him. But Wesley was a calm, cool-blooded man, and not one to speak strongly in any one's praise without good reason. This is his testimony:

"I was intimately acquainted with Mr. Fletcher for thirty years. I conversed with him morning, noon, and night, without the least reserve, during a journey of many hundred miles; and in all that time I never knew him to speak an improper word, or do an improper action. To conclude, within four-score years I have known many excellent men, holy in heart and life, but one equal to him I have not known, one so uniformly devoted to God. So unblamable a man, in every respect, I have not found, either in Europe or America; nor do I expect to find another such on this side eternity."

Let us hear, finally, what Henry Venn thought of Fletcher. His testimony, at any rate, is unexceptionable. Though not an extreme Calvinist, he certainly was not in the least an Arminian. He had little or no direct connection with the Vicar of Madeley, and did not move in the same path. Above all, he was a man of rare good sense as well as grace, and one whose gift of sound judgment was great and extraordinary.

His testimony was as follows:—"Mr. Fletcher was a luminary—a luminary, did I say? He was a sun. I have known all the great men for these fifty years, but I have known none like him. I was intimately acquainted with him, and was under the same roof with him once for six weeks, during which I never heard him say a single word which was not proper to be spoken, and which had not a tendency to minister grace to the hearers. One time, meeting him when he was very ill with a hectic fever, which he had brought on himself by excessive labor, I said, 'I am sorry to find you so ill.' Mr. Fletcher answered with great sweetness and energy, 'Sorry, sir! Why are you sorry? It is the chastisement of my heavenly Father, and I rejoice in it. I love the rod of my God, and rejoice therein, as an expression of his love and affection towards me.'"

Fletcher died on Saturday the fourteenth of August, 1785, after a short illness of only ten days' duration—apparently a typhus fever—in the fifty-sixth year of his age. His constitution was probably broken down by his long continued labors in Christ's cause, and a constant tendency to consumption; and when the last enemy came, he had no strength or stamina to enable him to resist disease. Even to the last he was the same man that he had been for twenty-five years, and his obstinate determination to work on to the uttermost in all probability made his attack of fever terminate fatally. Though taken ill on Thursday the fourth of August, he persisted in taking the full morning duty on the following Sunday in his church. He read prayers, preached, and administered the Lord's Supper, though he nearly fainted several times in the service. From the church he was supported into his bedroom, where he lay for some time in a swoon, and from that time he never left his house alive. Never, perhaps, was there a more striking instance of the "ruling passion being strong in death." Like Whitefield, he almost died in harness.—*Rev. J. C. Ryle in the Family Treasury.*

Inspiration of Scripture.

The nature of inspiration can only be learned from Scripture itself. To it, therefore, we apply for a definition to this important term. The Apostle Paul, in writing to Timothy, a pastor and teacher in the Church of God, makes use of the following expressions concerning Scripture: "The Holy *Scripta* able to make thee wise unto salvation," and, "Every Scripture given by inspiration of God and profitable for doctrine." From these expressions we gather the following order of doctrine concerning the origin and character of the Bible:

1. It is given by inspiration of God.

2. It is first, holy; second, able to make wise unto salvation; and third, profitable for doctrine and other purposes of edification.

In these elements of the doctrine of inspiration the following points are worthy of remark:

1. It is a *writing*, not a writer, of which the character is here given. The thing said to be inspired is not that which goes into the mind of the author, but that which comes out of his mind by means of his pen. It is not the material on which he is to exercise his mind, but the result of that mental exercise which is here characterized. Hence it has re-

ceived all the impress, not merely of man in general, but even of the individual author in particular, at the time when it is so designated. It is that piece of composition which the human author has put into a written form which is described as inspired. This is the true warrant for, and the proper meaning of, the phrase *verbal inspiration.*

2. To be inspired of God is to be communicated from God, who is a spirit, to the mind of man. The *modus operandi*, mode of communication, we do not pretend to explain. But the possibility of such communication we cannot for a moment doubt. The immediate author of a merely human book may not be the ultimate author of a single sentiment it contains. He may have received every fact from trustworthy witnesses, who are, after all, the real vouchers for all that it records. And the very merit of the immediate author may consist in judiciously selecting the facts, faithfully adhering to his authorities, and properly arranging his materials for the desired effect. Analogous to this is the divine authorship of the Sacred Volume. By the inspiration of the Almighty, the human author is made to perceive certain things divine and human, to select such as are to be revealed, and to record these with fidelity in the natural order and to the proper end. The result is a writing given by inspiration of God, with all the peculiarities of man, and all the authority of God.

3. Such a written revelation is "holy." The primary holiness of a writing is its *truth.* God's part in it secures its veracity and credibility. Even man often tells the truth, where he is a disinterested witness, and we believe not only his sincerity, but his competence. God, who cannot lie, is able to secure His scribes from error, intentional or unintentional. The secondary holiness of a writing appears in the two following particulars:

4. It is also "able to make wise unto salvation." This refers to the kind of truth contained in the Book of God. It is a revelation of mercy, of peace on earth and good will to man. This, at the same time, imparts an unspeakable interest to the book, and points out the occasion warranting the divine interference for its composition.

5. It is also "profitable for doctrine." It tends to holiness. It is moral, as well as merciful, in its revelations. It contains truth, mercy, and righteousness. It reflects, therefore, the holiness of God. It is in all respects worthy of its high original.—*Rev. J. G. Murphy, D.D.*

Sunday School Books.

The Largest and Choicest Assortment in the city, embracing the publications of

AMERICAN SUNDAY SCHOOL UNION,
AMERICAN TRACT SOCIETY,
MASS. SABBATH SCHOOL SOCIETY,
ROBERT CARTER & BROTHERS,
HENRY HOYT,
A. D. F. RANDOLPH,

And other Sunday School Publishers.

Delegates and Teachers in attendance at the coming Sunday School Convention are cordially invited to examine our complete stock in this department.

FAMILY, PULPIT, POCKET AND PHOTOGRAPH BIBLES,

Comprising the most celebrated English and American Editions, in every variety of size, style, price, and quality.

JUVENILE AND TOY BOOKS.

An immense stock of Children's Books, adapted to all ages, tastes, and capacities, from the simplest Primer to the most elegant Gift Book. Also, a large assortment of GAMES, including the popular

FIELD CROQUET.

For sale at Wholesale and Retail by

A. ROMAN & CO.,
Publishers, Booksellers, and Stationers,
417 & 419 MONTGOMERY STREET.

Sabbath School Books.

I have the most complete assortment of Sunday School Books, Cards, Question Books, and Sunday School Music Books, in the city.

Also, a fine assortment of Stationery. Paper and envelopes stamped with purchaser's initials, without charge.

A liberal discount made to Sunday Schools, Teachers, and Clergymen.

Just received, five hundred "SONGS OF THE SANCTUARY."

CHILION BEACH,
Bookseller and Stationer,
34 Montgomery Street, opposite Lick House.

The American Sunday School Union,

Having commenced the Sunday School Missionary work on the Pacific Coast, we are ready to aid in organizing Sunday Schools and aid existing needy Schools.

We have just received a fine and large assortment of the publications of the Society, which we supply to Schools at reasonable rates. We also supply the periodicals of the American Sunday School Union. The

CHILD'S WORLD,

a beautifully Illustrated Paper for Children and Youth. Monthly, at 12½ cents each per year for ten copies and upwards, and 24 cents for the semi-monthly. Also,

THE SUNDAY SCHOOL WORLD,

a Sixteen-Page Quarto Monthly Paper for Sunday School Officers and Teachers, at the low rate of Fifty Cents per Year. No Sunday School Teacher should be without this paper.

Rev. Richard Newton, D.D., the Editor of these papers, is acknowledged to possess unsurpassed abilities as a Sunday School writer. The above rates are in Currency.

Catalogues of the Society's publications, and Sample Copies of its Periodicals furnished gratuitously on application to Wm. F. Peters, care P. O. Box 1007, or at the Depository, 802 Montgomery Street, (Second Floor, Room No. 2,) San Francisco, Cal.

A. L. BANCROFT. H. H. BANCROFT

H. H. Bancroft & Company,

PUBLISHERS, MANUFACTURERS, AND IMPORTERS,

AND WHOLESALE AND RETAIL DEALERS IN

BOOKS AND STATIONERY,

609 MONTGOMERY ST., AND 607-617 MERCHANT ST.

SAN FRANCISCO, CAL

Catalogues of the various Departments of the business are published, as follows:

I. Miscellaneous Books,	VI. Religious Books,
II. Scientific Books,	VII. Subscription Works,
III. School Books,	VIII. Blanks,
IV. Law Books,	IX. Stationery,
V. Medical Books,	X. Publishing.

Country Orders will receive prompt attention. Books and packages sent, by Express or Mail, to any of the Pacific States or Territories.

BANCROFT & COMPANY,
San Francisco, Cal.

Agents Wanted

At once, to canvass for the

MOST POPULAR SUBSCRIPTION BOOKS

Of the Season.

The following works are now being canvassed in several counties of the coast and with the best of success, and good men can do well on any one of them in territory which has not been canvassed.

MACKENZIE'S 10,000 RECEIPTS.—The best book of the kind ever published. SIX HUNDRED COPIES have been sold in a single county in California, and the county not finished.
BEYOND THE MISSISSIPPI.—Containing over 200 illustrations. In several instances the commissions of our canvassers upon this work alone have amounted to over $100 a week.
BANCROFT'S MAP OF THE PACIFIC STATES.—Fifth edition; revised to the present time. Decidedly the best map of the coast in existence.
WELLS' EVERY MAN HIS OWN LAWYER.—As high as sixteen orders in a single day have been taken for this work. It is useful to every one.
PEOPLE'S BOOK OF BIOGRAPHY.—A new work, just ready, by the popular writer, James Parton. A great number of the subjects are self-made men, "Who paved their own way in this world," who were "architects of their own fortunes." Reading like this inspires the young with courage and stimulates them to emulate such examples. A very large sale is expected.
NATURAL WEALTH OF CALIFORNIA.—Comprising Early History, Geography and Scenery, Climate, Agriculture and Commercial Products, Manufactures, Mining, Railroads and Commerce, Population, Educational Institutions, and a detailed description of each County: together with much other valuable information. One large octavo vol. The finest work ever gotten up on the Pacific Coast. Published by H. H. BANCROFT & COMPANY, San Francisco.
LOST CAUSE.—The only Southern History of the war published. Very large sales have been made in the territory now already worked. A new revised and enlarged edition is now ready.
THE AMERICAN WHEAT CULTURIST.—Practical details for selecting and producing new varieties and cultivating on different kinds of soil. A new work just ready.
HISTORY OF THE SECRET SERVICE OF THE UNITED STATES.—"The most exciting and interesting book ever published."

In addition to the above list we have many other first-class works which offer good inducements to active men and new works contantly received.

Those desiring an agency on any of these works will please apply at once for terms to agents, etc., etc., and name two or three counties that will be satisfactory, when their first choice will be given if possible.

FAMILY READING.

The Peace of God.

We ask for peace, O Lord!
Thy children ask Thy peace;
Not what the world calls rest,
That toil and care should cease,
That through bright, sunny hours
Calm life should fleet away,
And tranquil night should fade
In smiling day,—
It is not for such peace that we would pray.

We ask for peace, O Lord,
Yet not to stand secure,
Girt round with iron pride,
Contented to endure:
Crushing the gentle strings,
That human hearts should know,
Untouched by others' joys
Or others' woe;—
Thou, O dear Lord, wilt never teach us so.

We ask Thy Peace, O Lord!
Through storm, and fear, and strife,
To light and guide us on,
Through a long struggling life:
While no success or gain
Shall cheer the desperate fight,
Or nerve, what the world calls,
Our wasted might:
Yet pressing through the darkness to the light.

It is Thine own, O Lord!
Who toil while others sleep,
Who sow with loving care
What other hands shall reap:
They lean on Thee, entranced
In calm and perfect rest:
Give us that peace, O Lord!
Divine and blest,
Thou keepest for those hearts who love Thee best.

—*Hymns of the Ages.*

The Kind Shepherd.

Rambling, a few summers ago, in the lake district of England, I came to Washdale Head, where I passed the night at the cottage of a shepherd friend. The next morning I set off to cross the mountains on my way to Buttermere. As I approached the summit of the pass a little lamb was bleating in tones more sad than I had ever heard before. It seemed to say, as plainly as in words: "Pity me! help me! save me! I stopped, and the lamb ran towards me. I sat on the grass, and it came up to me, and putting its face almost close to my own, repeated its cry: "Pity me! help me! save me!" It was evident that the lamb had been forsaken by its mother, for it was a mere skeleton, and its loosely hanging skin and sharp features betokened starvation. I could not resist its appeal; so took it in my arms and carried it towards a sheep that was browsing not far off. But the sheep moved away, and the tiny lamb ran back to me, still imploring help. Again I took it in my arms, and carrying it towards another sheep farther off, put it down where some bracken would hide it from me as I rapidly stepped back. The lamb did not go forward towards the retreating sheep, but remained where it had been placed, and still repeated its sad cry; "Pity me! help me! save me!"

I took it in my arms once more, and sat down, meditating what I had better do. Should I carry it forward with me till I reached the first house, several miles distant? But might not such an act seem suspicious if I met the owner of the flock? At any rate, I would not, I could not, leave to perish a helpless creature which had cast itself on my protection. Just then, looking listlessly down into the valley, I saw a small object at the foot of the mountain, moving upward. It came nearer. It was a man. Still nearer. It was my shepherd friend. I at once showed him my lamb, and entrusted it to his care.

"Poor thing," said the shepherd; "its mother has forsaken it; they sometimes do when pasture is scarce. It would have died in an hour or two. But I'll take it down and give it some milk, and it will soon get right."

Then the shepherd took in his arms the little trembling lamb, which at once nestled its head in his bosom and hushed its pitiful cry. And as this great, strong, tender-hearted man stalked down the mountain-side like a giant, bearing his tiny burden, I thought of the words of the prophet: "He shall feed His flock like a shepherd. He shall gather the lambs with His arm, and carry them in his bosom." (Is. xl: 2.)

I thus reflected: "If a degenerate creature, sinful and selfish, as all are in their degree, yet had pity enough in him not to suffer a worthless, half-starved lamb to perish which cast itself on his care, will He who is the Author and Fountain of all tenderness, be deaf to the cry of any wandering soul that comes to Him in fear and sorrow, saying, 'Lord, have mercy upon me! Save, Lord, or I perish?' Will the Good Shepherd, who giveth His life for the flock, reject any feeble lamb, any lost sheep, that comes to Him with the cry: 'Jesus, pity me! help me! save me?' He never will. He never can."

The next year I was again at Washdale, and inquired of the shepherd how the lamb had fared. Said he:

"It is now the fattest and the strongest of my flock."

And thus many, even the very chief of sinners, when ready to perish, have been taken into the arms of Jesus, and under His fostering care have soon become as holy and useful as any of the flock.—*From Sermons by Rev. Newman Hall, D.D.*

Only this Once.

Gulliver was pinned down to the earth by pigmies only as long as his thumb; but there were a thousand of them; and he was bound down, finger by finger, with a rope no larger than a hair, and each rope, of itself, he could have broken on the instant; but altogether they bound him fast, until he begged for mercy. And so the young man to-day, determined to live as well as he can, determined to dress as well as others, though his salary is not so large, sees the temptation come, while his employer is away, to take only a dollar, that is all! He has had a dun, and a dollar will help him out, and so he takes it. "I shall pay it back," he says, "to-morrow (and his will is good), and no one will know it; and no one ought to care, if he did know it."

But the morrow comes, and no dollar comes with it; but another dun, and then he looks wistfully at the pile of bills, and he takes another, and another, until at last he has gone so far that he says he may as well go farther still, and so the poor boy drops from habit to habit into everlasting ruin and death. "Only this once," he says, and when he dies you put it on his gravestone: "He died of the disease known as *only this once*, the most fatal disease in the world."

A young man comes to the city; he is gay and sprightly; he wants what he calls a "good time;" he wants excitement. He works at the clerk's desk all day, and when evening comes he has no friends and knows not what to do. By chance he strays into a gambler's place, and sees how easily money is made there. He knows how hard it is made everywhere else, and tries, "just for the fun of the thing, you know," to see if his dollar will not double itself in two minutes. Somehow or other, on such visits, the first dollar almost always does double itself; it is the law of that kind of place; and he puts the second dollar down, and the third, until at last his desire for excitement, his craving, his hunger and thirst, get the better of him, and he is ruined by a little thing. "Only this once," he says; and this once doubles itself into twice, the twice becomes thrice, and at last the habit is formed, and he is dead, gone, and only God can save him.—*Hepworth.*

A Judicious Wife.

A judicious wife is always snipping off from her husband's moral nature little twigs that are growing in wrong directions. She keeps him in shape by continual pruning. If you say anything silly, she will affectionately tell you so. If you declare you will do some absurd thing, she will find means of preventing your doing it. And by far the chief part of all the common sense there is in this world belongs unquestionably to woman. The wisest things that man commonly does are those which his wife counsels him to do. A wife is the grand wielder of the moral pruning-knife. If Johnson's wife had lived, there would have been no hoarding up of orange-peel—no eating and drinking with a disgusting voracity. If Oliver Goldsmith had been married, he would never have worn that memorable and ridiculous coat. Whenever you find a man whom you know little about, oddly dressed, or talking absurdly, or exhibiting any eccentricity of manner, you may be tolerably sure that he is not a married man, for the corners are rounded off—the little shoots are trimmed away—in married men. Wives generally have much more sense than their husbands, especially when their husbands are clever men. The wife's advices are like the ballast that keeps the ship steady; they are the wholesome, though painful, shears, nipping off little growths of self-conceit.—*Dr. Holland.*

Young Folks.

Davie Carr.

Are you asleep, little Davie? I've slipped away from the gloom;
It was, Oh, so dreary, to play in the lonely, darkened schoolroom:
The blinds are all pulled down, and our books are upon the shelf;
But I don't care for holidays, Davie, when I've no one to play but myself.

You are fast asleep, little coz; so I won't disturb you, but croon
So softly it will not awake you, but seem like a bit of a tune
You are listening to in your dreams, as you lie there so pale and still.
Your pretty, red color is gone; I wonder, dear, when it will

Come back; but you have lain so long in that wearisome bed, I suppose
It will hardly come back before the time of the bright June rose.
When the angels that love the flowers come, little Davie, to streak
The close-folded petals, maybe they'll touch your little white cheek.

I think they have got a secret they don't want to tell me yet,
For I heard old Nursey whisper to Aunty: "When shall we let
Miss Nesta know?" and Aunt Mary said nothing, but turned to the wall.
But when you are up, Davie, they'll find we are sharp enough for them all.

I'm tired of holidays, Davie; I'd like to do lessons again,
But Aunty looked just as you know she looks when her brow is in pain,
When I offered to bring my books, and said: "Little Nesta, nay:
Never mind books just now; you may go to your dolls and play."

And when she went out just now with that grieved look upon her face
(I wasn't naughty to bring it there, Davie), I stole from the place,
And I left Miss Doll on the floor in her grand new frock that I've made:
I'll show it you when you awake, but that won't be yet, I'm afraid.

I've minded your toys for you, Davie; your little pet bird I have fed;
And you couldn't have taken more care of your garden yourself, Robert said:
There are funny green letters sprung up; you'd never guess what they are;
It's a secret, but then you're asleep: D. C. for your name—Davie Carr.

They've cut off your nice little curls; 'twas a pity, I think; but maybe
You'll be just as happy without them; they won't get tangled, you see.
Your hands were brown when you sickened, and now they are just as white as
Aunty's; and how did you keep the bedclothes so tidy all night?

You are sleeping a long while, Davie. O, dear, I'm afraid if I stay
Any longer, they'll find me here; so I think I will go away.
If I kiss you, I may wake you; so good bye: make haste to get well:
I am, O, so lonely without you, more lonely then I can tell.

—*Chamber's Journal.*

True Stories.

A young lady of my acquaintance lost her purse, with eleven dollars in it. Not a large sum; so, after a few inquiries, she gave it up never expecting to see it again. But a little while after there came a

letter, not very well spelt or written, yet sensible and straightforward, telling her that Michael Donovan had found her purse and spent a dollar advertising it. As no one answered the advertisement, he now wrote to the address on a card which was in the purse, thinking Miss F. might know about it. The writer's address was given, and Miss F. and her father went to recover the lost purse.

They found a poor house in a poor street, and up in one poor room, a women and a flock of little children. Miss F. soon proved her right to the property, and offered a reward for the care of it.

"Thank ye kindly, ma'am; but Mike is away, and I'm thinking he wouldn't like me to take anything for being honest. He works for his living; so, if ye like to pay the dollar he spent advertising, it will be quite enough."

Now Miss F.'s father is one of the famous men of America, and I fancy many people would have been proud to receive the smile he gave poor Mrs. Donovan, as he said, looking at the poor place, the many children, and remembering that "Mike worked for a living," yet wanted no reward for "just being honest,"—

"We happen to be the strongest, so I think we will insist on leaving something to prove our thanks."

So "something" was left, and has not been rejected, I believe; but Mike Donovan's name has been uttered with regard by one of the most eloquent pairs of lips in America, and I think a very sweet little thing happened when the great man felt and acknowledged the beauty of the poor man's honesty.

The other story is this:—An old lady was waiting for a car, at the corner of Temple Place. She had lost the sight of one eye, and the other was very dim; so dim, that she found it hard to read the names on the cars, and was feeling her loss very keenly as she stood there, looking anxiously as each passed, and wishing some one was near to help her. A warmer heart never beat than that which ached a little just then under that old lady's black cloak.

As she turned round to shield her eyes from the sun, she saw something which made her forget her own loss in sympathy for a greater. Just behind her stood a poor man, with no eyes at all; so quiet and patient, holding a little placard before him, and letting his sad face appeal to passers-by better than any words could do. The old lady could'nt read the story on the little board, but the empty sockets told her enough; and, never stopping to think whether she had money to get home, she took one of the man's hands, and folded something in it, saying, in her motherly voice,

"My friend, it's only a dollar; but I wish it was more, for I am nearly blind myself, and I feel for you very much."

The blind, patient face lighted up, as if sudden sunshine had touched it; and groping for the kind hand that helped him, he said, so gratefully,—

"Oh, God bless you ma'am; it's a great deal to me; and I thank you, I thank you."

"How did you lose your sight? asked the old lady, forgetting all about her car.

"At Cedar Mountain; a ball put both out at once, ma'am."

"Have you any family?"

"No, ma'am; not a soul in the world to be a burden to, thank the Lord, said the poor fellow, thinking first of others, in spite of his own helplessness.

"How do you live, then?

"Oh, a person I know leads me here, and takes me home again. Folks are good to me, and I get on."

"Do you get much standing here?

"Some days, nothing at all; other days, I do pretty well. I hate to beg, but there don't seem any other way just yet."

As the old lady was wondering if she could do anything more, who should pass but her daughter; and by the time she had heard the story and added her mite, the car came.

"Good-bye, my friend; I hope you will get on. I shall stop, if I see you, next time I come this way; and I shan't forget you," said the old lady, as the man groped to find and shake her hand again.

When the old lady told me the little incident, saying how rich she felt with her one eye after that, and how soon she was taken care of after she had done her best for another, I thought how grateful those should be who possess both eyes; how patient they should be with the afflicted, and how gladly they should give, even of their little, to those who have less, feeling sure, as they pity and help, they will be pitied and helped again.—*Merry's Museum.*

About Bells.

There are many curious things about bells. The very name in old times meant to *bawl* or *bellow*, and they have made much noise in the world. With their brazen tongues they tell of joy and sorrow, of war, of peace; they call to church, to marriage, to death, to work, to play, to school, to fire, to bed, and to rise. They mark the hours of passing time, and whether at bright noon-day, or in the dark and quiet night, the stroke of the bell stops us in our thinking, as if with a sudden message from the unseen land.

No one knows when bells were first used; but it was a long time ago, for the Bible speaks of them in Exodus, and we hear them tinkling and ringing all down the ages, sounding through the shadowy past; and we read of them in the palaces of kings, in the holy temples, in public and private places, even to the beggars, with "rings on their fingers and bells on their toes." Sometimes they swung in church-towers, sometimes shook out merry music on the heads of prancing horses, and sometimes hung as ornaments to dress. The "king's fool," or "merry Andrew,"—he whose sole business it was to make sport for his monarch—wore little bells dangling from his cap; and to wear the "cap and bells" became a common expression to apply to over-frivolous persons.

"Foolscap paper had its name from the early custom of paper-makers of representing the "cap and bells," in water lines, in the paper of that size, as a trade-mark. The name still remains, and sometimes is seen the quaint device, as in olden times.

The first bells were small, and were perhaps as often for ornament as for actual use; but, as time passed on, they were gradually applied to sacred purposes, and at length large bells were made for attracting the attention of the people and calling them to worship. The inventor of church bells is said to have been a Bishop Paulinius, who lived about fourteen hundred years ago. In primitive times, before these large bells were in use, we read that in Eastern countries the hours of evening service were proclaimed by means of a rattle, or by striking with a stick upon a board. Not longer ago than the reign of Charles II of England, in a comedy, the company assembled at a country house of the upper class were called to dinner by the cook knocking on the "dresser," or cupboard, with a rolling-pin.

It would be amusing to enumerate the different purposes for which bells have been used in times past. For instance, one of the popes, Clement VII, had a beautiful silver bell for cursing animals. Its surface was covered with rich carvings of serpents, flies, grasshoppers, and other insects; and it was rung by the Pope, in the belief that its sound would scatter these troublesome creatures. In those days people had strange beliefs, and bells were supposed to possess singular power, such as scattering diseases, driving away evil spirits, and the brazen metal was often well nigh worshipped. Popes and priests, kings and subjects, masters, and mistresses, and servants, all have in turn served or been served by "the swinging and the singing of the bells."—*Samuel Burnham, in Our Boys and Girls.*

The Soldier and the Thistle.

Little Minnie, in her eagerness after flowers, had wounded her hand on a sharp, prickly thistle. This made her cry with pain at first, and pout with vexation afterward.

"I do wish there was no such thing as a thistle in the world," she said pettishly.

"And yet the Scottish nation think so much of it, they engrave it on the national arms," said mother.

"It is the last flower that I should pick out," said Minnie; "I am sure they might have found a great many nicer ones, even among the weeds."

"But the thistle did them good service once," said mother; "they learned to esteem it very highly. One time the Danes invaded Scotland, and they prepared to make a night attack upon a sleeping garrison. So they crept along barefooted as still as possible, until they were almost up to the spot. Just at that moment a barefoot soldier stepped on a great thistle, and the hurt made him utter a sharp, shrill cry of pain. The sound awoke the sleepers, and each man sprang to his arms. They fought with great bravery, and the invaders were driven back with much loss. So, you see, the thistle saved Scotland, and ever since it has been placed on their seal as their national flower."

"Well, I never suspected that so small a thing could save a nation," said Minnie, thoughtfully.

"God can make use of small things, as well as great, to accomplish his purpose; and it is said that very small circumstances often turn the tide of battle. In the war of 1812, the British fleet were sailing in the harbor of New London, and were asked afterwards why they did not destroy the town, when they could so easily have done it.

"I would," replied the commander, "if it had not been for that formidable long fort, whose guns commanded the harbor." That long fort, he learned, was an old rope-walk, and the many guns were the small windows in its side.

I presume the New London people looked with new eyes on that old rope-walk after they learned what a good service it had done.—*Christian Instructor.*

English Children.

Let us take a drive through some of the streets of London. As we stand waiting in the hall for a cab, the governess passes us with her charge. She is a bonnie-looking, lady-like girl, neatly dressed in drab-colored merino; and by the clatter they all make, the troop is well supplied with thick-soled, heavy boots. They are going for their three or four mile walk. There is a park opposite where they might ramble and play; but as the father says they must get out of the sight of the house—out of familiar surroundings—so twice a day they are sent off, and never do less than their two miles, except in rainy weather. There's the kind of training to make blush roses bloom on each hearty, healthy face. No wonder Englishmen and English women look ruddy and strong, in spite of their ale, when one sees such foundations laid. The little children are only manly, only womanly, so-called, in one thing, and that is politeness. Well-bred children in England may well be termed little ladies and gentlemen. "I beg your pardon," and "I am giving you too much trouble, I fear," are so ready on their six-year old tongues! They express themselves so well, and so gracefully! I imagine they are taught more reverence for their elders than is customary in other countries. They are never shame-faced or skulking, and their wholesome countenances are as good to look at as pictures. —*American Presbyterian.*

NEWS SUMMARY.

PACIFIC COAST ITEMS.

A LONG SHADOW.—Mount Davidson, upon the eastern slope of which stands Virginia City, casts a shadow, pyramidal in shape, at this season of the year, after the sun has gone down behind its peak, which stretches for fifteen miles across the deserts lying to the eastward, and is plainly defined, there being sunshine all around it. Soon, however, this giant shadow mingles with the lesser shadows of the distant hills, and a minute after, all is shadow.—*Territorial Enterprise.*

A GENTLEMAN from Tillamook informs us that the Swedish families residing in that county have letters from a large number of Swedes and Norwegians now on their way across the plains. They have signified their intention to settle in Tillamook and build up a property for their children. Such a thrifty and industrious race of people cannot fail to accomplish their purpose.—*Portland (Oregon) Bulletin.*

FIRE ON THE PLAINS.—All that section of the country lying between the Los Angeles road and the Tulare Lake, has been burned over during the past few days, destroying several thousand acres of the most luxuriant pasture in the country. These fires are often the result of carelessness on the part of campers, and are disastrous to the stockraising interest of the community at large.—*Tulare Times.*

THE efforts which are being made to raise money for the Italian, Ferrero, who lost his life in trying to save that of others, are meeting with good success. Every one should subscribe for such a cause. Californians should show to the world that such heroism as that exhibited at Oakland is fully appreciated by them.

BUSINESS is unusually dull in Napa. A movement is being made to establish a library for the young folks. On the 25th inst., the citizens will vote on the question of a new school building. The old building is justly considered a disgrace to the town.

THE RAINS.—The rain that has fallen during the week, has, in many instances, caused much damage to the wheat and barley that has been cut and was ready to be threshed. The ripening fruit has also been injured, but not to a great extent.—*San Bernardino Guardian.*

A GOLD medal worth two hundred dollars will be given for the most valuable Californian manufacture exhibited at the Mechanics' Fair. Sixteen other gold medals and fifty-six silver medals will be awarded in the several departments.

WE learn from the *Pioneer* that a fine Flouring Mill is about completed at the Chorro near San Luis Obispo. It will grind 1,500 tons of wheat raised on one ranch this year.

THE old Board of Directors of the State Insane Asylum, refuse to yield their places to the new Board appointed by Gov. Haight. The matter will be decided by the Courts.

THE Virginia *Trespass* says that about one hundred millions of dollars have been contributed to the currency of the world by the development of the Comstock lode.

ON the night of July 4th, near Pacheco, Contra Costa County, about one hundred and fifty acres of wheat almost ready for harvesting, were destroyed by fire.

THE United States steamer *Suwanee* was wrecked on the 9th inst., by running on a rock in Thadwell Passage, twenty-five miles north of Fort Rupert.

RATIFICATION meetings are being held throughout the State, in which a very respectable show of enthusiasm is made by the Democrats.

A MOVEMENT is on foot for the incorporation of the village of Chico. The *Courant* advises the people to oppose the measure.

A MAN in this city, last week, ate five hundred oysters in twenty-six minutes—a truly noble and heroic deed.

THE Central Pacific R. R. Co., with 9,000 men at work, intend to complete twenty miles of road weekly.

THE Fall Term of the Female College of the Pacific at Oakland, commenced on Wednesday last.

THE California Steam Navigation Company's total receipts for the month of May were $110,000.

FIVE whisky saloons, forerunners of civilization, have made their appearance at Wadsworth.

IN one place near Paradise, there is a pile of wheat in sacks one and one half miles in length.

IT is said that California has one insane person to every six hundred of its population.

ADDITIONAL sections on the Central and Pacific Railroad were opened on the Fourth.

THE Oregon State Teachers' Institute will meet at Eugene City on the 28th inst.

THERE were eighty-one deaths in this city during the week ending July 11th.

THE citizens of Stockton are raising funds to purchase a town clock.

WADSWORTH is one hundred and eighty miles from Sacramento.

NEW grapes are now to be found in our market.

TELEGRAPHIC.

EASTERN.—Seward is said to have purchased Sonora and Sinaloa from Mexico, and to have negotiated a treaty of commerce with China....The President has nominated B. F. Brundage for Register of the Land Office at Visalia, C. E. Romus, of Kansas, for Consul at Honolulu, and S. H. Axtell for Assessor of Internal Revenue of the Third District of California....Intensely hot weather is prevailing through the East....Evarts is to be confirmed.

SOUTHERN.—Wm. P. Kellogg and John S. Harris have been elected United States Senators from Louisiana....Wm. P. White has been appointed United States Senator from Maryland, to fill Reverdy Johnson's unexpired term....The Alabama Legislature has been organized and the Constitutional Amendments ratified....Military government is withdrawn in Louisiana....United States Senators have been elected in Alabama and the Carolinas....Seymour's nomination is enthusiastically received in the South.

POLITICAL.—Francis P. Blair, jr., was unanimously nominated for Vice President by the Democratic National Convention....Seymour and Blair accept the nomination.... The nomination of Seymour is tolerably satisfactory to the Democratic party throughout the country. That of Blair is received with less enthusiasm....The N. Y. *Herald* and *Times* predict that Seymour will be defeated....The New York Chase Club declares for Grant.

CONGRESSIONAL.—The bill to discontinue the Freedman's Bureau was passed by the House....Boyden and Dickey, members elect from North Carolinia, were sworn in and took the oath....The Tax Bill is still under discussion....The Alaska Bill passed the House 114 to 42....The Senate passed Sherman's Funding Bill.

FOREIGN.—The English papers think that the nomination of Seymour will ensure the defeat of the Democratic party ....Van Beust, the Austrian Premier, suggests to the Pope, the propriety of minding his own business....A conspiracy in Spain to elevate the Duke de Montpensier to the head of the Government, has been discovered and suppressed.

WEEKLY MARKET REPORT.

WEDNESDAY, July 15, 1868.

FLOUR—Sales of 1,000 bbls Extra and Superfine in lots, private. We quote city brands as follows: Superfine, in sks, ₱ 196 lbs, $5 75@6 25. Extra, in sks, $7 25@7 50.

WHEAT—Market steady at $1 85@1 90 ₱ 100 lbs, with sales of 5,000 sks in lots.

BARLEY—Sales include 200 sks old feed, $1 90; 640 sks do, $1 95; 200 sks brewing, $2 05; 600 sks do, $2 12½; 4,000 sks Chevalier, for export, private; 420 sks new, $1 90 ₱ 100 lbs.

OATS—Sales of 500 sks, private; 300 sks Oregon, private; jobbing rates remain steady at $2 20@2 40 ₱ 100 lbs.

POTATOES—The nominal range of the market is $1@$1 20, though most of the transactions were at $1 05@1 12½ for Bay and Mission.

ONIONS—Yellow are jobbing at $1 62½@1 87½ ₱ 100 lbs.

CORN—Under continued light receipts, the market is nominal at $2 20@2 37½ ₱ 100 lbs.

RYE—Is still held at $2 50 ₱ 100 lbs.

BUCKWHEAT—Without inquiry; quotable at $1 62½@$1 75 ₱ 100 lbs.

BEANS—Jobbing rates for first quality are as follows: Bayo, 5c; Butter, 6½c; Pea 12½c; small White, 8c; Pink, 5c; and Red, 3c ₱ lb.

BRAN—Continues scarce at $30 ₱ ton.

MIDDLINGS—Fine, $40@45; feed descriptions, $32 50@37 50 ₱ ton.

HAY—About 100 tons sold at $12@15 ₱ ton.

OIL CAKE MEAL—The jobbing price is $30 ₱ ton.

DAIRY PRODUCTS—Fresh roll Butter is firm at 32½@35c; California firkin, 33@35c; Cheese, 13@15c for ordinary to choice California dairies; Eastern dairies, 17c ₱ lb; Eggs 38@40c for Hen, and 30c ₱ dozen for Duck.

POULTRY—Live Turkeys are quoted at 20c, and dressed at 22c ₱ lb; Hens, $8@9; Roosters, $7@8; Spring Chickens, $5@6 50; Ducks, $5 ₱ doz; Geese, $1 75@2 ₱ pair.

PROVISIONS—We quote jobbing prices as follows: California smoked Bacon, 15@16c; Oregon do, 11½@12½c; California Hams, 16@17c; Oregon do, 14@16c; California Lard, 13½@14½c, and Eastern Lard dull and nominal at 12½@13c ₱ lb.

WOOL—Sales for the week aggregate 125,000 lbs, at 17@18c for clean shipping grades; 15@17c for medium, and 10@14c for burry. The spring clip is nearly all in, and pretty much all sold. A small lot of fall clip, from early lambs, sold on terms withheld. The fall clip is not expected to arrive in any considerable quantity for a month.

HIDES—3,000 California dry sold during the week at 14½@15½c ₱ lb, according to selection.

TALLOW—25,000 lbs good Beef sold at 7½c. The nominal range for Beef and Mutton is 7¼@7¾c ₱ lb.

San Francisco Cattle Market.

Prices to-day are somewhat irregular, though the market evidently favors the buyer. Some dealers quote 7½c as an outside figure for Beef, while others report 9c. We think 8c a fair figure. Veal is quoted by some parties at 8@12c, whereas others quote 7@10c. Mutton is a trifle easier and Lamb a trifle firmer than last week. Pork continues weak at a still further decline.

We quote slaughterers prices as follows:

BEEF—American, 1st quality, 6@8c ₱ lb.
do 2d do 5@6c ₱ lb.
VEAL—The general range is 7@10c ₱ lb.
MUTTON—Steady at 5@5½c ₱ lb.
LAMB—Good to choice, 6@8c ₱ lb.
PORK—Undressed, 4½@6½c; dressed, 7@9c ₱ lb, outside figures for milk or grain fed.

CURRENT TOPICS.

Conventions are being held in different parts of the country, for the purpose of cultivating and extending the spirit of union among Presbyterians, in anticipation of the action of Presbyteries upon the Basis adopted by the General Assemblies. That held in the church of Rev. Dr. Hall, in New York, must have been a very interesting meeting, and its effect will be felt over the whole land. The important fact developed in these conventions is but the repetition of that apparent in the Assemblies, viz: that the active, working men of the Church—those who actually encounter the difficulties caused by the division, and who see the advantages that would result from union, are unanimous in their desire for it. The opposition, or, rather, the hesitation and doubt, comes from those who are led by their position in the seminaries, or in places of quiet Church service, to dwell more upon points of doctrine and technical questions, until these are magnified beyond what the practical men think to be their real importance. Hence, these popular convocations are of great value. In them there can be free expression of sentiment, and both arguments and fears can be fairly weighed, while the mind of the people will thus be generally educated for such action in the Presbyteries as may exhibit the true judgment of the Church. We should be glad to know that similar conventions are to be called on this coast—not because there is need of increasing the desire of our members for organic union, for this seems to be well nigh universal, so far as we learn, but because their influence upon the mass of both branches would be most healthful, and they would prepare us for a vigorous entrance upon our work as the United Church.

The Reformed (Dutch) General Synod, at its late session in Hudson, manifested a disposition towards the great question that is now so prominent in all denominations, which we are much pleased to witness. The venerable Dr. Matthews, after extended remarks, in which he expressed the belief that the great hindrance to the aggressive work of the Church in the world, is the lack of harmony in plan and effort, and that the signs of the times all press the duty of more intimate coöperation, especially among American Christians, proposed resolutions by which a general Council of the Evangelical Denominations in the United States may be convened. These resolutions do not contemplate organic union, as the result of this Council, but fraternal union, and the adoption of some plan for the furtherance of the Gospel. They propose that it be a delegated body, consisting of five representatives from each denomination, and that it meet in New York on the third Tuesday in October, 1869, other church judicatories and assemblies being requested to accede to the suggestion. The General Synod passed these resolutions unanimously, the spirit of the body in their action being shown merely the character of the remarks they elicited, than by the mere vote itself. Such a Council can be productive of no evil, and may open the way for much good. The invitation to form it, coming from the old Reformed church, will certainly be welcomed, and regarded by all other denominations, for it savors of the spirit that called the Synod of Dort, which did more for the unity of Protestant churches, perhaps, than any other convention of modern times.

The Eastern religious papers, of all denominations, come to us filled with details of the annual meetings of their principal ecclesiastical bodies. Of course, there is much in these accounts that can have little general interest, yet they give evidence of breadth in plan and purpose, and of vigor in execution, and of real success, as we compare the statistics with those of former years, which is very encouraging. It is useful and stimulating, occasionally to rise to a point from which we may take this wide view of the sacramental host, in all their divisions as well as of the field they occupy and the land they are to possess. The view awakens thankfulness, rouses to new effort, tends to union among those who are here seen to be striving for the same end, and thus cultivates a firm trust in God who has so manifestly been with His people, and declares that He will never forsake them. The most prominent theme in these various assemblies, though not received with equal favor in all, has been *union*, and the drift of popular thought in this direction, aided by the action of those who were prepared for the step, cannot be mistaken. The rigid lines of old-fashioned sectarianism are not found running with relentless course through whole bodies of Christians. They bend in many directions, and at many points. Prejudice and bigotry have less power. Intelligence and true fellowship have more prevalence. God is working His own will in the hearts of those who love His kingdom, and the result will be, that His kingdom will be felt to be superior to any of its divisions, while all work and pray for its supremacy, and rejoice in advance wherever it may be seen.

The proof seems to accumulate that the Emperor of China and the Mandarins are disposed to remove the barriers that idolatry has placed between itself and the Christian religion. Not only is full toleration now granted to Christianity, and protection to those who accept it, but the local authorities in several of the provinces have prohibited the ordinary worship of the temples by the burning of incense and the offerings before the idols, and the Emperor, by an edict, has forbidden the rebuilding or repair of all temples, except those of Confucius. Of course, there is an open way for the introduction of the Gospel, and it is welcomed much more generally than was anticipated, by the more intelligent of the people. This exercise of power in its favor could not have been occasioned by any considerations of policy, and must be regarded as another of those instances in which God in His Providence coöperates with those who strive to execute the commissions of His grace.

A marked peculiarity of the emigration to this country, during the last year, has been the large proportion of those who came from the northern part of Germany, and from Norway and Sweden. Most of these are thriving families of the middle class, who intend to buy homes and identify their interests with us, and many of them favor religious influences wherever they reside. It is said that a large element of the enterprising population, whose tide runs on parallel with the Pacific Railroad across the continent, is from these foreign countries, so that we may expect the great interior of our territory to be rapidly settled by those who may become a most valuable part of our people in a few years. The Swedes and Norwegians, especially, are inclined towards whatever is good, and we should not fail to extend to them the facilities to be furnished by a Christian people, by which they may become intelligent, God-loving, and in all respects worthy citizens.

Sworn affidavits should not be needlessly multiplied. To resort to them, except upon grave occasion, is, by some codes, a punishable misdemeanor. The practice tends to bring, not only the ordinary credibility of men, but also the sanctity of the oath, into contempt. It is a small, but active, teredo upon one of the pillars of society. Two occasions impend which lend timeliness to these remarks. One is, the approaching Fair of the Mechanics' Institute. We hope to see as few articles as possible accompanied with the signatures of notaries attesting their genuineness. The other is, the Presidential campaign. Let us hope that not many of our politicians will feel a necessity of bolstering their allegations with legal oaths.

It is often said there is advance in essential particulars among the continental nations of Europe, and it is as often desired. Facts, therefore, are of much interest when they bear directly on this question, and they have been supplied of late in such a manner as renders dispute impossible. The measures recently sanctioned by the Emperor of Austria, to which we referred a few weeks ago, and which are called by the Romish Church party, "the Godless laws," are most significant, as indicating progress. Had they been in the form of edicts, they would have less significance, though even then they would be remarkable. But they were passed by both

Houses of the Reichsrath, in spite of the bitterest ecclesiastical opposition, and with great demonstrations of joy among the people, and they herald the utter overthrow of Papal power in Austria at no distant day. These laws establish civil marriage without the participation of the Clergy; place education in the hands of the civil authorities, without the superintendence of the priests; and permits sects, or forms of religion, without restriction, every subject having the right, at the age of fourteen, to choose his own faith. Scarcely less decisive and cheering is the news respecting the position of the Sultan in Turkey, since his visit to the western portion of the continent. Having called into existence a Council of fifty, as a new power in the State, by which the fruitful scenes of misgovernment and injustice may be removed, the Sultan's address at the beginning of their session, gives the clearest evidence that he is well aware of the dangers and needs of his Kingdom. He proposed, as the only remedy for abounding evils which he enumerated, fitted to the times in which we live, the perfect civil and religious freedom of his subjects, regulated only by the just and equal laws of the State. It is too early to announce results of such an unprecedented policy in Turkey, but it is safe to predict that if it shall be wisely and faithfully executed, there will be rapid and radical changes in that ancient government, that should cheer the hearts of those who love their race.

Religious Intelligence.

PACIFIC COAST.

The Church at Mendocino.

If the character of a place is reflected in its public buildings, the good people of Mendocino are giving evidence of some very liberal and substantial virtues. The new Presbyterian church which they dedicated yesterday is a model of its kind. There are many larger and more costly houses of worship in the State, but among them all I have seen none more tasteful, more complete, or more honorable to the liberality displayed in its erection. Mendocino, (better known in this vicinity as Big River) numbers about 500 people. The Presbyterian is the only Protestant church in the place. Their new house has cost, at a fair estimate of materials contributed, about $10,000.—Messrs. S. C. Bugbee & Son of San Francisco, are the architects. I append to this notice the description kindly furnished by them, which may be the means in your columns, of profitable suggestion to many other societies in our new State that are in need of a new church. The people of Mendocino are not making a religious display on borrowed capital with their fine house—it is completely finished and paid for, presenting the rare example of an expensive church for the community in which it is built, dedicated, entirely free from debt. This result is largely due to the liberality of Mr. J. B. Ford, an Elder of the church, and the leading business man of Mendocino. When the contributions of others gave out he would "foot the bills," as he has been accustomed to do for all the expenses of the church since its organization. Still the community have borne the expense. The intelligent looking audience that filled the house at the dedication, showed that they felt that to be *their* home. There is a general air of religious propriety observable in the society. All the pews but two in the new church were taken before it was dedicated. When the present minister, Rev. S. P. Whiting, came to this people, less than four years ago, the church numbered 12 members; now it is increased to 50. Two weekly prayer-meetings are sustained in different parts of the society, with an attendance of from 20 to 35. The people have just shown their appreciation of Brother Whiting's services by voting him a call, *nem. con.*, to be installed as their pastor. He has not yet announced his acceptance: but with such a people, and in such a place, and with such a deep religious interest already awakened under his ministrations, we can hardly doubt what his answer will be. Would that there were more places in our State where religious interests were as well cared for as at Mendocino. L. H.

[The following is a description of the above-mentioned building, furnished by the architect. We regret that we are compelled to omit some portions of it.—Eds. Occident.]

This church is built in the English gothic style—the roofs are steep and covered with shingles cut in varied patterns; the windows have pointed arched heads; the sashes have diamond-shaped lights, with a narrow border of stained glass.

On the center of the front is a projecting gable, in one angle of which is placed the tower, 14 feet square; from this the steeple rises to a height of 96 feet, surmounted with a large vane. A fine bell is placed 44 feet above the floor.

In the other angle of the front is a low porch, and in the front of the gable end is a large triplet window; on the ridge is placed a gothic cross.

The outside walls are covered with upright battens. The details are bold and simple. There is no attempt at fine and elaborate ornamentation, the aim being to produce a picturesque and striking effect at a small cost.

The dimensions of the building are: main building, 54x38 feet; front projecting nave, 8x23 feet. The walls at the sides are 18 feet high; height of ceiling in center, 26 feet.

There are two aisles and 56 pews on the floor, capable of seating about 280 persons, and room for 50 more in the gallery.

At the rear end, the pulpit platform is raised about 3 feet—8x14 feet, partly within an arched chancel, 4 feet deep, in the sides of which are two narrow windows, to light the reading desk. On either side of the pulpit, filling the corner, is a small room, one for a library, and the other for the pastor, with a private entrance.

All the inside is finished with wood—there is no plastering in the building, the walls and ceilings being sheathed with boards placed diagonally, and all the inside work varnished, showing the natural grain of the wood.

Donation.—The ladies of the M. E. Church, at Albany, Oregon, recently gave a donation party for the benefit of Rev. Mr. Belknap at his residence. $75 the result.

New Members.—The church at Providence, Oregon, lately received an accession of 31 members. The religious interest in the community is still lively.

Missionary Meetings.—On Sunday, July 5th, there was inaugurated a series of monthly Missionary meetings at St. Paul's church, Benicia.

New Church.—A fine building for the use of the Methodist church, is being built at Central City, Col.

Rio Vista.—$800 have been contributed towards a new Congregational church at this place.

New Bell.—The Congregationalists of Benicia bought of the P. M. S. Co., a large bell, weighing 1,000 lbs for their new church.

The children of the Presbyterian Sunday School at Vallejo, held their annual concert on Sunday, July 12th.

EASTERN.

Cumberland Presbyterian Assembly.—The Cumberland Presbyterian Assembly met at Lincoln, Ill., this year, and was composed of about 180 delegates from the following States: Pennsylvania, Ohio, Indiana, Kentucky, Illinois, Tennessee, Alabama, Georgia, Mississippi, Arkansas, Texas, Kansas, Missouri, Nebraska, Iowa, and California. Perfect harmony prevailed throughout the sessions, and the missionary, publication, and educational interests of the Church were thoroughly considered. The subject of revising their Confession of Faith was before the Assembly. Thirty-five hundred dollars were also raised for missionary enterprises in St. Louis and San Francisco. Murfreesboro, Tennessee, was chosen as the next place of meeting.

A Whole Congregation Poisoned.—The entire congregation of the Dunkard Church at Napierville, Ill., were recently poisoned in celebrating a love feast, by eating meat prepared in a copper kettle and allowed to remain there until the liquid had become oxydized. It was found upon actual count that no less than 130 were more or less affected, the major portion, however, but slightly, they having partaken of but a small quantity of the food. About 20 were found to be in a dangerous condition. These were removed to their homes, and every attention paid them, and before morning many of them were out of danger. All are now pronounced out of danger.—*Observer.*

Auricular Confession.—It is with pain we find it announced that the Right Rev. Bishop Horatio Potter, of the Protestant Episcopal Diocese of New York, has recently alowed a manual to be dedicated to him which defends the practice of auricular or priestly confession. Rev. Dr. Dix, one of the rectors of Trinity Church, New York, is said to have a number of penitents, or persons or persons who make their confessions to him, and to be a most popular confessor, especially among some of the so-called higher classes.—*Congregationalist.*

Insurance.—The Connecticut Protestant Episcopal Convention, at its recent session, adopted a resolution creating a committee of laymen to mature a plan of association of the parishes of the diocese upon the principle of mutual life insurance for the benefit of pastors and families. A petition to the State Legislature for a restraint upon the excessive facility with which divorces are legally obtained was also adopted.—*N. Y. Observer.*

Rev. Mr. Wallace.—The Stone Street Presbyterian Church of Watertown, N. Y., has given a unanimous call to Rev. C. C. Wallace, of Placerville, Cal., to become their pastor. The health of his family has rendered it desirable that Mr. Wallace should remain East, and it is understood that he will accept the call thus tendered.

Theological Seminaries.—From accounts of the commencement exercises of the following seminaries—Union, Virginia; Lane, Ohio; Princeton, New Jersey; Auburn, New York; and Mercersburg, Pennsylvania—we learn that the whole number of graduates is 75, of whom at least 15 will devote themselves to the work of foreign missions.

Rev. Herrick Johnson, D.D., was installed over the First Presbyterian Church, Philadelphia (Rev. Albert Barnes remaining *pastor emeritus*), on Thursday evening, June 4th. The sermon was preached by Dr. Z. M. Humphrey, the charge to the pastor delivered by Mr. Barnes, and that to the people by Dr. T. J. Shepherd.

Rev Dr. Hickok, President of Union College, having offered to the Trustees his resignation, hoping that some change in the administration will tend to secure a greater harmony and prosperity, expects to take up his permanent residence in Amherst. He will instruct the senior class of Amherst College in mental philosophy during the absence of Professor Seelye in Europe.—*Independent.*

Theological Professors.—At the recent meeting of the Old School General Assembly, Nathaniel West, D.D., was elected Professor in the Danville, Ky., Seminary, and Rev. Wm. M. Blackburn, of the Fourth Presbyterian Church of Trenton, N. J., was elected Professor in the Seminary of the Northwest in Chicago.

Resting.—The *Watchman and Reflector* has the following to say of the Reformed Dutch Church:

"The Reformed have now no great question at issue, but are resting and recuperating after the protracted and exhausting effort with which they lately threw off the incumbrance of their outlandish name."

Tobacco.—It was referred to the Directors of the theological Seminaries, by the General Assembly at Albany, N. Y., to consider the expediency of excluding from the seminaries young men who use tobacco, unless medically ordered.—*Chicago Presbyterian.*

Andersonville.—The very building which the rebels erected at Andersonville to be used as a hospital for their sick and wounded is now devoted to negro schools, and is filled with colored pupils taught by three Yankee girls.

In Debt.—The Secretary of the A. B. C. F. M. has issued a second appeal to the churches, admonishing them that the American Board was "drifting directly and rapidly into a *large and embarrassing indebtedness.*"

Rev. George R. Noyes, D.D., Hancock Professor of Hebrew and Oriental Languages, and Dexter Lecturer on Biblical Literature, in Harvard College, died at Cambridge on the 3d of June.

Dr. Chapin.—The eminent Universalist, Rev. Dr. Chapin, was brought up under the pastoral care of the Rev. Dr. Lyman Beecher, Mr. C.'s parents belonging to the strictest sect of Puritans.

Rev. Mr. Robertson, pastor of one of the Presbyterian churches in Springfield, Illinois, has been called to a church in St. Louis, offering a salary of $7,000.

Cincinnati has 119 churches, of which 11 are Baptist, 25 Methodist, and 18 Presbyterian of various schools.

The Second Adventists have announced the day of final judgment to be the 2d of October next.

FOREIGN.

Turkey.—The following is condensed from a letter written to the *Boston Journal* by "Carleton," who was travelling in Turkey. He quotes from statements given him by the Rev. Isaac G. Bliss, of the American Bible Society. Twenty years ago, the American Board of Foreign Missions, had 5 stations and 4 churches, with 114 members. In 1857, ten years later, the mustard tree had become quite a tree, with 18 central stations, 37 out-stations, 28 churches, with 800 members, 51 preaching places, 50 schools, with 1,500 pupils. Step over ten more years to the present hour, and you may count 22 central stations, 138 out-stations, 152 preaching places, 56 churches, with 2,484 members. The congregations have an average attendance of nearly 11,000 persons. There are 165 schools with 5,500 scholars, 4 theological seminaries, and 4 female seminaries. About 30,000 copies of the Bible are sold per annum. It is estimated that not far from 300,000 Bibles are in use every day in the Turkish empire.

Mr. Bliss, not long ago, made a journey through Eastern Turkey—the oldest country in the world, the land of mount Ararat, of Noah, and Abraham—where, after centuries of degradation, almost of oblivion, the light of Christianity is dawning, bringing civilization in its train. He passed twenty-three nights in the country, stopping with the peasants, and in twenty-one of the houses he found Bibles! In the town of Cesarea, three native women, employed as Bible-sellers, out of 860 families, found the Bible in 763! There is a great desire among the people to learn to read. The old opposition to the instruction of women has ceased, and there is now no obstacle in the way of their elevation.

Commerce of Jerusalem.

Jerusalem, observes the British Consul in a recent Annual Report to the Foreign office, is the least, commercial or industrial city I know. British trade is represented by one English tradesman, who keeps a store for English upholstery, drapery, and fancy goods. The population of the city is computed at 15,000, rather more than half of them Jews, the rest Moslems and Christians. The chief native industry is the manufacture of soap and "Jerusalem ware," the later consisting of chaplets, crucifixes, beads, crosses, and the like, made for the most part at Bethlehem, and sold to the pilgrims, who annually flock to the holy city to the number of 6,000. The population of the entire Sandjak, or province, is estimated at 200,000, of whom 160,000, are Mohammedans. Owing to the absence of good roads, and the insecurity arising from the predatory tribes of Bedouins inhabiting the outskirts of the district, but who could be easily kept in check, vast and fertile plains lie in waste or are but partly and poorly cultivated; factories are not to be met with, and no mines are worked. though it is believed that sulphur, bitumen, and rock salt abound on the shores of the Dead Sea. The principal, if not the only imports from England, are cotton goods, and some colonials, but the former have much diminished since the cotton crisis; it is calculated that 300 bales of these goods, of the value of 16,000*l* annually find their way here. The exports are olive oil and grain. Very little is done in cotton culture, what is raised being of inferior quality, and consumed on the spot; but it is believed in many parts of the country cotton to a large extent might be successfully cultivated, with good seed and proper instruction and implements given to the peasantry. The vegetable produce is barely sufficient for local requirements.

Jaffa is the port through which Jerusalem deals with foreign countries. The trade of Jaffa experienced a considerable increase in 1863. The quantity of cotton exported rose from 50,000 pounds in 1862 to nearly ten times the amount in 1863, with a prospect of this being trebled or quadrupled in 1864. This was owing to the interest exercised. The merchants who operated in cotton made a profit of about twenty-five per cent. There are regular lines of French Austrian, and Russian steamers, all doing well, and very often large quantities of goods have to be left behind for want of room. Only one English steamer visited Jaffa in 1863. The exports exceeded £200,000; of the imports no statistics are kept. The Consul reports a telegraph line in course of formation by the Government between Beyrout and Jaffa, thence to be carried on to Alexandria.

The Romish Church in Ireland has nearly 2,400 chapels, of which more than 2,000 have been built since 1800, at a cost of £3,500,000. In the same period it has established about 300 convents, monasteries, hospitals, colleges, etc., at a cost of £1,500,000; besides building 600 parsonage houses, 2,990 school-houses, and 70 Christian Brothers' schools, at a further cost of £650,000, and endowing these institutions and others, so that the total expenditure since the century opened cannot be less than seven million pounds. The maintenance of 28 Bishops, 2,527 parochial and 500 regular clergy, is estimated at £400,000 a year, the maintenance of the Church at over £100,000; and of hospitals, orphanages, colleges, etc., at £240,000. So that this Church of four millions, confessedly poor, taxes itself for its annual support, £750,000, beside large contributions to the Pope, the Propagation Society, and various minor missions.—*Protestant Churchman.*

The Oldest Missionary.—A gentleman who has recently visited Ceylon speaks thus of the oldest living missionary of the American Board:

"This venerable Dr. Spaulding is still at his work, though now seventy-six years of age. He spends two days in the week with a Bible revision committee, working from morning till night, and not unfrequently attends a moonlight evening meeting, preaching an hour after a day's work. I drove out with him on one of those evenings ten miles. We held meetings in two places, returning for our tea at 10 o'clock, and, after a good night's sleep, he was not the worse for work the next day. He looks older than he did in 1853, but retains his vigor wonderfully. Mrs. Spaulding, though now 72 years of age, has her class of girls on the house veranda as in younger days."

Dr, Spaulding went to Ceylon in 1819. Forty-nine years of work in the ministry is as much as most men enjoy in a cooler climate.—*N. Y. Obs.*

Rev. J. W. Bennett, Vicar of Frone, England, who, it is stated, believes in the real presence and adores the consecrated elements, is the subject of an application which has been recently made by the Bishop of London to the Court of the Queen's Bench for authority to proceed against him for heresy. What a state of things, when the Church has to ask authority from the State to take steps for the removal from her ministry and pulpits, of a man guilty of the most serious error!—*Christian Instructor.*

The Irish Church.—Dr. McCosh has published a letter with reference to the impending revolution in the Irish Church. He shows the admirable working of the voluntary principle in the Free Church of Scotland, under which the congregations have steadily increased, and the *average* annual salary of the minister is more than one thousand dollars in gold. This is higher than the average of any denomination in this country.

No Liberal Givers in England.—The London *Spectator* says:

"Gifts of princely amounts, amounts which would yield fortunes in mere interest, have been repeatedly made to great American cities, to colleges, to libraries, and this during the life-time of the donors, but we can scarcely recall an instance of the kind in Great Britain."

Moravian Missions.—It has been said that the Moravians have an average of one misssionary in the foreign field for every 600 members they have in the Church here at home; and what rich results follow! Their home membership numbers at the present time 24,459; their foreign, in their various mission fields in Labrador, South Africa, the West Indies, and elsewhere, is 70,311, nearly three times as many gathered ones abroad as at home.

Native Teachers.—The London Church Missionary Society is establishing a seminary in India to train native pastors and teachers, with a view to qualifying such persons as are to be employed in spiritual work for meeting difficulties and objections made by educated Mohammedans and Hindoos against Christianity.

The Pope.—Dr. Bellows describes the Pope as large and commanding in person, with a full, well-shaped head. He is about 73 years old. Resembles Edward Everett in his later years.

Prayer for the Ppesident.—The Bishop of London has ordered the President of the United States to be included in the prayers of the Episcopal Church for the Queen.

Correspondence.

Letter from Down the Coast.

San Buenaventura, July 13, 1868.

Having opportunity to be absent from the city for a few days, I resolved to become one of the tide of explorers, and home-seekers, and pleasure-hunters that is setting with so much force towards this lower country. And now that I am here, I will venture to add one more to the long list of letters that have been written recently for the San Francisco papers, respecting a region which has been more fully made known within a year past than during all the previous years of its history. Nor is this strange. How little would the world know now of interior California, and Nevada, and Idaho, if the eager throng of gold-diggers had not penetrated every valley and gorge, and scaled every mountain, till the whole wild territory was as familiar as the parts that have been settled for years. The stimulus of excitement has revealed what ordinary discovery and the mere advance of population would not have so faithfully added to the geography of the country in fifty years. The extraordinary emigration to the Pacific Coast, during this season, of those who design to reside here, awakened the attention of speculators and those seeking land which they might cultivate with the most profit, to this region, which had hitherto been left in possession of the Padres and old Spanish rancheros, and native residents, by common consent being regarded as of little worth.

It was known that cattle and sheep could be raised here when water could be reached by them, and that, in favorable localities, when *irrigated*, certain kinds of fruit might be produced. But, for general crops, and especially for the production of good vegetables, the land was believed to be entirely useless. Indeed, I am told by those who have lived here for many years, that potatoes were all brought from the upper country until within a year or two; that men were laughed at who proposed to plant corn in these valleys, and that wheat was regarded as so absolute a failure that the sanguiue were unwilling to risk the seed and labor in an attempt to get a crop. Last week I went through acres of potatoes, where men were digging those that were larger than any Humboldts I ever saw; miles of corn fields that will yield 80 to 100 bushels to the acre; and wheat in such quantities that the question can never be asked again whether this can be a country for cereals. No one irrigates, either in raising grain or fruit, and it is doubtful whether better products can be supplied from any portion of our strange State, that fifteen years ago was believed to be a desert, and now proves to be one of the most remunerative agricultural sections of the continent.

In the immediate vicinity of this old Spanish town, composed of a curious mixture of old adobe houses and little board cottages, erected for the accommodation of new-comers, there are some of the finest ranches in the country, and they are now being divided into small farms, greatly to the advantage of the whole region.

The San Buenaventura River comes down to the sea through a rich valley lying to the northeast, and the Santa Clara River passes through another valley, more extensive and rich, lying nearly east from this point, which is destined to be one of the noblest farming and manufacturing districts of the coast. The land is fertile to a degree almost unequaled, and the water-power would be remarkable in any country, but is specially rare in California. More than sixty families have settled in this valley within the last year, and the unsold land is being rapidly taken up, so that very soon the entire tract to the seashore will be under cultivation.

Among these new settlers I found Rev. M. B. Starr, who was lately pastor of the South Park Congregational Church in San Francisco, and expects to have a flourishing church near his new home very soon, and the family of Rev. S. S. Harmon, once pastor of the Presbyterian Church in Sonora, and widely known as connected for years with the Pacific Female College. Mr. Harmon is absent for a few months at the East, but it is hoped that on his return he may be induced to commence a female seminary here.

In this village, proper church interests are not flourishing, though services are held regularly, and there is the promise of better days in the increase of population. The dilapidated condition of the old Mission Cathedral, with its crumbling walls and wrecked interior, is a fit illustration of the Romish church, as contrasted with what it was in those palmy days when its Missions were most prosperous, the vestiges of which are to be seen in all these central points. At Santa Barbara, the decayed state of the old Mission, now occupied by a few Grey Friars, is even more marked, and the whole establishment can be regarded as little better than "a pile to ruin run."

This town is feeling the effect of the new life which is pouring into the region more perceptibly than any I have seen, and must soon become a thriving and beautiful place. Rev. J. A. Johnson is making progress in the Congregational church established there, and the influence of religion can be noticed in many particulars. This Church has not yet erected a house of worship, but will do so in a few months, and will gain a permanent hold upon the growing population. A fine Episcopal church is commenced and will be finished this season. It is indicative of the right spirit that Christians are disposed to render their influence prominent in the forming condition of the elements gathered here from all parts of the world, and they should receive all the sympathy and support they need from those in the older places until they become thoroughly planted.

I may write another letter respecting some other matters of interest in this vicinity, but will not prolong this, as I need my time for further survey of the country, and long letters are rarely profitable in print.

Observer.

Matters in Marin County.

We take the following from an interesting letter, which want of space prevents us from publishing in full:

Tomales is situated in the northwestern part of Marin County, 15 miles west of Petaluma, with three stores, doing in the aggregate a large business, and an equal number of store-houses with an immense capacity. The place is situated in the midst of one of the richest potato, and oats, and wheat growing regions of the State. I cannot give you figures, but I may say that its business is very extensive.

I have been laboring, in all, at this place, not three years. During half that time a Sabbath School has been taught with a good deal of zeal, and the regular congregations have been interesting and very large, considering the circumstances.

When I went to the place a church was provisionally organized. For the want of proper officers, the organization has not been completed. There are some fifteen members of churches who are in sympathy with our work, and who, we have reason to believe, will unite with us in a short time.

With remarkable liberality and zeal, the people of Tomales, headed by a band of noble Trustees, completed a Presbyterian church, costing $4,500, in 1866. Soon after, the beautiful building was laid in ashes by the flames. But undaunted and carried forward by that enterprising spirit which is seen in their worldly business, the Trustees resolved to erect another edifice on the foundation where the former stood. And in order to make the matter start well, and having given very liberally to the burnt building, Mr. Warren Dutton headed the subscription list with the handsome sum of $1,000. The new Presbyterian church is now nearly completed, and is a much more substantial and finer house than the first, to cost about the same. And all this has been done without a single puff by the press, or asking scarcely a dollar from outsiders.

M. A.

Origin of the Churches in the United States.

The Newark *Daily Advertiser* gives a report of a lecture delivered by Rev. Dr. Moffat, Professor of Church History in Princeton Theological Seminary, in Newark, N. J., before the Historical Society, on "the Planting of Churches in America":

In the discovery of the New World, the Cross was brought here by Roman Catholics of Spain, and soon all the inhabitants of the country, from California to Cape Horn, were either converted to Romanism or exterminated. Between 1608 and 1685, while all Europe was convulsed with religious wars, the most important of the American settlements were made.

Of the colonies that were planted at this time, the first two, and the most important, were Virginia and Massachusetts. Maryland was soon after settled by a colony of Roman Catholics. Then New York and New Jersey, the intermediate sections, were taken possession of by the Dutch, Danes and Swedes. In 1655, the Dutch reduced the others, and nine years afterwards the English conquered the Dutch. The fourth settlement was made at Port Royal in 1676, from which proceeded the founders of Charleston, S. C. The fifth and last settlement was that of the Friends, in Pennsylvania and the adjoining parts of New Jersey, in 1682. Thus it was that before the revocation of the edict of Nantes, England was in possession of the entire country from Maine to Georgia.

During the same time, France settled the territory to the North, and Spain and Portugal that to the South. Hence the Roman Catholics were in power in the extreme North and South. The Roman Catholic colony in Maryland, having received its charter from a Protestant, before one generation had passed away accepted that faith, and the Catholics became Episcopalians.

Among the English settlements in the Northeast, the Congregational was the established religion; in Virginia the Episcopalian; in the Carolinas the Episcopalian and Presbyterian; and in Pennsylvania the Quaker. Episcopalianism, depending upon England for its support, became unpopular and declined relatively until the time of the Revolution, when it broke down altogether, the clergymen fleeing to England. The American Protestant Episcopalian Church was then established and since that time has grown rapidly.

Presbyterianism early asserted itself, receiving its members from two classes, Puritan Congregationalists and the Scotch and Irish Huguenots. The growth of this Church was entirely from within and was on that account the more vigorous. It gradually spread towards the South, assimilating to itself many from other churches, and received accessions from England until it became the popular religion of the Middle and Southern sections. The first church in Newark was Congregational, but was in a generation overshadowed by the Presbyterians, which assumed the leading position in this State. About this time a revival extending all over the country,

greatly increased the names of the Presbyterians, and following it the College at Princeton was established. In 1770 the Wesleyan Methodists sent out their ministers, and in a few years established societies and increased with wonderful rapidity.

The Baptists first came over with the Puritans, but expelled from Massachusetts, they took refuge in Rhode Island, and spread rapidly toward the West and South.

Lutheranism and Romanism had but a brief rule, and were soon submerged by the other free faiths, so that at the opening of the national history they had given away to the Protestants, who were located, the Congregationalists in the Northeast, the Episcopalians in the Middle and Southern States, the Presbyterians in the same sections, the Baptists in the North and Middle, and the Methodists in the West and South.

Pacific Mail Steam Co's Steamships

—FOR—

NEW YORK, JAPAN AND CHINA

Will be Dispatched as follows:

LEAVE WHARF CORNER OF FIRST AND BRANNAN STREETS, at 11 o'clock A.M. of the following dates, for PANAMA connecting via Panama Railroad with one of the Company's splendid Steamers from ASPINWALL for NEW YORK.

On the 6th, 14th, 22d, and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Transatlantic Company's Steamer for St. Nazaire, and English Steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English Steamer for Southampton, South America, and P. R. R. Co.'s Steamer for Central America. Through tickets can be obtained.

Departure of the 6th connects with English Steamer for Australia.

The following Steamships will be dispatched on dates as given below.

STEAMERS FOR JULY, 1868.

July 6th—MONTANA, Captain Cavarly, connecting with HENRY CHAUNCEY, Capt. Grey.
July 14th—CONSTITUTION, Captain Comstock, connecting with OCEAN QUEEN, Capt. King.
June 22d—GOLDEN CITY, Captain Lapidge, connecting with RISING STAR, Capt. Conner.
June 30th—GOLDEN AGE, Capt. Farnsworth, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock.

Through tickets to Liverpool by the "Cunard," "Inman," and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired, an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

The Steamship JAPAN, Captain George E. Lane, will be dispatched on Monday, August 3d, at 12 o'clock, noon, from wharf, corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the COSTA RICA for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Co.'s Office, corner of Sacramento and Leidesdorff Sts.

OLIVER ELDRIDGE, Agent.

ILLUSTRATION OF DIVIDENDS OF PROFITS

—OF—

United States Life Insurance Comp'y,

NEW YORK.

OFFICE, No. 40 WALL STREET.

CASH ASSETS EXCEED $2,700,000.

SIXTH TRIENNIAL DIVIDEND.

The Board of Directors have this day declared a Dividend of FORTY PER CENT. for the three years ending at the 4th March, inst., to holders of all Policies then in force, on the whole sum of the annual participating premiums received during the said three years; and an additional Dividend of TWENTY PER CENT. on the whole sum of all previous Dividends and Additions, to holders of such Policies who have fulfilled their engagements with the Company, both Dividends being payable and available in the various modes explained in the Company's Prospectus.

For example, on a policy paying one hundred dollars a year of participating premium, the profits for each year and the total at each year on this system are:

Year.	Yearly.	Total.	Year.	Yearly.	Total.

RELIGIOUS BELIEF.

Among those not in the Church, there is a prevailing sentiment that a definite system of faith respecting religious things is a mere net-work of chains, and that a large part of those doctrines which have been believed for ages are the offspring of bigotry, or superstition, or both. And among Christians there is a feeling too often exhibited that it matters little what is believed, and even an inclination to look with contempt upon the sharply defined views of our fathers, a looseness as to confidence in the Bible and the established truths on which the Church stands, which can occasion nothing but evil. Many persons seem to have an idea that there can be no sin except in overt deeds; that it cannot be found in belief and theory; but there can be no greater error. The highest forms of sin are those which respect what we *believe*, and those who write sarcastically and talk flippantly about the sentiments which have been developed by the earnest, patient thought of nobler and better men, should feel that this course may be fraught with the most wide-spread mischief.

You go into an artist's exhibition room, and mutilate a statue here, and a picture there, and make general havoc with these expressions of his genius, and products of his hand, and you have done serious evil—what none but a vandal would ever do. But this does not compare with that destruction which you would effect, were you to go into his studio, and break up his models, and burn his copies, and then unsettle his taste and mental perceptions and rules for reconstruction, till he has no power to give again to the world those creations which his gallery contains. Tempt a man to do wrong, place stains upon his character, destroy, by temporary invasion, the symmetry of his conduct as a righteous man, and through sneers and ridicule thus break up his virtue and integrity for a season; and you accomplish what a devil might regard as his appropriate work. But this does not compare with that ruin which is wrought when you have taken away his ideas of what a righteous man should be, and unsettled his whole conception of the rules and guides by which a noble character shall be produced, and have removed from within him those fixed opinions which are the only guaranty of virtue or worth. The only reliable men are those who have distinct *ideas* within, of what they intelligently and firmly *believe*, of what they strive to exhibit in themselves and in their actions; and in this sense, what is *within* is the only substance of the man. These bosom thoughts and purposes, these established *residents* of the mind, which gain and claim control, are our only *realities*, and to rout these by contempt or sarcasm, to set the whole mind adrift upon religious truth, till it has no fixed outlines of belief which are to be expressed in the life, is the most disastrous trifling, the most heinous sin. Let it be that a temple is somewhat faulty in its construction, that its proportions are not perfect, that its arches are not above criticism, that you would like to see a nobler edifice in its place; suppose, by contemptuous, and sneering, and persistent remarks, you induce the builders to tear down the pillars that support it, and throw the whole into a mass of ruins, while you have no power to erect a better temple where it stood. The mourning owners shall have abundant time to sit upon the pile, and bewail your reckless counsel. The *truths we believe* are the pillars in the temple of character and real manhood, which we rear. Shake down these truths, or our *belief* in them, and the mischief is irreparable. If we can be shown that we build upon *error*, let all be razed to the ground. But the iconoclast is worthy of execration who will tear down what is proved to be good, because he fancies it ought to be better. Give us the better—until then, leave our good alone.

WHAT MAN NEEDS.

Not what he naturally desires, for that may be positively injurious in its results. Not what he strives for, since the object may be far below his capacities and unworthy his regard. Not what he labors to build on the insecure foundation of a fallen nature, since both structure and basis are alike imperfect; but what he requires in order to renew his nature and raise him to the highest possible place in the scale of being. What he needs is both general and individual. It relates to the improvement of each member of the race, and to man as connected with the Infinite and the Absolute. It has to do with temporal and eternal realities, and molds character that shall shine as the stars, forever and forever.

What man needs is not mere culture, the simple removing of restrictions hindering the development of his nature; the conferring of gifts to supplement deficiencies, till at last he shall reach the maximum, and be declared perfect. Something more is demanded before he can fill the place for which he was designed. No amount of pruning or enriching will make a fig tree bear olives, or a vine figs; neither will external culture change man's nature and fit him for his destined lot. Had that alone been necessary, then would Greece have still been the home of a race famed for its intellectual development; Rome would still give laws, and her victorious eagles proclaim the success of a nation raised to the highest perfection of government. If external culture alone be what is needed by man, why have not the Chinese a right to assert their claim to superiority? Why may not the maxims and proverbs of Confucius, the learning and training of sages now do for that people what Grecian arts and Roman laws failed to do for races then at the zenith of merely human culture? Man grows from within, outward; and therefore what he *is* must be changed, radically changed, before his outward relations can be permanently improved or elevated. What man needs is a renewal, a new principle, a new power working in him, changing not only his very nature, but the status of that very nature to all others.

If it be asked, is there a power adequate to such results? Scripture plainly answers, yes. It teaches emphatically man's need of that power, and then tells how he may avail himself of its helping. It positively asserts that by nature, "there is none that doeth good, no, not one;" and then declares that God works in the renewed man "both to will and to do of his good pleasure." And the renewal of man's nature is also a Divine work. It is the coming of the Infinite and Eternal into direct personal relations with the human soul, through the immediate agency of the Holy Spirit. It is this which makes man a new creature in Christ. Then "old things have passed away; all things have become new." Then man learns to submit himself in the spirit of Him who prayed, "Thy will by done;" and finds every longing met, every desire fulfilled, every want gratified. Taught all things be the Holy Spirit, and guided by Him into all truth, he realizes that he is here simply as a learner; that this world is merely a stopping-place for a time; that this life is only preparatory for one infinitely better. Little by little the things which are seen lose their hold, and the things which are not seen gain mastery over him. He becomes daily transformed in heart and life, living like that ancient worthy who walked with love; like another after him who endured as seeing Him who is invisible; like another, who counted all things but loss that he might win Christ and be found in Him.

To realize this need of Divine teaching and guidance, to enjoy from moment to moment His mighty helping; to feel that at the last this need shall all be met, and sing joyously with the Psalmist, "Thou wilt show me the path of life; in Thy presence is fulness of joy; at Thy right hand are pleasures forevermore." What can one ask more than this? Well may men thank God that He made them capable of feeling such need, and then supplied it so bountifully in the riches of Jesus Christ, His Son.

Hebrew Baptisms.

A second *baptismos* of the Hebrews which I will notice was, *the cleansing of the leper*. The disease of leprosy, in the highest degree loathsome, was peculiarly abhorrent to the Jews, for the confirmed leper, after the proper tests and examinations had been made by the priest, suffered not alone from the pains of the fatal malady; he was *ceremonially* unclean. "He is a leprous man; he is unclean; the priest shall pronounce him *utterly unclean;* his plague is in his head. And the leper in whom the plague is, his clothes shall be rent and his head bare, and he shall put a covering on his upper lip, and shall cry, 'unclean! unclean!' All the days that the plague shall be in him he is defiled; he is unclean; he shall dwell alone; without the camp shall his habitation be."

This plague of leprosy, so vivid a type of the defilement of sin and of moral pollution, had its law of cleansing, which the Lord delivered to Moses. Omitting the preparatory details of the ordinance, and other ceremonies, let us turn to Leviticus, 14: 7, which reads, "And he, the priest, shall *sprinkle* upon him that is to be cleansed from the leprosy seven times, and shall pronounce him clean."

The second Hebrew baptism is the more striking and pertinent because of the acknowledged similarity between the personal defilement of the leper and the moral defilement of sin, and as in the former case, in the cleansing from the pollution contracted from the touch of a dead body, the purifying baptism was administered by *sprinkling*, so, in the cleansing of the leper, seven times he is to be *sprinkled* by the priest, and then to be pronounced clean. No one familiar with the Scriptures will fail to connect this with the spiritual cleansing of the promised Messiah (Isaiah 55: 15), "So shall He sprinkle many nations."

I think it is manifest, from these two ceremonial lustrations of the Hebrews just noticed, that the purifications of the flesh, in the most marked cases of defilement, were by *sprinkling*, and that by the very eminence accorded to this mode of purification by the economy of the Hebrews, if *baptismos* confined us to any particular mode of ablution, that mode would of necessity be *sprinkling*, on account of its peculiar importance, but there were enjoined upon the Hebrew worshipper "divers washings" (*baptismoi*). Let us here note that recorded in Lev. 14: 8: "And he that is to be cleansed shall wash his clothes, and shave off all his hair, and wash himself in water, that he may be clean."

We have here another purification of the flesh, another of the divers baptisms of the Hebrews set forth in the direction, "wash himself in water." Was this washing a mere cleansing of the flesh by water, or was it an immersion of the entire person? There is certainly nothing in the text or context, as we read in our English Bible, to require an *immersion.*

Prof. Ripley, in his commentary on the Hebrews, 9: 10, refers us to this text, as will be seen below, to prove that these *baptismoi* of the Hebrews were immersions: "And 'divers washings,'—that is, the various ablutions which were enjoined, both of persons and things that had become ceremonially unclean. These ablutions appear to have been entire, not partial, both as to persons and as to things. Compare Leviticus 10: 32, and 14: 8, 9. Hence the original word here used, immersions." As Prof. Ripley, one of the distinguished scholars of the Baptist Church, has referred to this text and Lev. 10: 32 to prove that the *baptismoi* of the Hebrews were immersions, they are worthy of our careful consideration; therefore, I call special attention—

1st. To the statement that these "divers washings" were the ablutions enjoined, both of persons and things, that had become ceremonially unclean," because it confirms what I have already claimed respecting these *baptismoi*, to wit: that they referred to the ablutions appointed in the Hebrew economy for the removal of ceremonial uncleanness. But as the whole scope of the Apostle's reasoning rests on *carnal ordinances*—that is, purifications of the flesh—I cannot see the pertinence of the reference to purification of things which Prof. Ripley conveniently introduces to show that the *baptismoi* were immersions. We read, indeed, in Lev. 11: 32, that any vessel which a dead animal shall touch shall be unclean, "it must be put into the water; it shall be unclean until the even; so it shall be cleansed." But this has a very remote connection with personal ablutions for the purification of the flesh. But we let this pass. We grant that these vessels of wood, raiment, skins, sacks, were immersed.

2d. We turn now to the other reference of Prof. Ripley—the cleansing of the leper, Lev. 14: 8, 9, the text already under consideration. We marvel that it should have escaped the attention of the astute and learned commentator that by far the most important part of the purifying ceremony in this ablution, as we shall see, is contained in the preceding verse, to wit: the 6th, for, 1st, this was performed by the priest appointed to the temple service; and 2d, having been performed the aforetime leper was, by the command of God, to be officially pronounced clean. I will quote again, for the edification of the Professor and my readers: "And he shall *sprinkle* upon him that is to be cleansed from the leprosy seven times and shall pronounce him clean." (Lev. 14: 7.)

As it was convenient for the Professor to call attention to the immersion of vessels, sacks, garments, skins, to show an immersion, though immaterial to the question of personal ablution, so it seemed convenient to his argument also to overlook the fact that in the ablution for the cleansing of the leper the most important part of the ceremony was performed by *sprinkling*, for it was an official duty—a priestly office, and it really effected the cleansing, although subsequent washings were performed to complete the ceremony. F. B.

REV. ELI CORWIN preaches in Dr. Stone's pulpit during the latter's absence in the country.

Oxford Bibles.

The superior excellence of the Bibles printed at the Oxford University Press is proverbial among all who prize correctness of the text, and clearness and beauty of typography and binding. The Oxford editions are the standard from which other editions are copied, and are therefore acknowledged as superior.

The Subscribers, who act as

SOLE AGENTS IN THE UNITED STATES

or these Bibles, keep all varieties and sizes, from the 48-mo. to the Folio. They select the following, which they strongly recommend.

THE SUNDAY SCHOOL BIBLE. Printed in clear type and well bound in arabesque - - - - - - - - 50 cents.

H. H. BANCROFT & COMPANY,
San Francisco.

THE LATEST AND BEST OF SCHOOL READERS.

Edwards & Webb's Analytical Series.

ILLUSTRATED BY THOMAS NAST.

First Reader, 28 Cents. Fourth Reader, 90 Cents.
Second Reader, 50 Cents. Fifth Reader, $1.25.
Third Reader, 75 Cents. Sixth Reader, $1.60.
Edwards & Warren's Analytical Speller 25 Cts.

These Readers are COMPLETE IN GRADE, METHOD, MATTER, AND EXECUTION and contain

1. An admirable presentation of the word-method and object-systems of teaching, with a beautiful arrangement of text and illustration.

2. A clear and correct treatise upon the elements of spoken language.

3. Lessons in Phonic Analysis, and exercises for training the organs of speech to the acquirements of a full and distinct articulation.

4. Rules for reading the various classes of selections, and directions for giving due and appropriate expression to every phase of thought and feeling.

5. A most thorough system of Thought Analysis, by which the student is made to observe and appreciate the full sense and scope of each selection.

6. Selections chiefly new. Engaging lessons and stories for younger pupils, and for those more advanced, the best and worthiest specimens of American and foreign literature.

These books are printed from electrotype plates, made from new fonts of clear cut type; the best paper only is used; they are bound in the most durable manner; are sold at the lowest prices, and introduced upon the most favorable terms. Though published less than a year since, they have already been adopted by the Public Schools of New York, Chicago, and many other cities, and are everywhere giving unqualified satisfaction. Specimen pages and circulars sent on application.

A Method for the Piano-forte,

—BY—

WILLIAM MASON AND E. S. HOADLY.

Large quarto volume; illustrated; 240 pages. Price $4.00.

Two editions are published, one with AMERICAN FINGERING, and one with EUROPEAN FINGERING. Purchasers should always state which is wanted.

This work, first published in November, 1867, of which six editions have been called for in rapid succession, has proved to be the most useful, thorough, systematic, and successful text book for instruction upon the Piano-Forte ever published. It is eminently a new method: modern, original, complete. Retaining all that has proved valuable in older works, it adds much that has heretofore never been published, though often tested in private teaching with the best and most successful results. Among the novelties of the work, the ACCENT EXERCISES, introduced by Mr. Mason, are worthy of the attention of every teacher, as presenting unusual advantages of instruction.

The prominent excellences of this book are:

1. Its DEPARTMENTS, theoretical and practical.

2. EXPLANATIONS & DIRECTIONS, such as best teachers give their pupils, and which for accuracy and clearness, have neve been surpassed.

3. THE ART OF FINGERING—best modes of overcoming difficulties.

4. THOROUGHNESS and PERFECTION of Lessons.

5. RECREATIONS AND PIECES, skillfully adapted to the requirements of the pupil, and embracing the most attractive and meritorious compositions.

Dr. Lowell Mason's Music Charts,

FIRST SERIES, THIRTY CHARTS, Price $7.50.
SECOND SERIES, THIRTY CHARTS, Price $7.50.

This work, which every teacher of Vocal Music will find extremely useful and convenient, consists of Charts or Diagrams, each of which is 30 by 42 inches in size, designed as aids in teaching classes the Elements of Music and its Notation. They embrace Exercises, Illustrations, simple Songs and Pieces, such as teachers are accustomed to write on the Blackboard, progressively arranged and printed from mammoth type, which can be easily seen from all parts of a large hall.

Care should be taken to order DR. LOWELL MASON'S MUSIC CHARTS. These Charts cannot be sent by mail.

Apples of Gold in Pictures of Silver.

BY EDWARD ROBERTS.

Price in paper covers, 30 cents each, or $25 a hundred; in board covers, 35 cents each or $30 per hundred.

The New Sunday-School Song Book. Containing treasures old and new, many beautiful Songs, the words as well as music of which are now first published, with the choicest of the old hymns and tunes.

MASON BROTHERS, Publishers,
596 Broadway, New York; 154 Fremont St., Boston.

Current Literature.

SERMONS BY REV. NEWMAN HALL, D.D.

The author of these sermons is too well known to need introduction to the Christian public. His recent visit to the United States, and his open, manly utterances in favor of this country on his return to England, have made him friends in every part of the land. The volume now given to the public, consists of selections made by Dr. Hall, and has the advantage of his personal revision. Prefacing these, are brief letters to his publishers, and to the Clergy and Christian people of America, together with a short sketch of the history and institutions of Surrey Chapel, London. A single extract from his letter to the Clergy, reveals the author's catholicity of spirit, and will meet with the cordial assent of every reader.

There is no bond of union like that which unites us to Christ. No attraction draws us so near to each other as that which draws us all to the Cross. Stronger than diplomacy, more convincing than argument, a common love for the gospel, a common zeal in making it known, a common loyalty towards our one common Brother, Savior, Lord, will do more to preserve our two nations in concord, than all that self-interested politicians can avail to stir them up to mutual strife. For the sake of that international union which is so essential to the prosperity of both countries, and to the welfare of the world, as well as for the interest of the souls of men and the glory of Christ, let us, both in America and Great Britain, maintain, in all its beautiful simplicity, the cardinal doctrine of Jesus Christ and Him crucified: the great object of preaching, the great work of all the churches, being to make known His name, and to secure for Him the loving homage of all hearts.

It will not seem at all strange that a man of such temper should be found in the pulpit of every evangelical denomination, that he should preach in the House of Representatives by invitation of the speaker, and on the same day in the Methodist Colored Church, nor that he should address students in Colleges, male and female, and young men preparing for the ministry, and be found on the platform, advocating the claims of the Sabbath, and urging the Temperance cause with all the earnestness and enthusiasm of one entirely devoted to the Master. What his sermons are may be inferred from his words to theological students.

Ask what is the end of preaching. Is it to display your own learning, or genius, or eloquence? You will not think so if you are divinely called to the ministry. What is it but to expound and enforce the truths of the Gospel, to lead men to repentance towards God, and to faith in our Lord Jesus Christ?

* * * * When your hearers go away, saying, "What a grand sermon! What an eloquent preacher! depend upon this, that you have *failed*. The object of preaching is, not to fix attention on the preacher, but on the subject of the preaching: not to lead men to admire the *servant*, but to adore the *Master;* not to lead them to say, "What a fine discourse we have had!" but, "What a sinner I am! What a Christ I have! What must I do to be saved? Lord, what wilt thou have me to do?"

A volume of sermons from such a man, moved by such a spirit cannot fail of a powerful influence for good. No one who reads them but will be refreshed and strengthened. Sheldon & Co., New York. A. Roman & Co., San Francisco.

THE ATONEMENT.

Dr. A. A. Hodge, of the Alleghany Seminary, has just issued through the Presbyterian Board of Publication, a volume on the Atonement, which has more than usual interest, because of the discussions now so frequent in the church upon doctrinal points. The substance of the book was given to the public in a series of articles written for the "Presbyterian Banner," of Pittsburg, but they have been expanded and more thoroughly elaborated before being published in this permanent form.

The doctrine, in all its details, is presented from what is regarded as the Old School point of vision, and as there are frequent references to Mr. Barnes and others who are believed to hold views not in harmony with these details, the interest just now prevailing in connection with the questions of Union, will cause the work to be read with eagerness.

Of course, we shall not even attempt to give an outline of the argument, much less a review of it, in this brief notice. The purpose of the author is definitely stated in the preface, when he tells us that "it is sent forth as the best contribution within my power to the vindication of the ancient faith of the Presbyterian Church, and of the unquestionable and only legitimate interpretation of her standards. While jealously guarding the essential principles of the Calvinistic system, I have designed to repel with all my might alike all those positive heresies which attack it openly, and with even greater solicitude that latitudinarian indifference to exact conceptions and careful statements of doctrine which tends secretly, yet not less certainly, to destroy the truth, and which in the present age is our chief source of danger. I would pray and labor that in gaining breadth we may not lose height, and in gaining peace and love we may not lose purity and truth."

Some idea of the sentiments supported will be gained by attention to the author's definition of terms, respecting which he is very precise, as he should be.

Atonement. This word has been generally used in late years, both in England and in this country, to express the specific thing which Christ wrought in order to our salvation. The old term in use ever since the days of Anselm, and habitually used by all the Reformers in all the creeds and great classical theological writings of the seventeenth century, both Lutheran and Reformed, was Satisfaction. We prefer the old term to the new one for it is not ambiguous. It always means precisely that which Christ did in order to save his people, as that work stands related to the nature of God and his law.

The Reformed churches mean by its use (1) that Christ fully satisfied all that the justice and law of God required, on the part of mankind, as the condition of their being admitted to divine favor and eternal happiness. (2) As the demands of the law upon sinful men are both perceptive and penal—the condition of life being "do this and live," while the penalty denounced upon disobedience is, "the soul that sinneth it shall die"—it follows that any work which shall fully satisfy the demands of the divine law in behalf of men must include (1) that obedience which the law demands as the condition of life, and (2) that suffering which it demands as the penalty of sin.

The difference between a penal and pecuniary satisfaction. These differ precisely as do crime and debt, things and persons, and therefore the distinction is both obvious and important. Many, who either are incapable of understanding the question, are ignorant of its history, or who are unscrupulous as to the manner in which they conduct controversy, are continually charging our doctrine with the folly of representing the sacrifice of Christ as a purely commercial transaction, in which so much was given for so much, and in which God was in such a sense recompensed for his favors to us that however much gratitude we may owe to Christ, we owe on this behalf none to God. Long ago the doctrine of the Reformed Churches was unanswerably vindicated from such puerile charges by all its most authoritative expounders.

Pecuniary satisfaction differs from penal thus: (*a*) In debt, the demand terminates upon the thing due. In crime, the legal demand for punishment is upon the person of the criminal. (*b*) In debt, the demand is for the precise thing due—the exact *quid pro quo*, and nothing else. In crime, the demand is for that kind, degree and duration of suffering which the law—*i. e.*, absolute and omniscient justice—demands in each specific case, the person suffering and the sin to be expiated both being considered. (*c*) In debt, the payment of the thing due, by whomsoever it may be made, *ipso facto* liberates the debtor, and instantly extinguishes all the claims of the creditor, and his release of the debtor is no matter of grace. In crime, a vicarious suffering of the penalty is admissible only at the absolute discretion of the sovereign; remission is a matter of grace; the rights acquired by the vicarious endurance of penalty all accrue to the sponsor; and the claims of law upon the sinner are not *ipse facto* dissolved by such a satisfaction, but remission accrues to the designed beneficiaries only at such times and on such conditions as have been determined by the will of the sovereign, or agreed upon between the sovereign and the sponsor.

Redemption *and* Atonement. The modern advocates of a general Atonement distinguish between the words Redemption and Atonement after this manner: Atonement they confine to the impetration of the objective conditions of salvation, which they maintain is general and indefinite. Redemption they use in a wider sense as including the actual personal application in addition to the general and all-sufficient impetration. Hence, while they speak of a general Atonement, they deny of course that there is a general Redemption.

In the Westminster Confession, let it be remembered, the word *Redemption* is used in the sense of Atonement, or the sacrificial purchase of salvation for those for whom it was intended.

We have given these extracts only as partial statements of Dr. Hodge's positions, and to stimulate a desire to read the whole book carefully, on the part of any who might not so read it, were they only to be influenced by its title. It is full of thought, and will provoke thought, whether we agree with all his views, or not, and Christians cannot be too firmly established on this central and fundamental doctrine. Sold by H. H. Bancroft & Co.

Bancroft & Company have handed us Womens' Rights, and Serpents in the Dove's Nest, by Dr. John Todd, and Is it I?, and Why Not? by Dr. Storer. These books are published by Lee & Shepherd, Philadelphia, and the two latter are designed to counteract evils, said to be fearfully prevalent.

Dangers of our Republic. By J. A. Stinson.

LITERARY ITEMS.

The Press.

There are printed in the United States five thousand and sixty-two regular publications—daily, tri-weekly, semi-weekly, weekly, semi-monthly, monthly, bi-monthly, and quarterly—with a combined circulation of over seventy-five millions a week.

Nearly all country publications own two presses—some of them three; while the papers in large cities and job offices generally own from two to fifty presses. These offices will average four presses each, which will amount to about sixteen thousand, and adding, say eleven thousand for newspapers, we have twenty-seven thousand printing presses in use in the United States.

We may further calculate, by the average of twelve offices, that there are printed daily over twenty-two millions of cards, circulars, hand-bills, etc.

To print these cards, circulars, bills, and news-

papers, as near as can be figured, keeps constantly in use over thirty million pounds of type; over three million pounds of leads and slugs; over three hundred thousand galleys; one hundred thousand composing sticks; four hundred thousand cases; seven hundred thousand feet of rules; twenty thousand imposing stones; uses each day three hundred thousand pounds of ink, and one million three hundred thousand pounds of blank paper and card-board.

To supply this want of paper, ink, and type, mills and foundries have been established over the country.—*Index.*

Affectation.

Not many years ago there was an attempt to introduce a new pronunciation of the words *either* and *neither*, by giving the first syllable the sound of *i*. Luckily the attempt did not succeed, for it was not supported either by history, analogy or respectable usage. On this subject Mr. Richard Grant White speaks thus in the *Galaxy* for May: "The analogically correct pronunciation of these words is what we call the Irish one, *ayther* and *nayther;* the dipthong having the sound it has in a large family of words in which the dipthong *ei* is the emphasized vowel sound—*weight, freight, deign vein, obeisance*, etc. This sound, too, has come down from Anglo-Saxon times, as we have already seen; and there can be no doubt that in this, as in some other respects, the language of the educated Irish-Englishman is analogically correct, and in conformity to ancient custom. His pronunciation of certain syllables in *ei* which have acquired in English usage the sound of *e* long, as, for example, *conceit, receive*, and which he pronounces *consayt, resayve* is analogically and historically correct. *E* had of old the sound of *a* long, and *i* the sound of *e*, especially in words which came to us from or through the Norman-French. But *ayther* and *nayther*, being antiquated and Irish, analogy and the best usage require the common pronunciation *eether* and *neether*. For the pronunciation *i-ther* and *ni-ther*, with the *i* long, which is sometimes heard, there is not the authority either of analogy or the best speakers. It is an affectation, and, in this country, a copy of a second-rate British affectation. Persons of the best education and of the highest social position in England say *eether* and *neether*."

Mr. Dickens, reserved until his return to England, one of the most graceful acts connected with his American trip. This is, the presentation to Dr. S. G. Howe, the Superintendent of the Perkins Institution for the education of the blind, at Boston, the sum of $1,700, the estimated cost of printing 250 copies of the *Old Curiosity Shop*, in the raised letters legible by the blind. The list of such books is exceedingly limited, and educated blind persons have no resource but to go over and over books already familiar to them, or depend upon more fortunate friends to read aloud.—*Round Table.*

It is said that there are 306 religious newspapers and other periodicals, published in the United States, of which 60 are Baptist, 54 Methodist, 30 Presbyterian, 29 Lutheran, 26 Episcopal, 24 Catholic, 16 Congregational, 11 Universalist, and the remainder, miscellaneons.

Four hundred dollars have been raised in San Francisco toward the erection of a monument to Fitz Greene Halleck, at Guilford (Conn.)

Educational.

Profitable Travel.

It is a pleasant occupation to map out edifying journeys. In geography there are two important elements of a physical nature. These are, heat and cold. Then there are two of a metaphysical character. These are, civilization and barbarism. Combining these elements we obtain four regions through which a youth could be conducted with great benefit to his education. One is, a region of cold and barbarism. This we could find in Alaska. Another, of cold and civilization, is Russia. One of heat and barbarism, we would see among the Pacific Islands. Another, of heat and civilization, is Italy. A trip to Alaska, and then one to Tahiti; a winter in St. Petersburg, and then one in Italy; would equip a young person for a life-long course in reading travels and studying the planet we live on. On a smaller scale, similar journeys may be planned nearer home. A trip to Nevada gives clearer ideas of the business of mining, the formation of mountainous regions, and the effect of elevation upon temperature. Los Angeles, on the contrary, shows the effect of low latitude upon climate, and the characteristics of tropical agriculture. A trip up the coast would unfold the mysteries of the fishing business and lumbering. Add the knowledge acquired in these trips to what may be obtained in and near San Francisco, and the youth is well provided for a large amount of profitable reading and conversation with travelers.

C. R. C.

Santa Rosa, July 14th, 1868.

Mr. Cyrus Alexander, well known in Sonoma County for his Christian liberality, has given to the Presbytery of Benicia a valuable property, consisting of two acres of land and buildings suitable for an academy in the town of Healdsburg. The property is deeded in trust to Rev. Thomas Frazer, Rev. James Woods, Rev. N. B. Klink, and Elders Brown and Morgan. The object named in the deed is the establishment of a Presbyterian Academy, under the care and direction of the Presbytery of Benicia.

Healdsburg is one of the most beautiful, healthful, and prosperous towns in this part of the State, the terminus of the Sonoma County Railroad, now commenced, to which the county has voted a donation of $5,000 per mile.

With Baptist, Methodist, and Presbyterian churches, the latter under the able ministry of Bro. Ely, this place presents to persons seeking homes many advantages, and to a successful teacher in communion with the Presbyterian Church a very desirable opening.

In accordance with Mr. Alexander's benevolent intentions, the Trustees above named will establish, as speedily as practicable, a permanent school.

We invite the co-operation of our brethren, and ask for the prayers of God's people.

Thomas Fraser,
Chairman Board of Trustees Alexander Presbyterian Academy.

Personal.

Rev. Richard Wylie, of Napa, has just returned, by the overland route, from a trip to the East as a delegate to the General Assembly at Albany.

Gen. Banning, of Los Angeles, is in San Francisco making arrangements for the commencement of work on the San Pedro and Los Angeles Railroad.

Rev. Dr. Briggs lectured at Suisun on Thursday, 16th inst., on "The Relations of Temperance to the Perpetuity of our Free Institutions."

Rev. S. S. Harmon, of Oakland, sailed for the East on Wednesday last. We learn that he intends to be absent about one year.

D. O. McCarthy was sent to jail last week for refusing to obey the injunction of the Court.

Capt. R. H. Pearson, who recently died in this city, left an estate of $200,000, of which he gave $10,000 to found a "Home for Aged and Indigent Women" in San Francisco.

Rev. A. K. Lindsey has arrived in this city, on his way to Portland, Oregon, where he will take charge of the Presbyterian church.

Col. Thomas H. Holt was the principal speaker at the late ratification meeting in Stockton.

P. H. Sibley, Esq., of this city, leaves the Democratic party and declares for Grant.

Rev. Dr. Eells has just returned from a trip in the southern part of the State.

Rev. J. A. Benton is enjoying a rest from his pastoral and editorial duties.

From the San Francisco Pulpit.

"Go to the ant, thou sluggard, consider her ways and be wise." The text calls attention by implication to the traits of industry, perseverance, forethought, etc. The ant is democratic—dwelling in a well ordered community without a ruler; it is public spirited, working for the public good; it is energetic, building huge monuments, which, in proportion to its size, are one hundred times larger than the pyramids built by man; it is provident, laying up store against future need; it does not fritter away its efforts on trifles, but, judiciously adapting means to ends, labors for high results. See with what hardy resolution it takes up its daily burthen and toils ceaselessly and energetically on, contributing something, however little, every moment to the accomplishment of its great purposes. If man, immortal man, would work half as earnestly to secure the crown of life, an object so infinitely worthier of struggle and endeavor than the poor insect's physical needs, what magnificent results would be achieved.—*Dr. Wadsworth, Sunday Evening, July* 19.

To be weary *of* well-doing is one thing—true love for the Master would never suffer that—to be weary *in* well-doing is quite another thing, and is of frequent occurrence in the experience of the most devoted disciple. * * * * * * * There is no Gospel more needed by the people of California, than one which shall teach them to break in a little upon their *intense, ceaseless* work.—*Dr. A. L. Stone, Sunday Evening, July* 5th.

Too many Christians regard religion as a state to be gained, rather than a starting point for new development. There is no progress. If there is motion, it is not locomotion. They move on hinges, and not on wheels. Having escaped the storms on the ocean of sin, they sit calmly down on the shore, with no desire to explore the land which is given them to possess.—*Wm. Boyd, Sunday Evening, July* 12th.

The true Christian does not enter the church with the idea that he knows what the Bible *ought* to teach, but with the determination to accept what it *does* teach, whether it be for or against him.—*Rev. J. G. Fackler, Sunday Morning, June*, 28th.

I. S. Van Winkle & Co.

IMPORTERS AND DEALERS IN

Norway and Bar Iron, Cast, Plow, and Toe Steel, Boiler Tubes, Gas Pipe, Fixtures, and Rivets; Case-hardened and Capp'd Half and Full Patent Carriage and Coach Axles. Also, Concord, Kinsley's, and Boston Axles, Bright and Tempered Warranted Springs, Bolts, Files, Rasps, etc., which we offer at Lowest Market Rates. Country orders solicited.

Corner of Battery and Bush streets, San Francisco, and 93 I St., Sacramento.

Practical and Scientific.

AGRICULTURAL.

Agricultural Ode.

This day, two hundred years ago,
The wild grapes by the river's side,
And tasteless ground-nut, trailing low,
The table of the woods supplied.

Unknown the apple's red and gold,
The blushing tint of peach and pear;
The mirror of the power told
No tale of orchards ripe and rare.

Wild as the fruits he scorned to till,
These vales the idle Indian trod;
Nor knew the glad, creative skill,
The joy of him who toils with God.

O, Painter of the fruits and flowers!
We thank Thee for Thy wise design,
Whereby these human hands of ours
In nature's garden work with Thine.

And thanks that from our daily need
The joy of simple faith is born;
That he who smites the summer weed
May trust Thee for the autumn corn.

Give fools their gold and knaves their power;
Let fortune's bubble rise and fall;
Who sows a field, or trains a flower,
Or plants a tree, is more than all.

For he who blesses most is blessed;
And God and man own his worth
Who toils to leave as his bequest,
An added beauty to the earth.

And, soon or late, to all that sow,
The time of harvest shall be given;
The flower shall bloom, the fruit shall grow,
If not on earth, at least in Heaven.

—*J. G. Whittier.*

The Orange Tree.

The orange tree, when full grown, attains the height of about twenty-five feet, and is graceful in all its parts. The trunk and older branches are of a delicate ash color; the twigs so soft and green that they appear almost transparent; the leaves are moderately large, beautifully shaped, of a fine, healthy green, and shining on the upper side, while the under one has a slight appearance of down. The flowers, which are in little bunches, and very graceful in their form, are, in the sweet oranges, of a delicate white, and in the more acid varieties of the family lightly marked with pink.

Some plants have a more powerful odor than others, and are, for the moment, more rich; but there is a freshness in the aroma of an orange grove that never offends or cloys, and the tree is at one and the same time in all the stages of its bearing—in the tender bud and full-blown blossom mingling in loveliness with the dear old brown leaves, with the embryo fruit, just peeping out from beneath the foliage, and the rich, round, golden fruit nodding a welcome to the hand to gather it, and the palate to partake of its refreshing juice.

It is this peculiar character of the taste that renders it the appropriate symbol of marriage—showing at once both the promise and the fulfillment of womanhood, and of those rewards of married love which give at once the charm of domestic, the endearing bond of well-pledged hearts, and the provision for the future of another and succeeding race to take their places.

It is one of those beauties of nature that scarcely knows a superior, even in the perfumes of Arabia, and the aromatic groves on the north of the Mediterranean, where bloom the Provence rose and tuberose, and blend their sweets with that of the orange.

One peculiarity of the orange is, that man may have it fresh in every region of the world, and at almost every season of the year. The aromatic oil and the rind preserve it from the effects of both heat and cold, and the acridity of the former renders it proof against the attacks of insects.

It is true they rot, like other fruits, but not for a long time, if the rind is preserved from injury and they are kept from moisture, and so ventilated as to prevent fermentation. Most of the oranges intended for exportation, and which we get in this country, are gathered while they are quite green, for, if it be allowed to come to maturity, it would spoil before it reached a foreign climate.

Fruit Garden.

A great revolution has occurred in selecting fruit trees for planting. Bushy plants are now sought for. The shade which the side branches make is considered beneficial to the tree. As to the beneficial effects of continual digging about trees, which we oppose, all cultivators are not unanimous, but most of them now abandon it after some years; the only difference being, how many years after planting shall this style of cultivation continue? With very low-branched trees there is this advantage, that the plow or the spade cannot approach very near the trunk. Rich soil is, however, essential to good growth and good crops. This is the essence of "good cultivation."

In preparing for planting trees, the soil should be stirred up at least two feet in depth. Of course, the trees should be planted in the holes only so deep as they stood in the ground before, rather higher, if anything, as the soil will settle. Good common soil may be filled in the holes if the natural soil is very bad, but anything applied as manure may be stirred in the surface-soil after the trees are planted. Some object to making deep holes for planting trees, for if the soil is stiff, they become wells, collecting water from surrounding soil, and rotting the roots. It is best to underdrain such soil before planting. If this cannot be done, it is best to plant such ground in the spring. The water objection is a fatal one to planting in such ground.

Trees that have long stems exposed to hot suns or drying winds, become what gardeners call "hide-bound." That is, the old bark becomes indurated—cannot expand—and the tree suffers in consequence. Such an evil is usually indicated by grey lichens which feed on the decaying bark. In these cases a washing of weak lye or lime water is very useful; indeed, where the bark is healthy, it is beneficial thus to wash the trees, as many eggs of insects are thereby destroyed.

Whitewash is frequently resorted to by farmers; but its great objection is its unsightly appearance—the result is otherwise good. The great opposition to washes formerly was, that the pores of the bark were closed by them,—this was on the supposition that the bark was alive; but the external bark of most trees has been dead years before the time of application; and "the breathing," if so the operations of the pores can be called, is through the crevices formed in the old bark by the expansion of the growing tree by which the living bark below has a chance of contact with the air. No matter what kind of coating is applied to the bark of a tree, it will soon crack sufficiently by the expansion of the trunk to permit all the "breathing" necessary.—*Religious Herald.*

Book Farming.

Those who are opposed to book farming are requested to read the following and give us their opinion.

There was a farmer once who hesitated not to hurl all manner of invectives against book-farming and those who consulted books for advice. By long experience and practical observation, he had become quite successful in the culture of grapes and trees. His fields were clean and fair, and highly productive. His trees were vigorous, well-adjusted, and profitable.

In conversation with a friend, he related his experience in raising grapes and trees, entering into the minutest details, sometimes becoming quite eloquent when describing his victories over the enemies which infest them.

"His knowledge," he said, "was gained by dint of application, by actual experience and hard labor. It was none of your book-knowledge, written by men who know nothing about farming."

"Well," said his friend, "if all this valuable information, gained by the assiduous labor and observation of so many years, and which you have so clearly described, were written out and published, which would you have a young and inexperienced man do—take this as he finds it from your pen, or go through the same tedious process that you have gone through with, including all its vexations and losses?"

The question puzzled him, and he was silent for a moment; but was obliged at last to confess that, after all, there was much that was valuable in books, because combining and relating the results and experience of practical cultivators.

Do not condemn book-farming. You may criticise certain books very severely, because written by ignorant, theoretical hands; but there is always good wheat as well as abundant chaff. So there are many good books as well as poor ones. The time may come, when a single hint from a book or paper may save your farm or orchard, or add to your wealth, by telling you how to increase your crops.—*Independent.*

How to Enlarge Vegetables.—A vast increase of food may be obtained by managing judiciously, and systematically carrying out for a time the principle of increase. Take, for instance, a pea. Plant it in very rich ground. Allow it to bear the first year, say half a dozen pods only. Remove all others. Save the largest single pea of these. Sow it the next year, and retain one pod. Again, select the largest, and the next year the sort will have by this time trebled in size and weight. Ever afterward sow the largest seed. By this means you will get peas (or anything else) of a bulk of which we at present have no conception.—*Maryland Farmer.*

SCIENTIFIC.

The Antiquity of Man.

In no respect has there been a greater progress of scientific thought the past few years than in relation to the antiquity of man. Extravagant estimates have been hastily made upon insufficient data; but rejecting these, there remains still a strong probability of the existence of races allied to the Laplanders and North American Indians, several thousand years anterior to the accepted epoch of the Adamic creation. Indisputable proofs of the contemporaneity of these races with extinct mammoths, lions and bears, have been found in England, France, Spain, Italy, and other European countries, as well as in Mississippi and California in the New World. This fact, when isolated, is indecisive of great or little antiquity, but when its collateral relations are developed, it is found that this contemporaneity continued through a long unbroken period, reminding one of more ancient ones, and that these earlier races were dispossessed of their domains by the invading Noachic nations, and we are compelled to believe that the highest types of mankind were preceded by the aboriginal tribes inferior to the Canearians in many respects.

They are none the less human, with their distinctive mental and moral endowments, while their tendencies may have been no more progressive than those of their living representatives. Some of our theologians may object to any theory which admits of the presence of men upon the globe ten or twelve thousand years ago.

But some of the same profession who objected once to the great age of the world, have been led to acknowledge the correctness of the scientific view, and its consistency with revelation. The same results will follow existing objections, for, though worthy of respect, the present *interpretation* of the Bible is not inspired. It is the glory of our sacred writings that their luster is not impaired by the discovery of new truths—principles not imagined in the early history of the church—and that its central doctrine remains unchanged, while system after system of human philosophy has arisen and sunk into oblivion.—*Prof. Charles H. Hitchcock.*

Burying Alive.

The great Washington, and others of eminence, suffered through life with a fear of being buried alive; most distressing narratives have been given from time to time about dead bodies being found turned over in their coffins. Such things may have taken place, but it is a very rare occurrence. It is known that in some parts of Europe the corpse is placed in such a position, for several days, that if it should revive, a bell-rope touches the hand, and the alarm could be given to the whole neighborhood; in one hundred years it did not occur that one of these

bells had been rung a single time. Still, great efforts have been made by scientific men to discover some rule by which death may be infallibly indicated, For many years the French government have held out a standing reward of a large amount of money to any one who would discover and communicate a satisfactory test, other than that of the actual decomposition, indicated by the skin turning black and blue and green, which is conclusive on the subject; but in cold weather this may not take place in many weeks, and to keep the body so long would be inconvenient, and objectionable on several accounts. A method has recently been given to the French government which will probably take the prize. Hold a lighted candle to any portion of the body; a blister will soon arise. If on puncture it gives out a fluid substance, death has not taken place; if it emits air only, it is perfectly certain that life has become entirely extinct, for which we offer but one reason among others: in case of actual death the blood is congealed, in a sense; there is no moisture, simply a little air. This being rarified by the flame, raises up the skin. If there is life, the flame causes an inflammation, and nature, in her alarm, sends increased material there for repair—a kind of glairy fluid—and this being sent there in excess, causes the skin to rise; inability to feel the pulse or heart beat; cold skin; no dew on a bit of glass; none of these are conclusive, as there has been life, when none of these were observed.—*Lutheran.*

Foretelling Storms.

A plan has been devised for the use of the electric telegraph in announcing the approach of storms and tornadoes, and thus protecting crops and shipping from their destructive action. When a storm has formed, and begins to travel in any certain direction, the first telegraph stations over which it passes will send the news to all telegraph stations at county seats and principal towns, scores or hundreds of miles in advance, according to the kind of storm or probable distance that it may travel, always keeping a suitable distance in advance. At each county seat or principal town a cannon is to be kept ready by the officials at the court house, or other suitable place, and as soon as the news is received of a coming storm it is to be fired—the very rapid, or slow-traveling storms to be indicated by the very rapid or slow firing of the storm guns. In large cities, if a destructive storm is approaching, bells may also be rung, or steam whistles be blown, at the same intervals as the guns, to increase the warning. As a good sized cannon can be heard distinctly from fifteen to twenty miles in every direction from the place of firing, or over a space from thirty to forty miles square, by firing one at each county seat and principal town, the farmers over the whole country in harvest time will be warned to stop cutting, and to get their grain or hay under cover, or in a situation to shut out the rain, thus saving not only that portion which had been cut and cured previous to the warning, but that which otherwise would have been cut during several hours or a whole day, without it.

The storm signals will also be of great value to commerce, especially in severe storms and hurricanes, by warning vessels to seek places of safety, or prepare for the coming storm. The Western Union Telegraph Company, in order to test the system, will supply telegrams of approaching storms, whenever any considerable number of cities or towns shall make arrangements to fire signal guns, according to the plan proposed.—*N. Y. Sun.*

CURIOSITY OF VISION.—A person may see the blood-vessels of his eye, displayed, as it were, on a screen before him, by a most simple experiment. Let a lamp or candle be held in one hand, and the eye directed steadily forward; now move the lamp up and down, or sideways, on one side of the line of vision; in a short time an image of the blood-vessel will present itself, like the picture of a tree or shrub, with its trunk and branches, to the admiration of the observer.—*English Paper.*

AN Irish sailor once visited a city where, he said, they copper-bottomed the tops of their houses with sheet lead.

MINING.

The Drain of Silver to Asia.

It is admitted by all eminent authors who have written about the present supply of the precious metal that it far exceeds the demand of Christendom, and its inevitable fall in value is retarded only by exceptional and temporary circumstances, the chief of which is the remarkable stream of silver pouring into Asia. The Hindoos and Chinese and Japanese are industrious and very populous nations, which have to import nearly all their gold and silver from abroad, and their capacity to absorb those metals increases as value declines, and as their stock becomes greater their wages rise, and they obtain the means to purchase more foreign goods, and after a time they will have as much coin proportionately to their productive powers as the Christian nations; and then their imports of merchandise will nearly equal their exports, and the importations of the precious metals will not be one-tenth of the present figure.

Asia is called "the sink of silver" by Pliny, and it has deserved that name ever since, and will continue to deserve that name for an uncertain period in the future.

So long as we continue to consume so much tea, silk, rice, and other Asiatic products, and so long as they consume so few of our products, so long we must settle the difference by payment of the precious metals, and the precious metals will probably not decline much in value. But let the vessel of Asiatic trade, now half empty of silver, be once filled, as it will be in 5, 10, or 15 years, and then we shall begin to feel the influence of the over-supply of the precious metals, and their market value will fall rapidly.

Christendom and Asia may be compared to two tubs standing side by side, and connected by a large open tube half way from the ground, and the supply of the precious metals to a stream of water falling into the tub representing Christendom. Before the water reaches the tube, or before the tube was well opened, the level rose very rapidly in the first tube; but now the stream pours so swiftly into the second, that the level can scarcely rise at all in the first. When the liquid gets up to the same level in both tubs, then it will rise with equal pace in both.—*Ross Browne's Report for* 1867.

A Great Increase of Production Probable.

A great increase in the production of gold and silver is probable. In California, Australia, and Siberia, gold mining is now conducted under many disadvantages. In the two former, wages and interest are exceptionally high, and in all there is a lack of that thorough knowledge, and those economical modes of working, which can only be adopted by a generation educated to the business, and devoted to it as a life-long occupation. In Spain and Brazil, which were once very rich in gold, and would probably pay for hydraulic washing, there must be numerous quartz veins that are now untouched.

These will be made productive. The Andes and Altai will be explored with care, and hundreds of veins, as rich and large as those of Potosi and Guanajuato, will be found. Machinery will be improved, so that tunnels or adits large enough for wagons can be bored 20, 30, or 40 miles long through high mountains, so as to pay for the purposes of travel, and at the same time, any lodes that may exist in the claim will be opened to a depth far below anything known in mining. The great lodes of the future will not be discovered by such accidents as those which revealed Potosi, Cerro, Pasco, Sombrerete, Chañarcillo and the best mines of Catorce. If veins like those could be found by chance, what will not the well-directed explorations of the future find? It is scarcely to be doubted that a large tunnel commenced 1,500 feet above the sea level, on the eastern slope of the Sierra Nevadas, at any point between latitude 30° and 40° would, in the course of 10 miles, run through a multitude of rich lodes. We have reason to believe that when the great mountains were formed, numerous large fissures running in some places for hundreds of miles, were filled with auriferous and argentiferous quartz, and we fail to find them, not because they are not there, but because they are covered with earth, and because the clambering hunter, the benighted wanderer, or the charcoal burner does not pull up the bush, or does not light the fire at the right spot. A tunnel, running through the Andes, commencing near Lima or Santiago, would reveal wonders, and the progress of mechanical industry is so marvellous, that we are justified in hoping, if not in expecting, to see immense tunnels 20 or 30 miles long, cut through high mountain ranges.—*Ross Browne's Report for* 1867.

Wasteful Mining.

"Assuming the yield of our mines from 1848 to 1867, inclusive, to be $1,174,000,000, a loss of 25 per cent. in the process of extracting that amount would be $391,333,333, which is more than we now have in the Treasury and all the banks in the country. Suppose, by a better system of treating the ores, one-half of this amount could have been saved, there would now be an addition to our stock of precious metals of $195,666,666. Add to this the loss in unsuitable machinery and unprofitable labor, owing to the want of scientific knowledge, and it is plain the aggregate loss resulting to the country from this cause alone, upon ores actually worked, would far exceed twenty-five per cent.

Mr. Louis A. Garnett, formerly melter and refiner in the United States Branch Mint, and at present manager of the San Francisco Assaying and Refining Works, says, in a printed letter to the Secretary of the Treasury, that it costs in labor alone $1.80 for every dollar produced from our mines. He bases this estimate upon a population of 100,000 men engaged directly in mining, at the minimum wages of $3 per day for 300 days, and upon a product of $50,000,000. A mining population of 50,000, engaged in actual labor in the mines at $4 per day for 250 days, would probably be nearer the facts. This would give a result of $50,000,000 as the cost for labor alone. Add for current expenses of management, wear and tear of machinery, material, etc., $25,000,000, and you have a total cost, without calculating interest on capital, of $75,000,000 to produce $75,000,000, the maximum estimate for this year: in other words, it costs a dollar to produce a dollar. 'Upon what principle of political economy,' says Mr. Garnett, 'a tax upon the mining interest can be justified, I confess I am unable to discover. It practically amounts to taxing a man for the privilege of working at his own expense for the public benefit.' If the miners are taxed at all, it would be good policy to apply the tax in such a way as to increase the product of bullion; still better to take the tax off altogether, and make a direct and liberal appropriation to carry out the object of Mr. Stewart's bill. But that is scarcely to be expected.—*National School of Mines as a means of increasing the product of Gold and Silver Bullion.*

The American Sunday School Union

Having commenced the Sunday School Missionary work on the Pacific Coast, we are ready to aid in organizing Sunday Schools and aid existing needy Schools.

We have just received a fine and large assortment of the publications of the Society, which we supply to Schools at reasonable rates. We also supply the periodicals of the American Sunday School Union. The

CHILD'S WORLD,

a beautifully Illustrated Paper for Children and Youth. Monthly, at 12½ cents each per year for ten copies and upwards, and 24 cents for the semi-monthly. Also,

THE SUNDAY SCHOOL WORLD,

a Sixteen-Page Quarto Monthly Paper for Sunday School Officers and Teachers, at the low rate of Fifty Cents per Year. No Sunday School Teacher should be without this paper.

Rev. Richard Newton, D.D., the Editor of these papers, is acknowledged to possess unsurpassed abilities as a Sunday School writer. The above rates are in Currency.

Catalogues of the Society's publications, and Sample Copies of its Periodicals furnished gratuitously on application to Wm. F. Peters, care P. O. Box 1007, or at the Depository, 302 Montgomery Street. (Second Floor, Room No. 2,) San Francisco, Cal.

City Female Seminary,

CORNER OF MASON AND O'FARRELL STREETS.

REV. CHARLES RUSSELL CLARKE, A.M., PRINCIPAL.

TERMS—$6, $8, and $10 per month. French, $2.

GENERAL SELECTIONS.

The Old Grief.

My heart is restless like a leaf,
Which stirs in every breeze,
Or like an infant's hand that moves
Toward everything it sees!

The visions sweet of happy years
Are thronging in my brain,
And little arms around my neck
Are clinging once again.

The air is full of silver tones
That made my young life sweet,
And past me run a little flock
With gay and merry feet.

Now comes again, midst flowing tears,
That question in my heart—
Why did my Father treasures give
From which He bids me part?

Why did He fill my heart with joy,
Then crush me with a blow—
And in the flower why did He hide
The bitter fruit of woe?

Oh! Father, see! time cannot heal
The wound Thy hand hath given.
Is there no cure for broken hearts
Beneath Thy happy Heaven?

The love of friends—Thy love divine—
Are priceless gifts to me—
But, Father, in those little graves
Lie forms I long to see!

I cannot wait the angel's call,
To wake them from their sleep;
The time is long—my heart is sad—
For them, dear Lord, I weep!

I know they're safe in Thy embrace,
From every earthly harm,
And though there's love, there's little strength,
In e'en a mother's arm.

Oh, calm my heart, and ease my pain,
And let me find relief,
And in the joys Thou giv'st me now
Let me forget my grief.

In bleeding hearts the seeds of grace
Most fruitfully do grow,
And buds unfold their fairest leaves
Where rapid streams do flow.

As on a lake deep-set in gloom
The sun sheds beams of light,
So let my life, beneath Thy smile,
Grow calm, and pure, and bright.

—*Grace Webster Hinsdale in Hours at Home.*

Christianity and Morality.

There are, at present, two simultaneous attempts, of the same origin and the same tendency, though differing from one another. There are thoughtful men, who persist in thinking and calling themselves Christians, who endeavor to separate Christian morality from Christian dogma, and make of Jesus Christ the moral ideal of humanity, while they deprive him of his miracles and his divinity. Others, who openly declare themselves not to be Christians, undertake to separate morality in general from religion in general, and place the source as well as the authority of morality in human nature itself and in that alone. On the one hand, Christian morality independent of Christian faith; on the other, morality independent of all religious belief, natural or revealed; these two doctrines are, in our day, zealously proclaimed and propagated.

The true cause of this double attempt is the unbelief and skepticism of our age in regard to religion. There are many who are not Christians; deists, for the most part, who are not very sure of their faith and its efficacy. They feel the necessity of morality; they believe that human actions should be guided by it; it is in order to preserve it intact and puissant that they wish to separate it from religion, from all religious beliefs, all which, they say, are wrecked or tottering. Independent morality is a raft which they offer to the human soul and human society, to save them from the shipwreck of their old vessel.

The idea is false and the effort futile. Those who flatter themselves that they shall leave Christian morality erect in uprooting it from Christian dogma, and those who think that morality can be preserved by separating it from religion, equally misconceive the essential facts of human nature and human society. Both of these doctrines come from an incorrect and incomplete observation of these facts. I have already in these *Meditations* said what I think of the first, and why I oppose it. It is with the second, the idea of independent morality, that I have now to do, and in the name of pure and severe psychology I maintain the intimate, legitimate, and necessary union of morality and religion.

* * * * * *

Almost all moral philosophers are either bitter censors, or cold observers, or flatterers of human nature. Some declare that man is naturally good, and that wrong social institutions are the sole cause of his vices, and thus regard interest and self-love as the only motives of human conduct. Others decry the errors and weaknesses of men with a curious and somewhat scoffing sagacity, like artists amused by the spectacle with which they amuse the spectators. How differently, how seriously, profoundly, and efficaciously does Jesus Christ look upon a man, and feel in regard to him! He regards human nature neither with illusion nor indifference; he knows it to be full at once of evil and of good, bent upon revolt against the moral law, while capable of obeying it; he sees in man an original plague, the source of the soul's disorders and perils; but he does not believe the evil to be incurable; he regards it with severity and at the same time with tenderness, and he attacks it with a resolution superior to all discouragement and ready for all sacrifices. Why should I not simply repeat the Christian expressions, the truest and most striking of any? Jesus Christ without reserve unveils the sin, and without reserve devotes himself to the salvation of the sinner. What philosophy has known man so well, and loved him so much while passing upon him so free and firm a judgment?

Jesus Christ is no less interested in human destiny than in human nature. While he lays down in all its rigor, the principle of the moral law, the pure fulfilment of duty, he does not forget that man craves and needs happiness, a pure and lasting happiness; and to virtue he opens hope, a hope strange to the world's vision, the hope of an ideal happiness, inaccessible to mere curiosity, but satisfying the aspirations of the soul, and which is not to be won by human merits alone, or as the payment of a debt, but a recompense granted to the virtuous efforts of man by the just bounty of God. While the Christian religion imposes upon man in this life a constant and laborious work, it offers him, if he works indeed according to law, "the kingdom of God and the promise of the life to come."

Thus Jesus Christ knows and satisfies the whole of human nature; he takes into the account at once its duties and its needs, its weaknesses and its merits. He does not let the curtain fall without a disentanglement of the plot, upon the rough scenes of life, and the world's sad spectacles; he gives man prospects and satisfactions superior to his trials and mistakes. And how does Jesus Christ attain this end? How does he touch all the chords, respond to all the appeals of the human heart? By the intimate union of morality with religion, of moral law with moral responsibility; the only complete and definitive view of human nature and destiny, the only efficacious solution of the problems which weigh upon human thought and life.

I say, the only efficacious solution. Efficacy is, in fact, the true and essential characteristic of Christianity. However high it may be, the ambition of philosophy is infinitely less than that of religion; it is a purely scientific aim; philosophers study, observe, discuss; their works produce systems and schools. The Christian religion is a practical work, not a scientific study; beneath its dogmas and precepts there is certainly a philosophy, and, according to my convictions, the true one; but it is the starting point not the end of Christianity; its end is to lead the human soul to govern itself according to the divine law; and, to attain this end, it takes human nature as it is, and in all its parts, with its diverse elements and supreme aspirations. This, according to military phrase, is its base of operations; upon this base it carries on the moral warfare, and undertakes to make good triumph over evil in man, by reforming him.—*M. Guizot in Revue Chrétienne, translated for Hours at Home.*

The Revolution in Austria.

A revolution, not in the form of government, but in characteristic ideas and laws, is now in progress in Austria. Never did whipped school boy betake himself more faithfully to neglected books than does defeated, humbled Austria confess her past errors, and mark out for herself a new course. The triumph of Prussia on the field of battle two years since—a miracle of swiftness and completeness—opened the eyes of the Austrians, from king to peasant. Prussia represented Protestantism and modern ideas. Austria stood for Romanism and the notions of the dark ages. In the conflict the latter went down at the first shock.

Traveling in a steamer on the Danube, a few weeks after, we fell into conversation with a gentleman from Vienna, who freely opened his heart to an American. He said that as a patriot he deeply felt the humiliation of his native land, and that there could be no doubt as to its cause being the retrograde policy which ruled in the councils of the government. He had no hope of a brighter future unless a radical change took place, which should fit Austria to stand with other first-rate European powers by bringing her institutions and people into sympathy with the nineteenth century. Failing to secure this, he and many others would take refuge in America.

What he scarcely ventured to anticipate, has come to pass. The Emperor, young and capable of learning from adversity and the spirit of the age, has entered upon the establishment of a constitutional monarchy, based on universal education and national freedom. The present ministry and legislative majority are liberal, and they have just adopted, amid general rejoicing, two important measures of progress, to wit: a system of common school education, and the recognition of civil marriage. These are deadly wounds to Romanism, because at war with her claims to control these subjects, and contrary to the *concordat*, or treaty made with the Pope in 1855, by which the Romish Church was allowed full sway in all such matters. For some weeks it has been doubted whether the Emperor would give his official sanction to the law as it had passed the two chambers of the Reichsrath. The Pope is said to have written him an autograph letter of earnest entreaty and solemn warning, a professed copy of which was published in the public journals. His letter in reply has also been given in *L'International*, and we make this significant extract:

"The concessions in question were neither dragged from me by rebellious subjects, nor granted with secret terror; and if I have departed from tradition hitherto respected, I have not been compelled to do so either by the people or the ministers, but by the imperative exigencies of the changed circumstances, and my sacred, sovereign duty to listen to the numerous and important persons who implored me to satisfy the just claims of a great nation which for so many centuries has shed its blood to preserve the Crown conferred upon me by the Almighty. It would be great injustice to distrust after so many sacrifices; it would be an eternal reproach for the grave disasters which might result from perverse obstinacy, and precisely because I am responsible to my family I was obliged to abandon a system which was very nearly ruining the State and the people. The hand of iron which your Holiness recommends me has reigned for more than fifteen years, but it did not produce that love and satisfaction on the part of my subjects which has resulted now from a wise and mild policy of a few months.

I am threatened by no one, and however much I value the powerful support of the Church, I shall not hesitate to give it up if it cannot come to an understanding with a truly religious people like mine; and, however much it may pain me to be obliged to act against the persuasion of your Holiness, I confess I am convinced of the inevitable necessity of the modern reform."

The telegraph informed us, a few days since, that the Emperor had signed the bills in question. As religious liberty had been previously established, so that Protestants now receive legal protection, al-

though Romanism is still the established religion, we may congratulate Austria—whose name has been the synonym of despotism—upon having entered upon a new career. Let Christians pray for her! The light is piercing the darkness everywhere, and chains are falling off in church and state. Father Hecker may boast of sentimental, ritualistic Protestants, or of outworn skeptics, converted to Romanism in this country; but what of the waning influence of Rome in Austria and Italy?—*Advance.*

☞ Book-keeping carefully taught in the Junior and Senior Departments.

☞ Instruction in French, Spanish, German, and Drawing, given in all departments of the School.

The Chemical Laboratory, on Stockton Street, has been fitted up with costly furnaces and the best appliances for the practical study of Chemistry, in all its branches. Courses of Lectures on Chemistry, Metallurgy, and Mining are given by Prof. Price, during the first four months of the year. The Institution is provided with ample Buildings, valuable Philosophical and Chemical Apparatus, spacious Play-grounds, and an open-air Gymnasium.

For Terms and further particulars, address

REV. P. V. VEEDER.

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

Also SCHOOL FURNITURE.

WARREN HOLT,
305 Montgomery Street.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Eighth Term of this Institution will commence on Wednesday, July 8th, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

The Niagara of Sin.

Save, Lord, I perish! Sin's strong tide,
Smooth, treacherous, rapid, deadly, wide,
Hurries me headlong from thy side;
Save, or I perish, Lord!

Madly I slept upon the stream,
Gliding along as in a dream;
Waking—on hell's dark brink I seem;
Save, or I perish, Lord!

The howling fall I dare not brave,
Yet cannot stem the giant wave;
Helpless, I cry to Thee to save;
Save, or I perish, Lord!

Spirit of Love! I now implore
Thy aid—rejected, scorned before,
To snatch me from the rapid's roar;
Save, or I perish, Lord!

Jesus, I faint, I sink, I die:
Yet, sinking, fix my anguished eye
On Thee, and from the torrent cry,
Save, or I perish, Lord!

Thou canst! Thou wilt! Thy hand I see,
Long slighted, still held forth to me:
I grasp that hand; I cling to Thee;
Save, or I perish, Lord!

—*Rev. Newman Hall, D.D.*

A Clergyman's Joke.

I was spending the night in a hotel in Freeport, Illinois. After breakfast I went into the sitting-room, where I met a pleasant, chatty, good humored traveler, who, like myself, was waiting for the morning train from Galena. We conversed freely and pleasantly on several topics, until, seeing two young ladies meet and kiss each other in the street, the conversation turned on kissing, just about the time the train was approaching.

"Come," said he, taking up his carpet-bag, "since we are on so sweet a subject, let us have a practical application. I'll make a proposition to you. I'll agree to kiss the most beautiful lady in the cars from Galena, you being the judge, if you will kiss the next prettiest, I being the judge."

The proposition staggered me a little, and I could hardly tell whether he was in earnest or in fun; but as he would be as deep in it as I could possibly be, I agreed, provided he would do the first kissing, though my heart failed somewhat as I saw his black eye fairly dance with daring.

"Yes," said he, "I'll try it first. You take the back car, and go in from the front end, where you can see the faces of the ladies, and you stand by the one you think the handsomest, and I'll come in from behind and kiss her."

I had hardly stepped inside the cars when I saw at the first glance one of the loveliest looking women my eye ever fell on. A beautiful blonde, with auburn hair, and a bright, sunny face, full of love and sweetness, and radiant and glowing as the morning. Any further search was totally unnecessary. I immediately took my stand in the aisle of the car by her side. She was looking out of the window earnestly, as if expecting some one. The back door of the car opened and in stepped my hotel friend. I pointed my finger to her slyly, never dreaming that he would dare to carry out his pledge, and you may imagine my horror and amazement when he stepped up quickly behind her, and, stooping over her, kissed her with a relish that made my "mouth water." I expected, of course, a shriek of terror, and then a row generally, and a knock-down; but astonishment succeeded astonishment when I saw her return the kiss with compound interest.

Quick as a flash, he turned to me and said:

"Now, sir, it is your turn," pointing to a hideously ugly, wrinkled old woman, who sat in the seat behind.

"Oh, you must excuse me! you must excuse me!" I exclaimed. "I'm sold this time. I give up. Do tell me whom you have been kissing."

"Well," said he, since you are a man of so much taste, and such quick perception, I'll let you off." And we all burst into a hearty peal of laughter as he said: "This is my wife. I have been waiting here for her. I knew that it was a safe proposition."

He told the story to his wife, who looked tenfold sweeter as she heard it.

Before we reached Chicago we exchanged cards, and I discovered that my genial companion was a popular Episcopal preacher of Chicago, whose name I had frequently heard. Whenever I go to Chicago I always go to hear him, and a heartier, more natural, and more eloquent preacher it is hard to find. He was then but a young man; he is now well known as one of the ablest divines of the Episcopal denomination in the West.—*Harper's Monthly.*

Trifles.

It has been often remarked that trifles make up the happiness and the miseries of human life, and the remark is, at least, half true, if not wholly. There is no one who cannot recall occasions when the pettiest vexations have made as exhausting draughts upon his philosophy and forbearance as troubles of the highest moment. Collect a thousand burning sticks into a heap and you have a bonfire which may be seen over a whole country. How often has defeat in a game of draughts inflicted keener annoyance upon us than if we had met with some real calamity. A lump of soot spoiling a man's dinner, which had otherwise just *suited* him—a beef-steak overdone—having counterfeit currency passed upon one—losing the cars by thirty seconds after running yourself out of breath—reaching Clark Street Bridge as it is swinging into the stream, when you have just time for the cars—being disappointed of a ribbon, or a cap, or a ticket to a concert—being answered "all gone," when, with a ravenous appetite, you enter an eating-house and order "canvas-backs" or a trout—even the want of a pin, or a button flying off at an unlucky moment—have often led to fearful consequences.

Alexander Smith expresses the opinion that if, during thirty years, the annoyances connected with shirt-buttons found missing when you are hurriedly dressing for dinner, could be gathered into a mass and endured at once, it would be misery equal to a public execution. Petty trials, the ever recurring disappointments in the minor affairs of life, chafe and worry some natures more than grave trials—just as the ship that will stand a hard thump on a reef may be sunk by tiny insects boring through her timbers.

How often for some petty disagreement, some "trick not worth an egg," will friends, who have stood the shock of serious differences of opinion, become icy cold to each other, perhaps enemies for life! There is much shrewdness in the doctrine of the Tattler, that, if a married couple do not quarrel in the first instance about some point not worth contesting, they will rarely afterwards find opportunity to bicker about questions of real importance.

A finger's breadth at hand will mar
A world of light in heaven afar;
A mote eclipse yon glorious star,
An eyelid hide the sky.

—*Presbyterian.*

Stealing Snakes.

A Pittsburgh paper tells of two thieves who robbed a gentleman one night of a box he was carrying under his arm with great care. The gentleman was a naturalist, and the box contained four rattlesnakes, The rascals must have experienced a sensation when they opened the box and divided this booty. While we laugh over their consternation, and feel that the fangs of the snakes inserted in their flesh where it would hurt, but not kill, would not have been a great departure from a strict line of justice, yet, we may see in their cupidity and disappointment a picture of what transpires very frequently, and, possibly, very near at home.

Every man who does his neighbor a wrong, has stolen a snake, and must carry it with him into eternity, unless restitution is made. He may never meet in life the victim of his rapacity or oppression; the deed may be hidden from all human eyes; he may gloat over his ill-gotten gains, and revel in the splendor and pleasures they will buy, but the serpent is still there; it coils around his treasures, it enters into his very soul, and leaves its trail in every chamber of his heart. It will "cling to him everlastingly." He may be unconscious of his presence for a while, but the hour of terrible surprise will come, when he finds how empty are all his treasures, how hollow are all his joys, and the serpent, with deadly hiss and expanded fangs, reveals the fatal prize his sinfulness has won.—*Texas Advocate.*

The Bible not an Old Book.

The Bible is of course old in one sense; and its very age is one of the things that will prevent it forever from becoming antiquated. One of the charms of the blessed Book is that it is the repository of original materials of history. Every great historian spends a large amount of his time in examining the authentic original records of the time under his survey. Sometimes a newly-discovered scrap, only a few lines in length, will give a new coloring to many pages of his volume. Now, the Bible is an ancient history, full of the richest variety of incident, and extending over the great epochs in the world's progress. It is not a second-hand compilation, but an original, fresh, and inspiriting record. This can be appreciated without reference to its divine inspiration.

A more important reason why the Bible will always have the interest of a new book is, that it is associated with the experience of the new heart. The Spirit uses the word in regeneration. The new born soul has a new insight into the Scriptures. The Christian, as he grows in grace, finds increased enjoyment in the Bible.

"I used to think," said a believer to us, "that many portions of the Bible were dry and uninteresting, even after I became a Christian; but now I can say that I find no part uninteresting."

A book that is so intimately connected with a new life, being itself the fountain of life, cannot grow old. It is too full of the love of God in Christ to grow old. The new hearts of every generation of believers will keep the Sacred Volume new; or rather, its own divine inspiration and divine instructions will keep them ever finding something new in it.—*Christian Banner.*

The Unsafe Bridge.

A young lady, in giving her reasons for preferring a particular church, remarked that she "liked it best because it allowed its members to dance." She had been brought up to regard this as inconsistent for a professor of religion. She could not help feeling that it was a risk to try to get to Heaven and carry the world along with her. But here was comfort. She had found a religious guide on which she could, as she fancied, shift off the responsibility. Instead of deciding for herself in the light of Christ's teachings, she chose to take a second-hand opinion of a mere man as her rule.

One is reminded of an incident related by Dr. Whately, of an old bridge, which had long been thought unsafe, even for foot-passengers. People usually went a considerable distance around, rather than venture upon it. But one evening a lady in great haste, came up to the bridge before she reflected on its unsafe condition. It was late, and she had yet to dress for a party. She could not go all the way around, though still afraid to venture. At last a happy thought seemed to strike her. She called for a sedan chair, and was *carried over!*

Now, the young lady who desired to follow the world and go to Heaven, too, was afraid to trust to her own judgment on the subject of dancing. She feared the tottering arch might give way and she be lost forever. To make all safe, she added to her own chances of error the additional chances of her human authority being wrong.

Napoleon once entered a cathedral and saw twelve silver statues.

"What are those?" said the Emperor.

"The twelve Apostles," was the reply.

"Well," said he, "take them down, melt them, coin them into money, and let them go about doing good, as their Master did."

Conceited men think that nothing can be done without them.

Young Folks.

A True Story.

I was just going through the X——— ferry, and dropping my pennies as usual, without waiting to see who received them, when my dress caught on a nail in the gate.

"Better hurry, ma'am, or you'll lose the boat, and it only runs once in half an hour."

It was such a queer little voice that I glanced up to see where it came from, and behold it came from the ferryman. Was it the ferryman? Yes, it sat in the box, just where the ferryman usually sits, and before it lay such a pile of pennies as the ferryman is continually taking—but it was such a queer little thing for a man! I looked at it still again, not thinking how rude it was, when its face began to grow red, and in the same piping voice, it said:

"You've lost the boat, ma'am."

So I had; but I was half glad of it, I was so curious about this queer little ferryman.

"Are you the ferryman?" said I.

"Yes, ma'am," he answered, quite proudly, and drew his poor little body up as straight as he could, as though he wondered at my question.

"I thought you seemed so young," said I, by way of apology, though his face was not young at all, but I could not describe it by any other word.

"Yes, ma'am, I'm young, but I suppose I'm just as honest as if I was forty."

I was growing more and more abashed, and started to go into the ferry-house, there to wait out my dreary half-hour, when a curiosity—I hope not unkind—got the better of my resolution, and I went back.

"Tell me how you came here," said I, bluntly; "tell me all about yourself; perhaps I can help you—"

Something stopped me, and I did not finish my sentence.

"There isn't much to tell, ma'am," he replied, respectfully. "I'm pretty young for the place, where they mostly take grown up young men; but the way I came to get it was by being *paralleled*."

"Paralleled!" I said, mystified.

"Yes, ma'am; don't you see?" he answered, and lifting his right arm—a little, puny, withered arm and hand—from the other side, just as if it hadn't belonged to him at all, smoothing out his fingers on the table with a half caressing motion, that brought the tears to my eyes. "Don't you see?" he repeated, looking up, a little pale in the face. "I can't move this arm, nor my left foot much. It came by a fall."

"Oh, dear! your left side was paralyzed by a fall?"

"Yes, ma'am, that's it; thank you. I didn't rightly recollect the word. Sometimes I think I'm not over bright and that's the cause of all our trouble."

"How do you mean?" I asked, more and more interested.

"Well, you see, ma'am, my father was a house painter."

Here he made a motion as if to pass his coat-sleeve across his eyes, but thought better of it, and looked past me into space for a moment, biting his lips hard.

"Do not tell me; I see that it distresses you," I said.

"No, ma'am," he replied, stoutly; "I'll tell it, though you won't think any the better of me; but never mind. When I was getting old enough to learn the trade, father took me one day, and he says to me:

"'Azel, I've got a very particular job to-morrow, and it'll do you good to look on. It's a sign on a shop-front, and there's gildin' and sandin' to be done, and we must be right careful of the spellin'. You might go and tell me, so's't I won't get any of the letters wrong.'

"Before I started, my little sister she put up our dinner in the pail and gave it to me, and what did she do but says:

"'Azel, I've been readin' such a dreadful story in the paper about a painter. He was mostly always painting high signs, I guess, like father; and one day he was up a painting one in a church, with another man, and he stepped back to see whatever 'twas he was doing, and he was just going off the scaffold, and the other man he threw a pot of paint at his sign and spoiled it, so as to make him step up quick, and not fall over.'

"Well, I kept just thinking and thinking about that story all day, an it seemed as if father was the painter, and I was t'other man, and I kept doing the thing over and over—seeing him step back, and throwing the pot of paint at the picture, just as we do in dreams. Well, in the afternoon father 'd got his sign a'most done, and stepped back a little to look at it. I'd ought to know'd the scaffolding was wide, and father wouldn't fall, but I only thought—'Now he's going, and I must save him.' And I up and threw a pot of paint at the sign. But oh, it didn't come out a bit like the story; for father was so dashed at seeing me do what I had no business to do that he just gave a jump to one side, and I never could rightly tell how he got his foot on to a place where two ends of boards came together, without anything under 'em, and so—he went down. Then I thought again, and what I thought was—'I'll catch him,'—and so I jumped after him.

"But, you see, there isn't time enough to have two thoughts when a body's falling through the air—least, I couldn't, being a little slow-witted—so I went too. Well, that store looked high enough from the ground, but it seemed higher yet when you are going through the whole height of it, without anything to hang on to, and I thought I never would get to the ground. I s'pose I did, though, because they picked us both up—father and me; and father was dead; and so was I—this half of me. Oh, but when we got home it was dreadful!

"Says I, 'Sister, it didn't come out like the story.' And when I told them how I first tumbled father off, and then went myself, they didn't let me die then, either, but loved me just as well.

"You see, what I look to is this, that I ought not to have jumped when father fell. I'd ought to have thought that I mustn't go and get myself lamed up, because the family would have to depend on me if father should happen to hit on his head when he got to the bottom, and get killed—which was just what he did. But I didn't think—I'm slow-witted. I just threw myself over, and that's what came of it. You see, once I could whittle ever so many kinds of wooden toys, all out of my own head, and if I had the use of my own hands at least, I could have made money by carving. But what can a fellow do with such a thing as that?"

He took up the paralyved hand again, and then threw it down with an expression of disgust, and continued:

"However, it's lucky my head was saved; and I could always calculate figures pretty speedy, if I couldn't other things; so the man that owned the sign father was painting, he got me a place here. Here's your boat, ma'am, and here's my relief."

A tall, stalwart man—such a painful contrast to this poor creature—walked into the box, and little Azel came sliding and wheeling out on a crutch. Just outside the bars a rosy face in a sun-bonnet peeped in, and seeing the cripple coming, began to dance up and down with joy.

"She's my sister," exclaimed Azel; "she always comes for me."

And seeing her run along, impatiently thrusting her arm through every hole in the grating, one after another, until she had covered herself with all sorts of dirty hieroglyphics, he made a queer, twisted motion, that did its best to express a bow, and disappeared up the village street, the little girl clinging to his coat and making vain attempts to aid his unequal footsteps.—*Boys and Girls.*

A Very Bad Habit.

"Oh! mother, I'm tired to death!" said Jane Mills, as she threw herself into a chair, on her return from school.

"Tired to death, did you say?" repeated her mother, slowly.

"Yes, mother—I'm almost, I mean," she added.

"No, my daughter, not even almost," said Mrs. Mills.

"Well, at any rate," continued Jane, "I would not walk from here to school again to-morrow for anything in the world!"

"Oh, yes, you would, my dear," said her mother, gently.

"No, mother, I'm sure I would not; I am certain nothing could tempt me."

"But I am nearly certain you could be induced to go, without any urging," answered her mother.

"Well, mother, try me, and see if anything could make me willing to go."

"Suppose," said Mrs. Mills, "I should offer to take you to the panorama this afternoon. I expect to visit it."

"Do you, mother?" said Jane, with great animation. "May I go? You promised to take me when you went."

"I intended to have done so," replied her mother "but the place where it is exhibited is a long way beyond your school."

"But I am quite rested now, dear mother," said Jane. "I would not fail of going for all the world. Why do you smile, mother?"

"To think what an inconsistent little daughter I have."

"What do you mean by inconsistent, mother?"

"Why when a little girl says one minute that she would not walk a particular distance 'for anything in the world,' and in the next minute says 'she would not fail' of walking still further 'for all the world,' she not only talks inconsistently or extravagantly, but foolishly. It is a very bad habit to use such expressions.

"Yesterday, when you came home from school, you said you was almost frightened out of your life, and when I inquired as to the cause of your alarm, you replied that you had met as many as a thousand cross dogs on your way home from school. Now, my daughter, I wish you to break yourself of this bad habit. When you are tired, or hungry, or frightened, use the simple words that express your meaning. For instance, you may be tired, very tired, or exceedingly tired; or you may be alarmed, or terrified, or frightened.

"From this time let your lips speak the things you mean. The Bible says, 'Let your yea be yea, and your nay, nay;' and adds that 'whatsoever is more than these cometh of evil.' Will you try to remember what I have been saying, and strive to correct this fault, my dear child?" said her mother.

"Yes, dear mother," replied Jane, "for I know it is wrong, and I feel ashamed and sorry for it."

"Well, my dear," added her mother, "improve. And now you may get ready to go with me and see the panorama."—*Evangelical Messenger.*

USE the best language in your common conversation at home, and you will soon acquire the habit of using it on all occasions.

WILLIAM JAMES, Newark, N. J. DAVID MEEKER, J. COBBLEDICK, San Francisco.

MEEKER, JAMES & CO.

Nos. 12 and 14 Pine Street, San Francisco,

Importers and Wholesale and Retail Dealers in

Wagon and Carriage Materials,

Embracing all the Wood Materials for the manufacture of

WAGONS, TRUCKS, CARTS, OMNIBUSES, CARRIAGES, COACHES, EXPRESS WAGONS, BUGGIES, SULKIES, Etc.

Also, Importers of

NEWS SUMMARY.

PACIFIC COAST ITEMS.

COLLEGE OF CALIFORNIA.—The College of California will open its Fall term, on Thursday, July 30th. Instruction in the full course will be given as heretofore. New advantages will be provided in some of the departments. Those who wish to join any of the classes, may be examined on Wednesday, July 29th. An optional course will be provided for those who wish to study the natural sciences, mathematics, the modern languages and English language. Professor Rising will continue to give special attention to classes in analytical chemistry and assaying.—*Oakland News.*

BITTEN BY A SPIDER.—A man in Tuolumne City was bitten by a spider a few days since, from the effects of which he came near losing his life. It seems that the peculiar species of spider that bit him abounds in that region—three persons having been dangerously injured by them last year.—*Stockton Gazette.*

SINCE the last quarterly meeting, 8 children have been received at the Asylum, and 2 discharged. At present, 17 find a home there, 12 of that number boys, and 5 girls; their age varying from 3 to 14 years.—*Report of Managers of Protestant Orphan Asylum of Sacramento.*

THE Nevada *Transcript* says a man from Bear River brought a pair of white rats to that city for sale. They were caught last January in a dwelling house at Crabtree's Ranch, near the mouth of Bear River, and are the only ones of the kind ever seen in that vicinity.

THE Young Mens' Christian Association, of this city, have been in the habit of sending forward letters dropped in the Post Office without stamps, and have in several instances, received donations of money from those to whom letters have been forwarded.

THE California Minstrels, while in Stockton, went to the Insane Asylum and played and sung several airs for the amusement of the unfortunate patients of that institution, who are said to have enjoyed the entertainment very much.

AN effort is being made to organize a company in Santa Clara Co., to engage in the business of gathering mustard seed in Southern California. The *News* says, a man made $30,000 at the business last year.

SOMEBODY is agitating the scheme of building an air line railroad from New York to San Francisco, over which the trip will be made in 48 hours. Ground has not yet been broken on the road.

THE early crop of figs, which is coming into market quite freely, will be, as we are informed, unusually light this season. The prospects, however, of an average fall crop, are favorable.—*Los Angeles Reporter.*

PILES were driven to a depth of 108 feet on Clay street, near the city front. It is uncertain to what depth they might have been driven had the workmen seen fit to waste more piles.

THE S. F. *Times* estimates the quantity of peaches received in this city on Wednesday last, at 370,000 lbs, or 2½ pounds for each man, woman, and child in the city.

THERE has been considerable excitement in Petaluma about the small pox. There have been 15 cases, of which, however, only two had proved fatal up to the 16th.

ON Monday, July 13th, three miners were instantly killed by the fall of a cage, caused by the breaking of a rope in the Yellow Jacket Mine, at Gold Hill, Nev.

THE next term of the Missionary College of St. Augustine, Benicia, will open on August 3d, under the care of Rev. J. Lloyd Breck, D.D.

THE State Agricultural Fair will open at Sacramento on September 15th. We acknowledge the receipt of a complimentary ticket.

COMPLAINTS are made of the quality of the bricks with which the Capitol at Sacramento is being constructed.

THE people of Tuolumne city are making preparations to build a fine brick school-house.

SEVERAL of the State papers for a few weeks past contain articles of a political nature.

A MAN near Alvarado, Alameda County, has 40 acres planted with chicory.

THE Union Pacific is said to be the Colossus of *Roads.*

THE population of San Jose is 6,111.

THE paper boat proves to be a failure.

TELEGRAPHIC.

PERSONAL.—The wife of Gen. Hooker died at Watertown on the 15th inst....Sherman Day has been confirmed as Surveyor-General of California, and T. J. Henley rejected as Postmaster of San Francisco....General Grant and General Sherman left Leavenworth for Cheyenne on the 17th....Moses Y. Beach, formerly editor of the New York *Sun*, died at Wallingford, Ct., on the 19th....Gen. Rosecrans has been nominated Minister to Spain....Lentz, the painter, is dead.

EASTERN.—A fatal case of cholera has been reported in New York....Intensely hot weather has prevailed in all the Eastern cities. Over 250 deaths were reported in three days from sun-stroke....By a strike among the workmen in the gas works in Philadelphia the city was kept in darkness for several nights....Trains are now running 700 miles on the U. P. R. R. The engineers on the road are on a strike.

CONGRESSIONAL.—A bill has passed the Senate for the establishment of civil government in Alaska....Thad. Stevens made a speech in the House in favor of paying interest on the five-twenty bonds in currency....The President vetoed the Electoral College Bill, which was immediately passed over the veto by both Houses....Nash, from North Carolina, and Bowen, from South Carolina, were sworn in by the House....Abbott and Pool, from North Carolina, and Harris and Kellogg, from Louisiana, U. S. Senators elect, were sworn in by the Senate....The Funding Bill was passed by the House, the clause legalizing gold contracts having been stricken out.

SOUTHERN.—F. A. Sawyer and T. J. Robinson were elected U. S. Senators from South Carolina....There has been a serious riot at Millican, near Texas, between a party of negroes and whites. 50 or 60 persons were killed.

FOREIGN.—Admiral Farragut's squadron sailed from Southampton, England, on the 18th....Salnave has declared himself Emperor of Hayti....The harvest in Great Britain bids fair to be unusually large....The revolutionists have captured Caraccas....A new revolution has broken out in St. Domingo....A fourth of the coffee crop at Rio, was destroyed by heavy rains.

POLITICAL.—Secretary Seward has formally declared the 14th amendment duly ratified, and a part of the Constitution....Senator Doolittle, favors the formation of a third party....The President sent a message to Congress, recommending the election of President and U. S. Senators by a direct vote....John L. Edwards is Democratic candidate for Governor of Vermont....E. P. Stannard is Republican candidate for Governor of Missouri.

WEEKLY MARKET REPORT.

WEDNESDAY, July 22, 1868.

FLOUR—Sales of 100 bbls Oregon Superfine, $5 Oregon Extra is quoted at $6 75@7. We quote jobbing rates for city brands as follows: Superfine, in sks, ℔ 196 lbs, $5 75@6 25. Extra, in sks, $7 25@7 50.

WHEAT—Receipts to-day reach about 13,000 sks, mostly sold to arrive. Sales include 300 sks ordinary, $1 70; 1,400 sks do, $1 75; 800 sks fair milling, $@1 85; 3,000 sks do, $1 87½. We quote the range of the market at $1 80@1 90 ℔ 100 lbs.

BARLEY—New is quotable at $1 90@2, though higher figures are asked. Sales include 200 sks new in two lots, $2; 700 sks do, private; 580 sks old brewing, private.

OATS—Jobbing all the way from $2 25 to $2 50 ℔ 100 lbs.

POTATOES—There is a good tone to the market at 75c@$1 as extremes, with sales of 675 sks Mission at 85@90c ℔ 100 lbs.

ONIONS—Small sales are reported at $1 12½@1 50 ℔ 100 pounds.

CORN—Receipts light and prices nominal—say $2 20@2 37½ ℔ 100 lbs for the various kinds.

RYE—Is still held at $2 50 ℔ 100 lbs.

BUCKWHEAT—Light sales; quotations nominal at $1 62½@$1 75 ℔ 100 lbs.

BEANS—Jobbing rates for first quality are as follows: Bayo, 5c; Butter, 6½c; Pea 12½c; small White, 8c; Pink, 5½c; and Red, 3c ℔ lb.

BRAN—Is more plentiful; quotable at $30 ℔ ton from the mills.

MIDDLINGS—Fine, $40@45; feed descriptions, $32 50@37 50 ℔ ton.

CURRENT TOPICS.

Street-preaching seems to be revived in the large cities, both of this country and Europe, with much more success than ever before attended it. In Paris, the masses are reached thus by two or three popular Protestant preachers, until there has been an attempt to prevent them from holding out-door meetings. In London, there are multitudes assembled in various parts of the city every Sabbath, to hear the Gospel from those who could gain no access to them in churches. The same is true in New York, where the City Missionary Society sustains several open-air services, some of the ablest pastors in the city taking turn in conducting them with marked effect. The Young Men's Christian Association of San Francisco has undertaken to maintain a like meeting on Sabbath afternoons, and the results are very encouraging. There are many persons temporarily in this city, who do not incline to attend church, yet who are willing to listen to the Word of God, and there are many residents of the same class, who avail themselves of the opportunity to attend these meetings. Sometimes two or three hundred are present, and more respectful and attentive auditors are rarely found in our houses of worship, nor are there more intelligent men in proportion to the number, in the regular congregations of the city. Great good may be done in these meetings, if the clergymen of the different denominations will coöperate with the young men in this excellent work, and if they will take pains to give those who come together something that they may hear and remember with profit.

The custom is established in Brooklyn, New York, for the Christians of various denominations to celebrate the ordinance of the Lord's Supper together, once in three months. The service is held in different churches in turn, and is conducted by the pastors as may be convenient, the arrangement being in the hands of what is called the "Church Union." The effect of such a meeting is said to be very marked on those who participate in it, and on the community, all accepting it as evidence that Christian fellowship is not confined within denominational lines, but relates only to the hearts of sincere believers in Christ. We notice the account of the last Communion in the Plymouth church, as having been one of peculiar interest, and the purpose expressed to continue the service so long as the Lord shall give token of His presence with His people, that the world may have this additional demonstration of the spirit of our religion.

The passage of a resolution of sympathy for the Cretans, by both Houses of Congress, naturally excites new interest in the struggle of that people who have shown themselves to be most heroic. With almost all their men in arms, and the women and children who remain on the island living in caves, and often subsisting on herbs, they resist the forces of Turkey, endure privations, perhaps unequaled in modern warfare, and refuse to submit, when submission means subjection and oppression and slavery. The spectacle is a grand one, and it ought to summon more than resolutions of sympathy from the Christian nations of the world. Fifty thousand men hold in check the power of the Sultan, and are unbroken in spirit, and as determined to make their land free, as when they struck the first blow for independence. So far as we may judge from the latest intelligence, they are unanimous in the purpose that liberty of conscience and of act shall be pledged to them, or they will leave their bones among the mountains in which they are entrenched. We only regret that expressions of sympathy with such a people, fighting in such a cause, have been postponed so long, and that they mean so little now that they are uttered. The united protest of the prominent Christian Governments, would probably cause the withdrawal of the Turkish troops, yet the prospect is small that this will be gained.

One of our daily papers exposes an immense swindle in land speculation, practiced upon the ignorant or credulous at the East, and desires that all other papers may make it a text from which to preach a sermon on caution and common sense, as respects the purchase of real estate, on the part of those who cannot see what they buy. The repeated success of such impositions, notwithstanding they have been so often exposed, seems to render it necessary to warn all persons, lest they be deceived by those who desire to sell the paper towns they have so finely laid out on the maps they exhibit. "Newport," the lots of which have been so extensively sold, under such representations, might be exchanged for any other name, by which any other tract of land and water might be designated, with quite as good prospects of success as favored the scheme that has been so brilliant in the eyes of the eager purchasers. Let all those who have never been in California take counsel of some one whom they can trust, before they buy city lots of the men whose fancy, or whose fraud, can so easily create what does not now exist.

Now that the two great political parties of the country have made their nominations for President and Vice President, we bespeak the exercise of a reasonable moderation, and at least a decent regard for truth, on the part of the party papers, in their statements respecting the candidates. It may be presumed that the gentlemen who are to receive the votes of the people are equal to the average of our citizens, in character, in position, in intelligence, and in patriotism. It may be presumed that neither of them will be a better, or more faithful, public officer because of any attempt to blacken his fame, or dwarf his faculties, or prove him to be the embodiment of evil. Surely, we have had Presidents enough who were represented to the world as mere monsters by those who hoped to make some political capital out of such representations. Let us now have one whom we may be permitted to regard as *human*, whatever may be his political sentiments, and let not foreign nations suppose that we are absolutely incapable of just judgment respecting a man whom we may not prefer as a ruler. We could never see any advantage in the license assumed by lawyers to malign those to whom they are opposed in a Court, and by partisan papers to villify and degrade those whose names are not on their banners. It would be refreshing to pass through one really high-toned and honorable political campaign.

The New York *Tablet*, in an article more bitter than able, defends the Church it represents from the censures of those who demand that the Sabbath have some show of regard from those who claim to be Christains. The *Tablet* justifies the Sunday procession of the German Roman Catholic Union, attended by several military companies, with bands of music, marching through nearly one-third of the city, and in several instances breaking up Sabbath Schools and worship in Protestant churches, because, forsooth, these Germans were going to church, and chose to go after this fashion. No doubt we shall have a like justification of the equally offensive pageant in Brooklyn a few weeks later, when the whole city was thrown into disturbance on Sunday, because the Irish chose to make it a gala-day, inasmuch as the corner stone of a new Cathedral was to be laid. Surely, the times are strange, if a portion of the people may set at naught the wishes and feelings of the rest, by wanton disregard of what they believe to be sacred, and have sufficient excuse in the declaration that this is their way of showing themselves to be religious!
